[A]One thousand one hundred sixty-nine (59.0%) terminees indicated they had no job during the time they were in high school taking their vocational course.

Table 32 reveals the indications of the 1973-74 Business and Office Education terminees as whether, before taking their first job, they looked for employment within daily walking or driving distance of home by how their first job related to their vocational training.

Six hundred twenty-six (81.7%) of the 1973-74 Business and Office Education terminees who were employed in their first job indicated they sought employment within daily walking or driving distance of home. One hundred forty (18.3%) terminees indicated before taking their first job, they looked for a job beyond daily walking or driving distance of home.

TABLE 32

INDICATIONS OF 1973-74 BUSINESS AND OFFICE EDUCATION TERMINEES AS TO WHERE THEY LOOKED FOR THEIR FIRST JOB BEFORE TAKING ONE BY HOW THEIR FIRST JOB RELATED TO THEIR TRAINING[A]

Before Taking First Job, Where Terminees Looked for Job	Total Reporting		Total Reporting by Relatedness of First Job to Vocational Training

TOTAL	766	100.0	203	100.0	281	100.0	282	100.0

[A]Two hundred ninety-nine terminees indicated they already had their first job while in high school. Of those 299 terminees, 112 (37.5%) were working in a directly related area, 125 (41.8%) in a somewhat related area, while 62 (20.7%) were working in a non-related area.

[B]See listing, page 70, for reasons terminees gave for seeking their first job away from home.

Of the 203 terminees who were working in a directly related area, only 40 (19.7%) sought employment beyond daily walking or driving distance of home.

It is interesting to note that of the 282 terminees whose first jobs did not relate to their training, only 50 of those terminees sought employment beyond daily walking or driving distance of home.

Two hundred ninety-nine terminees indicated they had their first job while in high school. Of those 299 terminees, 112 (37.5%) were

working in a directly related area, 125 (41.8%) in a somewhat related area, and 62 (20.7%) were working in a non-related area.

The following is a listing of reasons terminees gave for seeking a job beyond daily walking or driving distance of their home before accepting their first job.

TOTAL	270	100.0	167	100.0	103	100.0

[A]Totals in this table may not correspond with totals of terminees for non-related categories in other tables for the following reasons: (1) some terminees had jobs when leaving program and did not have to seek employment and (2) some terminees failed to respond to one or more of the related questions from which data was drawn.

[B]See page 31 for the listing of reasons terminees who were working in non-related jobs gave for not trying to secure a job that was related to their training.

Table 34 illustrates the indications of the 1973-74 Business and Office Education terminees as to where they looked for a job before taking their present job by how their present job is related to their vocational training.

Five hundred ninety-nine (81.1%) of the presently employed 1973-74 Business and Office Education terminees indicated they sought employment

within daily walking or driving distance of home. One hundred forty (18.9%) terminees indicated they sought employment beyond daily walking or driving distance of home.

Sought employment beyond daily walking or driving distance of their home	49	20.1	33	20.9	16	18.6
TOTAL	244	100.0	158	100.0	86	100.0

[A]Totals in this table may not correspond with totals of terminees for non-related categories in other tables for the following reasons: (1) some terminees had jobs when leaving programs and did not have to seek employment and (2) some terminees failed to respond to one or more of the related questions from which data was drawn.

[B]See page 44 for the listing of reasons terminees who were working in non-related jobs gave for not trying to secure a job that was related to their training.

Only 33 (13.5%) of the 244 terminees who were working in a non-related area sought related employment beyond daily walking or driving distance of home before accepting their present job.

APPENDIX

PRESENT JOB AND FIRST JOB TITLES OF THE 1973-74
BUSINESS AND OFFICE EDUCATION TERMINEES

PRESENT JOB AND FIRST JOB TITLES OF THE 1973-74 BUSINESS AND OFFICE EDUCATION TERMINEES

For those terminees who indicated present or first job occupations, this appendix lists the present job title and first job title by their high school vocational training area (OE Codes). The job titles are listed as the terminees reported them. The number of full-time jobs held by these terminees since completing their high school vocational course is listed, current employment status is listed, and whether the student intended to get a job in the area while in the program.

The following code is used to identify the employment status of the terminees:

0. Unemployed, but seeking employment
1. Employed full time
2. Employed part time, seeking full-time job
3. Employed part time, not seeking full-time job
4. Employed full time and attending school
5. Employed part time and attending school
6. Unavailable for employment

The following code is used to identify whether the student intended to get a job in the area while in the program:

1. No
2. Was not sure
3. Yes

The number in parenthesis behind the job titles indicates the relatedness of the high school vocational training to these jobs. The terminees

made the judgment as to the relatedness of their training to these jobs. The following is used to identify this relatedness.

1. Directly related
2. Somewhat related
3. Not related

The total in each occupational title area may not correspond to the total in each OE Code as listed in Table 23. Some of the terminees failed to indicate the title of their present position. If the first job title was the same as the present job title, the first job title is included under the present job title.

DESCRIPTOR: *TRADE AND INDUSTRIAL EDUCATION; *VOCATIONAL FOLLOWUP; *OCCUPATIONAL SURVEYS; *STATE SURVEYS; *SECONDARY EDUCATION; VOCATIONAL EDUCATION

IDENTIFIER: ALABAMA

EDRS PRICE: MF AND HC AVAILABILITY WILL BE ANNOUNCED IN VOL. 10, NO. 2.

DESCRIPTIVE NOTE: 242P.; RELATED DOCUMENTS VT 103 321 THROUGH VT 103 335 IN THIS ISSUE.

ABSTRACT: THIS REPORT RELATES THE FINDINGS OF A STATEWIDE FOLLOWUP SURVEY OF 1973-74 TRADE AND INDUSTRIAL OCCUPATIONS TERMINEES FROM THE SECONDARY SCHOOL VOCATIONAL PROGRAMS OF ALABAMA. QUESTIONNAIRES WERE MAILED TO 6,875 STUDENT TERMINEES APPROXIMATELY SEVEN TO EIGHT MONTHS AFTER LEAVING SCHOOL. RETURNS WERE RECEIVED FROM 1,866 (27.1 PERCENT) OF THE TRADE AND INDUSTRIAL OCCUPATIONS TERMINEES FROM THE INITIAL MAILING AND ONE FOLLOWUP. DATA ARE PRESENTED IN TABLES WITH ACCOMPANYING NARRATIVE SUMMARIES ORGANIZED ACCORDING TO THESE MAJOR SECTIONS: GENERAL INFORMATION ON THE TERMINEES; BASIC INFORMATION RELATED TO THE VOCATIONAL PROGRAMS; BASIC EMPLOYMENT INFORMATION; CONTINUING EDUCATION INFORMATION; AND JOB PLACEMENT INFORMATION. PRESENT AND FIRST JOB TITLES OF THE 1973-74 TRADE AND INDUSTRIAL OCCUPATIONS TERMINEES ARE APPENDED. (NJ)

For their help in refining the survey instrument, special thanks are due the following state supervisors:

Mrs. Divine Bauer, Health Occupations Education
Miss Evelyn Cotney, Home Economics Education
Mr. H. W. Green, Agribusiness Education
Mr. J. C. Lindley, Trade and Industrial Education
Mrs. Anacile Kurth, Distributive Education
Mrs. Sandra Yelverton, Business and Office Education

Appreciation is also extended to the following members of the Occupational Research and Development Unit for their contribution to the study:

Mrs. Bonnie J. Burks, Research Associate
Mr. Paul Davis, Research Associate
Mr. Gary Greenshields, Graduate Research Assistant
Mr. James McMath, Graduate Research Assistant
Dr. Alice S. Morgan, Assistant Professor
Miss Flossi Sergen, Secretary
Mr. Ed Williams, Duplicating Operator

FOLLOW-UP OF 1973-74 TRADE AND INDUSTRIAL OCCUPATIONS TERMINEES FROM THE SECONDARY SCHOOL VOCATIONAL PROGRAMS OF ALABAMA

Alabama continues to support one of the most progressive and comprehensive vocational education programs in the nation. In addition to serving youth and adults by training them for gainful and useful employment, the diversification of vocational courses meets a serious job need and contributes to the industrial development in the state.

With the millions of tax dollars being spent on vocational education, it is necessary to attempt to account to the taxpayer and decision-makers on the results of those expenditures. Terminee student follow-up studies constitute one of the most valuable techniques for assessing vocational education system outcomes.

The Alabama State Department of Education, Division of Vocational Education and Community Colleges, recognizing this important phase of accountability and evaluation, initiated the development of a statewide follow-up system for its vocational education program terminees at the secondary school level. The Division, under the direction of Dr. T. L. Faulkner, State Director, contracted with the Occupational Research and Development Unit at Auburn University to develop and implement the statewide follow-up system for all its secondary vocational terminees in all service areas.

This report relates the findings of the survey instrument mailed to the 1973-74 Trade and Industrial Occupations terminees from the

secondary school vocational programs of Alabama. When the terminees received the questionnaire, most had been out of school seven to eight months.

General Information

Student rosters with names and addresses of 1973-74 Trade and Industrial Occupations terminees were received from 444 secondary school vocational teachers in Alabama. Of the 444 teachers from which student rosters were received, 250 were in Secondary Area Vocational Centers (AVC) and 194 were in programs in schools of other settings. The total of 6,875 student terminees reported to the ORDU were mailed the follow-up forms. Returns were received from 1,866 (27.1%) of the Trade and Industrial Occupations terminees from the initial mailing and one follow-up. At least one student questionnaire was received from 407 of the 444 teachers.

All terminees reported in this study were in programs administered only by the Trade and Industrial Section of the Division of Vocational Education and Community Colleges, State Department of Education.

Table 1 presents data relative to the total population of Trade and Industrial Occupations terminees and the number of returns categorized by OE codes as reported by teachers.

TABLE 1

DESCRIPTION OF TOTAL POPULATION AND RETURNS BY OE CODE OF 1973-74 TRADE AND INDUSTRIAL OCCUPATIONS TERMINEES[A]

OE Code[B]	Occupational Title	Total Number of Students	Percent of Trade and Industrial Students by OE Code	Number of Returns	Percent of Returns for OE Code Area
Not Designated		20	0.3		
01.0500	Ornamental Horticulture	1	0.0	1	100.0
04.0100	Advertising Service	14	0.2	6	42.9

[A]These Trade and Industrial Occupations terminees were terminees in programs administered only under the Trade and Industrial Section of the Division of Vocational Education and Community Colleges, State Department of Education.

[B]OE Codes as reported by teachers.

Of the 1973-74 Trade and Industrial Occupations terminees reported by the teachers, the largest number in any OE code was in the occupational title area of Auto Mechanics. This 930 represented 13.5 percent of the reported Trade and Industrial Occupations terminees. There were 1,451 (21.1%) terminees listed as studying Automotive clusters. The combined enrollment of the top 11 Trade and Industrial Occupations groups was 5,384 (Automotive Service, 1,451; Construction and Maintenance, 906; Metalworking, 829; Electronics, 493; Drafting, 422; Food Preparation, 339; Air Conditioning, 260; Graphic Arts, 215; Electrical, 194; Textile Production, 173; and Custodial Services, 102). This grouping represents 78.3 percent of the total enrollment in the Trade and Industrial Occupations area.

Table 1A is a description of the total population and returns by OE Code area, type school, and termination status of the 1973-74 Trade and Industrial Occupations terminees.

[A]OE Code areas as reported by teachers

[B]Area Vocational Centers

[C]Any terminee who left the program by completing or by high school graduation

[D]Any terminee who the instructor reported as having dropped out of school

Table 2 illustrates the sex characteristics of those 1973-74 Trade and Industrial Occupations terminees reported by the instructors and those who returned survey forms.

TABLE 2

SEX OF THE 1973-74 TRADE AND INDUSTRIAL OCCUPATIONS TERMINEES REPORTED AND BY WHO RETURNED QUESTIONNAIRES

Sex[A]	Reported		Returns	
	Number	Percent	Number	Percent
Male	5761	83.8	1515	81.2
Female	903	13.1	314	16.8
Not Known	210	3.1	37	2.0
TOTAL	6875	100.0	1866	100.0

[A]Sex as reported by teacher

Table 3 presents the racial or ethnic characteristics of those 1973-74 Trade and Industrial Occupations terminees reported by instructors and who returned survey forms.

TABLE 3

RACIAL OR ETHNIC CHARACTERISTICS OF THE 1973-74 TRADE AND INDUSTRIAL OCCUPATIONS TERMINEES REPORTED AND BY WHO RETURNED QUESTIONNAIRES

Racial or Ethnic Group[A]	Reported		Returns	
	Number	Percent	Number	Percent
American Indian	6	0.1	1	0.1
Black	2128	31.0	477	25.5
Oriental	11	0.1	3	0.2
Spanish Surnamed American	2	0.0	1	0.1
White	4587	66.7	1346	72.1
Other	9	0.1	2	0.1
Not Known	132	2.0	36	1.9
TOTAL	6875	100.0	1866	100.0

[A]Racial or Ethnic Group as reported by teacher

Table 4 illustrates the number and grade level of the 1973-74 Trade and Industrial Occupations terminees reported who dropped out of school during the academic year and by who returned the questionnaire.

TABLE 4

NUMBER OF THE 1973-74 TRADE AND INDUSTRIAL OCCUPATIONS TERMINEES REPORTED WHO DROPPED OUT OF SCHOOL DURING THE 1973-74 SCHOOL YEAR BY GRADE LEVEL

Grade Level Upon Dropping Out of School	Reported		Returns	
	Number	Percent[A]	Number	Percent[B]
Below Ninth	11	0.2	1	9.1
Ninth	96	1.4	10	10.4
Tenth	502	7.3	67	13.3
Eleventh	638	9.3	72	11.3
Twelfth	394	5.7	59	15.0
Grade Level Not Indicated by Teacher	204	3.0	29	14.2
TOTAL	1845	26.8	238	12.9

[A]Percentage is based on 6,875 total reported terminees.

[B]Percentage is based on returns by grade.

Table 5 shows the number of 1973-74 Trade and Industrial Occupations terminees who indicated whether they were in active full-time military service.

TABLE 5

ACTIVE FULL-TIME MILITARY STATUS OF 1973-74 TRADE AND INDUSTRIAL OCCUPATIONS TERMINEES WHO RETURNED QUESTIONNAIRES

Active Full-Time Military Status	Number	Percent
Yes	98	5.3
No	1684	90.2
No Response	84	4.5
TOTAL	1866	100.0

Basic Information Related to the Vocational Education Program

Table 6 points out the number of 1973-74 Trade and Industrial Occupations terminees who indicated whether this vocational program was a school requirement.

TABLE 6

1973-74 TRADE AND INDUSTRIAL OCCUPATIONS TERMINEES WHO INDICATED WHETHER THEIR VOCATIONAL PROGRAM WAS A SCHOOL REQUIREMENT

Vocational Courses Was A School Requirement	Number	Percent
Yes	96	5.1
No	1754	94.0
No Response	16	0.9
TOTAL	1866	100.0

Table 7 indicates, according to the 1973-74 Trade and Industrial Occupations terminees, the primary source of influence in selecting their vocational course.

TABLE 7

PRIMARY INFLUENCES ON THE 1973-74 TRADE AND INDUSTRIAL OCCUPATIONS TERMINEES IN SELECTING THEIR VOCATIONAL COURSE

Group or Individual Terminees Felt Influenced Them Most in Selecting Vocational Course	Number	Percent
Parent(s) or Guardian(s)	106	5.7
Guidance Counselor	69	3.7
Your Vocational Teacher	133	7.1
Another Teacher or Principal	29	1.5
Student in VED Program	146	7.8
A Friend or Relative	115	6.2
A Businessman	22	1.2
Made Choice Yourself	1220	65.4
Other[A]	18	1.0
No Response	8	0.4
TOTAL	1866	100.0

[A]See page 43 for listing of "Others" who influenced Trade and Industrial terminees in selecting their VED course.

Students in VED Programs appeared to be the greatest outside influence on those terminees enrolling in the Trade and Industrial Occupations program. One hundred forty-six (7.8%) of the terminees responding indicated that students in VED Programs influenced them most in selecting their Trade and Industrial Occupations course. However, 1,220 (65.4%) indicated that they selected their course of study on their own. Sixty-nine terminees (3.7%) indicated that a guidance counselor influenced them most in selecting their program. One hundred thirty-three (7.1%) of the terminees indicated that their vocational teacher influenced them most in selecting their course in Trade and Industrial Occupations.

Below are the responses given to the "Others" category indicated in Table 7 as to the primary source of influence in selecting their vocational course.

"Other" Persons or Groups Who Most Influenced Terminees in Selecting Their VED Course	Number
Required by school	1
To complete class schedule	1
Catholic priest	1
Couldn't get into first choice because it was full	1
The course itself	1
Needed credits	1
Available jobs in field	1
A new program	1
Already in cutting meat	1
Had to take second choice	1
To have more time on job	1
My husband	1
Previous jobs in course	1
Army vocational test	1
Pay scale	1
Interest in jobs available	1
Employer	1
Wanted work in this field	1

Table 8 indicates terminees' opinions as to whether they had adequate job or occupational information and school experiences to make a realistic career choice.

TABLE 8

OPINIONS OF 1973-74 TRADE AND INDUSTRIAL OCCUPATIONS TERMINEES AS TO WHETHER THEY HAD ADEQUATE JOB OR OCCUPATIONAL INFORMATION AND SCHOOL EXPERIENCES TO MAKE A REALISTIC CAREER CHOICE

	Number	Percent
Yes	1439	77.1
No	403	21.6
No Response	24	1.3
TOTAL	1866	100.0

Table 9 indicates whether, during the time they were taking their high school vocational program, the reporting 1973-74 terminees intended to get a job in Trade and Industrial Occupations.

TABLE 9

INDICATIONS OF 1973-74 TRADE AND INDUSTRIAL OCCUPATIONS TERMINEES AS TO WHETHER, DURING THE TIME THEY WERE TAKING THEIR HIGH SCHOOL VED PROGRAM, THEY PLANNED TO GET A JOB IN THEIR AREA OF STUDY

Intended To Get Job in Area of Study	Number	Percent
Yes	1043	55.9
No	218	11.7
Was Not Sure	590	31.6
No Response	15	0.8
TOTAL	1866	100.0

It is interesting to note that only 1,043 (55.9%) of the 1973-74 reporting Trade and Industrial Occupations terminees indicated that

during the time they were taking their Trade and Industrial Occupations program, they intended to get a job in the area they were studying.

Table 10 indicates terminees's opinions on choosing the Trade and Industrial Occupations program if they had the selection to make again.

A noteworthy point was revealed by the data. Of the 1973-74 Trade and Industrial Occupations terminees, 1,430 (76.6%) indicated that they would select the same vocational program if they had the choice to make again. Ninety-eight (5.3%) of the responding terminees indicated that they would not take a vocational program.

TABLE 10

OPINIONS OF 1973-74 TRADE AND INDUSTRIAL OCCUPATIONS TERMINEES REGARDING THEIR VOCATIONAL PROGRAM

Question: If You Had It To Do Over Again, Would You...?	Number	Percent
Take the same vocational program	1430	76.6
Not take a vocational program	98	5.3
Choose another vocational program offered in your school, such as _____ [A]	213	11.4
Choose another vocational program if it had been offered in your school, such as _____ [B]	75	4.0
No Response	50	2.7
TOTAL	1866	100.0

[A]See listing IA, page 46, for those other vocational programs offered in terminees' school that they would have taken instead of their Trade and Industrial programs.

[B]See listing IB, page 47, for the vocational programs the terminees would have taken instead of their Trade and Industrial program if it had been offered in their school.

Table 11 indicates the extent to which the reporting 1973-74 Trade and Industrial Occupations terminees felt their high school vocational programs prepared them for their first job. This data was also broken down by how that first job related to their vocational program.

Terminees who were in full-time active military service or who had never been employed were not asked to respond to the questions from which this data was reported. Also, the terminees who failed to respond to the question items were not indicated in the table.

TABLE 11

PERCEPTIONS OF 1973-74 TRADE AND INDUSTRIAL OCCUPATIONS TERMINEES AS TO THE EXTENT THEIR HIGH SCHOOL VOCATIONAL PROGRAM PREPARED THEM FOR THEIR FIRST FULL-TIME JOB BY HOW FIRST FULL-TIME JOB RELATED TO TRAINING

Extent Vocational Course Prepared for First Full-Time Job	Total Reporting		Number Reporting by Relatedness of First Full-Time Job to Training Received					
			Directly Related		Somewhat Related		Not Related	
	No.	%	No.	%	No.	%	No.	%
Excellent	164	15.0	105	29.8	20	8.5	39	7.7

Preparation not related to job	385	35.1	4	1.1	26	11.0	355	69.8
TOTAL	1096	100.0	352	100.0	235	100.0	509	100.0

In noting the extent to which the 1973-74 Trade and Industrial Occupations terminees felt their high school vocational course prepared them

for their first full-time job by how their first full-time job related to the training they received in their high school Trade and Industrial program, some interesting points were revealed. Five hundred twelve (46.8%) of the 1973-74 Trade and Industrial Occupations terminees responding to this item indicated "Excellent" or "Well Prepared" for their first full-time job as a result of the training received in their high school vocational education program. Two hundred eighty-seven (81.5%) of the 352 terminees employed in their first full-time job related directly to their training felt they were excellent or well prepared for this first job. Only eight terminees who were working in an area directly related to their vocational training felt they were poorly prepared for their first job. There were four additional terminees who indicated they were working in an area directly related to their vocational course and felt their preparation was not related to their jobs. Of all the responding terminees, 34 (3.1%) felt that they were poorly prepared for their first full-time job. Of these, eight were working in an area directly related to their vocational course.

Table 12 indicates the extent to which the reporting 1973-74 Trade and Industrial Occupations terminees felt their high school vocational course prepared them for their present job. Also shown in the table is a breakdown of the data by how their present job was related to their vocational program.

Terminees in active full-time military service, and students who were attending school full time and had not had a job, were not asked to respond to the question from which Table 12 was prepared. Also, those other students who failed to respond to the items were not shown on the table.

Of the 1,175 terminees responding to these items, 542 (46.1%) indicated "Excellent" or "Well Prepared" for their present job as a result

of their high school vocational program. Thirty-three terminees reported feeling poorly prepared for their present job as a result of their training.

TABLE 12

PERCEPTIONS OF 1973-74 TRADE AND INDUSTRIAL OCCUPATIONS TERMINEES AS TO THE EXTENT THEIR HIGH SCHOOL VOCATIONAL COURSE PREPARED THEM FOR THEIR PRESENT JOB BY HOW THEIR PRESENT JOB RELATED TO TRAINING

Extent Vocational Course Prepared for Present Job	Total Reporting		Number Reporting by Relatedness of Present Job to Training Received					
			Directly Related		Somewhat Related		Not Related	
	No.	%	No.	%	No.	%	No.	%

Fair[A]	149	12.7	53	15.0	66	23.7	30	5.5
Poorly Prepared	33	2.8	12	3.4	8	2.9	13	2.4
Preparation not related to job	451	38.4	10	2.8	39	14.0	402	73.9
TOTAL	1175	100.0	353	100.0	278	100.0	544	100.0

[A]See listing, page 51, for reasons terminees specified for only being trained "Fair" by their vocational course for their present job.

[B]See listing, page 51, for reasons terminees specified for only being "Poorly Prepared" by their vocational course for their present job.

Two hundred seventy-eight (78.8%) of the 353 responding terminees working in an area directly related to their high school vocational program indicated that they felt excellent or well prepared by their training.

The following lists the reasons the 1973-74 Trade and Industrial Occupations terminees indicated for being trained only "Fair" by their vocational course for their present job.

Reasons	Number
Training different from that needed in job	38
Not enough time to train	19
Need for better training	14
Need for equipment and machines	8
Not enough supplies and material in classes	5
The class work was only general	5
The class work was not advanced enough	5
Books not up to date	3
Experience required for most jobs	3
Lack of interest in course (student)	3
Instructor didn't have any interest in course	3
Instructor was not prepared to teach	2
Program was short of books	2
Instructor didn't know policies of job	1
No facilities	1
Enrolled too late	1
Programs used only study guides	1
Program was contradictory	1
Needed training on different types of tools and machines	1
I need a refresher course	1

The terminees who indicated they were "Poorly Prepared" for their present job by their vocational program gave reasons why they felt that way.

Reasons	Number
Teaching not related to job	9
Lack of teaching	2
Materials outdated	2
No instruction at school	1
Only had books--no supplies or equipment	1
Study guide outdated	1
Text outdated	1
Books generalized	1
No books	1
Everything wasn't covered	1
Poor training	1
Lack of teacher interest if we learned or not	1
Untrained teacher	1
Wrong field for me	1

Table 13 focuses on the Trade and Industrial Occupations student club. The researchers sought to determine the extent to which the

1973-74 Trade and Industrial Occupations terminees felt that their high school student club aided in preparing them for their present job. Data are also broken down by the relationship of the present job to the vocational training received.

TABLE 13

PERCEPTIONS OF 1973-74 TRADE AND INDUSTRIAL OCCUPATIONS TERMINEES AS TO THE EXTENT THEIR HIGH SCHOOL VOCATIONAL STUDENT CLUB PREPARED THEM FOR THEIR PRESENT JOB BY HOW THEIR PRESENT JOB RELATED TO TRAINING[A]

Extent High School Vocational Student Club Helped Prepare for Present Job	Total Reporting		Total Reporting by Relatedness of Present Job to Vocational Training					
			Directly Related		Somewhat Related		Not Related	
	No.	%	No.	%	No.	%	No.	%
Excellent	112	15.8	48	19.6	29	15.3	35	12.8
Well Prepared	231	32.6	101	41.2	65	34.2	65	23.8
Fair	251	35.5	68	27.8	71	37.4	112	41.0
Poorly Prepared	114	16.1	28	11.4	25	13.1	61	22.4
TOTAL	708	100.0	245	100.0	190	100.0	273	100.0

[A]Of the 1,338 who responded, 108 (8.1%) had no related student club available, and 437 (32.7%) were not members of a related student club.

Only respondents who had had a job since terminating their high school vocational Trade and Industrial program were asked to respond to the question reported in Table 13. Students in active full-time military service were excluded. One hundred eight (8.1%) of the 1,338 terminees reported no related student club was available, while 437 (32.7%) were not members of a related student club.

Three hundred forty-three (48.4%) of the 708 terminees who participated in student club activities indicated they were "Excellent" or "Well Prepared" by their related student club for their present job. One hundred fourteen (16.1%) indicated they were "Poorly Prepared" by their related student club for their present job. Of those 114, 53 (46.5%) were in related or somewhat related jobs, while 61 (53.5%) were in non-related jobs.

Of those terminees who were working in an area directly related to the training they received in their high school vocational program, 149 (60.8%) revealed that they were "Excellent" or "Well Prepared" for their present job by their related student club. Twenty-eight (11.4%) of the 245 terminees who were working in a job directly related to the training they received indicated they were "Poorly Prepared" for their present job by their related student club.

Table 14 reports how the 1973-74 Trade and Industrial Occupations terminees rated the quality of teaching by their high school vocational instructors.

TABLE 14

1973-74 TRADE AND INDUSTRIAL OCCUPATIONS TERMINEES' RATINGS OF THE QUALITY OF TEACHING BY THEIR HIGH SCHOOL VOCATIONAL INSTRUCTORS

Rating	Number	Percent
Excellent	898	48.1
Good	654	35.0
Fair	225	12.1
Poor	43	2.3
Very Poor	37	2.0
No Response	9	0.5
TOTAL	1866	100.0

One thousand five hundred fifty-two (83.1%) of the 1,866 reporting 1973-74 Trade and Industrial Occupations terminees rated the quality of teaching by their vocational instructor either "Good" or "Excellent." Eighty (4.3%) rated the quality of teaching by their instructors "Poor" or "Very Poor."

Table 15 illustrates how the 1973-74 Trade and Industrial Occupations terminees rated their high school vocational instructor's interest in their class work.

TABLE 15

1973-74 TRADE AND INDUSTRIAL OCCUPATIONS TERMINEES' RATINGS OF THEIR HIGH SCHOOL VOCATIONAL INSTRUCTOR'S INTEREST IN THE STUDENT'S CLASS WORK

Rating	Number	Percent
Excellent	891	47.7
Good	666	35.7
Fair	203	10.9
Poor	50	2.7
Very Poor	48	2.6
No Response	8	0.4
TOTAL	1866	100.0

One thousand five hundred fifty-seven (83.4%) of the 1,866 reporting 1973-74 Trade and Industrial Occupations terminees rated the interest exhibited by their high school vocational instructor in their class work as "Good" or "Excellent." Ninety-eight (5.3%) of the terminees rated the interest their vocational instructors showed in their class work as "Poor" or "Very Poor."

Table 16 points out how the 1973-74 Trade and Industrial Occupations terminees subjectively rated the knowledge their vocational teachers

possessed about their field of study. This rating is also shown in the table by a breakdown of how the terminees' present job related to the training they received in their high school vocational program. Terminees were asked to base their judgments on their current knowledge of their job and responsibilities.

TABLE 16

1973-74 TRADE AND INDUSTRIAL OCCUPATIONS TERMINEES' RATINGS OF THE KNOWLEDGE THEIR HIGH SCHOOL VOCATIONAL TEACHER POSSESSED ABOUT THEIR FIELD OF STUDY BY HOW THE TERMINEES' PRESENT JOB RELATED TO THE TRAINING THEY RECEIVED

Ratings[A]	Total Reporting		Number Reporting by Relatedness of Present Job to Training Received					
			Directly Related		Somewhat Related		Not Related	
	No.	%	No.	%	No.	%	No.	%
Excellent	460	38.4	142	40.2	93	33.1	225	40.0
Good	478	40.0	130	36.8	131	46.6	217	38.5
Fair	188	15.7	59	16.7	40	14.2	89	15.8
Poor	48	4.0	16	4.6	12	4.3	20	3.6
Very Poor	23	1.9	6	1.7	5	1.8	12	2.1
TOTAL	1197	100.0	353	100.0	281	100.0	563	100.0

[A]Ratings were to be based on terminee's judgment of their current knowledge of their job and responsibilities.

Total responses to this item indicate that 938 (78.4%) of the 1,197 responding 1973-74 Trade and Industrial Occupations terminees rated the knowledge their vocational teachers possessed about their field of study either "Good" or "Excellent." For those 353 terminees working in an area

directly related to the training they received, 272 (77.0%) rated the knowledge their teachers possessed about their field of study as "Good" or "Excellent." Thirty nine (12.4%) of those who considered their job related or somewhat related rated the knowledge their vocational teachers possessed about their field of study as "Poor" or "Very Poor."

If the respondent was working in an area related to his training, he was asked to compare the facilities and equipment in his high school vocational program with those on his present job. Table 17 illustrates how the 1973-74 Trade and Industrial Occupations terminees responded.

TABLE 17

HOW 1973-74 TRADE AND INDUSTRIAL OCCUPATIONS TERMINEES WORKING IN A RELATED AREA RATED THE FACILITIES AND EQUIPMENT IN THEIR HIGH SCHOOL VOCATIONAL PROGRAM[A]

Rating[B]	Number	Percent
Better than those on present job	125	22.8
Similar to those on present job	245	44.6
Not as good as those on present job	179	32.6
TOTAL	549	100.0

[A]Seven hundred fifty-one (57.8%) of the responding 1,300 terminees indicated that their present job was not related to their vocational training enough to compare facilities and equipment.

[B]Persons who had not had a job since leaving their vocational program, including those in military service and those who attended school, were asked not to respond to questions from which data was drawn. Returns were received from 1,866 terminees.

One hundred twenty-five (22.8%) of the 549 responding 1973-74 Trade and Industrial Occupations terminees working in an area related to their training rated the facilities and equipment in their high school vocational program as better than those on his present job. Two hundred forty-five

(44.6%) rated the facilities and equipment in their high school vocational program as similar to those on their present job; however 179 (32.6%) rated the facilities and equipment not as good as those on their present job.

Table 18 shows how 1973-74 Trade and Industrial Occupations terminees, who were in a cooperative work program in school and were now working in an area related to their vocational training, rated the facilities and equipment used in their cooperative work station.

TABLE 18

HOW 1973-74 TRADE AND INDUSTRIAL OCCUPATIONS TERMINEES NOW WORKING IN A RELATED AREA, WHOSE VOCATIONAL PROGRAM INCLUDED COOPERATIVE WORK, RATED FACILITIES AND EQUIPMENT USED IN THEIR COOPERATIVE WORK STATION[A]

Rating[B]	Number	Percent
Better than those on present job	87	18.9
Similar to those on present job	171	37.2
Working at same place where cooperative training was done	119	25.9
Not as good as those on present job	83	18.0
TOTAL	460	100.0

[A]One hundred ninety-two (10.3%) of the responding 1,866 Trade and Industrial Occupations terminees indicated their vocational program was not a cooperative program. Five hundred seventy-four (30.8%) terminees indicated they were not working in an area related to their cooperative work; therefore, they did not complete this item on the questionnaire.

[B]Persons who had not had a job since leaving their vocational program, including those in military service and those attending school, were asked not to respond to questions from which data was drawn. Returns were received from 1,866 terminees.

Eighty-seven (18.9%) of the 460 responding 1973-74 Trade and Industrial Occupations terminees whose vocational programs had included cooperative work and were now working in an area related to their vocational

training, rated the facilities and equipment in their cooperative work station as better than those on their present job. One hundred seventy-one (37.2%) rated the facilities and equipment in their cooperative training station as similar to those on their present job. Eighty-three (18.0%) rated the facilities and equipment in their cooperative work station not as good as those in their present job. It was significant to note that 119 (25.9%) indicated they were working at the same establishment where they did their cooperative training.

Basic Employment Information

The following section of this report offers information relative to employment and job characteristics of the 1973-74 secondary Trade and Industrial Occupations terminees.

Table 19 illustrates the number of full-time jobs the responding 1973-74 Trade and Industrial Occupations terminees have had since leaving their high school vocational course.

TABLE 19

NUMBER OF FULL-TIME JOBS HELD BY THE 1973-74 TRADE AND INDUSTRIAL OCCUPATIONS TERMINEES SINCE LEAVING THEIR HIGH SCHOOL VOCATIONAL COURSE

Number of Full-Time Jobs Held	Number	Percent[A]
One	861	46.1
Two	316	16.9
Three	89	4.8
Four	13	0.7
Five or more	7	0.4
TOTAL	1286	68.9

[A]Percentage is based on the 1,866 terminees who returned the questionnaire.

There were 861 (46.1%) of the total 1,866 responding 1973-74 Trade and Industrial Occupations terminees who had been employed in just one job since leaving their high school vocational program. Three hundred sixteen (16.9%) of the terminees reported having two jobs since leaving their high school vocational course seven to eight months ago, and 109 (5.9%) reported three or more jobs since leaving their vocational course.

Table 20 reveals the first-job employment status of Trade and Industrial Occupations terminees who returned the survey by the relatedness of their vocational training to their first job.

TABLE 20

FIRST-JOB EMPLOYMENT STATUS OF TRADE AND INDUSTRIAL OCCUPATIONS TERMINEES (1973-74) BY RELATEDNESS OF VOCATIONAL TRAINING TO FIRST JOB[A]

First Job After Leaving High School Vocational Program	Total Reporting		Relatedness of Vocational Training to First Job[B]					
			Directly Related		Somewhat Related		Not Related[C]	
	No.	%	No.	%	No.	%	No.	%
Full-Time	1107	59.3	353	18.9	235	12.6	519	27.8
Part-Time	188	10.1	47	2.5	42	2.3	99	5.3
TOTAL	1295	69.4	400	21.4	277	14.8	618	33.1

[A]All percentages were based on the 1,866 (27.1%) of 6,875 terminees who returned the survey form.

[B]The terminees made the judgment as to how their first job was related to the training received in their high school vocational program.

[C]See page 60 for reasons terminees who were working in first job unrelated to this vocational training gave for not seeking job that was related before accepting their first job.

Of the 1,866 responding 1973-74 Trade and Industrial Occupations terminees, 1,107 (59.3%) were employed full time in their first job

after leaving their high school vocational program. One hundred eighty-eight terminees' first jobs were on a part-time basis.

Four hundred (21.4%) of the 1,866 responding terminees' first jobs (full-time or part-time) were in an area directly related to the training they received in their high school vocational course. Two hundred seventy-seven (14.8%) were employed in an area somewhat related while 618 (33.1%) were employed in a first job not related to the training they received. The terminees made the judgment as to how their first job was related to the training they received in their high school vocational program.

Of the 618 terminees who indicated their jobs were not related to their vocational course, 308 (49.8%) terminees indicated that before they accepted their unrelated job, they tried to get a job that was related to their vocational training. However, 310 (50.2%) of the terminees did not.

The following is a list of reasons given by 159 of the 310 terminees who, before taking their first unrelated job indicated they did not seek a job that was related to their vocational training.

Reasons	Number
Not interested in work in that vocational area	40
Not enough training and experience for a job	28
Only interested in a job--any job	19
Nothing available in area	19
Already had a job	14
Pay not high enough	9
Didn't know where to look for a job	4
Joined armed services	4
Too young for type of work	3
Planned to go to college	3
Planned to continue training	2
Still in school	2
Heard about layoffs in this field	1
No need	1
Didn't think I would get hired	1
Not sure	1

(continued)

Reasons	Number
Didn't have the time	1
Tired of being dirty	1
Took course as a hobby	1
Disabled	1
No one was for you	1
Personal reasons	1
I joined a union	1
Instructor turned me totally against that type of job	1

Table 21 shows by OE Code for the first job of the 1973-74 Trade and Industrial Occupations terminees the relatedness of their training to this first job.

TABLE 21

1973-74 TRADE AND INDUSTRIAL OCCUPATIONS TERMINEES' FIRST JOB BY OE CODE STUDIED AND RELATEDNESS OF TRAINING[A]

[A]Of 6,875 Trade and Industrial Occupations terminees, 1,866 (27.1%) returned the questionnaire.

[B]The terminees made the judgment as to how their first job was related to the training received in their high school vocational program.

Of the 1,339 responding 1973-74 Trade and Industrial Occupations terminees who indicated how their first job related to the training they received in their high school vocational program, 411 (30.7%) were employed in directly related areas. Two hundred eighty-three (21.1%) were employed in

somewhat related areas while 645 (48.2%) terminees were employed in areas not related to their training. The terminees made the judgment as to how their first job was related to the training received in their high school vocational program.

More responding terminees who studied in Auto Mechanics (OE Code 17.0302) indicated first job employment. This was to be expected since more terminees studied in this occupational objective area (See Table 1). Of the 171 employed 1973-74 terminees who studied in the occupational area of Auto Mechanics and indicated relatedness of training, 43 (25.2%) were employed in an area directly related to that training. Forty-four (25.7%) were employed in their first job in an area somewhat related to their training. However, 84 (49.1%) of these responding terminees indicated that their first job was not related to the training they received in their Auto Mechanics program.

Table 21A is a description of 1973-74 Trade and Industrial Occupations terminees' first job by OE code area studied, number of returns, type school, termination status, and relatedness of training.

[A]OE Code areas as reported by teachers

[B]Area Vocational Centers

[C]Any terminee who left the program by completing or by high school graduation

[D]Any terminee who the instructor reported as having dropped out of school

[E]The terminees made the judgment as to how their first job was related to the training received in their high school vocational program

Table 22 illustrates the current employment status of the responding terminees by the relatedness of their vocational training to their present

jobs. All percentages figured in the table were based on the 1,866 (27.1%) returns from the 6,875 Trade and Industrial Occupations terminees.

Of the 1,866 responding 1973-74 secondary Trade and Industrial Occupations terminees, 941 (50.4%) were presently employed full time and not attending school or employed full time and attending school. One hundred forty-three (7.7%) of the terminees were employed part time and attending school, while 106 (5.7%) were unavailable for employment (See page 104 for reasons terminees were unavailable for employment). Two hundred sixty-five (14.2%) of the terminees were unemployed and actively seeking employment, while 52 (2.8%) were employed part time and seeking full-time employment.

The "No Response" category in Table 22 includes three groups: (1) terminees in active full-time military service; (2) terminees who were in school full time and had never had a job; and (3) terminees who failed to respond to the item on the questionnarie.

Of the 1,866 secondary Trade and Industrial Occupations respondees, 338 (18.1%) were presently employed full time or part time in an area directly related to the training received in their high school vocational course. Two hundred sixty-two (14.0%) were employed either part time or full time in an area somewhat related to their training, while 512 (27.4%) were employed in areas not related to training. The terminees made the judgment as to how their present employment was related to the training received in their high school vocational course.

TABLE 22

CURRENT EMPLOYMENT STATUS OF TRADE AND INDUSTRIAL OCCUPATIONS TERMINEES (1973-74) BY RELATEDNESS OF TRAINING TO PRESENT JOB[A]

Employment Status	Total Responding		Relatedness of Training to Present Job[B]							
			Directly Related		Somewhat Related		Not Related[E]		Employed No Response	
	No.	%	No.	%	No.	%	No.	%	No.	%
Employed full time and not attending school	809	43.3	232	12.4	189	10.1	364	19.5	17	0.9

Employed part time and seeking full-time job	52	2.8	13	0.7	9	0.5	29	1.6	0	0.0
Employed part time and not seeking full-time job	23	1.2	7	0.4	6	0.3	6	0.3	4	0.2
Employed part time and attending school	143	7.7	44	2.4	24	1.[illegible]	61	3.3	9	0.5
Unemployed (actively seeking a job)[C]	265	14.2	N/A		N/A		N/A		N/A	
Unavailable for employment[C&D]	106	5.7	N/A		N/A		N/A		N/A	
No Response	336	18.0	N/A		N/A		N/A		N/A	
TOTAL	1866	100.0	338	18.1	262	14.0	512	27.4	33	1.8

[A]All percentages were based on the 1,866 (27.1%) respondents of the total 6,875 terminees. Terminees in active full-time military service or attending school full-time and had never been employed were included in the "No Response" category.

[B]The terminees made the judgment as to how their present job was related to the training received in their high school vocational program.

[C]The unemployed and unavailable for employment categories do not include persons in the military service and persons who were in school full time and never had a job.

[D]See page 104 for the listing of reasons Trade and Industrial Occupations terminees gave for being unavailable for employment.

[E]See page 1[illegible] for reasons terminees who were working in present job not related to vocational training gave for not seeking related job before accepting present job. Totals for unrelated columns may not correspond because terminees failed to respond to one of the two questions from which data was drawn.

Below is a list of the reasons given by the terminees for being unavailable for employment.

Reason	Number
In school full time	90
Presently not working, not interested in a job	7
Homemaker	6
Pregnancy	4
Illness or disability	9
Other	19

Of the 576 terminees who indicated their present jobs were not related to their vocational course, 297 (51.6%) terminees indicated that before they accepted their unrelated job, they tried to get a job that was related to their vocational training. However, 279 (48.4%) of the terminees did not.

The following is a list of reasons given by 247 of the terminees who, before taking their present unrelated job, indicated they did not seek a job that was related to their vocational training.

Reason	Number
Interested in a different vocation	43
Need for more training	30
Lost interest	23
Pay not enough	19
Could not find one	18
Nothing available	16
Already had a job	14
Took first available job	11
Wasn't taught	5
Going to college	5
Was in school	5
Not working	5
Don't know	4
Need for experience	4
My teacher didn't help me	3
I have my vocational course for personal use	3
I did not feel I was qualified	3
Joined armed services	3
Better job	3

(continued)

Reason	Number
Dislike it	2
Wanted to change	2
Health disability	3
Work at same place with father	2
Working for father; he needed me	1
Had no time to look	1
Because I got in a union	1
Impatient	1
No transportation	1
Didn't know where to look	1
Had money	1
Couldn't get one close to home; people would talk	1
No future	1
It was labor	1
Not demanding	1
Tired of being dirty	1
Because of poor weather	1
It was a good job	1
Didn't have proper books in school for my job	1
Left school	1
Too small	1
I could not afford further study	1
Working with the school	1

Table 23 shows for the present job, by OE code, the number of 1973-74 secondary Trade and Industrial Occupations terminees employed by the relatedness of their vocational training to their present job.

Of the 1,211 secondary Trade and Industrial Occupations terminees who indicated present employment, 160 (17.2%) who studied in the area of Auto Mechanics, OE Code 17.0302, were employed. This represented the largest number of employed terminees that studied in any OE Code area.

Of the 160 terminees presently employed that studied Auto Mechanics, 39 (24.4%) were employed in an area directly related to the training received in their high school vocational program. Seventy-eight (48.8%) terminees who studied in Auto Mechanics indicated their present job was not related to their high school vocational training. The terminees made the judgment as to how their present job related to the training received in their high school vocational program.

[A]All percentages were based on the 1,866 (27.1%) of the 6,875 terminees who returned the questionnaire.

[B]Terminees made the judgment as to how their first job was related to training received in their high school vocational program.

Table 23A is a description of 1973-74 Trade and Industrial Occupations terminees' present job by OE code area studied, number of returns, type school, termination status, and relatedness of training.

[A]OE Code areas as reported by teachers

[B]Area Vocational Centers

[C]Any terminee who left the program by completing or by high school graduation

[D]Any terminee who the instructor reported as having dropped out of school

[E]The terminees made the judgment as to how their first job was related to the training received in their high school vocational program

Table 24 indicates the first job salary ranges as compared to the present job salary ranges for the 1973-74 Trade and Industrial Occupations terminees.

TABLE 24

FIRST-JOB SALARY RANGES AND PRESENT-JOB SALARY RANGES FOR 1973-74 TRADE AND INDUSTRIAL OCCUPATIONS TERMINEES

Salary Ranges	First Job		Present Job	
	No.	%	No.	%
Under $250	478	37.5	224	21.4
$250 - $299	190	14.9	106	10.1
$300 - $349	201	15.8	142	13.5
$350 - $399	128	10.0	132	12.6
$400 - $449	118	9.2	158	15.1
$450 - $499	60	4.7	86	8.2
$500 - $599	54	4.2	107	10.2
$600 - $699	25	2.0	49	4.7
$700 or more	22	1.7	44	4.2
TOTAL	1276	100.0	1048	100.0

Of the 1,276 terminees reporting a salary range for their first job, 478 (37.5%) indicated a range of under $250 per month. Forty-seven (3.7%) of the terminees reported a first salary of over $600 per month. The median salary range for the first job fell in the range of $250 - $299 per month. The mean salary range for the first job fell in the range of $300 - $349 per month.

Of the 1,048 1973-74 Trade and Industrial Occupations terminees reporting a salary range for their present job, 224 (21.4%) indicated under $250 per month. This salary range was indicative of the mode of the reporting students. The median and mean salary ranges for the present job fell within the range of $350 - $399 per month. The median and

and mean salary ranges of present jobs over first jobs indicate an increase for the reporting Trade and Industrial Occupations terminees.

Table 24A indicates the first-job salary ranges by relatedness of training and sex of the Trade and Industrial Occupations terminees.

TABLE 24A

$600 - $699	24	0	8	0	3	0	13	0
$700 or more	22	0	6	0	6	0	10	0
TOTAL[A]	1024	164	299	72	209	36	516	56

[A]Totals do not match those of Table 24 because some terminees did not respond to all questions.

[B]The terminees made the judgment as to how their first job was related to the training received in their high school vocational program.

Four hundred forty-seven (37.6%) of the 1,188 responding terminees were employed at less than $250 per month. Of these 447 terminees, 95 (21.3%) males and 44 (9.8%) females were employed in a job directly related to their training, 70 (15.7%) males and 22 (4.9%) females were employed in jobs somewhat related to their training, while 183 (40.9%) males and 33 (7.4%) females were employed in jobs not related to their training.

Of the 1,188 responding terminees, 1,024 (86.2%) were males and 164 (13.8%) were females. Two hundred ninety-nine (25.2%) males and 72 (6.1%) females were employed in jobs directly related to their vocational training, 209 (17.6%) males and 36 (3.0%) females were employed in jobs somewhat related to their training, while 516 (43.4%) males and 56 (4.7%) females were employed in jobs not related to their training.

Table 24B indicates the present-job salary ranges by relatedness of training and sex of the Trade and Industrial Occupations terminees.

TABLE 24B

PRESENT-JOB SALARY RANGES BY RELATEDNESS OF TRAINING OF 1973-74 TRADE AND INDUSTRIAL OCCUPATIONS TERMINEES BY SEX

Salary Ranges	Sex of Terminees Responding		Relatedness of Training to Present Job[B]					
			Directly Related		Somewhat Related		Not Related	
	Male	Female	Male	Female	Male	Female	Male	Female
Under $250	151	60	33	33	34	12	84	15
$250 - $299	83	20	20	8	25	5	38	7
$300 - $349	112	23	27	9	31	9	54	5
$350 - $399	109	15	25	8	24	5	60	2
$400 - $449	137	12	44	4	22	4	71	4
$450 - $499	74	6	27	4	15	2	32	0
$500 - $599	92	7	33	2	18	3	41	2
$600 - $699	49	0	15	0	15	0	19	0
$700 or more	40	2	13	0	8	1	19	1
TOTAL[A]	847	145	237	68	192	41	418	36

[A]Totals do not match those of Table 24 because some terminees did not respond to all questions.

[B]The terminees made the judgment as to how their present job was related to the training received in their high school vocational program.

Two hundred eleven (21.3%) of the 992 responding terminees were employed at less than $250 per month. Of these 211 terminees, 33 (15.6%)

males and 33 (15.6%) females were employed in a job directly related to their training, 34 (16.1%) males and 12 (5.7%) females were employed in jobs somewhat related to their trianing, while 84 (29.8%) males and 15 (7.1%) females were employed in jobs not related to their training.

Of the 992 responding terminees, 847 (85.4%) were males and 145 (14.6%) were females. Two hundred thirty-seven (23.9%) males and 68 (6.9%) females were employed in jobs directly related to their vocational training, 192 (19.4%) males and 41 (4.1%) females were employed in jobs somewhat related to their training, while 418 (42.1%) males and 36 (3.6%) females were employed in jobs not related to their training.

Continuing Education Information

The following section of this report presents information relative to the continuing education of the 1973-74 secondary Trade and Industrial Occupations terminees.

Table 25 shows the vocational educational training opportunities terminees have participated in since leaving their high school vocational program.

Of the total terminees, the 157 (8.4%) who were enrolled in Junior Colleges represented next to the largest area where terminees had taken additional vocational training: On-the-job training with 333 (17.8%) was the largest area.

Of the 1,866 responding terminees, 857 (45.9%) had taken part in one additional vocational training program since leaving their high

school program. Seventy-three (3.9%) enrolled in two training programs, and 95 (5.1%) terminees had enrolled in three vocational training programs. One thousand nine (54.1%) indicated they had not enrolled in any additional vocational training.

TABLE 25

ADDITIONAL VOCATIONAL EDUCATIONAL TRAINING 1973-74 SECONDARY TRADE AND INDUSTRIAL OCCUPATIONS TERMINEES PARTICIPATED IN SINCE LEAVING THEIR HIGH SCHOOL VOCATIONAL PROGRAM[A]

Type Training	Number	Percent[B]
On-the-job training (employer-sponsored program)	333	17.8
Public school adult vocational program	35	1.9
Private vocational school program	16	0.9
University or four year college	103	5.5
Junior college	157	8.4
Post-secondary vocational-technical institute (trade school)	124	6.6
Apprenticeship training program	73	3.9
Specialized occupational military training	56	3.0
Other[C]	128	6.9
TOTAL[D]	1025	54.9

[A]One thousand nine (54.1%) of the responding 1,866 terminees gave no indication of being involved in addional vocational training. Of the 1,866 terminees, 857 (45.9%) took part in one additional vocational training opportunity since leaving their high school program. Seventy-three (3.9%) took part in two and 95 (5.1%) terminees took part in three additional training opportunities.

[B]Percentages are based on the 1,866 (27.1%) respondents of the total 6,875 terminees who returned questionnaires.

[C]See page 151 for the "Other" listing as specified by the terminees.

[D]The total indicated the number of different training programs in which terminees enrolled. As footnoted above, several terminees had enrolled in more than one training program.

The following is a listing of the "Other" (Table 28) vocational education training terminees indicated they had participated in:

"Other" Vocational Training	Number
On-the-job training	62
Private vocational school program	19
Specialized occupational training	13
Post-secondary vocational institute (trade school)	12
University or four-year college	5
Public school adult vocational program	5
Apprenticeship training program	4
Still in high school	4
Correspondence course	4

Table 26 points out the additional programs the 1973-74 secondary Trade and Industrial Occupations terminees were presently attending beyond their high school training by whether these programs were related to their high school vocational program.

Of the 1,866 1973-74 secondary Trade and Industrial Occupations terminees who responded to the survey, 139 (7.4%) were attending an on-the-job training program (employer-sponsored), 152 (8.1%) were attending a vocational-technical institute, 182 (9.8%) were attending a junior college, 150 (8.0%) were attending a four year college or university, 11 (0.6%) were attending a public adult vocational program, 22 (1.2%) were attending private business or trade school, 25 (1.3%) were attending an apprenticeship program, and 87 (4.7%) were attending some other type of school or educational program. (See page 153 for the listing of the other types of schools or educational programs students were attending.)

Seven hundred sixty-eight (41.2%) of the 1,866 Trade and Industrial Occupations terminees were presently continuing their education. Two

hundred thirty-seven (12.7%) of the terminees were continuing their education in a program related to their high school vocational program. Three hundred thirty-four (17.9%) were attending a program in an area not related to their high school vocational program.

TABLE 26

PROGRAMS PRESENTLY ATTENDED BY THE 1973-74 SECONDARY TRADE AND INDUSTRIAL OCCUPATIONS TERMINEES BY WHETHER THESE PROGRAMS WERE RELATED TO THEIR HIGH SCHOOL VOCATIONAL EDUCATION PROGRAM[A]

Programs Attended	Terminees		Program Related to High School VED Program					
			Yes		No		No Response	
	No.	%	No.	%	No.	%	No.	%
On-the-job training (employer-sponsored)	139	7.4	19	1.0	14	0.8	106	5.7
Vocational-technical institute (trade school)	152	8.1	102	5.5	39	2.1	11	0.6
Junior college	182	9.8	41	2.2	128	6.9	13	0.7

Job Placement Information

The following section of this report presents information concerning job placement of the 1973-74 secondary Trade and Industrial Occupations terminees.

Table 28 points out whether the 1973-74 Trade and Industrial Occupations terminees were seeking full-time employment when they left their high school vocational program and if their vocational teacher attempted to help them get a job.

TABLE 28

WHETHER VOCATIONAL TEACHER ATTEMPTED TO HELP 1973-74 TRADE AND INDUSTRIAL OCCUPATIONS TERMINEES GET A JOB IF SEEKING FULL-TIME EMPLOYMENT UPON LEAVING THE HIGH SCHOOL VOCATIONAL PROGRAM[A]

Vocational Teacher Attempted To Get Terminee A Job	Number	Percent
Yes	555	55.1
No	453	44.9
TOTAL	1008	100.0

[A]Seven hundred eighty-five (42.1%) of the responding terminees indicated they were not seeking full-time employment when they left their high school vocational program. Seventy-three (3.9%) of the terminees did not respond to the question.

Of the 1,008 responding 1973-74 Trade and Industrial Occupations terminees indicating they were seeking full-time employment when they left their high school vocational program, 555 (55.1%) indicated that their vocational teacher attempted to help them get a job. However,

453 (44.9%) of the terminees seeking full-time employment indicated that their vocational teacher did not attempt to help them secure employment. It was interesting to note that 785 (42.1%) of the reporting 1973-74 Trade and Industrial Occupations terminees indicated that they were not seeking full-time employemnt when they left their high school vocational program.

Table 29 illustrates how long it took the 1973-74 Trade and Industrial Occupations terminees to get their first full-time job after they left their high school vocational program and began actively seeking full-time employment.

TABLE 29

LENGTH OF TIME IT TOOK THE 1973-74 TRADE AND INDUSTRIAL OCCUPATIONS TERMINEES TO SECURE FIRST FULL-TIME JOB AFTER LEAVING HIGH SCHOOL VOCATIONAL PROGRAM AND BEGINNING ACTIVELY SEEKING FULL-TIME EMPLOYMENT[A]

Time to Secure First Full-Time Job	Number	Percent
0 - 2 weeks	319	47.0
3 - 4 weeks	128	18.8
5 - 8 weeks	103	15.2
9 - 12 weeks	46	6.8
13 or more weeks	83	12.2
TOTAL	679	100.0

[A]Six hundred sixty-seven terminees indicated they already had a job when they left their high school vocational program.

Three hundred nineteen (47.0%) of 679 of the secondary Trade and Industrial Occupations terminees secured their first full-time job within two weeks after they left their high school vocational program and began actively seeking full-time employment. However, 83 (12.2%) of the terminees took 13 or more weeks to secure their first full-time

job. There were 667 terminees who indicated they already had a job when they left their high school vocational program.

Table 30 shows how the 1973-74 secondary Trade and Industrial Occupations terminees indicated they got their first full-time job after leaving their high school vocational program.

TABLE 30

HOW THE 1973-74 TRADE AND INDUSTRIAL OCCUPATIONS TERMINEES INDICATED THEY GOT THEIR FIRST FULL-TIME JOB AFTER LEAVING THEIR HIGH SCHOOL VOCATIONAL PROGRAM

How Terminees Secured First Full-Time Job	Number	Percent
Through your vocational teacher	75	9.7
Through your counselor	7	0.9
Through other school teachers or administrators	12	1.6
Through a friend or relative	350	45.2
Through applications to business or industry	200	25.8
Through state (local) employment office	45	5.8
Through a private employment agency	9	1.2
Through radio, T.V., newspaper, or other news media	15	1.9
Other[A]	61	7.9
TOTAL	774	100.0

[A]See listing on page 169 for the "Other" ways terminees indicated they secured their first full-time job after leaving their high school vocational program.

Of the 774 1973-74 Trade and Industrial Occupations terminees who responded to the survey item, 200 (25.8%) indicated they got their first full-time job after leaving their high school vocational program through applications to business and industry. Three hundred fifty (45.2%) of the terminees also indicated they got their first full-time job through a friend or relative. These represented the two methods that the largest

number of Trade and Industrial Occupations terminees utilized to secure their first full-time job. Seventy-five (9.7%) of the terminees indicated they secured their first job through their vocational teacher. Seven (0.9%) students indicated that a counselor got them their first full-time job after leaving their vocational program. Those students who already had a job before leaving their high school vocational program were not shown in Table 30. (See Table 31, page 170)

Fifty-four of the 61 terminees who checked the "Other" category specified the means by how he secured his first full-time job after leaving his high school vocational program. The following list indicates the "Other" means the terminee indicated.

"Other" Means for Securing First Full-Time Job	Number
Own initiative	12
Didn't get a full-time job	9
Friend or relative	8
Previous employer	7
Application to business and industry	5
Joined armed servies	4
Through other school personnel	3
Through vocational teacher	1
Contest (Auto trouble shooting)	1
Still in school	1
J.C.C.E.O.	1
R.O.R. Personnel	1
N.Y.C.	1

Table 31 shows how the 1973-74 Trade and Industrial Occupations terminees who were working while in high school taking their vocational program indicated they got that job.

Nine hundred eighty-three (52.7%) of the 1,866 reporting 1973-74 Trade and Industrial Occupations terminees indicated they were working during the time they were in high school taking their vocational program. Of those terminees working while in high school, 222 (22.6%) got their

job through their vocational instructor, 411 (41.8%) through a friend or relative, and 153 (15.6%) got jobs through applications to business or industry. These three means were the ways most of the terminees secured a job while they were still in high school taking their vocational program.

TABLE 31

HOW THE 1973-74 TRADE AND INDUSTRIAL OCCUPATIONS TERMINEES WHO WERE WORKING WHILE IN HIGH SCHOOL TAKING THEIR VOCATIONAL PROGRAM INDICATED THEY GOT THAT JOB[A]

Who or What Helped Terminee Get Job	Number	Percent
Your vocational teacher	222	22.6
Your counselor	14	1.4
Other school teachers or administrators	21	2.1
Friend or relativel	411	41.8
Applications to business or industry	153	15.6
State (local) employment office	10	1.0
Private employment agency	5	0.5
Radio, T.V., newspaper, or other news media	4	0.4
Other	143	14.6
TOTAL	983	100.0

[A]Eight hundred seventy-one (46.7%) terminees indicated they had no job during the time they were in high school taking their vocational course.

Table 32 reveals the indications of the 1973-74 Trade and Industrial Occupations terminees as whether, before taking their first job, they looked for employment within daily walking or driving distance of home by how their first job related to their vocational training.

Six hundred sixty-six (82.0%) of the 1973-74 Trade and Industrial Occupations terminees who were employed in their first job indicated they sought employment within daily walking or driving distance of home.

One hundred forty-six (18.0%) terminees indicated before taking their first job, they looked for a job beyond daily walking or driving distance of home.

TABLE 32

INDICATIONS OF 1973-74 TRADE AND INDUSTRIAL OCCUPATIONS TERMINEES AS TO WHERE THEY LOOKED FOR THEIR FIRST JOB BEFORE TAKING ONE BY HOW THEIR FIRST JOB RELATED TO THEIR TRAINING[A]

Before Taking First Job, Where Terminees Looked for Job	Total Reporting		Total Reporting by Relatedness of First Job to Vocational Training					
			Directly Related		Somewhat Related		Not Related	
	No.	%	No.	%	No.	%	No.	%
Within daily walking or driving distance of home	666	82.0	164	85.9	129	80.6	373	80.9
Beyond daily walking or driving distance of home[B]	146	18.0	27	14.1	31	19.4	88	19.1
TOTAL	812	100.0	191	100.0	160	100.0	461	100.0

[A]Four hundred forty-eight terminees indicated they already had their first job while in high school. Of those 448 terminees, 198 (44.2%) were working in a directly related area, 107 (23.9%) in a somewhat related area, while 130 (29.0%) were working in a non-related area.

[B]See listing, page 172, for reasons terminees gave for seeking their first job away from home.

Of the 191 terminees who were working in a directly related area, 27 (14.1%) sought employment beyond daily walking or driving distance of home.

Of the 461 terminees whose first jobs did not relate to their training, 88 (19.1%) of those terminees sought employment beyond daily walking or driving distance of home.

Four hundred forty-eight terminees indicated they had their first job while in high school. Of those 448 terminees, 198 (44.2%) were working in a directly related area, 107 (23.9%) in a somewhat related area, and 130 (29.0%) were working in a non-related area.

The following is a listing of reasons terminees gave for seeking a job beyond daily walking or driving distance of their home before accepting their first job. Of the 146 terminees who indicated they sought a job beyond daily walking or driving distance of home before accepting their first job, here are some of the reasons given why they sought that job.

Reasons for Seeking Job Beyond Daily Walking or Driving Distance Before Accepting First Job	Number
No local employment	16
Needed a job badly	6
Better pay	3
Went to city for better job	3
Better opportunity elsewhere	3
Took first job available	3
Father had job for me	2
Looked everywhere	2
Needed experience	1
Family moved to another city	1
Going to school	1
Went into armed services	1
Had to look elsewhere for job in field of study	1

Table 33 reveals the indications of the 1973-74 Trade and Industrial Occupations terminees who were working in their first job not related to their training by whether or not they tried to get a job related to their training by where they looked for employment before accepting that first job.

It is important to note that of the 447 terminees who were working in a non-related first job, 49 (11.0%) sought related employment beyond

daily walking or driving distance of home before accepting their first job.

TABLE 33

INDICATIONS OF THE 1973-74 TRADE AND INDUSTRIAL OCCUPATIONS TERMINEES WORKING IN FIRST JOB NOT RELATED TO THEIR TRAINING BY WHETHER OR NOT THEY TRIED TO GET A JOB RELATED TO THEIR TRAINING BY WHERE THEY LOOKED FOR EMPLOYMENT BEFORE ACCEPTING FIRST JOB[A]

Where Terminees Working in Non-Related Areas Looked for Employment Before Accepting First Job	Total Reporting		Before Accepting This First Job Unrelated to Training Whether Terminees Sought Job in Related Area			
			Yes		No	
	No.	%	No.	%	No.	%
Sought employment within daily walking or driving distance of their home	359	80.3	193	79.8	166	81.0
Sought employment beyond daily walking or driving distance of their home[B]	88	19.7	49	20.2	39	19.0
TOTAL	447	100.0	242	100.0	205	100.0

[A]Total in this table may not correspond with totals of terminees for non-related categories in other tables for the following reasons: (1) some terminees had jobs when leaving program and did not have to seek employment and (2) some terminees failed to respond to one or more of the related questions from which data was drawn.

[B]See page 175 for the listing of reasons terminees who were working in non-related jobs gave for not trying to secure a job that was related to their training.

Table 34 illustrates the indications of the 1973-74 Trade and Industrial Occupations terminees as to where they looked for a job before taking their present job by how their present job is related to their vocational training.

Six hundred five (79.3%) of the presently employed 1973-74 Trade and Industrial Occupations terminees indicated they sought employment within

daily walking or driving distance of home. One hundred fifty-eight (20.7%) terminees indicated they sought employment beyond daily walking or driving distance of home.

TABLE 34

INDICATIONS OF 1973-74 TRADE AND INDUSTRIAL OCCUPATIONS TERMINEES AS TO WHERE THEY LOOKED FOR A JOB BEFORE TAKING THEIR PRESENT JOB BY HOW THEIR PRESENT JOB RELATED TO THEIR TRAINING[A]

Where Terminees Looked for Job Before Taking Present Job	Total Reporting		Total Reporting by Relatedness of Present Job to Vocational Training					
			Directly Related		Somewhat Related		Not Related	
	No.	%	No.	%	No.	%	No.	%
Within daily walking or driving distance of home	605	79.3	137	87.3	139	79.4	329	76.3
Beyond daily walking or driving distance of home[B]	158	20.7	20	12.7	36	20.6	102	23.7
TOTAL	763	100.0	157	100.0	175	100.0	431	100.0

[A]Four hundred two terminees reported they already had their present job while in high school. Of those 402 terminees, 184 (45.8%) were in a directly related area, 94 (23.4%) in a somewhat related area, while 104 (25.9%) were working in a non-related area.

[B]See listing, page 175, for reasons terminees gave for seeking their present job away from home.

Of the 157 terminees who were working in a directly related area, 20 (12.7%) sought employment beyond daily walking or driving distance of home.

Of the 431 terminees who were presently working in a non-related area, 102 (23.7%) sought employment beyond daily walking or driving distance of his home.

Four hundred two terminees reported they already had their present job while in high school. Of those 402 terminees, 184 (45.8%) were in directly related areas, 94 (23.4%) in somewhat related areas, and 104 (25.9%) were in non-related areas.

The following is a list of reasons terminees gave for seeking a job beyond daily walking or driving distance of their home before accepting their present job. Of the 158 terminees who indicated they sought a job beyond daily walking or driving distance of home before accepting their present job, 117 gave reasons why they sought that job.

Reasons for Seeking Job Beyond Daily Walking or Driving Distance Before Accepting Present Job	Number
None near my home	33
More money	18
Needed job--bad	13
To find a good job, you go in town to look	10
Took first job available	7
Better job	5
Wanted a certain job at a certain place	4
Wanted to travel	4
To make money on field	3
Because of bettering my future	3
Joined armed services	3
Looked everywhere	3
I wasn't home	2
Not much close-in	1
Father worked there	1
Had job, then family moved away	1
Found a job while away from home	1
Didn't know what to do	1
Training not long enough	1
Close to school	1
I want a job.	1
Working in textiles before service	1

Table 35 reveals the indications of the 1973-74 Trade and Industrial Occupations terminees who were working in their present job not related to their training by whether or not they tried to get a job related to their training by where they looked for employment before accepting that present job.

TABLE 35

INDICATIONS OF THE 1973-74 TRADE AND INDUSTRIAL OCCUPATIONS TERMINEES WORKING IN PRESENT JOB NOT RELATED TO THEIR TRAINING BY WHETHER OR NOT THEY TRIED TO GET A JOB RELATED TO THEIR TRAINING BY WHERE THEY LOOKED FOR EMPLOYMENT BEFORE ACCEPTING PRESENT JOB[A]

Before Accepting Present Job Where Terminees Working in Non-Related Areas Looked for Employment	Total Reporting		Before Accepting This Present Job Unrelated to Training Whether or Not Terminees Sought Job in Related Area			
			Yes		No[B]	
	No.	%	No.	%	No.	%
Sought employment within daily walking or driving distance of their home	332	76.3	196	76.6	136	76.0
Sought employment beyond daily walking or driving distance of their home	103	23.7	60	23.4	43	24.0
TOTAL	435	100.0	256	100.0	179	100.0

[A]Totals in this table may not correspond with totals of terminees for non-related categories in other tables for the following reasons: (1) some termines had jobs when leaving programs and did not have to seek employment and (2) some terminees failed to respond to one or more of the related questions from which data was drawn.

[B]See page 104 for the listing of reasons terminees who were working in non-related jobs gave for not trying to secure a job that was related to their training.

Sixty (14.0%) of the 435 terminees who were working in a non-related area sought related employment beyond daily walking or driving distance of home before accepting his present job.

APPENDIX

PRESENT JOB AND FIRST JOB TITLES OF THE 1973-74 TRADE AND INDUSTRIAL OCCUPATIONS TERMINEES

PRESENT JOB AND FIRST JOB TITLES OF THE 1973-74 TRADE AND INDUSTRIAL OCCUPATIONS TERMINEES

For those terminees who indicated present or first job occupations, this appendix lists the present job title and first job title by their high school vocational training area (OE Codes). The job titles are listed as the terminees reported them. The number of full-time jobs held by these terminees since completing their high school vocational course is listed, current employment status is listed, and whether the student intended to get a job in the area while in the program.

The following code is used to identify the employment status of the terminees:

0. Unemployed, but seeking employment
1. Employed full time
2. Employed part time, seeking full-time job
3. Employed part time, not seeking full-time job
4. Employed full time and attending school
5. Employed part time and attending school
6. Unavailable for employment

The following code is used to identify whether the student intended to get a job in the area while in the program:

1. No
2. Was not sure
3. Yes

The number in parenthesis behind the job titles indicates the relatedness of the high school vocational training to these jobs. The terminees

made the judgment as to the relatedness of their training to these jobs. The following is used to identify this relatedness.

1. Directly related
2. Somewhat related
3. Not related

The total in each occupational title area may not correspond to the total in each OE Code as listed in Table 23. Some of the terminees failed to indicate the title of their present position. If the first job title was the same as the present job title, the first job title is included under the present job title.

OE Code 01.0500 - Ornamental Horticulture

No.	Employment Status	Full-Time Jobs Held Since High School Voc. Course	Intent of Employment in Area	Present Job	First Job
1	1	0	3	Nursery Owner & Manager (2)	Same (1)

OE Code 04.0100 - Advertising Service

TITLE: FOLLOW-UP OF 1973-74 POST-SECONDARY DATA PROCESSING OCCUPATIONS TERMINEES OF ALABAMA. RESEARCH AND DEVELOPMENT REPORT NO. 30.

PERSONAL AUTHOR: DRAKE, JAMES BOB; AND OTHERS

DESCRIPTOR: *DATA PROCESSING OCCUPATIONS; *POST SECONDARY EDUCATION; *STATE SURVEYS; *OCCUPATIONAL SURVEYS; *VOCATIONAL FOLLOWUP

IDENTIFIER: ALABAMA

EDRS PRICE: MF AND HC AVAILABILITY WILL BE ANNOUNCED IN VOL. 10, NO. 2.

DESCRIPTIVE NOTE: 159P.; RELATED DOCUMENTS VT 103 321 THROUGH VT 103 335 IN THIS ISSUE.

ABSTRACT: THIS REPORT RELATES THE FINDINGS OF A STATEWIDE FOLLOWUP SURVEY OF 1973-74 POSTSECONDARY DATA PROCESSING OCCUPATIONS TERMINEES FROM THREE JUNIOR COLLEGES AND 12 VOCATIONAL-TECHNICAL INSTITUTES IN ALABAMA. QUESTIONNAIRES WERE MAILED TO 1,201 STUDENT TERMINEES FROM NINE TO 19 MONTHS AFTER LEAVING SCHOOL. RETURNS WERE RECEIVED FROM 470 (39.1 PERCENT) OF THE DATA PROCESSING OCCUPATIONS TERMINEES FROM THE INITIAL MAILING AND TWO FOLLOWUPS. DATA ARE PRESENTED IN TABLES WITH ACCOMPANYING NARRATIVE SUMMARIES ORGANIZED ACCORDING TO THESE MAJOR SECTIONS: GENERAL INFORMATION ON THE TERMINEES; FACILITIES AND EQUIPMENT; BASIC EMPLOYMENT INFORMATION; CONTINUING EDUCATION INFORMATION; AND JOB PLACEMENT INFORMATION. PRESENT AND FIRST JOB TITLES OF THE 1973-74 DATA PROCESSING OCCUPATIONS TERMINEES ARE APPENDED ALONG WITH THE QUESTIONNAIRE AND A SECTION OF STUDENT TERMINEE COMMENTS RECEIVED WITH THE QUESTIONNAIRES. Appreciation are due the following persons for their contribution to the study:

Mrs. Sandra S. Yelverton, State Supervisor for BOE
Dr. Douglas Patterson, Director, State Research Coordinating Unit
Mrs. Joanne Adams, District BOE Supervisor
Miss LaHolme McClendon, District BOE Supervisor
Dr. Mary Louise Simms, Research Associate, State Research Coordinating Unit
Mr. Leolen Sizemore, District BOE Supervisor
Mr. Phillip Wayne Scroggins, District BOE Supervisor
Mrs. Anita J. Strickland, FBLA Executive Secretary

The authors also wish to express their appreciation to the following members of the Occupational Research and Development Unit for their contribution to the study:

Mrs. Bonnie J. Burks, Research Associate
Mr. Gary Greenshields, Graduate Research Assistant
Mr. John Gross, Research Associate
Mr. James McMath, Graduate Research Assistant
Miss Flossi Sergen, Secretary
Mr. Ed Williams, Technical Assistant

FOLLOW-UP OF 1973-74 POST-SECONDARY DATA PROCESSING
OCCUPATIONS TERMINEES OF ALABAMA

Alabama continues to support one of the most progressive and comprehensive vocational education programs in the nation. In addition to serving youth and adults by training them for gainful and useful employment, the diversification of vocational courses meets a serious job need and contributes to the industrial development in the state.

With the millions of tax dollars being spent on vocational education, it is necessary to attempt to account to the taxpayer and decision-makers on the results of those expenditures. Terminee student follow-up studies constitute one of the most valuable techniques for assessing vocational education system outcomes.

The Alabama State Department of Education, Division of Vocational Education and Community Colleges, recognizing this important phase of accountability and evaluation, initiated the development of a statewide follow-up system for its vocational education program terminees. The Division, under the direction of Dr. T. L. Faulkner, State Director, contracted with the Occupational Research and Development Unit at Auburn University to develop and implement the statewide follow-up system for its vocational terminees in all service areas.

This report relates the findings of the survey instrument mailed to the 1973-74 Post-Secondary Data Processing Occupations terminees from three junior colleges and twelve vocational-technical institutes in Alabama. When the terminees received the questionnaire, most had been out of school nine to nineteen months.

GENERAL INFORMATION

General Information

Student rosters with names and addresses of the 1973-74 Post-Secondary Data Processing Occupations terminees were received from 15 post-secondary schools. For the purpose of this study, three of the post-secondary schools were classified as junior colleges and 12 were classified as vocational technical institutes.

The following list indicates the names of the three junior colleges:

1. Gadsden State Junior College
2. Jefferson State Junior College
3. S. D. Bishop State Junior College

The following list indicates the names of the 12 institutions classified as vocational technical institutes:

1. Alabama Institute for Deaf and Blind
2. Bessemer State Technical College
3. George C. Wallace Community College - Technical Division
4. J. F. Drake State Technical College
5. Lawson State Technical Division
6. MacArthur State Technical College
7. Muscle Shoals State Technical Institute
8. Northwest State Technical College
9. Opelika State Technical College
10. Patterson State Technical College
11. Shelton State Technical College
12. Trenholm State Technical College

The total of 1,201 Post-Secondary Data Processing Occupations terminees reported to the Occupational Research and Development Unit (ORDU) were mailed the follow-up forms. Returns were received from 470 (39.1%) of the post-secondary data processing terminees from the initial mailing in March 1975 and two follow-ups.

Table 1 presents data relative to the total population of Data Processing Occupations terminees and the number of returns categorized by type institution terminees attended and by OE Codes studied as reported by teachers.

Of the 1973-74 Post-Secondary Data Processing terminees reported by the teachers, the largest number in any OE code was in the Occupational Title area of Computer and Console Operators. Of the total 1,201 reported terminees, 440 (36.6%) studied to be Computer and Console Operators. Of the 440 who studied in this area, 366 (83.1%) attended a program in a junior college. There was a survey return rate of 35.0 percent for those terminees who studied to be Computer and Console Operators.

There were 416 (34.6%) terminees who studied to be Programmers. Of these terminees, 340 (81.7%) attended a program in a vocational-technical institute. The survey return rate of 39.2 percent was achieved from those persons studying to be Programmers.

The combined enrollment of terminees who studied to be Computer and Console Operators and those who studied to be Programmers represented 71.2 percent of all 1973-74 Post-Secondary Data Processing terminees reported to the ORDU.

TABLE 1

DESCRIPTION OF TOTAL POPULATION AND RETURNS BY
OE CODE OF 1973-74 POST-SECONDARY
DATA PROCESSING TERMINEES

OE Code	Occupational Title	Type Post-Sec. School	Total Number of Students Terminating	Number of Returns	Percent of Returns for OE Code Area
14.0000	Office Occupations (Total)		12	4	33.3
		Jr. Colleges	0	0	0.0
		Voc-Tech Colleges	12	4	33.3
14.0200	Business Data Processing Systems Occupations (Total)		126	58	46.0
		Jr. Colleges	0	0	0.0
		Voc-Tech Colleges	126	58	46.0
14.0201	Computer and Console Operators (Total)		440	154	35.0
		Jr. Colleges	366	127	34.7
		Voc-Tech Colleges	74	27	36.5
14.0202	Peripheral Equipment Oper. (Total)		22	6	27.3
		Jr. Colleges	0	0	0.0
		Voc-Tech Colleges	22	6	27.3
14.020201	Keypunch and Coding Equipment Oper. (Total)		185	85	45.9
		Jr. Colleges	0	0	0.0
		Voc-Tech Colleges	185	85	45.9
14.0203	Programmers (Total)		416	163	39.2
		Jr. Colleges	76	26	34.2
		Voc-Tech Colleges	340	137	40.3
	TOTAL (All Programs)		1201	470	39.1
		Jr. Colleges	442	153	34.6
		Voc-Tech Colleges	759	317	41.8

The total population of 1973-74 Post-Secondary Data Processing terminees reported to the ORDU (1201) were mailed questionnaires. From the initial mailing and two follow-ups, returns were received from 470 (39.1%).

A return rate of 34.6 percent was received from the junior college terminees, while a return rate of 41.8 percent was achieved from the terminees of the vocational-technical institutes.

Table 1-A offers a description of the total population and returns by OE code area by length of the program and length of time terminees were enrolled in the program of the 1973-74 Junior College Data Processing terminees.

Table 1-B offers a description of the total population and returns by OE code area, by length of the program and length of time terminees were enrolled in the program, of the 1973-74 Vocational-Technical Institute terminees.

Table 1-C illustrates the description of the total population and survey returns from the 1973-74 junior college data processing terminees by individual junior colleges by OE code area studied.

Table 1-D reports the description of the total population and survey returns from the 1973-74 vocational-technical institutes data processing terminees by individual vocational-technical institute by OE code area studied.

TABLE 1-A

DESCRIPTION OF TOTAL POPULATION AND RETURNS BY OE CODE AREA, BY LENGTH OF PROGRAM AND LENGTH OF TIME TERMINEES ENROLLED IN PROGRAM, OF THE 1973-74 JUNIOR COLLEGE DATA PROCESSING TERMINEES

Length of Program in Months	OE Code Area Studied	Occupational Title Area Studied by Length of Time Terminees Enrolled in Program	Total Number Reported	Number of Returns	Percent of Returns
12 mos.	14.0201	Computer and Console Operator (Total)	238	89	37.4
		0 - 2 months	0	0	0.0
		3 - 5 months	18	6	33.3
		6 - 8 months	20	2	10.0
		9 - 11 months	37	16	43.2
		12 months	20	7	35.0

TOTAL	153	100.0	317	100.0	470	100.0

[A]See page 20 for listing of "Others" who influenced terminees in selecting their data processing course.

Of the total 470 1973-74 Post-Secondary Data Processing terminees, 294 (62.5%), when asked who was the primary influence on them taking their data processing program, indicated they made the choice themselves.

From the terminees who attended the vocational-technical institute, other than influencing themselves, friends or relatives seem to have been the greatest influence on the terminees taking the program.

Other than influencing themselves, most of the junior college terminees reported that "Other" persons or things not listed by the researchers, were the primary influence on them.

There were only four (2.6%) of the terminees from the junior colleges and 19 (6.0%) of the terminees from the vocational-technical institutes who indicated that Guidance Counselors were the primary influence on them taking their data processing program.

The following is a listing of "Other" persons or ways junior college terminees indicated influenced them most in selecting their data processing course:

1. United States Air Force
2. I was already working in data processing field
3. Took high school course in data processing
4. Worked indirectly with data input on inventory control basis
5. Talked to Navy computer programmer
6. Fortran Course
7. Aptitude Test
8. Military
9. Anniston Data Processing School

Listed below are "Other" persons or ways vocational-technical institute terminees indicate influenced them most in selecting their data processing course:

1. Rehabilitation counselor
2. Advertisements on T.V.
3. Was required course
4. Prior service experience
5. Required subject
6. Needed to complete program
7. Good job
8. E. S. Counselor
9. Saw need for information on this subject
10. Family doctor
11. Had no choice

Table 6 notes, by type institution attended, whether during the time they were taking their data processing program, the responding 1973-74 terminees intended to get a job in their area of study.

TABLE 6

BY TYPE INSTITUTION ATTENDED, INDICATIONS OF 1973-74 POST-SECONDARY TERMINEES AS TO WHETHER, DURING THE TIME THEY WERE TAKING THEIR DATA PROCESSING PROGRAM, THEY INTENDED TO GET A JOB IN THE AREA THEY WERE STUDYING

Intended to Get Job in Area of Study	Junior College Terminees		Voc.-Tech. Institute Terminees		TOTAL	
	No.	%	No.	%	No.	%
Yes	107	69.9	226	71.3	333	70.9
No	17	11.1	15	4.7	32	6.8
Was Not Sure	24	15.7	72	22.7	96	20.4
No Response	5	3.3	4	1.3	9	1.9
TOTAL	153	100.0	317	100.0	470	100.0

Approximately 27 percent of all the 470 terminating 1973-74 Post-Secondary Data Processing terminees indicated that during the time they were taking their course they had no intention or were not sure whether they were going to take a job in the area they were studying.

Seventeen (11.1%) terminees from the junior colleges indicated that while they were taking their data processing program, they had no intention of getting a job in that area. Only 15 (4.7%) terminees who attended vocational-technical institutions indicated they had no intention of getting a job in the area they were studying.

Seventy-two (22.7%) terminees who attended the vocational-technical institutes indicated that during the time they were taking their data processing program, they were not sure if they were going to get a job in the area they were studying. However, only 24 (15.7%) of the junior college terminees indicated this.

Table 7 reports terminees' opinions on choosing the Post-Secondary Data Processing program if they had the selection to make again.

TABLE 7

INDICATIONS OF THE 1973-74 TERMINEES IF THEY HAD IT TO DO OVER AGAIN, WHETHER THEY WOULD STILL CHOOSE TO TAKE THE DATA PROCESSING PROGRAM

Question: If You Had It To Do Over Again, Would You Still Choose To Take the Data Processing Program	Junior College Terminees		Voc.-Tech. Institutes		TOTAL	
	No.	%	No.	%	No.	%
Yes	116	75.8	228	71.9	344	73.2
No	31	20.3	77	24.3	108	23.0
No Response	6	3.9	12	3.8	18	3.8
TOTAL	153	100.0	317	100.0	470	100.0

Of the total 470 1973-74 Post Secondary Data Processing terminees, 344 (73.2%) indicated they would still choose to take their data processing program again. However, 75.8 percent of the junior college terminees and only 71.9 percent of the vocational-technical institute terminees indicated they would still take their program again.

Overall 108 (23.0%) of the terminees indicated if they had it to do over again, they would not choose to take their data processing program. From the junior college terminees, 20.3 percent, and from the vocational-technical institutes, 24.3 percent, of the terminees reported they would not choose to take their program again.

Table 8 indicates the extent to which the reporting 1973-74 Post-Secondary Data Processing terminees who indicated having a first job felt their data processing program prepared them for their first job. This

data was also broken down by how that first job related to their data processing course and by the type post-secondary institution the terminees had attended.

TABLE 8

PERCEPTIONS OF THE 1973-74 POST-SECONDARY DATA PROCESSING TERMINEES AS TO THE EXTENT THEIR DATA PROCESSING PROGRAM PREPARED THEM FOR THEIR FIRST JOB BY TYPE INSTITUTION ATTENDED

Extent Data Processing Course Prepared for First Full-Time Job by Type Institution Attended	Total Reporting		Number Reported by Relatedness of First Full-Time Job to Training Received					
			Directly Related		Somewhat Related		Not Related	
	No.	%	No.	%	No.	%	No.	%

Fair	20	16.0	8	18.6	11	29.7	1	2.2
Poorly Prepared	4	3.2	2	4.7	1	2.7	1	2.2
Preparation Not Related to Job	47	37.6	1	2.3	6	16.2	40	88.9
TOTAL	125	100.0	43	100.0	37	100.0	45	100.0

Terminees who were in full-time active military service or who had never been employed were not asked to respond to the questions from which this data was reported. Also, the terminees who failed to respond to the question items were not indicated in the table.

In reporting the extent to which the 1973-74 Post-Secondary Data Processing Occupations terminees felt their data processing program prepared them for their first full-time job by how their first full-time job related to the training they received in their data processing program, some interesting points were revealed. Nineteen (24.1%) of the 79 junior college terminees, who had a first job, indicated "Excellent" to "Well Prepared" for their first job as a result of the training they received in their data processing program. However, 15 (71.4%) of the 21 junior college terminees employed in their first full-time job related directly to their training felt they were excellent to well prepared for this first job. Only two (2.5%) junior college terminees felt they were "Poorly Prepared" for their first job and only one of these was working in a directly related area.

Of the total 125 vocational-technical institute terminees reporting a first job, 54 (43.2%) felt from "Excellent" to "Well Prepared" for their first job as a result of their data processing program. However, 32 (74.4%) of the 43 vocational technical institute terminees who were working in a directly related area reported being "Excellent" to "Well Prepared" for that first job as a result of their data processing program. Only four (3.2%) of the vocational-technical institute terminees felt they were "Poorly Prepared" for their first job and only two of these terminees were working in directly related areas.

Table 9 reveals the extent to which the reporting 1973-74 Post-Secondary Data Processing terminees having a job at present, felt their data processing program prepared them for their present job. This data was also broken down by how their present job related to their data processing course and by the type post-secondary institution the terminees had attended.

TABLE 9

PERCEPTIONS OF THE 1973-74 POST-SECONDARY DATA PROCESSING TERMINEES AS TO THE EXTENT THEIR DATA PROCESSING PROGRAM PREPARED THEM FOR THEIR PRESENT JOB BY TYPE INSTITUTION ATTENDED

[A]See listing, page 26, for reasons terminees in junior colleges gave for being prepared "Fair" for their present job.

[B]See listing, page 27, for reasons terminees in junior colleges gave for being "Poorly Prepared" for their present job.

[C]See listing, page 27, for reasons terminees in vocational-technical institutes gave for being prepared "Fair" for their present job.

[D]See listing, page 28, for reasons terminees in vocational-technical institutes gave for being "Poorly Prepared" for their present job.

Twenty-three (22.1%) of the 104 junior college terminees, who reported having a job at present, indicated they were from "Excellent" to "Well Prepared" for their present job as a result of their data processing program. Of the 27 junior college terminees presently working in a directly related area, 15 (55.6%) noted they were from "Excellent" to "Well Prepared" for their present job.

Twenty-one (20.2%) of the total junior college terminees felt they were prepared just "Fair" for their present job, while 11 (40.7%) of those junior college terminees working in a directly related area indicated they were prepared just "Fair" for their present job. The following list notes the reasons the junior college terminees specified for being prepared only "Fair" for their present job:

1. Because it only prepared you for programming
2. Just became familiar with equipment
3. Only general knowledge
4. Not same system
5. Instructor doesn't keep himself up to date
6. Not exactly what I studied
7. Instructors not experienced in data processing
8. No experience, used an outdated 1130 computer in industry
9. Only basics taught leaving a lot to learn
10. Did not offer subjects when desired
11. Studies were in programming--am doing unit record work
12. Instructor not interested
13. Studied COBOL, BAC, and Regular Programming--I am not a programmer
14. Not operator programmer
15. Need more advanced programs of study; also need required course consisting of logic and systems design
16. Data processing program poor in State of Alabama
17. Poor instructing
18. Classroom techniques not as involved as actual applications--but then no training is
19. General knowledge helpful

Only four (3.9%) of the total 104 junior college terminees noted that they were "Poorly Prepared" for their present job as a result of their data processing program. Only one terminee working in a directly

related area indicated being only "Poorly prepared" for his present job. The following list reports the reasons the four terminees gave for being only "Poorly prepared" for their present job:

1. Obsolete equipment
2. Didn't teach keypunch touch systems
3. Information control system (multi-programming)
4. No coordinated program and not enough operating time on school's systems

Sixty-two (41.2%) of the total 154 vocational-technical institute terminees, who reported having a job at present, reported being from "Excellent" to "Well Prepared" for their present job as a result of their data processing program. Of the 42 vocatioanl-technical institute terminees presently working in a directly related area, 29 (69.0%) felt they were from "Excellent" to "Well Prepared" for their present job.

Twenty-six (16.9%) of the total vocational-technical institute terminees reported being trained only "Fair" for their present job as a result of their data processing program. Of the terminees working in an area directly related to their data processing program, nine (21.4%) consider being trained only "Fair" for their present job. Listed below are the reasons the vocational-technical institute terminees gave for being prepared only "Fair" for their present job.

1. Different operating system than school (Had only basic knowledge)
2. Trained on IBM 1130, working on UNIVAC 9300
3. Peculiarities of job
4. Learned on job
5. Trained on IBM 1130; most centers in area use IBM 360 or 370 DOS system
6. I am presently a computer operator and main function at trade school was programming
7. The material needs up-dating
8. Not enough training on 129 Keypunch
9. I am employed as English aide
10. Poor instructor
11. Needed to be more detailed

12. I believe classroom preparation and on-the-job preparation are somewhat different
13. I am a bookkeeper and computer operator
14. Accounting
15. What I do is really not pertinent to data processing
16. No training with mini-computers
17. Not enough instructors
18. I'm in electronics
19. New machines, different machines
20. Not directly related to course
21. Not enough training
22. Data processing program did not have adequate equipment for training
23. Basic machine knowledge

Only six (3.9%) of the total 154 vocational-technical college terminees reported being "Poorly Prepared" for their present job as a result of their data processing program. Three of these terminees were working in an area directly related to their data processing program. Listed below are the reasons the vocational-technical institute terminees gave for being "Poorly Prepared" for their present job as a result of their data processing program:

1. Instructor
2. Office classes related to data processing was used

Table 10 notes how the 1973-74 Post-Secondary Data Processing terminees rated the quality of teaching of their data processing instructors by the type institution terminees attended.

Of the total 463 1973-74 Post-Secondary Data Processing terminees, 341 (73.7%) rated the quality of teaching of data processing instructors from "Good" to "Excellent." However, 41 (8.8%) of the total terminees rated the quality of their data processing instructors to be from "Poor" to "Very Poor."

One hundred nine (73.2%) of the total 149 junior college terminees rated the quality of teaching of their data processing instructor to be

from "Good" to "Excellent." Fourteen (9.4%) junior college terminees rated the quality of teaching of their instructors to be from "Poor" to "Very Poor."

TABLE 10

1973-74 POST-SECONDARY DATA PROCESSING TERMINEES' RATINGS OF THE QUALITY OF TEACHING BY THEIR INSTRUCTORS BY TYPE INSTITUTION ATTENDED

Rating	Total		Type Institution			
			Junior College		Voc.-Tech. Institute	
	No.	%	No.	%	No.	%
Excellent	150	32.4	39	26.2	111	35.4
Good	191	41.3	70	47.0	121	38.5
Fair	81	17.5	26	17.4	55	17.5
Poor	32	6.9	10	6.7	22	7.0
Very Poor	9	1.9	4	2.7	5	1.6
TOTAL	463	100.0	149	100.0	314	100.0

Of the 314 vocational-technical institute terminees, 232 (73.9%) felt the quality of teaching of their data processing instructors to be from "Good" to "Excellent." Twenty-seven (8.6%) vocational-technical institute terminees rated the quality of teaching of their data processing instructors to be from "Poor" to "Very Poor."

Table 11 illustrates how the 1973-74 Post-Secondary Data Processing terminees rated their data processing instructor's interest in their class work by the type institution the terminees attended.

Three hundred forty-two (74.0%) of the total responding 462 Post-Secondary Data Processing terminees rated their data processing instructor's interest in their class work from "Good" to "Excellent." However, 54 (9.5%) of all the terminees rated their instructor's interest in their class work from "Poor" to "Very Poor."

TABLE 11

1973-74 POST-SECONDARY DATA PROCESSING TERMINEES' RATINGS OF THEIR INSTRUCTOR'S INTEREST IN THEIR CLASS WORK BY THE TYPE INSTITUTION TERMINEES ATTENDED

Rating	Total		Type Institution			
			Junior College		Voc.-Tech. Institute	
	No.	%	No.	%	No.	%
Excellent	152	32.9	40	26.8	112	35.8
Good	190	41.1	66	44.3	124	39.6
Fair	76	16.5	29	19.5	47	15.0
Poor	32	6.9	10	6.7	22	7.0
Very Poor	12	2.6	4	2.7	8	2.6
TOTAL	462	100.0	149	100.0	313	100.0

Table 12 points out how the 1973-74 Post-Secondary Data Processing terminees subjectively rated the knowledge their data processing instructors possessed about their field of study. This rating is also shown in the table by a breakdown of how the terminee's present job related to the training they received in their data processing program and by the type institution the terminees attended. Terminees were asked to base their judgments on their current knowledge of their job and responsibilities.

From the 103 responses from the junior college terminees, 82 (79.6%) rated the knowledge their data processing instructor possessed about their field of study from "Good" to "Excellent." Only nine (8.8%) junior college terminees on this rating, rated their instructor from "Poor" to "Very Poor."

For those 27 junior college terminees working in an area directly related to the training they received, 20 (74.0%) rated the knowledge

their data processing instructor had about their field of study to be from "Good" to "Excellent."

TABLE 12

1973-74 POST-SECONDARY DATA PROCESSING TERMINEES RATINGS OF THE KNOWLEDGE THEIR DATA PROCESSING INSTRUCTORS POSSESSED ABOUT THEIR FIELD OF STUDY BY HOW TERMINEES' PRESENT JOB RELATED TO THE TRAINING THEY RECEIVED BY THE TYPE INSTITUTION TERMINEES ATTENDED

Ratings[A]	Total Reporting		Number Reporting by Relatedness of Present Job to Training Received					
			Directly Related		Somewhat Related		Not Related	
	No.	%	No.	%	No.	%	No.	%
Junior College								
Excellent	30	29.1	7	25.9	7	25.9	16	32.7
Good	52	50.5	13	48.2	12	44.5	27	55.1

Good	65	43.6	21	50.0	21	40.4	23	41.8
Fair	34	22.8	6	14.3	14	26.9	14	25.5
Poor	6	4.1	1	2.4	1	1.9	4	7.3
Very Poor	0	0.0	0	0.0	0	0.0	0	0.0
TOTAL	149	100.0	42	100.0	52	100.0	55	100.0

[A]Ratings were to be based on terminees' judgment of their current knowledge of their job and responsibilities.

Of the 149 responding vocational-technical institute terminees, 109 (73.1%) rated the knowledge their data processing instructor possessed about their field of study to be from "Good" to "Excellent."

Only six (4.1%) of the vocational-technical institute terminees, on this factor, rated their instructors to be "Poor," and none "Very Poor."

Of the 42 vocational-technical institute terminees working in an area directly relat-d to the training they received, 35 (83.3%) rated their instructor's knowledge about their field of study to be from "Good" to "Excellent." Only one (2.4%) terminee working in a directly related area rated his instructor's knowledge about this field of study to be "Poor," and none "Very Poor."

FACILITIES AND EQUIPMENT INFORMATION

Facilities and Equipment Information

The following section of this report contains information regarding the facilities and equipment in the Post-Secondary Data Processing programs as viewed by the 1973-74 terminees.

Table 13 illustrates how the 1973-74 Post-Secondary Data Processing terminees, who considered their present job close enough related to their data processing program, compared the facilities and equipment in their data processing program with their present job.

TABLE 13

HOW THE 1973-74 POST-SECONDARY DATA PROCESSING TERMINEES, WHO CONSIDERED THEIR PRESENT JOB CLOSE ENOUGH RELATED TO THEIR DATA PROCESSING PROGRAM, COMPARED THE FACILITIES AND EQUIPMENT IN THEIR DATA PROCESSING PROGRAM WITH THEIR PRESENT JOB

Comparisons	Total		Type Institution Attended			
			Junior College		Voc.-Tech. Institute	
	No.	%	No.	%	No.	%
Better than those on present job	19	17.1	6	14.0	13	19.1
Similar to those on present job	50	45.1	21	48.8	29	42.7
Not as good as those on present job[A]	42	37.8	16	37.2	26	38.2
TOTAL	111	100.0	43	100.0	68	100.0

[A]See page 38 for listing of facilities and/or equipment that terminees indicated were not available to them in their data processing program that they now need on their present job.

There were 43 junior college data processing terminees who presently indicated working in a job closely enough related to their data processing program to compare the facilities and equipment.
Of the 43, six (14.0%) noted the data processing programs facilities and equipment as better than those on their present job, 21 (48.8%) indicated similar to those on present job, while 16 (37.2%) reported not as good as those on present job.

Of the 68 vocational-technical institute terminees who reported having a present job closely enough related to their training to rate the facilities and equipment, 13 (19.1%) rated the facilities and equipment in their data processing program as better than those on their present job. Twenty-nine (42.7%) rated the facilities and equipment in their program as similar to those on their present job, while 26 (38.2%) reported facilities and equipment not as good as those on their present job.

See listing, page 38, for facilities and/or equipment that terminees indicated were not available to them in their data processing program that they now need on their present job. The listings are shown by individual institution.

Table 13-A reports how the 1973-74 Post-Secondary Data Processing terminees, who considered their present job closely enough related to their data processing program, compared the facilities and equipment in their data processing program with their present job by the institution they attended.

TABLE 13-A

HOW THE 1973-74 POST-SECONDARY DATA PROCESSING TERMINEES, WHO CONSIDERED THEIR PRESENT JOB CLOSELY ENOUGH RELATED TO THEIR DATA PROCESSING PROGRAM, COMPARED THE FACILITIES AND EQUIPMENT IN THEIR DATA PROCESSING PROGRAM WITH THEIR PRESENT JOB, BY THE INSTITUTION THEY ATTENDED

[A]See listing, page 38, for facilities and/or equipment that terminees indicated were not available to them in their data processing program that they now need on their present job.

Below is a listing, by institution attended, of facilities and/or equipment that terminees indicated were not available to them in their data processing program that they now need on their present job:

Junior Colleges

Gadsden State Junior College

(None listed)

Jefferson State Junior College

CRT Tape Drive
OS, VSI, JCL, Newer Systems (370-158)
Tape processing and equipment was not as advanced
No tape drives--old machines
Tape drives, console work, etc.
Did not have any exposure to tape units
Tape drives, larger computers
Tape drives, disk pack
UNIVAC, ENTREY, ENFOREX, IBM 129
Better equipment
The IBM 1130 is an out-of-date computer

S. D. Bishop State Junior College

(None listed)

Vocational-Technical Institutes

Alabama Institute for Deaf and Blind

(None listed)

Bessemer State Technical College

Terminal and larger computer with more memory
IBM 129 (Keypunch)
Tape drives, in school had out-of-date computer
Data terminals
Key tape machines
A larger system, tape drives, JCL, HASP and ASP, 3277 Display Terminal
A bigger computer--the IBM 1130 not used in companies anymore
Not similar in size and capabilities
The computer at Bessemer Tech. is: (1) obsolete and (2) a scientific and not a commercial system
Terminals, printers, modems, telephone equipment, teletype

(continued)

Vocational-Technical Institutes (continued)

George C. Wallace Community College-Technical Division

Keypunch machines are obsolete and CPU not adequate

J. F. Drake State Technical College

Verifying machines were not available in my training program
Collator, reproducer, interpreter

Lawson State Technical College

(None listed)

MacArthur State Technical College

Need better (newer) keypunch machines

Muscle Shoals State Technical Institute

Tape hardware, disk hardware, more on the job environment
Obsolete equipment

Northwest State Technical College

(None listed)

Opelika State Technical College

Tape drives, faster, more modern equipment
We had a very little and slow computer at school
Teletypes
Tape experience
Tape drives

Patterson State Technical College

IBM 370, 3420 tape drives, 3330 disk drives

Shelton State Technical College

Slow speed sorter, proof machines
On-the-job we have a Univac 1110 and at school we only had a small IBM computer which is no longer used anymore for employment

Trenholm State Technical College

Terminals, disk-packs drives, tape drives, tab equipment
Up-to-date keypunch machines
Some equipment was out of date
Older models of machines are out of date--the computer type machine is in

Table 14 reports the opinions of the 1973-74 Post-Secondary Data Processing terminees presently working in directly related or somewhat related areas as to whether or not there were equipment items used in their data processing program that were not used on their present job. Data is also present by the individual institution attended by the terminees. Also, the terminees made the judgment as to relatedness of their present job to their data processing program.

TABLE 14

OPINIONS, BY INSTITUTION ATTENDED, OF THE 1973-74 POST-SECONDARY DATA PROCESSING TERMINEES PRESENTLY WORKING IN RELATED AREAS AS TO WHETHER OR NOT THERE WERE EQUIPMENT ITEMS USED IN THEIR DATA PROCESSING PROGRAM THAT WERE NOT NEEDED IN THEIR PRESENT WORK[A]

TOTAL	87	100.0	32	36.8	55	63.2

[A]Opinions of only the terminees presently working in jobs directly related or somewhat related to their data processing training are reported. The terminees made the judgment as to whether or not their present job was directly related or somewhat related to their training.

[B]See listing, page 42, for equipment items in their data processing program terminees, who were working in present job directly related or somewhat related to their training, reported are not needed in their present work.

Of the 48 junior college data processing terminees presently working in directly related or somewhat related jobs, 18 (37.5%) reported that there were equipment items used in their program that were not needed in their present work. Thirty (62.5%) reported these were none.

Of the 87 vocational technical-institute data processing terminees presently working in directly related or somewhat related jobs, 32 (36.8%)

indicated that there were equipment items used in their program that were not needed in their present work. However, 55 (63.2%) reported there were none.

Below is listed, by institution attended, the equipment items the terminees who were presently working in directly related or somewhat related jobs reported were not needed in their present work:

Institution	Equipment Not Needed in Present Work
Junior Colleges	
Gadsden State Junior College	Cord sorter and card punch
Jefferson State Junior College	Unit record equipment Accounting machine and unit recording equipment Record keeping equipment Unit record lab machines Accounting machine Keypunch and computer readout Lab Equipment Accounting machines Small computer and out-dated unit record equipment Accounting machines 502 accounting machines IBM disk on IBM 1130 402-403 accounting machines Collator, computer, sorter
S. D. Bishop State Junior College	(None listed)
Vocational-Technical Institutes	
Alabama Institute for Deaf and Blind	(None listed)
Bessemer State Technical College	Qualified--my school data processing equipment not closely enough related to be comparable Card (punched) interpreter Printers, cardreader, punch Keypunch cards and machines--job has nothing to do with programming

(continued)

Institution	Equipment Not Needed in Present Job
Vocational-Technical Institutes (continued)

(continued)

Institution	Equipment Not Needed in Present Job
Vocational-Technical Institutes (continued)	
Trenholm State Technical College (continued)	Accounting machines, the sorter and reproducer Sorter Coding equipment Machines: 407 sorter, reproducer, keypunch machines, interpreting machines, wiring boards

Table 15 illustrates the opinions of the 1973-74 Post-Secondary Data Processing terminees presently working in directly related or somewhat related areas as to whether there are equipment items used in their present work that was not taught in their data processing program. Data is presented by individual institution attended by the terminees. Terminees also made the judgment as to the relatedness of their present job to their data processing program.

Of the 49 reporting junior college data processing terminees presently working indirectly related or somewhat related jobs, 32 (65.3%) indicated there are equipment items used on their present job that were not taught in their data processing program. Seventeen (34.7%) indicated there were none.

Of the 86 vocational-technical institute terminees presently working in directly related or somewhat related jobs, 39 (45.3%) reported there are equipment items used on their present job that were not taught in their data processing program. However, 47 (54.7%) said there were none.

TABLE 15

[A]Opinions of only the terminees presently working in jobs directly related and somewhat related to their data processing training are reported. The terminees made the judgment as to whether or not their present job was directly related or somewhat related to their training.

[B]See listing, page 46, of equipment items terminees, presently working in directly related or somewhat related areas, reported were used in their present work that was not taught in their data processing program.

Below is listed, by institution attended, the equipment items used in their present work that the terminees who were presently working in directly related or somewhat related areas reported were not taught in their data processing program:

Institution	Equipment Items Used in Present Work Not Taught in Data Processing Program
Junior Colleges	
Gadsden State Junior College	Sorters, console typewriter, keypunch 1255 magnetic ink character reader CRT Decolator, burster
Jefferson State Junior College	CRT tape drive Telecommunications hardware and processing T50 terminals, tape drives, 3330 disk driver 370-158, 3340's, 3211's, 6250 BPI tape drivers, microfilm units Tape drives, data terminals Fulton time-sharing JCL Systems-computer Tape units, paper tape, audio and CRT units Data-communications--visual Tape driver, console commands Punching systems and card printing systems Tape drives, systems communications, DOS Tape storage units IBM 1419, CRT units, tapes, disks Collator (card controller) UNIVAC 1001 Tape drives Advanced equipment Tape drives, TV screens 3420 tape drives, 3330 disk drives, OS The printer, card reader CRT terminals

(continued)

Institution	Equipment Items Used in Present Work Not Taught in Data Processing Program
S. D. Bishop State Junior College	Sorting, collating
Vocational-Technical Institutes	
Alabama Institute for Deaf and Blind	Machine No. 129
Bessemer State Tech. College	Terminal Burster IBM system 3, Model 15 Key tape Tape drives, IBM 1419 Tape drives, disk drives, (Software--JCL) Reader with two hoppers system 3 MFCU Terminals, printers, modems, telephone equipment, teletypes JCL, tape drives
George C. Wallace Community College (Technical Div.)	Combined check reader and sorter, burster, transmitting equipment
J. F. Drake State Tech. College	New keypunch machine Verifying machines
Lawson State Technical College	(None listed)
MacArthur State Tech. College	(None listed)
Muscle Shoals State Tech. College	Tape hardware Check porter, GE Computer, not IBM Magnetic tape drives Other than IBM equipment
Northwest State Technical College	(None listed)

(continued)

Institution	Equipment Items Used in Present Work Not Taught in Data Processing Program
Opelika State Technical College	Magnetic cassettes, mini computer 2402 tape drives, 370/155 computer Tape units There is so much, there is not space for me to list them all
Patterson State Tech. College	IBM 370, 3420 tape drives, 3330 disk, telecommunications Teletype terminals, tape drives, disk-pac drives, collators, accounting machines
Shelton State Technical College	Slow speed sorter, proof machine This generation of IBM equipment and language Univac 1110, Univac 9200
Trenholm State Technical College	Computers Filming Equipment We use different brands of machines and now use our own computer terminal

BASIC EMPLOYMENT INFORMATION

Basic Employment Information

The following section of this report offers information relative to employment and job characteristics of the 1973-74 Post-Secondary Data Processing terminees.

Table 16 illustrates the number of full-time jobs the responding terminees have had since leaving their Data Processing program.

TABLE 16

NUMBER OF FULL-TIME JOBS HELD BY THE 1973-74 POST-SECONDARY DATA PROCESSING OCCUPATIONS TERMINEES SINCE LEAVING THEIR DATA PROCESSING PROGRAM BY TYPE INSTITUTION TERMINEES HAD ATTENDED

Number of Full-Time Jobs Held	Total Number Terminees Indicating Number Jobs Held		Type Institution Terminee Attended			
			Junior College		Voc-Tech. Institute	
	No.	%[A]	No.	%[B]	No.	%[C]
One	192	40.9	69	45.1	123	38.8
Two	52	11.1	21	13.7	31	9.8
Three	8	1.7	3	2.0	5	1.6
Four	1	0.2	1	0.7	0	0.0
Five or more	2	0.4	1	0.7	1	0.3
TOTAL	255	54.3	95	62.2	160	50.5

[A]Percentage is based on the 470 terminees who returned the questionnaire.

[B]Percentage is based on the 153 junior college terminees who returned the questionnaire.

[C]Percentage is based on the 317 vocational-technical institute terminees who returned the questionnaire.

There were 192 (40.9%) of the total 470 responding 1973-74 Data Processing Occupations terminees who had been employed in just one job since leaving their Data Processing program. Sixty-nine (45.1%) of 153 junior college terminees and 123 (38.8%) of 317 vocational-technical terminees had held just one job.

Of the total 470 Data Processing Occupations terminees, 255 (54.3%) had held one or more jobs since leaving their data processing program. Ninety-five (62.2%) of the junior college terminees had held one or more jobs, while 160 (50.5%) of the vocational-technical terminees indicated that they had held one or more jobs since leaving their data processing program.

Table 17 reveals the first job employment status of Post-Secondary Data Processing terminees by the relatedness of training to their first job held.

Of the 470 responding Post-Secondary Data Processing terminees, 195 (41.5%) terminees first job after leaving their data processing program was full time. Thirty-seven (7.9%) terminees first jobs were on a part-time basis.

Of 153 responding junior college data processing terminees, 77 (50.3%) terminees first job after leaving their data processing program was full time. Thirteen (8.5%) terminees first jobs were on a part-time basis.

Of 317 responding vocational technical institute data processing terminees, 118 (37.3%) terminees first job after leaving their data processing program was full time. Twenty-four (7.5%) terminees first job were on a part-time basis.

Sixty-seven (14.3%) of the 470 responding terminees first jobs (full time or part time) were in an area directly related to the training they received in their data processing program. Seventy (14.9%) terminees

first jobs were in areas somewhat related to training received, while 95 (20.2%) terminees first jobs were in areas not related to the training received. The terminees made the judgment as to how their first job related to the training they received in their data processing programs.

TABLE 17

FIRST JOB STATUS OF 1973-74 DATA PROCESSING OCCUPATIONS TERMINEES BY RELATEDNESS OF TRAINING TO FIRST JOB BY TYPE INSTITUTION

Type Institution	First Job After Leaving Data Processing	Number Terminees Reporting		Relatedness of Training to First Job[D]					
				Directly Related		Somewhat Related		Not Related	
		No.	%	No.	%	No.	%	No.	%
Junior College[A]									
	Full-Time	77	50.3	24	15.7	20	13.1	33	21.5
	Part-Time	13	8.5	2	1.3	2	1.3	9	5.9
	TOTAL	90	58.8	26	17.0	22	14.4	42	27.4
Vocational-Technical Institute[B]									
	Full-Time	118	37.3	37	11.7	38	12.0	43	13.6
	Part-Time	24	7.5	4	1.3	10	3.1	10	3.1
	TOTAL	142	44.8	41	13.0	48	15.1	53	16.7
COMBINED (Jr. Col./ Voc.Tech.)									
	Full-Time	195	41.5	61	13.0	58	12.3	76	16.2
	Part-Time	37	7.9	6	1.3	12	2.6	19	4.0
	TOTAL	232	49.4	67	14.3	70	14.9	95	20.2

[A]Percentages based on the 153 (34.6%) of the 442 junior college terminees who returned the survey form.

[B]Percentages based on the 317 (41.8%) of the 759 vocational-technical institute terminees who returned the survey form.

[C]Percentages based on 470 (39.1%) of the total 1,201 data processing terminees who returned the survey form.

[D]The terminees made the judgment as to how their first job related to the data processing training they receoved.

Twenty-six (17.0%) of the responding 153 junior college data processing terminees first jobs (full or part time) were in an area directly related to the training they received in their data processing program. Twenty-two (14.4%) terminees first jobs were in areas somewhat related to training received, while 42 (27.4%) terminees first jobs were in areas not related to the training they received in their data processing programs.

Forty-one (13.0%) of the 317 responding vocational-technical institute terminees first jobs were in areas directly related to the training they received in their data processing program. Forty-eight (15.1%) terminees first jobs were in areas somewhat related to training received, while 53 (16.7%) terminees first jobs were in areas not related to the training they received in their data processing programs.

Of the 95 data processing terminees who indicated their first jobs were not related to their data processing program, 42 (44.2%) terminees were from junior college data processing programs, while 53 (55.8%) terminees were from vocational-technical institute data processing programs.

Of the 42 junior college terminees who indicated their first jobs were not related to their data processing training, 17 (40.5%) terminees indicated that before they accepted their unrelated job, they tried to get a job that was related to their data processing training. Twenty-two (52.4%) of the 42 terminees indicated that they did not try to get a job related to their training, while three (7.1%) of the terminees did not indicate whether or not they tried to get a job related to their area of training. See page 127 for list of reasons given by 13 of the 22 terminees who indicated they did not seek a job related to their data processing training prior to taking their first job.

Of the 53 vocational-technical institute terminees who indicated their first job was not related to their data processing training, 29 (54.7%) terminees indicated that before accepting their unrelated job, they tried to get a job that was related to their data processing training. Twenty (37.7%) of the 53 terminees indicated that they did not try to get a job related to their training, while four (7.6%) of the terminees did not indicate whether or not they tried to get a job related to their area of training. See page 128 for list of reasons given by 14 of the 20 terminees who indicated they did not seek a job related to their data processing training prior to taking their first job.

Table 18 shows the distribution of the 1973-74 Post-Secondary Data Processing Occupations terminees by the type school attended and OE Code by relatedness of their training to their first job held.

Of the 275 responding 1973-74 Data Processing Occupations terminees who indicated how their first job related to the training they received in their data processing program, 73 (26.5%) were employed in areas directly related to their training. Seventy-eight (28.4%) were employed in somewhat related areas, while 124 (45.1%) terminees were employed in areas not related to their training.

Of the 107 junior college data processing terminees who indicated how their first job related to the training they received in their data processing program, 24 (22.4%) were employed in areas directly related to their training. Twenty-eight (26.2%) were employed in somewhat related areas, while 55 (51.4%) terminees were employed in areas not related to their training.

[A]Persons who had not had a job since leaving their vocational program, including those in military service and those attending school, were asked not to respond to questions from which data were drawn. Returns were received from 470 terminees. Excluded also were those terminees who indicated they were unemployed or who failed to respond to the question.

[B]OE Code as reported by teachers.

[C]The terminees made the judgment as to how their first job was related to the training received in their data processing program.

[D]JC - Junior College

[E]VTI - Vocational technical Institute (Technical colleges, trade schools, technical institutes, and technical divisions which are part of community colleges)

NOTE: Percentages based on number of returns for each OE Code.

Of the 168 Vocational-Technical Institute Data Processing Occupations terminees who indicated how their first job related to the training they received in their data processing program, 49 (29.2%) were employed in areas directly related to their training. Fifty (29.7%) were employed in somewhat related areas, while 69 (41.1%) terminees were employed in areas not related to their training.

The largest group of Junior College Data Processing Occupations terminees studied in the area of computer and console operators (OE Code 14.0201). Of this group, 91 of the responding terminees indicated the relatedness of training to first job held. Of the 91 terminees, 19 (20.9%) terminees indicated their first job were in areas directly related to their training, 24 (26.4%) terminees indicated their first job was in an area somewhat related to training, and 48 (52.7%) terminees indicated their first jobs were in areas not related to the training they received in their data processing program.

The largest group of Vocational-Technical Institute Data Processing Occupations terminees studied in the area of computer programmers (OE Code 14.0203). Of this group, 85 of the responding terminees indicated the relatedness of training to first job held. Of the 85 terminees, 29 (34.1%) indicated their first jobs were in areas directly related to their training, 20 (23.5%) terminees indicated their first jobs were in areas somewhat related to their training, while 36 (42.4%) terminees indicated their first jobs were in areas not related to the training they received in their data processing program.

Table 18-A is a description of the total population and survey returns by OE Code area, by program length, by length of time terminees were enrolled in the program, and by relatedness of training to first job held by the 1973-74 Junior College Data Processing Occupations terminees.

[A]OE Code as reported by teachers

[B]The terminees made the judgment as to how their first job was related to the training they received in their data processing program

NOTE: Percentages based on number of returns for each OE Code.

Table 19 illustrates the current employment status of the responding terminees by the relatedness of their data processing training to their present jobs. Percentages related to junior colleges were based on 153 (34.6%) returns from 442 junior college Data Processing Occupations terminees. Percentages related to vocational-technical institutes were based on 317 (41.8%) returns from 759 vocational-technical institute Data Processing Occupations terminees. Percentages related to totals were based on the combined 470 (39.1%) returns from 1,201 reported Post-Secondary Data Processing Occupations terminees.

Of the 470 responding Post-Secondary Data Processing Occupations terminees, 233 (49.6%) were presently employed full time and not attending school or employed full time and attending school. Nineteen (4.1%) terminees were employed part time and attending school, 10 (2.2%) terminees were employed part time seeking full-time work and one (0.2%) terminee was employed part time not seeking full-time work. Fifty-eight (12.3%) terminees indicated that they were unemployed and actively seeking employment, while 26 (5.5%) were unavailable for employment (See page 73 for reasons terminees gave for being unavailable for employment).

Of the 153 responding Junior College Data Processing Occupations terminees, 97 (63.4%) were presently employed full time and not attending school or employed full time and attending school. Eight (5.3%) terminees were employed part time and attending school, one (0.7%) terminee was employed part time seeking full-time employment, and one (0.7%) terminee was employed part time not seeking full-time employment. Ten (6.5%) terminees were unemployed and actively seeking a job. While only two (1.3%) terminees indicated they were unavailable for employment, four junior college terminees indicated reasons for not being available for employment (See page 73 for reasons terminees gave).

	Jr. Col.	153	100.0	27	17.7	27	17.7	48	31.4	5	3.3
	Voc. Tech.	317	100.0	39	12.3	49	15.4	57	18.0	11	3.4

[A]Percentages related to junior colleges were based on 153 responding terminees. Percentages related to vocational-technical institutes were based on 317 responding terminees. Percentages related to total were based on combined (470) responding terminees. Terminees in active full-time military service or attending school full time and had never been employed were included in the "No Response" category.

[B]The terminees made the judgment as to how their present job was related to the training received in their high school vocational program.

[C]The unemployed and unavailable for employment categories do not include persons in the military service and persons who were in school full time and never had a job.

[D]See page 73 for the listing of reasons Data Processing Occupations terminees gave for being unavailable for employment.

[E]See page 133 for reasons terminees who were working in present job not related to vocational training gave for not seeking related job before accepting present job. Totals for unrelated columns may not correspond because terminees failed to respond to one of the two questions from which data was drawn.

Of the 317 responding vocational-technical institute Data Processing Occupations terminees, 136 (42.9%) were presently employed full time and not attending school or employed full time and attending school. Eleven (3.5%) terminees were employed part time and attending school, and nine (2.8%) terminees were employed part time and seeking full-time employment. Forty-eight (15.1%) terminees were unemployed and actively seeking employment, while 24 (7.6%) terminees indicated that they were unavailable for employment.

The "No Response" category in Table 19 includes three groups: (1) terminees in active full-time military service; (2) terminees who were in school full time and had never had a job; and (3) terminees who failed to respond to the item on the questionnaire.

Below is a list of reasons given by the terminees for being unavailable for employment:

Reason Indicated	JC	VTI
In school full time	4	13
Presently not working, not interested in job	0	1
Homemaker	0	11
Pregnancy	0	4
Illness or disability	0	3
Other	0	3

Of the 470 responding Post-Secondary Data Processing terminees, 66 (14.1%) were presently employed full time or part time in an area directly related to their data processing occupations training, 76 (16.2%) were presently employed full time or part time in an area somewhat related to their data processing occupations training, and 105 (22.4%) were employed in areas not related to their data processing training. The terminees made the judgment as to how their present employment was related to the training they received in their data processing occupations program.

Of the 153 responding junior college Data Processing Occupations terminees, 27 (17.7%) were presently employed full time or part time in an area directly related to their data processing occupations training, 27 (17.7%) were presently employed part time or full time in an area somewhat related to their data processing occupations training, and 48 (31.4%) were presently employed in areas not related to their data processing occupations training.

Of the 48 junior college Data Processing Occupations terminees who indicated they were working in areas not related to their data processing occupations training, 21 (43.8%) terminees indicated that before they accepted their unrelated job, they tried to get a job that was related to their vocational training. However, 23 (47.9%) of the terminees did not (See page 132 for list of reasons given by terminees for not seeking jobs related to their data processing occupations training).

Of the 317 responding vocational-technical institute Data Processing Occupations terminees, 39 (12.3%) were presently employed full time or part time in an area directly related to their data processing occupations training, 49 (15.4%) were employed part time or full time in an area somewhat related to their data processing occupations training, and 57 (18.0%) were presently employed in areas not related to their data processing occupations training.

Of the 57 vocational-technical institute Data Processing Occupations terminees who indicated they were working in areas not related to their data processing occupations training, 29 (50.9%) terminees indicated that before they accepted their unrelated job, they tried to get a job that was related to their vocational training. However, 27 (47.4%) terminees did not (See page 133 for list of reasons given by terminees for not seeking jobs related to their data processing occupations training).

Table 20 shows for the present job, by OE Code and type of school, the number of Post-Secondary Data Processing Occupations terminees employed by the relatedness of their data processing training to their present job.

Of the 1,201 Post-Secondary Data Processing Occupations terminees who indicated present employment, 440 (36.6%) terminees studied in the area of Computer and Console Operator, OE Code 14.0201, while 416 (34.6%) terminees studied in the area of Programmers. These two OE Codes represented the largest study groups in Data Processing Occupations.

Of the 440 terminees who studied in the area of Computer and Console Operator, OE Code 14.0201, 366 (83.2%) terminees studied data processing in junior colleges. Of the 336 junior college terminees who studied Computer and Console Operator, 89 (26.5%) indicated relatedness of training to present job. Of the 89 terminees who indicated relatedness of training to present job, 21 (23.6%) indicated they were working in an area directly related to their data processing training, 23 (25.8%) said they were working in an area somewhat related, and 45 (50.6%) said they were not working in an area related to their data processing training.

Of the 416 terminees who studied in the area of Programmer, OE Code 14.0203, 340 (81.7%) terminees studied data processing in a vocational-technical institute. Of the 340 vocational-technical institute terminees who studied the occupational area Programmer, 82 (34.1%) terminees indicated relatedness of training to present job. Of the 82 terminees who indicated relatedness of training to present job, 22 (26.8%) were presently employed in an area directly related to their data processing training, 26 (31.7%) were presently working in an area somewhat related to their training, and 34 (41.5%) said they were not employed in an area related to their data processing training.

[A]Persons who had not had a job since leaving their vocational program, including those in military service and those attending school, were asked not to respond to questions from which data were drawn. Returns were received from 470 terminees. Excluded also were those terminees who indicated they were unemployed or who failed to respond to the question.

[B]OE Code as reported by teachers.

[C]The terminees made the judgment as to how their present job was related to the training received in their data processing program.

[D]JC - Junior College

[E]VTI - Vocational-Technical Institute (Technical colleges, trade schools, technical institutes, and technical divisions which are part of community colleges)

NOTE: Percentages based on number of returns for each OE Code.

Table 20-A is a description of the total population and survey returns by OE Code area, by program length, by length of time terminees were enrolled in the program, and by relatedness of training to present job held by the 1973-74 Junior College Data Processing Occupation terminees.

Table 20-B is a description of the total population and survey returns by OE Code area by program length, by length of time terminees were enrolled in the program, and by relatedness of training to present job held by the 1973-74 Vocational Technical Institute Data Processing Occupations terminees.

Table 20-C is a description of the total population and survey returns by individual junior college, by OE Code area, and by relatedness of training to present job held by the 1973-74 Junior College Data Processing Occupations terminees.

Table 20-D is a description of the total population and survey returns by individual vocational-technical institute, by OE Code area, and by relatedness of training to present job held by the 1973-74 Vocational-Technical Institute Data Processing Occupations terminees.

TOTAL	229	100.0	81	100.0	148	100.0	214	100.0	86	100.0	128	100.0

Of 229 terminees reporting a salary for their first job, 48 (21.0%) indicated a salary range of under $250 per month. Nine (3.9%) terminees reported a first salary of over $700 per month. The median salary range for the first job fell in the range of $350 to $399 per month. The mean salary range for the first job also fell in the range of $350 to $399 per month.

Of the 81 Junior College terminees reporting a salary range for their first job, 16 (19.8%) indicated a range of under $250 per month. Eight (9.9%) terminees indicated a first salary of over $700 per month. The median salary range for the first job fell in the range of $350 to $399 per month. The mean salary range for the first job fell in the range of $400 to $450 per month.

Of the 148 Vocational-Technical Institute terminees reporting a salary range for their first job, 32 (21.6%) indicated a range of under $250 per month. Only one (0.7%) terminee indicated a first job salary of over $700 per month. The median salary range for the first job fell in the range of $350 to $399 per month. The mean salary range for the first job also fell in the range of $350 to $399 per month.

Of the 214 1973-74 Post-Secondary Data Processing Occupations terminees reporting a salary range for their present job, 33 (15.4%) indicated a present salary range of $400 to $449 per month. Forty (18.7%) terminees indicated that their present salary range was over $700 per month. The median salary range for their present job fell in the range of $450 to $499 per month. The mean salary range for the present job also fell in the range of $450 to $499 per month.

Of the 86 Junior College terminees reporting a present salary, 30 (34.9%) reported a present salary range of over $700 per month. Fifty-eight (67.5%) of the 86 terminees reported a salary range of over $500 per month. The median salary range for the present job fell in the range of $600 to $699 per month. The mean salary range was in the range of $500 to $599 per month. The present salary showed a substantial increase over the first salary as reported by the Junior College Data Processing Occupations terminees.

Of the 128 Vocational-Technical Institute terminees reporting a present salary, 23 (18.0%) reported a present salary range of $400 to $449 per month. Ten (7.8%) terminees indicated a first job salary of over $700 per month. The median salary range for the present job fell in the range of $400 to $449 per month. The mean salary range was also in the range of $400 to $449 per month. While the present salary is an increase over the first salary as reported by the Vocational-Technical Institute Data Processing Occupations terminees. It was not as large as the increase in present salary over first salary as that reported by Junior College Data Processing terminees.

Table 21-A indicates the first job salary ranges by relatedness of training and sex of the Post-Secondary Data Processing terminees.

Forty-six (20.6%) of the 223 responding terminees who indicated relatedness of training to first job employment reported that their first salary was under $250 per month. Of these 46 terminees, two (4.3%) males and nine (19.6%) females were employed in a job directly related to their data processing training, eight (17.4%) males and eight (17.4%) females were employed in jobs somewhat related to their training, while ten (21.7%) males and nine (19.6%) females were employed in jobs not related to their training.

Of the 223 responding terminees, 123 (55.2%) were males and 100 (44.8%) were females. Thirty-five (15.7%) males and 30 (13.5%) females were employed in jobs directly related to their data processing training, 36 (16.1%) males and 27 (12.1%) females were employed in jobs somewhat related to their training, while 52 (23.3%) males and 43 (19.3%) females were employed in jobs not related to their data processing training.

Of the 223 terminees indicating relatedness of training to first job, 79 (35.4%) were junior college terminees and 144 (64.6%) were vocational-technical institute terminees.

Of the 79 junior college terminees, 18 (22.8%) males and three (3.8%) females were employed in first jobs directly related to their data processing training, 18 (22.8%) males and two (2.5%) females were employed in first jobs somewhat related to their training, while 29 (36.7%) males and nine (11.4%) females were employed in first jobs not related to their data processing training.

	VTI	58	86	17	27	18	25	23	34

[A]The terminees made the judgment as to how their first job was related to the training received in their high school vocational program.

[B]Totals do not match those of Table 21 because some terminees did not respond to all questions.

Of the 144 vocational-technical institute terminees, 17 (11.8%) males and 27 (18.7%) females were employed in first jobs directly related to their data processing training, 18 (12.5%) males and 25 (17.4%) females were employed in first jobs in areas somewhat related to their training, while 23 (16.0%) males and 34 (23.6%) females were employed in first jobs not related to their data processing training.

Table 21-B indicates the present job salary ranges by relatedness of training and sex of the Post-Secondary Data Processing terminees.

TABLE 21-B

[A]The terminees made the judgment as to how their present job was related to the training received in their high school vocational program.

[B]Totals do not match those of Table 21 because some terminees did not respond to all questions.

Forty (19.0%) of the 211 responding terminees who indicated relatedness of training to present job employment reported that their first salary was over $700 per month. Of these 40 terminees, 16 (40.0%) males were employed in jobs directly related to their data processing training, ten (25.0%) males were employed in jobs somewhat related to their data processing training, while 14 (35.0%) males were employed in jobs not related to their data processing training.

Only four (4.8%) of 84 females were presently employed in jobs paying $600 or more per month, while 62 (48.8%) of the 127 males were presently employed in jobs paying $600 or more per month. No female was presently employed in a job paying $700 per month, while 40 (31.5%) of 127 males were presently employed in jobs paying more than $700 per month.

Of the 211 terminees indicating relatedness of training to present jobs, 127 (60.2%) were males and 84 (39.8%) were females. Thirty-eight (18.0%) males and 20 (9.5%) females were employed in jobs directly related to their data processing training, 37 (17.5%) males and 29 (13.8%) females were employed in jobs somewhat related to their training, while 52 (24.6%) males and 35 (16.6%) females were employed in jobs not related to their data processing training.

Of the 211 terminees indicating relatedness of training to present jobs, 86 (40.8%) were junior college terminees, while 125 (59.2%) were terminees of vocational-technical institutes.

Of the 86 junior college terminees, 22 (25.6%) males and three (3.5%) females were employed in present jobs directly related to their data processing training, 21 (24.4%) males and five (5.8%) females were employed in present jobs somewhat related to their training, while 29 (33.7%) males and six (7.0%) females were employed in present jobs not related to their data processing training.

Of the 125 vocational-technical institute terminees, 16 (12.8%) males and 17 (13.6%) females were employed in present jobs directly related to their data processing training, 16 (12.8%) males and 24 (19.2%) females were employed in jobs somewhat related to their training, while 23 (18.4%) males and 29 (23.2%) females were employed in jobs not related to their data processing training.

CONTINUING EDUCATION INFORMATION

Continuing Education Information

The following section of this report presents information relative to the continuing education of the 1973-74 Post-Secondary Data Processing Occupations terminees.

Table 22 shows the additional data processing training the 1973-74 Post-Secondary Data Processing Occupations terminees have taken part in since leaving their data processing program. Data is also reported by the type institution the terminees attended.

Of the 153 junior college data processing terminees, 66 additional data processing programs or courses had been taken. The additional courses or programs taken by the junior college terminees were as follows: 31, on-the-job training (employer-sponsored program); three, private data processing school programs; eight, university or four year college; 17, junior college; one, post-secondary vocational institute (trade school); one, specialized occupational military training; and five, other type courses or programs.

The following lists reports the other type data processing courses or programs the junior college terminees indicated they had taken:

1. P.I. Course
2. IBM School
3. IBM Training Center
4. CCF in Birmingham
5. IBM sponsored by the company I worked for

No junior college terminee reported taking more than one additional data processing course or program.

TABLE 22

ADDITIONAL DATA PROCESSING TRAINING 1973-74 POST-SECONDARY DATA PROCESSING TERMINEES PARTICIPATED IN SINCE LEAVING THEIR POST-SECONDARY DATA PROCESSING PROGRAM BY TYPE INSTITUTION TERMINEES ATTENDED

Type Training[B]	Total Taking Additional Training		Type Institution Terminees Attended			
			Junior College		Voc.-Tech. Institute	
	No.	%	No.	%	No.	%
On-the-job training (employer-sponsored program)	76	16.2	31	20.3	45	14.2
Private data processing school program	5	1.1	3	2.0	2	0.6
University or four year college	20	4.2	8	5.2	12	3.8
Junior college	29	6.2	17	11.1	12	3.8
Post-secondary vocational institute (trade school)	12	2.5	1	0.6	11	3.5
Specialized occupational military training	2	0.4	1	0.6	1	0.3
Other[C&D]	15	3.2	5	3.3	10	3.1
TOTAL	159	33.8	66	43.1	93	29.3

[A]All percentages are based on the total returns from terminees in the type category being explained. The total return was 470 for both type institutions, with 153 being from junior colleges and 317 being from vocational-technical institutes.

[B]The numbers represent courses or programs taken. Some terminees may have taken more than one course. No terminee from a junior college program took more than one additional data processing training program. However, six terminees from the vocational-technical institutes had taken two additional training programs and one terminee had taken three programs.

[C]See page 101 for the "Other" listing as specified by the junior college terminees.

[D]See page 103 for the "Other" listing as specified by the vocational-technical institute terminees.

Ninety-three additional data processing courses or programs had been taken by 317 vocational-technical institute terminees at the time they received the questionnaire. The additional courses or program taken by

the vocational-technical institute terminees were as follows: 45, on-the-job training (employer-sponsored program); two, private data processing school program; 12, university or four year college; 12, junior college; 11, post-secondary vocational institute (trade school); one, specialized occupational military training; and 10, other type courses or programs.

The following list reports the "Other" type data processing courses or programs the Voc.-Tech. Institute terminees indicated they had taken:

1. Terminal communication
2. Keypunching
3. Special classes on the job
4. Computer programming
5. Working on Associate Degree in Computer Science
6. Taking advance Cobal at some school
7. Univac 110 operator class
8. Keypunching
9. (No response)
10. (No response)

Six terminees from the vocational-technical institutes had taken two additional training programs and one terminee had been enrolled in three additional programs or courses.

Table 23 reports the type of schools or educational programs presently attended by the 1973-74 Post-Secondary Data Processing terminees by whether these programs were related to their post-secondary program. Data comparisons are also shown by the type post-secondary institution terminees had attended.

Of the total 470 terminees, 202 (43.0%) were presently continuing their education. One hundred thirty-one (27.9%) of the terminees were continuing their education in an area related to their data processing program and 71 (15.1%) were presently continuing their education in a non-related area.

TABLE 23

TYPE SCHOOLS OR EDUCATIONAL PROGRAMS PRESENTLY ATTENDED BY THE 1973-74 POST-SECONDARY DATA PROCESSING OCCUPATIONS TERMINEES BY WHETHER THESE PROGRAMS WERE RELATED TO THEIR POST-SECONDARY DATA PROCESSING PROGRAM BY TYPE INSTITUTION TERMINEES HAD ATTENDED

Type School or Educational Program Presently Attending	Total Terminees Presently Attending		Type Institution Previously Attended							
			Junior College[B]				Voc-Tech. Institute[C]			
			Program Related				Program Related			
			Yes		No		Yes		No	
	No.	%[A]	No.	%	No.	%	No.	%	No.	%
On-the-job training (employer-sponsored program)	7	1.5	3	2.0	0	0.0	1	0.3	3	1.0
Vocational-technical institute (trade school)	51	10.8	1	0.6	1	0.6	36	11.4	13	4.1
Junior college	95	20.2	52	34.0	19	12.4	15	4.7	9	2.8
Four year college or university	42	8.9	11	7.2	14	9.2	10	3.2	7	2.2
Private business or trade school	2	0.4	0	0.0	0	0.0	1	0.3	1	0.3
Other[D&E]	5	1.0	0	0.0	0	0.0	1	0.3	4	1.3
TOTAL	202	43.0	67	43.8	34	22.2	64	20.2	37	11.7

[A]Percentages are based on the total 470 terminees who returned questionnaires.

[B]Percentages are based on the total 153 junior college terminees who returned questionnaires.

[C]Percentages are based on the total 317 vocational-technical institute terminees who returned questionnaires.

[D]See page 105 for listing of "Other" schools or educational institutions attended by junior college terminees

[E]See page 105 for listing of "Other" schools or educational institutions attended by vocational-technical institute terminees.

Of the 153 junior college terminees, 101 (66.0%) were presently continuing their education. Sixty-seven (43.8%) were continuing their

education in a program related to their data processing program, while 34 (22.2%) were in a non-related program.

Of the 317 vocational-technical institute terminees responding, 101 (31.9%) were presently continuing their education. Sixty-four (22.2%) vocational-technical institute terminees were presently continuing their education in a school or program directly related to their data processing program, while 37 (11.7%) of the terminees were continuing their education in a non-related area.

Following is a listing of "Other" schools or programs presently attended by the vocational-technical institute terminees who indicated "Other" types than those listed by the researchers:

1. Talladega School for Deaf
2. American Institute of Banking
3. Commercial Foods
4. OIC
5. High school

Table 24 illustrates the educational programs presently attended by the 1973-74 junior college terminees by the OE Code area studied by whether it related to their data processing program. No attempt was made to report the no responses to the data items; therefore, many of the totals do not correspond.

Table 25 illustrates the educational programs presently attended by the 1973-74 vocational-technical institute terminees by OE Code area studied by whether it related to their data processing program. No attempt was made to report the no responses to the data items; therefore, many of the totals do not correspond.

TABLE 24

PROGRAMS PRESENTLY ATTENDED BY THE 1973-74 JUNIOR COLLEGE DATA PROCESSING TERMINEES BY OE CODE AREA STUDIED BY WHETHER IT RELATED TO THEIR DATA PROCESSING PROGRAMS[A]

OE Code	Occupational Title	Total Presently Continuing Education	Type School or Educational Program Presently Attending											
			On-the-Job Training		Voc. Tech. School		Junior College		4 Year College or Univ.		Private Business or Trade School		Other	
			Related	Not Related	Related	Not Related	Related	Not Related	Related	Not Related	Related	Not Related	Related	Not Related

Of the total 153 junior college terminees, only 35 (22.9%) reported that they would like no further data processing training. However, 93 (29.3%) of the 317 reporting vocational-technical institute terminees indicated they would like no further data processing training.

JOB PLACEMENT INFORMATION

Job Placement Information

The following section of this report presents information concerning job placement of the 1973-74 Post-Secondary Data Processing terminees before and after program termination.

Table 26 illustrates how the 1973-74 Post-Secondary Data Processing terminees, who had jobs while taking their data processing program, indicated they secured that job. Data is also shown by the type post-secondary institution they attended.

One hundred fifty-four (32.8%) of the 470 Post-Secondary Data Processing terminees indicated they had jobs while taking their data processing program. Seventy (45.8%) of the junior college data processing terminees reported having jobs while taking their program and 84 (26.5%) of the vocational-technical institute terminees indicate the same.

Eight (11.4%) data processing terminees from the junior colleges, who had a job while in the program, reported that their data processing instructor got that job for them, while 21 (25.0%) of the vocational-technical institute terminees who had jobs while in the program reported their instructor got that job for them.

Applications to business or industry and friends or relatives accounted for the two most important ways (50 percent) the terminees got jobs they had while enrolled in their data processing program.

TABLE 26

HOW THE 1973-74 POST-SECONDARY DATA PROCESSING TERMINEES, WHO HAD JOB WHILE TAKING DATA PROCESSING PROGRAM, INDICATED THEY SECURED THAT JOB

Who or What Helped Terminee Get Job?	Total		Type Institution Attended			
			Junior College		Voc.-Tech. Institute	
	No.	%	No.	%	No.	%
Your data processing instructor	29	18.9	8	11.4	21	25.0
Your counselor	1	0.6	1	1.4	0	0.0
Other instructors or administrators	3	1.9	1	1.4	2	2.4
Friend or relative	34	22.1	16	22.9	18	21.4
Applications to business or industry	43	27.9	22	31.4	21	25.0
State (local) employment office	4	2.6	2	2.9	2	2.4
Private employment agency	6	3.9	4	5.7	2	2.4
Radio, T.V., newspaper, or other news media	8	5.2	3	4.3	5	6.0
Other[A&B]	26	16.9	13	18.6	13	15.4
TOTAL	154	100.0	70	100.0	84	100.0

[A]See listing, page 118, for the "Other" ways the junior college terminees, who had job while taking their data processing program, indicated they got those jobs.

[B]See listing, page 119, for the "Other" ways the vocational-technical institute terminees, who had job while taking their data processing program, indicated they got those jobs.

The following list notes the "Other" ways the junior college data processing terminees revealed they secured the jobs they had while in the data processing program:

1. U.S.A.F.
2. Already had it
3. ARNG Technician
4. Myself
5. No help
6. Background and experience

(continued)

7. Father's business
8. Skills
9. Internship then part time
10. Transferred into computer department
11. Quality assurance analyst
12. Computer repair (15 years)
13. U.S.M.C.

Listed below are the "Other" ways the vocational-technical institute terminees noted they got the jobs they had while working and taking their data processing program:

1. Worked in father's office
2. Produce company
3. Application to the state
4. Already employed in executive capacity
5. Part time, not related to data processing

13. (No Response)

Table 27 illustrates how long it took the 1973-74 Post-Secondary Data Processing terminees to get their first full-time job after they left their data processing program and began seeking full-time employment. Data is also shown by the type institution they attended.

Of the junior college terminees who left their data processing program and began actively seeking full-time employment, 10 (29.4%) found jobs within two weeks, 11 (32.4%) found jobs within three to four weeks, six (17.6%) found jobs within five to twelve weeks, and seven (20.6%) found jobs within 13 or more weeks.

Of the vocational-technical institute terminees who left their data processing program and began actively seeking full-time employment, 36 (40.5%) found jobs within two weeks, 14 (15.7%) found jobs within

three to four weeks, 22 (24.7%) found jobs within five to twelve weeks, and 17 (19.1%) found jobs within 13 weeks or more.

TABLE 27

LENGTH OF TIME IT TOOK THE 1973-74 POST-SECONDARY DATA PROCESSING TERMINEES, BY THE TYPE INSTITUTION THEY ATTENDED, TO SECURE THEIR FIRST FULL-TIME JOB AFTER LEAVING THEIR PROGRAM AND BEGIN ACTIVELY SEEKING FULL-TIME EMPLOYMENT

Time to Secure First Full-Time Job	Total		Type Institution Attended			
			Junior College[A]		Voc.-Tech. Institute[B]	
	No.	%	No.	%	No.	%
0 - 2 weeks	46	37.4	10	29.4	36	40.5
3 - 4 weeks	25	20.3	11	32.4	14	15.7
5 - 8 weeks	17	13.9	5	14.7	12	13.5
9 - 12 weeks	11	8.9	1	2.9	10	11.2
13 or more weeks	24	19.5	7	20.6	17	19.1
TOTAL	123	100.0	34	100.0	89	100.0

[A]Sixty-one (39.9%) junior college data processing terminees indicated they already had a job when they left their data processing program.

[B]Eighty-nine (28.1%) vocational-technical institute terminees reported they already had a job when they left their data processing program.

Table 28 points out whether the 1973-74 Post-Secondary Data Processing terminees were seeking full-time employment when they left their data processing program, and if so, did their data processing instructor attempt to help them secure employment.

Of the total 470 1973-74 Post-Secondary Data Processing terminees, 249 (53.0%) indicated they were looking for jobs when they left their data processing program. Of the 249 terminees who were looking for

jobs, 132 (53.0%) indicated their data processing instructor made no attempt to help them secure employment.

TABLE 28

WHETHER THE DATA PROCESSING INSTRUCTORS ATTEMPTED TO HELP 1973-74 POST-SECONDARY DATA PROCESSING TERMINEES GET A JOB IF TERMINEES WERE SEEKING FULL-TIME JOB UPON LEAVING THEIR DATA PROCESSING PROGRAM

Data Processing Instructors Attempted to Get Terminee a Job	Total		Type Institution Attended			
			Junior College		Voc.-Tech. Institute	
	No.	%	No.	%	No.	%
Yes	117	47.0	20	31.7	97	52.2
No	132	53.0	43	68.3	89	47.8
TOTAL	249	100.0	63	100.0	186	100.0

Of the 153 junior college data processing terminees, 63 (41.2%) reported they were looking for jobs. Forty-three (68.3%) of the junior college data processing terminees who were looking for jobs indicated their data processing instructor made no attempt to help them find a job.

Of the total 317 vocational-technical institute terminees, 186 (58.7%) reported they were looking for a full-time job when they left their data processing program. Of the 186 terminees who were seeking a full-time job when they left their data processing program, 89 (47.8%) reported that their data processing instructor made no attempt to help them secure employment.

Table 29 illustrates how the 1973-74 Post-Secondary Data Processing terminees indicated they got their first full-time job after leaving their data processing program by the type institution they attended.

TABLE 29

HOW THE 1973-74 POST-SECONDARY DATA PROCESSING TERMINEES INDICATED THEY GOT THEIR FIRST FULL-TIME JOB AFTER LEAVING THEIR DATA PROCESSING PROGRAM BY THE TYPE INSTITUTION THEY ATTENDED

How Terminees Secured First Full-Time Job	Total		Type Institution Attended			
			Junior College		Voc.-Tech. Institute	
	No.	%	No.	%	No.	%
Through your data processing instructor	19	12.2	2	4.5	17	15.2
Through a counselor	6	3.9	0	0.0	6	5.4
Through other instructors or administrators	5	3.2	1	2.3	4	3.6
Through a friend or relative	40	25.7	15	34.1	25	22.3
Through applications to business or industry	48	30.8	10	22.8	38	33.9
Through state (local) employment agency	13	8.2	4	9.1	9	8.0

TOTAL	156	100.0	44	100.0	112	100.0

[A]See page 123 for the listing of "Other" ways junior college terminees reported they got their first job after leaving their data processing program.

[B]See page 123 for the listing of "Other" ways vocational technical institute terminees reported they got their first job after leaving their data processing program.

Of the 156 1973-74 Post-Secondary Data Processing terminees who reported how they got their first full-time job after leaving their data processing program, 48 (30.8%) indicated they got that job through applications to business and industry. Forty (25.7%) of the terminees reported getting their first full-time job after leaving the program through a friend or relative. These two methods represent the two

ways the largest number of Post-Secondary Data Processing terminees secured their first full-time job after leaving their data processing program. Only 19 (12.2%) of the terminees reported getting their first full-time job through their data processing instructor. As reported by the terminees, counselors accounted for getting only six (3.9%) terminees employment.

Of the junior college data processing terminees reporting how they got their first full-time job after leaving the program, data processing instructors were reported to have gotten only two (4.5%) terminees' jobs, while counselors got no terminees' jobs.

The following list reports the "Other" ways the junior college terminees revealed how they got their first full-time job after leaving their data processing program:

1. Cooperative Education counselor
2. Had previous job
3. Took state civil service test
4. Promoted to Data Processing
5. (No Response)
6. (No Response)
7. (No Response)

Of the vocational-technical institute terminees who reported how they got their first full-time job after leaving the program, data processing instructors were given credit for getting only 17 (15.2%) of the terminees' jobs, while counselors were reported as having gotten only six (5.4%) terminees' jobs.

The following list notes the "Other" ways the vocational-technical institute terminees reported they got their first full-time job after leaving their data processing program:

1. Worked there before
2. Supervisor
3. Asking

(continued)

4. Still employed at previous job
5. Ran down on the street
6. (No Response)

Table 30 reports the indications of the 1973-74 Post-Secondary Data Processing terminees, by type institution attended, as to where they looked for their first job before taking it by how their first job related to their training.

TABLE 30

INDICATIONS OF THE 1973-74 POST-SECONDARY DATA PROCESSING TERMINEES AS TO WHERE THEY LOOKED FOR THEIR FIRST JOB BEFORE TAKING ONE BY HOW THEIR FIRST JOB RELATED TO THEIR TRAINING

Type Institution Attended by Where Terminees Looked for Employment Before Taking First Job	Total Reporting		Total Reporting by Relatedness of First Job to Data Processing Training					
			Directly Related		Somewhat Related		Not Related

TOTAL	125	100.0	36	100.0	38	100.0	51	100.0

See listing, page 125 for reasons junior college terminees gave for seeking their first job beyond daily walking or driving distance of their home.

See listing, page 125 for reasons vocational-technical institute terminees gave for seeking their first job beyond daily walking or driving distance of their home.

Only five (11.9%) of the 42 junior college terminees and 10 (19.6%) of the vocational-technical institute terminees who reported taking jobs in areas unrelated to their data processing program noted that they sought their first job beyond daily walking or driving distance of home.

The following list of reasons is what the vocational-technical institute data processing terminees gave for seeking a job beyond daily walking or driving distance of home before taking their first job:

1. None available
2. No jobs near home
3. No jobs within driving distance
4. Could not find one around here
5. No jobs in home town

Table 31 reports the indications of the 1973-74 Post-Secondary Data Processing terminees who worked in their first jobs not related to their data processing training by whether or not they tried to get a job related to their training by where they looked for employment before they accepted their first job. Data is also presented by the type institution they attended.

Only three (7.7%) of the 39 junior college data processing terminees who were working in a non-related area reported seeking related employment beyond daily walking or driving distance of home.

The following list reports the reasons the junior college data processing terminees whose first job was not related to their training, but who sought a job related to their data processing training, gave for not getting their first job in a related area:

1. None available and experience
2. Wrong training; job used tape computer
3. Not enough experience
4. Not enough experience
5. None available
6. No experience
7. No openings
8. Not qualified

TABLE 31

INDICATIONS OF THE 1973-74 POST-SECONDARY DATA PROCESSING TERMINEES WORKING IN FIRST JOBS NOT RELATED TO THEIR TRAINING BY WHETHER OR NOT THEY TRIED TO GET A JOB RELATED TO THEIR TRAINING BY WHERE THEY LOOKED FOR EMPLOYMENT BEFORE ACCEPTING FIRST JOB

By Type Institution Attended, Where Terminees Working in Non-Related Areas Looked for Employment Before Accepting First Job	Total		Before Accepting This First Job Unrelated to Training Whether Terminees Sought Job in Related Area			
			Yes[A&C]		No[B&D]	
	No.	%	No.	%	No.	%

Sought employment within daily walking or driving distance of home	39	79.6	22	75.9	17	85.0
Sought employment beyond daily walking or driving distance of home	10	20.4	7	24.1	3	15.0
TOTAL	49	100.0	29	100.0	20	100.0

See listing, page 127, for reasons junior college terminees working in non-related jobs, but sought employment in related areas, gave for not securing job in related area.

See listing, page 127, for reasons junior college terminees working in non-related jobs, and who did not seek related employment, gave for not seeking related employment.

See listing, page 128, for reasons vocational-technical institute terminees working in non-related jobs, but sought employment in related areas, gave for not securing job in related area.

See listing, page 128, for reasons vocational-technical institute terminees working in non-related jobs, and who did not seek related employment, gave for not seeking related employment.

Listed below are the reasons the junior college data processing terminees whose first job was unrelated to their data processing training and who did not try to get a job related to their training gave for not attempting to get related employment:

1. Not enough training
2. Office work mostly typing
3. Did not complete course
4. Did not have any training
5. Already had job
6. Did not have qualifications
7. Only thing I could find
8. Not looking for EDP
9. Didn't finish course
10. Work in bank--balancing control
11. Job in production
12. Was not in E.O.P.
13. Took up drafting

Only seven (14.3%) of the 49 vocational-technical institute terminees who were working in non-related areas reported seeking related employment beyond daily walking or driving distance of home.

The following list reports the reasons the 1973-74 vocational-technical institute terminees whose first job was not related to their training but who sought a job related to their data processing training gave for not getting their first job in a related area:

1. Couldn't find one available
2. I couldn't find one
3. Could not find one
4. Didn't have opening yet
5. There was no opening in this field
6. Someone else picked
7. Not interested in finding a job in that field
8. Wasn't hiring
9. Not enough jobs in D.P.
10. No openings at the time and no job experience
11. Money and distance from home
12. None to be found

Listed below are the reasons the 1973-74 vocational-technical institute terminees whose first job was unrelated to their data processing

training and who did not try to get a job related to their training gave for not attempting to get a related job:

1. Low pay
2. Already had a job
3. Not interested
4. Did not complete course
5. I hadn't planned to work until this job came up and I took it
6. Already had this job
7. Because there weren't any available
8. Had job while in porgram
9. I did not like data processing
10. Not satisfied with field
11. Wasn't available
12. I didn't think I was qualified
13. Attended four year college for more training
14. Didn't want that kind of job

Table 32 reports the indications of the 1973-74 Post-Secondary Data Processing terminees, by type institution attended, as to where they looked for their present job before taking it by how their present job related to their training.

Of the 41 junior college data processing terminees who had a present job in an unrelated area, only six (14.6%) looked for a job beyond daily walking or driving distance of home before they took that present job.

Listed below are the reasons offered by the junior college data processing terminees for looking for a job away from home:

1. No jobs in that area
2. I live in the country
3. Because of opening in my field
4. No jobs available in home town
5. More job opportunities in other town
6. Needed employment

Only 12 (26.1%) of the 46 vocational-technical institute terminees who had present jobs unrelated to their data processing training, reported that they looked for a job beyond daily walking or driving distance of home.

TABLE 32

INDICATIONS OF THE 1973-74 POST-SECONDARY DATA PROCESSING TERMINEES AS TO WHERE THEY LOOKED FOR THEIR PRESENT JOB BEFORE TAKING THEIR PRESENT JOB BY HOW THEIR PRESENT JOB RELATED TO THEIR TRAINING

[A]See listing, page 130, for reasons junior college terminees gave for seeking their present job beyond daily walking or driving distance of their home.

[B]See listing, page 130, for reasons vocational-technical institute terminees gave for seeking their present job beyond daily walking or driving distance of their home.

Listed below are the reasons the 1973-74 vocational-technical institute terminees gave for seeking a job beyond daily walking or driving distance of home before accepting their present job:

1. No job openings near home
2. No jobs in home town
3. A larger city
4. I looked everywhere. No possibility or location was refused
5. I was interviewed in _____(city)_____
6. To find a job
7. Nothing in field close to home
8. Nothing close by
9. Better pay, just to get a job
10. No computers in home town
11. No jobs available within driving distance
12. Financial independence
13. Only place available
14. Where recommended to me
15. Only place available
16. Montgomery IBM
17. I moved

Table 33 reports the indications of the 1973-74 Post-Secondary Data Processing terminees who worked in their present jobs not related to their data processing training by whether or not they tried to get a job related to their training by where they looked for employment before they accepted their present job. Data is also presented by the type institution they attended.

Only three (8.3%) of the 36 junior college data processing terminees who were working in non-related areas indicated that they sought related employment beyond daily walking or driving distance of home.

Listed below are the reasons the 1973-74 junior college data processing terminees whose present job was not related to their training, but who sought a job related to their data processing training, gave for not getting their present job in a related area:

Reasons	Number
Could not find job in field	6
Not enough training	3
Trained on old IBM card--job had tape computer	1
No experience	8

(continued)

Reasons	Number
Not qualified	2
Unknown	1
I didn't finish the course	1
Found better paying job	1

[A]See listing, page 130, for reasons junior college terminees working in non-related jobs, but sought employment in related areas gave, for not securing job in related area.

[B]See listing, page 132, for reasons junior college terminees working in non-related jobs, and who did not seek related employment, gave for not seeking related employment.

[C]See listing, page 132, for reasons vocational-technical institute terminees working in non-related job, but sought employment in related areas, gave for not securing job in related area.

[D]See listing, page 133, for reasons vocational-technical institute terminees working in non-related jobs, and who did not seek related employment, gave for not seeking related employment.

Below are listed the reasons the junior college data processing terminees whose present job was not related to their data processing training and who did not try to get a related job gave for not seeking related employment:

Reasons	Number
Did not feel properly trained or qualified	8
Didn't want a change	6
No related job available	2
Was not qualified	2
Lost interest	2
Did not complete course	1
Not enough pay	1
Taught on obsolete IBM 130 equipment	1
Illness in family had to have any job	1
People said things but didn't back-up offers	1
Just needed to earn to finish school in any job	1

Only ten (22.7%) of the 44 vocational-technical institute terminees working in non-related area reported seeking related employment beyond daily walking or driving distance of home.

Listed below are reasons the 1973-74 vocational-technical institute terminees whose present jobs were in areas not related to their data processing training gave for not getting their present job in a related area:

Reasons	Number
Could not find job in field	14
Needed experience	4
Not enough training	2
Was not sure what I wanted	2
Had job in Data Processing but didn't like it	1
Because of my race	1
Not needed--not too many data processing jobs	1
Because I went to _____ community college	1
Because I did not have a college degree and three years experience	1
The college I attended was not accredited	1

Below are listed the reasons the vocational-technical institute terminees, whose present job was not related to their data processing training and who did not seek related employment, gave for not seeking a related job:

Reasons	Number
No jobs available	5
Still had same job that I started with	4
Still in school	3
Didn't want job related to data processing	2
Did not complete course	2
Changed interest	2
Worked for father	1
Low pay	1
Didn't try	1
Selected secretarial	1
Not enough training at the time	1
Did not feel qualified	1
Not enough experience	1

APPENDIX

PRESENT JOB AND FIRST JOB TITLES OF THE 1973-74 DATA PROCESSING OCCUPATIONS TERMINEES

PRESENT JOB AND FIRST JOB TITLES OF THE 1973-74 DATA PROCESSING OCCUPATIONS TERMINEES

For those terminees who indicated present or first job occupations, this appendix lists the present job title and first job title by their school vocational training area (OE Codes). The job titles are listed as the terminees reported them. The number of full-time jobs held by these terminees since completing their high school vocational course is listed, current employment status is listed, and whether the student intended to get a job in the area while in the program.

The following code is used to identify the employment status of the terminees:

0. Unemployed, but seeking employment
1. Employed full time
2. Employed part time, seeking full-time job
3. Employed part time, not seeking full-time job
4. Employed full time and attending school
5. Employed part time and attending school
6. Unavailable for employment

The following code is used to identify whether the student intended to get a job in the area while in the program:

1. No
2. Was not sure
3. Yes

The number in parenthesis behind the job titles indicates the relatedness of the school vocational training to these jobs. The terminees made

the judgment as to the relatedness of their training to these jobs. The following code is used to identify this relatedness:

1. Directly related
2. Somewhat related
3. Not related

The total in each occupational title area may not correspond to the total in each OF Code as listed in Table 1. Some of the terminees failed to indicate the title of their present position. If the first job title was the same as the present job title, the first job title is included under the present job title.

Junior College Job Titles

JUNIOR COLLEGES

OE Code 14.0201 - Gadsden State Junior College

No.	Employment Status	Full-Time Jobs Held Since Data Processing Course	Intent of Employment in Area	Present Job	First Job

QUESTIONNAIRE

JUNIOR COLLEGE STUDENT COMMENTS RECEIVED
WITH COMPLETED QUESTIONNAIRES

Mr. Faulkner:

In regard to the questionnaire I received from you, I need to tell you that I changed subjects at school and I am no longer in data processing. I only took that course for six weeks and I changed to low enforcement. So, I couldn't honestly fill out the questionnaire. And don't think I would if I could help in anyway.

Thank you,

Mr. Faulkner:

I am currently undertaking the data processing program at _____ Junior College and don't feel that this questionnaire should apply to me yet after finishing. If you still want it completed, return it.

Sincerely,

Gentlemen:

Enclosed is the questionnaire sent to us. If you have any free materials that you feel may be helpful to our Data Processing Program at _____, please send them to us. Thank you.

Sincerely,

Dear Mr. Faulkner:

I attended junior college for only one quarter. Because of the small training I had in Data Processing, I do not think the questionnaire applies to me. The job I have now is no where related to Data Processing. I am sorry I can't help you.

I can tell you that I truly enjoyed the small amount of training that I did receive. My instructor was very good.

Sincerely,

VOCATIONAL-TECHNICAL INSTITUTE STUDENT COMMENTS
RECEIVED WITH COMPLETED QUESTIONNAIRES

I received a confidential letter from you. I am glad you want to know. I been didn't find job since finished Business College for seven months. My friend help me find job at _____, but I don't like work there because small pay a month. I just first job with training on keypunch, but I hope can get better other job with large earn money, but I hard find one. I hope I can succeed better soon. I am deaf. I still hope I can find better job with good pay.

Thank,

(Letter typed as received from student)

_____ is in the Army. Entered in September of 1974.

To whom it may concern:

I can not complete this form because I have not completed my course as yet. Second, I am not a "Former Data Processing Student." When I do complete the course, I will be glad to complete it at that time.

Dear Sir:

I was not in the data processing class, but I would be interested to know if you have a course in radio broadcasting and an on-the-job training program.

Thank you,

To whom it may concern:

The program I participated in at _____ State Technical in keypunch was excellent and the instructors very good. However, I feel that they have an unrealistic attitude about the job market.

There are very few keypunch jobs without experience, and even with experience the pay is pathetic. I am currently making $90 a week posting payments part of the day and keypunch part of the day. I have no chance for advancement and no hope of ever making more than $100 a week.

Thank you,

Dear Sir:

Please read the attached questionary before reading this letter. The data processing course here at _____ Technical College was and is an excellent one. I graduated with an A- after 17 months of full time study. I was to say the least tremendously interested in this field as a career, however and most unfortunately, this was not to be.

I graduated in May of 1974. I spent the next seven months looking for a job. I applied at literally hundreds of places locally and nationwide. In addition I enlisted the aid of two private employment agencies all to no avail. The real reason that I did not get a job as a computer programer is that employers want and can get college graduates (degreed) with at least three years experience. They dont care how good you work record is or how much training you have had.

Even after seven months of futil effort I still haven't given up. I have been enrolled in an accounting and bookkeeping course at the same school since Oct 1974. Accounting is related to data processing so this may help. To my knowledge only one student that has graduated from the computer programing course since 1972 has obtained employment as a programer. Obviously I dont think this justifies the continuation of this course of instruction here at _____ Technical College. I would surely be interested in any follow up comments that you may have.

Sincerely,

(Letter typed as received from student)

TITLE: DISTRIBUTIVE EDUCATION OCCUPATIONS FOLLOW-UP. FOLLOW-UP OF 1973-74 DISTRIBUTIVE EDUCATION OCCUPATIONS TERMINEES FROM THE SECONDARY SCHOOL VOCATIONAL PROGRAMS OF ALABAMA. RESEARCH AND DEVELOPMENT REPORT NO. 31.

PERSONAL AUTHOR: BURKS, BONNIE J.; DRAKE, JAMES BOB

DESCRIPTOR: *DISTRIBUTIVE EDUCATION; *VOCATIONAL FOLLOWUP; *OCCUPATIONAL SURVEYS; *STATE SURVEYS; *SECONDARY EDUCATION; VOCATIONAL EDUCATION

IDENTIFIER: ALABAMA

EDRS PRICE: MF AND HC AVAILABILITY WILL BE ANNOUNCED IN VOL. 10, NO. 2.

DESCRIPTIVE NOTE: 112P.; RELATED DOCUMENTS VT 103 321 THROUGH VT 103 335 IN THIS ISSUE.

ABSTRACT: THIS REPORT RELATES THE FINDINGS OF A STATEWIDE FOLLOWUP SURVEY OF 1973-74 DISTRIBUTIVE EDUCATION OCCUPATIONS TERMINEES FROM THE SECONDARY SCHOOL VOCATIONAL PROGRAMS OF ALABAMA. QUESTIONNAIRES WERE MAILED TO 2,400 STUDENT TERMINEES APPROXIMATELY SEVEN TO EIGHT MONTHS AFTER LEAVING SCHOOL. RETURNS WERE RECEIVED FROM 712 (29.7 PERCENT) DISTRIBUTIVE EDUCATION OCCUPATIONS TERMINEES FROM THE INITIAL MAILING AND ONE FOLLOWUP. DATA ARE PRESENTED IN TABLES WITH ACCOMPANYING NARRATIVE SUMMARIES ORGANIZED ACCORDING TO THESE MAJOR SECTIONS: GENERAL INFORMATION ON THE TERMINEES; BASIC INFORMATION RELATED TO THE VOCATIONAL EDUCATION PROGRAM; BASIC EMPLOYMENT INFORMATION; CONTINUING EDUCATION INFORMATION; AND JOB PLACEMENT INFORMATION. PRESENT AND FIRST JOB TITLES OF THE 1973-74 DISTRIBUTIVE EDUCATION OCCUPATIONS TERMINEES ARE APPENDED. (NJ)

For their help in refining the survey instrument, special thanks are due the following state supervisors:

Mrs. Divina Bauer, Health Occupations Education
Miss Evelyn Cotney, Home Economics Education
Mr. H. W. Green, Agribusiness Education
Mr. J. C. Lindley, Trade & Industrial Education
Mrs. Anacile Kurth, Distributive Education
Mrs. Sandra Yelverton, Business and Office Education

Appreciation is also extended to the following members of the Occupational Research and Development Unit for their contribution to the study:

Mr. Paul Davis, Research Associate
Mr. Gary Greenshields, Graduate Research Assistant
Mr. John Gross, Research Associate
Mr. James McMath, Graduate Research Assistant
Miss Flossi Sergen, Secretary
Mr. Ed Williams, Duplicating Operator

FOLLOW-UP OF 1973-74 DISTRIBUTIVE EDUCATION OCCUPATIONS TERMINEES FROM THE SECONDARY SCHOOL VOCATIONAL PROGRAMS OF ALABAMA

Alabama continues to support one of the most progressive and comprehensive vocational education programs in the nation. In addition to serving youth and adults by training them for gainful and useful employment, the diversification of vocational courses meets a serious job need and contributes to the industrial development in the state.

With the millions of tax dollars being spent on vocational education, it is necessary to attempt to account to the taxpayer and decision-makers on the results of those expenditures. Terminee student follow-up studies constitute one of the most valuable techniques for assessing vocational education system outcomes.

The Alabama State Department of Education, Division of Vocational Education and Community Colleges, recognizing this important phase of accountability and evaluation, initiated the development of a statewide follow-up system for its vocational education program terminees at the secondary school level. The Division, under the direction of Dr. T. L. Faulkner, State Director, contracted with the Occupational Research and Development Unit at Auburn University to develop and implement the statewide follow-up system for all its secondary vocational terminees in all service areas.

This report relates the findings of the survey instrument mailed to the 1973-74 Distributive Education Occupations terminees from the

secondary school vocational programs of Alabama. When the terminees received the questionnaire, most had been out of school seven to eight months.

General Information

Student rosters with names and addresses of 1973-74 Distributive Education Occupations terminees were received from 89 secondary school vocational teachers in Alabama. Of the 89 teachers from which student rosters were received, 12 were in Secondary Area Vocational Centers (AVC) and 77 were in programs in schools of other settings. The total 2400 student terminees reported to the ORDU were mailed the follow-up forms. Returns were received from 712 (29.7%) Distributive Education Occupations terminees from the initial mailing and one follow-up. At least one student questionnaire was received from each of the 89 teachers.

All terminees reported in this study were in programs administered only by the Distributive Education, Section of the Division of Vocational Education and Community Colleges, State Department of Education.

Table 1 presents data relative to the total population of Distributive Education Occupations terminees and the number of returns categorized by OE codes as reported by teachers.

TABLE 1

DESCRIPTION OF TOTAL POPULATION AND RETURNS
BY OE CODE OF 1973-74 DISTRIBUTIVE
EDUCATION OCCUPATIONS TERMINEES[A]

OE Code[B]	Occupational Title	Total Number of Students	Percent of Health Students by OE Code	Number of Returns	Percent of Returns for OE Code Area
04.0000	Distributive Education	41	1.7	7	17.1
04.0100	Advertising	35	1.5	16	45.7
04.0200	Apparel & Accessories	261	10.9	100	38.3
04.0300	Automotive	109	4.5	32	29.4

TABLE 1 (continued)

OE Code[B]	Occupational Title	Total Number of Students	Percent of Health Students by OE Code	Number of Returns	Percent of Returns for OE Code Area
14.0300	Filing, Office Machines, and General Office Clerical Occupations	3	0.1	1	33.3
14.0402	Correspondence Clerks	1	0.0	0	0.0
14.0406	Receptionists and Information Clerks	1	0.0	1	100.0
	TOTAL ALL AREAS	2400	100.0	712	29.7

[A]These terminees were in programs administered only under the Distributive Education Section of the Division of Vocational Education and Community Colleges, State Department of Education.

[B]OE Codes as reported by teachers.

[C]Other OE Codes were indicated by Distributive Education instructors that did not fall within the Distributive Education categories.

Of the 1973-74 Distributive Education Occupations terminees reported by the teachers, the largest number in any OE code was in the occupational title area of General Merchandise. This 552 represented 23.0 percent of the reported Distributive Education Occupations terminees. There were 496 (20.7%) terminees listed as studying Food Distribution, 267 (11.1%) as studying Food Services, and 261 (10.9%) as studying Apparel & Accessories. The combined enrollment of General Merchandise, Food Distribution, Food Services and Apparel & Accessories was 1576. This represented 66.7 percent of the total enrollment in the Distributive Education Occupations area.

Table 1A is a description of the total population and returns by OE Code area, type school, and termination status of the 1973-74 Distributive Education Occupations terminees.

Basic Information Related to the Vocational Education Program

Table 6 points out the number of 1973-74 Distributive Education Occupations terminees who indicated whether this vocational program was a school requirement.

TABLE 6

1973-74 DISTRIBUTIVE EDUCATION OCCUPATIONS TERMINEES WHO INDICATED WHETHER THEIR VOCATIONAL PROGRAM WAS A SCHOOL REQUIREMENT

Vocational Courses Was a School Requirement	Number	Percent
Yes	20	2.8
No	687	96.5
No Response	5	0.7
TOTAL	712	100.0

Table 7 indicates, according to the 1973-74 Distributive Education Occupations terminees, the primary source of influence in selecting their vocational course.

Another student in the VED Program appeared to be the greatest outside influence on terminees (12.5%) enrolling the Distributive Education program. Sixty-eight (9.6%) of the terminees responding indicated their vocational teacher influenced them most in selecting their Distributive Education course. Sixty terminees (8.4%) indicated that a friend or relative influenced them most in selecting their program, and 38 (5.3%) of the terminees indicated their parents or guardians influenced them most in selecting their course in Distributive Education. However, 396 (55.7%) indicated they selected their course of study on their own.

TABLE 7

PRIMARY INFLUENCES ON THE 1973-74 DISTRIBUTIVE EDUCATION OCCUPATIONS TERMINEES IN SELECTING THEIR VOCATIONAL COURSE

Group or Individual Terminees Felt Influenced Them Most in Selecting Vocational Course	Number	Percent
Parent(s) or Guardian(s)	38	5.3
Guidance Counselor	32	4.5
Your Vocational Teacher	68	9.6
Another Teacher or Principal	5	0.7
Student in VED Program	89	12.5
A Friend or Relative	60	8.4
A Businessman	12	1.7
Made Choice Yourself	399	56.0
Other[A]	8	1.1
No Response	1	0.1
TOTAL	712	100.0

[A]See below for listing of "Others" who influenced Distributive Education terminees in selecting their VED course.

Below is the response given to the "Others" category indicated in Table 7 as the primary source of influence in selecting the vocational course.

"Other" Persons or Groups Who Most Influenced Terminees in Selecting Their VED Course	Number
Junior Achievement	1
Only one offered	1
I needed a job	2
Only way to get out early	1
Got on program to keep summer job full time	1
Had to for me to graduate	1
Money & position	1
	8

Table 8 indicates terminees' opinions as to whether they had adequate job or occupational information and school experiences to make as realistic career choice.

TABLE 8

OPINIONS OF 1973-74 DISTRIBUTIVE EDUCATION OCCURATIONS TERMINEES AS TO WHETHER THEY HAD ADEQUATE JOB OR OCCUPATIONAL INFORMATION AND SCHOOL EXPERIENCES TO MAKE A REALISTIC CAREER CHOICE

	Number	Percent
Yes	502	70.5

No Response	12	1.7
TOTAL	712	100.0

Table 9 indicates whether, during the time they were taking their high school vocational program, the reporting 1973-74 terminees intended to get a job in their area of study.

TABLE 9

INDICATIONS OF 1973-74 DISTRIBUTIVE EDUCATION OCCUPATIONS TERMINEES AS TO WHETHER, DURING THE TIME THEY WERE TAKING THEIR HIGH SCHOOL VED PROGRAM, THEY PLANNED TO GET A JOB IN THEIR AREA OF STUDY

Intended To Get Job In Area of Study	Number	Percent
Yes	312	43.8
No	151	21.2
Was Not Sure	244	34.3
No Response	5	0.7
TOTAL	712	100.0

It is interesting to note that only 312 (43.8%) of the 1973-74 reporting Distributive Education Occupations terminees indicated that during the time they were taking their Distributive Education Occupations program, they intended to get a job in the area they were studying.

Table 10 indicates terminees' opinions on choosing the Distributive Education Occupations program if they had the selection to make again.

A noteworthy point was revealed by the data. Of the 1973-74 Distributive Education Occupations terminees, 521 (73.2%) indicated they would select the same vocational program if they had the choice to make again. Sixty-six (9.3%) of the responding terminees indicated they would not take a vocational program.

TABLE 10

OPINIONS OF 1973-74 DISTRIBUTIVE EDUCATION OCCUPATIONS TERMINEES REGARDING THEIR VOCATIONAL PROGRAM

Question: If You Had It To Do Over Again, Would You . .?	Number	Percent
Take the same vocational program	521	73.2
Not take a vocational program	66	9.3
Choose another vocational program offered in your school, such as _____ [A]	69	9.7
Choose another vocational program if it had been offered in your school, such as _____ [B]	41	5.8
No Response	15	2.1

Table 11 indicates the extent to which the reporting 1973-74 Distributive Education Occupations terminees felt their high school vocational programs prepared them for their first job. This data was also broken down by how that first job related to their vocational program.

Terminees who were in full-time active military service or who had never been employed were not asked to respond to the questions from which this data was reported. Also, the terminees who failed to respond to the question items were not indicated in the table.

TABLE 11

PERCEPTIONS OF THE 1973-74 DISTRIBUTIVE EDUCATION OCCUPATIONS TERMINEES AS TO THE EXTENT THEIR HIGH SCHOOL VOCATIONAL PROGRAM PREPARED THEM FOR THEIR FIRST FULL-TIME JOB BY HOW FIRST FULL-TIME JOB RELATED TO TRAINING

Extent Vocational Course Prepared for First Full-Time Job	Total Reporting		Number Reporting by Relatedness of First Full-Time Job to Training Received					
			Directly Related		Somewhat Related		Not Related	
	No.	%	No.	%	No.	%	No.	%
Excellent	54	15.1	30	26.8	14	10.1	10	9.3

TOTAL	358	100.0	112	100.0	138	100.0	108	100.0

In noting the extent to which the 1973-74 Distributive Education Occupations terminees felt their high school vocational course prepared them for their first full-time job by how their first full-time job related to the training they received in their high school health program, some interesting points were revealed. Of the 1973-74 Distributive Education Occupations terminees responding to this item, 195 (54.5%) indicated "Excellent" or "Well Prepared" for their first full-time job as a result of the training received in their high school vocational education program. Ninety-five (84.8%) of the 112 terminees whose first full-time job related directly to their training felt they were excellent or well prepared for this first job. Only two terminees

working in an area directly related to their vocational training felt that they were poorly prepared for their first jobs. One additional terminee indicated he was working in an area directly related to his vocational course but felt that his preparation did not relate to his job. Of all the responding terminees, seventeen (4.7%) felt they were poorly prepared for their first full-time job. Of these 17, only two were working in an area directly related to his vocational course.

Table 12 indicates the extent to which the reporting 1973-74 Distributive Education Occupations terminees felt their high school vocational course prepared them for their present job. Also shown in the table is a breakdown of the data by how their present job was related to their vocational program.

Terminees in active full-time military service and students attending school full time and had not had a job were not asked to respond to the question from which Table 12 was prepared. Also, students who failed to respond to the items were not shown on the table.

Of the 461 terminees responding to these items, 245 (53.2%) indicated "Excellent" or "Well Prepared" for their present job as a result of their high school vocational program. Only 18 (3.9%) felt poorly prepared for their present jobs as a result of their training.

Of the 153 responding terminees working in an area directly related to their high school vocational program, 128 (83.6%) indicated they felt excellent or well prepared by their training.

TABLE 12

PERCEPTIONS OF THE 1973-74 DISTRIBUTIVE EDUCATION OCCUPATIONS TERMINEES AS TO THE EXTENT THEIR HIGH SCHOOL VOCATIONAL COURSE PREPARED THEM FOR THEIR PRESENT JOB BY HOW THEIR PRESENT JOB RELATED TO TRAINING

Extent Vocational Course Prepared for Present Job	Total Reporting		Number Reporting by Relatedness of Present Job to Training Received

Preparation not related to job	130	28.2	4	2.6	24	14.5	102	71.3
TOTAL	461	100.0	153	100.0	165	100.0	143	100.0

[A]See listing below for reasons terminees specified for only being trained "Fair" by their vocational course for their present job.

Sixty-eight (14.8%) terminees indicated "Fair" as the extent their vocational program prepared them for their present jobs. The following list presents reasons the 1973-74 Distributive Education Occupations terminees indicated for being trained only "Fair" by their vocational course for their present job:

Reason Given	Number
Already had a job	3
Not enough materials and supplies	6
Inadequate time and materials	2
Not enough information	2
Course too general	6
Not advanced enough	2

(continued)

(continued)

Reason Given	Number
Not related	9
Somewhat related	2
Most training on the job	2
Not in same type job now	2
Instructor not interested	2
Little classroom work or instruction	1
Taught me public relations	1
Learned by experience	1
Worked at night full time--had hard time studying	1
Not enough material on grocery store bookkeeping	1
Very little sales	1
No preparation in jewelry	1
Selling of ads	1
Not much training supplied	1
Changed departments	1
Just helped to apply for a job	1
Didn't know what to expect	1
Did some woodwork	1

Eighteen (3.9%) indicated they were "poorly prepared" for their present job by their vocational program. The following list is the reasons the terminees gave to explain their rating the program "poor":

Teacher not interested - 2
Most information was useless
Didn't learn job in school
Does not refer to present job
Teacher did not relate to banking
Teacher almost never tried to teach anything
Studies related to sales; work related to secretarial
No equipment
I took something in sales and got a job in medical work
I learned everything on the job
Wrong kind of materials text
No training
Too many students for one instructor

Table 13 focuses on the Distributive Education Occupations student club. The researchers sought to determine the extent to which the 1973-74 Distributive Education Occupations terminees felt that their high school student club aided in preparing them for their present job. Data are also broken down by the relationship of the present job to the vocational training received.

TABLE 13

PERCEPTIONS OF 1973-74 DISTRIBUTIVE EDUCATION OCCUPATIONS TERMINEES AS TO THE EXTENT THEIR HIGH SCHOOL VOCATIONAL STUDENT CLUB PREPARED THEM FOR THEIR PRESENT JOB BY HOW THEIR PRESENT JOB RELATED TO TRAINING

Extent High School Vocational Student Club Helped Prepare for Present Job	Total Reporting		Total Reporting by Relatedness of Present Job to Vocational Training					
			Directly Related		Somewhat Related		Not Related	
	No.	%	No.	%	No.	%	No.	%
Excellent	65	16.0	30	20.3	19	12.2	16	15.3
Well Prepared	144	35.5	63	42.6	50	32.3	31	30.1
Fair	116	28.5	39	26.3	49	31.6	28	27.3
Poorly Prepared	81	20.0	16	10.8	37	23.9	28	27.3
TOTAL	406	100.0	148	100.0	155	100.0	103	100.0

Of the 466 who responded, 23 (4.9%) had no related student club available, and 37 (7.9%) were not members of a related student club.

Only respondents who had had a job since terminating their high school vocational Distributive Education program were asked to respond to the question reported in Table 13. Students in active full-time military service were excluded. Twenty-three (4.9%) of the 466 terminees reported no related student club was available, while 37 (7.9%) were not members of a related student club.

Of the 406 terminees who participated in student club activities, 209 (51.5%) indicated they were "Excellent" or "Well Prepared" by their related student clubs for their present job. Eighty-one (20.0%) indicated they were "Poorly Prepared" by their related student clubs for their present job. Of those 81, 16 (19.8%) were in related jobs, while 37 (45.6%)

were in somewhat related jobs. Twenty-eight (34.6%) were in non-related jobs.

Of those terminees working in an area directly related to the training they received in their high school vocational program, 93 (62.9%) indicated they were "Excellent" or "Well Prepared" for their present job by their related student club. Only 16 (10.8%) of the 148 terminees working in a job directly related to the training they received indicated they were "Poorly Prepared" for their present jobs by their related student clubs.

Table 14 reports how the 1973-74 Distributive Education Occupations terminees rated the quality of teaching by their high school vocational instructors.

TABLE 14

1973-74 DISTRIBUTIVE EDUCATION OCCUPATIONS TERMINEES' RATINGS OF THE QUALITY OF TEACHING BY THEIR HIGH SCHOOL VOCATIONAL INSTRUCTORS

Rating	Number	Percent
Excellent	256	36.0
Good	281	39.5
Fair	111	15.6
Poor	41	5.7
Very Poor	19	2.7
No Response	4	0.5
TOTAL	712	100.0

Of the 712 reporting 1973-74 Distributive Education Occupations terminees, 537 (75.5%) rated the quality of teaching by their vocational instructor either "Good" or "Excellent." Sixty (8.4%) rated the quality of teaching by their instructors "Poor" or "Very Poor."

Table 15 illustrates how the 1973-74 Distributive Education Occupations terminees rated their high school vocational instructor's interest in their class work.

TABLE 15

1973-74 DISTRIBUTIVE EDUCATION OCCUPATIONS TERMINEES' RATINGS OF THEIR HIGH SCHOOL VOCATIONAL INSTRUCTOR'S INTEREST IN THE STUDENT'S CLASS WORK

Rating	Number	Percent
Excellent	303	42.6
Good	248	34.8
Fair	101	14.2
Poor	43	6.0
Very Poor	15	2.1
No Response	2	0.3
TOTAL	712	100.0

Of the 712 reporting 1973-74 Distributive Education Occupations terminees, 551 (77.4%) rated the interest exhibited by their high school vocational instructor in their class work as "Good" or "Excellent." Fifty-eight (8.1%) of the terminees rated the interest their vocational instructors showed in their class work as "Poor" or "Very Poor."

Table 16 points out how the 1973-74 Distributive Education Occupations terminees subjectively rated the knowledge their vocational teachers possessed about their field of study. This rating is also shown in the table by a breakdown of how the terminees present jobs related to the training they received in their high school vocational program. Terminees were asked to base their judgments on their current knowledge of their jobs and responsibilities.

TABLE 16

1973-74 DISTRIBUTIVE EDUCATION OCCUPATIONS TERMINEES' RATINGS OF THE KNOWLEDGE THEIR HIGH SCHOOL VOCATIONAL TEACHER POSSESSED ABOUT THEIR FIELD OF STUDY BY HOW THE TERMINEES' PRESENT JOB RELATED TO THE TRAINING THEY RECEIVED

Ratings[A]	Total Reporting		Number Reporting by Relatedness of Present Job to Training Received					
			Directly Related		Somewhat Related		Not Related	
	No.	%	No.	%	No.	%	No.	%
Excellent	137	28.8	57	36.6	41	24.3	39	26.0
Good	196	41.3	63	40.4	73	43.2	60	40.0
Fair	112	23.6	32	20.5	46	27.2	34	22.7
Poor	25	5.3	3	1.9	8	4.7	14	9.3
Very Poor	5	1.0	1	0.6	1	0.6	3	2.0
TOTAL	475	100.0	156	100.0	169	100.0	150	100.0

[A]Ratings were to be based on terminee's judgment of their current knowledge of their job and responsibilities.

Total responses to this item indicates that 333 (70.1%) of the 475 responding 1973-74 Distributive Education Occupations terminees rated the knowledge their vocational teachers possissed about their field of study either "Good" or "Excellent." Of the 156 terminees working in an area directly related to the training they received, 120 (77.0%) rated the knowledge their teachers possessed about their field of study as "Good" or "Excellent." A favorable point was revealed in that only 4 (2.5%) of those terminees rated the knowledge their vocational teachers possessed about their field of study as "Poor" or "Very Poor."

If the respondent was working in an area related to his training, he was asked to compare the facilities and equipment in his high school vocational program with those on his present job. Table 17 illustrates how the 1973-74 Distributive Education Occupations terminees responded.

TABLE 17

HOW 1973-74 DISTRIBUTIVE EDUCATION OCCUPATIONS TERMINEES WORKING IN A RELATED AREA RATED THE FACILITIES AND EQUIPMENT IN THEIR HIGH SCHOOL VOCATIONAL PROGRAM[A]

Rating[B]	Number	Percent
Better than those on present job	23	8.7
Similar to those on present job	104	39.4
Not as good as those on present job	137	51.9
TOTAL	264	100.0

[A]Of the responding 497 terminees, 233 (46.9%) indicated that their present job was not related to their vocational training enough to compare facilities and equipment.

[B]Persons who had not had a job since leaving their vocational program, including those in military service and those who attended school, were asked not to respond to questions from which data was drawn. Returns were received from 712 terminees.

Twenty-three (8.7%) of the 264 responding 1973-74 Distributive Education Occupations terminees working in an area related to their training rated the facilities and equipment in their high school vocational program as better than those on their present jobs. One hundred four (39.4%) rated the facilities and equipment in their high school vocational programs as similar to those on their present jobs; however, 137 (51.9%) rated the facilities and equipment not as good as those on their present jobs.

Table 18 shows how the 1973-74 Distributive Education Occupations terminees who were in a cooperative work program in school and were now

working in an area related to their vocational training rated the facilities and equipment used in their cooperative work station.

TABLE 18

HOW 1973-74 DISTRIBUTIVE EDUCATION OCCUPATIONS TERMINEES NOW WORKING IN A RELATED AREA, WHOSE VOCATIONAL PROGRAMS INCLUDED COOPERATIVE WORK, RATED FACILITIES AND EQUIPMENT USED IN THEIR COOPERATIVE WORK STATIONS

Rating	Number	Percent
Better than those on present job	15	6.6
Similar to those on present job	63	27.7
Working at same place where cooperative training was done	91	40.1
Not as good as those on present job	58	25.6
TOTAL	227	100.0

Fifty-three (11.3%) of the responding 471 Distributive Education Occupations terminees indicated their vocational program was not a cooperative program. As 191 (40.6%) terminees indicated they were not working in an area related to their cooperative work, they did not complete this item on the questionnaire.

Persons who had not had a job since leaving their vocational program, including those in military service and those attending school, were asked not to respond to questions from which data was drawn. Returns were received from 712 terminees.

Only 15 (6.6%) of the 227 responding 1973-74 Distributive Education Occupations terminees whose vocational programs had included cooperative work and were now working in an area related to their vocational training rated the facilities and equipment in his cooperative work station as better than those on his present job. Sixty-three (27.7%) rated the facilities and equipment in their cooperative training stations as similar to those on their present jobs. Fifty-eight (25.6%) rated the facilities and equipment in their cooperative work station not as good as those in

their present jobs. It was significant to note that 91 (40.1%) indicated they were working at the same establishments where they did their cooperative training.

Basic Employment Information

The following section of this report offers information relative to employment and job characteristics of the 1973-74 secondary Distributive Education Occupations terminees.

Table 19 illustrates the number of full-time jobs the responding 1973-74 Distributive Education Occupations terminees have had since leaving their high school vocational course.

TABLE 19

NUMBER OF FULL-TIME JOBS HELD BY THE 1973-74 DISTRIBUTIVE EDUCATION OCCUPATIONS TERMINEES SINCE LEAVING THEIR HIGH SCHOOL VOCATIONAL COURSE

Number of Full-Time Jobs Held	Number	Percent[A]
One	342	48.0
Two	72	10.1
Three	17	2.4
Four	3	0.4
Five or more	4	0.6
TOTAL	438	61.5

[A]Percentage is based on the 712 terminees who returned the questionnaire.

There were 342 (48.0%) of the total 712 responding 1973-74 Distributive Education Occupations terminees who had been employed in just one job since leaving their high school vocational program; 72 (10.1%) had two full-time jobs since leaving high school. Twenty-four (3.4%) of the

terminees reported having three or more jobs since leaving their high school vocational courses seven to eight months ago.

Table 20 reveals the first-job employment status of Distributive Education Occupations terminees who returned the survey by the relatedness of their vocational training to their first job.

TABLE 20

FIRST-JOB EMPLOYMENT STATUS OF DISTRIBUTIVE EDUCATION OCCUPATIONS TERMINEES (1973-74) BY RELATEDNESS OF VOCATIONAL TRAINING TO FIRST JOB[A]

First Job After Leaving High School Vocational Program	Total Reporting		Relatedness of Vocational Training to First Job[B]					
			Directly Related		Somewhat Related		Not Related[C]	
	No.	%	No.	%	No.	%	No.	%
Full-Time	366	51.4	114	16.0	141	19.8	111	15.6
Part-Time	126	17.7	55	7.7	42	5.9	29	4.1
TOTAL	492	69.1	169	23.7	183	25.7	140	19.7

[A]All percentages were based on the 712 (29.7%) of 2400 terminees who returned the survey form.

[B]The terminees made the judgment as to how their first job was related to the training received in their high school vocational program.

[C]See page 33 for reasons terminees who were working in first job unrelated to this vocational training gave for not seeking job that was related before accepting their first job.

Of the 712 responding 1973-74 Distributive Education Occupations terminees, 366 (51.4%) were employed full time in their first job after leaving their high school vocational program, and 126 terminees' first jobs were on a part-time basis.

Of the 712 responding terminees, 126 (17.7%) held first jobs (full-time or part-time) in an area directly related to the training they

received in their high school vocational course; 183 (25.7%) were employed in an area somewhat related; and 140 (19.7%) were employed in a first job not related to the training they received. The terminees made the judgment as to how their first job was related to the training they received in their high school vocational program.

Of the 146 terminees who indicated their jobs were not related to their vocational course, 51 (34.9%) terminees indicated that before they accepted their unrelated job, they tried to get a job that was related to their vocational training. However, 95 (65.1%) of the terminees did not. (Note: the 146 terminees reported here does not match the total in Table 20 because some respondees failed to complete the question on full-time or part-time status.)

The following is a list of reasons given by the terminees who, before taking their first unrelated job indicated they did not seek a job that was related to their vocational training.

Reasons	Number
Wanted work in a different field	15
Not interested	10
Low pay	10
Already had job & didn't want to change	6
Received no training	3
No job available	2
Had better offer	2
Didn't like the work	2
Quit trying to find related job	1
Didn't know where to look	1
DECA	1
Nursing child	1
Trying to make enough money to leave	1
Wanted change of pace	1
Travel	1
Teacher	1
Was pushed into it	1

Table 21 shows by OE Code for the first job of the 1973-74 Distributive Education Occupations terminees the relatedness of their training to this first job.

TABLE 21

[A]Of 2400 Distributive Education Occupations terminees, 712 (29.7%) returned the questionnaire.

[B]The terminees made the judgment as to how their first job was related to the training received in their high school vocational program.

Of the 508 responding 1973-74 Distributive Education Occupations terminees who indicated how their first job related to the training they

received in their high school vocational program, 173 (34.1%) were employed in directly related areas; 187 (36.8%) were employed in somewhat related areas; and 148 (29.1%) terminees were employed in areas not related to their training. The terminees made the judgment as to how their first job was related to the training received in their high school vocational program.

Of the 121 employed 1973-74 terminees who studied Food Distribution (OE Code 04.0600) and indicated relatedness of training, 44 (36.3%) were employed in an area directly related to that training. Fourteen (31.8%) were employed in their first job in an area somewhat related to their training, and 18 (40.9%) of these responding terminees indicated that their first job was not related to the training they received in their Distributive Education Occupations program. Of the 98 terminees who studied General Merchandise (OE Code 04.0800), 29 (29.6%) were employed in jobs directly related to their training. Forty-four (44.9%) were employed in jobs somewhat related, and 25 (25.5%) were employed in jobs not related to their training.

Table 21A is a description of 1973-74 Distributive Education Occupations terminees' first job by OE code area studied, number of returns, type school, termination status, and relatedness of training.

[A] OE Code areas as reported by teachers
[B] Area Vocational Centers
[C] Any terminee who left the program by completing or by high school graduation
[D] Any terminee who the instructor reported as having dropped out of school
[E] The terminees made the judgment as to how their first job was related to the training received in their high school vocational porgram

Table 22 illustrates the current employment status of the responding terminees by the relatedness of their vocational training to their present jobs. All percentages figured in the table were based on the 712 (29.7%) returns from the 2400 Distributive Education Occupations terminees.

Of the 712 responding 1973-74 secondary Distributive Education Occupations terminees, 316 (44.3%) were presently employed full time and not attending school or employed full time and attending school. One hundred six (14.9%) of the terminees were employed part time and attending school, while 61 (8.6%) were unavailable for employment. (See page 46 for reasons terminees were unavailable for employment). Sixty-four (9.0%) of the terminees were unemployed and actively seeking employment, while 18 (2.5%) were employed part time and seeking full-time employment.

The "No Response" category in Table 22 includes three groups: (1) terminees in active full-time military service; (2) terminees who were in school full time and had never had a job; and (3) terminees who failed to respond to the item on the questionnaire.

Of the 712 secondary Distributive Education Occupations respondees, 146 (20.5%) were presently employed full time or part time in an area directly related to the training received in their high school vocational course. One hundred fifty-six (21.9%) were employed either part time or full time in an area somewhat related to their training, while 139 (19.5%) were employed in areas not related to training. The terminees made the judgment as to how their present employment was related to the training received in their high school vocational course.

TABLE 22

CURRENT EMPLOYMENT STATUS OF DISTRIBUTIVE EDUCATION OCCUPATIONS TERMINEES (1973-74) BY RELATEDNESS OF TRAINING TO PRESENT JOB[A]

Employment Status	Total Respond-ing		Relatedness of Training to Present Job[B]							
			Directly Related		Somewhat Related		Not Related[E]		Employed No Response	
	No.	%	No.	%	No.	%	No.	%	No.	%
Employed full time and not attending school	236	33.1	61	8.6	77	10.8	94	13.2	4	0.6
Employed full time and attending school	80	11.2	29	4.1	30	4.2	20	2.8	1	0.1
Employed part time and seeking full-time job	18	2.5	7	1.0	7	1.0	4	0.6	0	0.0
Employed part time and not seeking full-time job	12	1.7	5	0.7	4	0.6	2	0.3	1	0.1
Employed part time and attending school	106	14.9	44	6.2	38	5.3	19	2.7	5	0.7
Unemployed (actively seeking a job)[C]	64	9.0	N/A		N/A		N/A		N/A	
Unavailable for employment[C&D]	61	8.6	N/A		N/A		N/A		N/A	
No Response	135	19.0	N/A		N/A		N/A		N/A	
TOTAL	712	100.0	146	20.5	156	21.9	139	19.5	11	1.5

[A]All percentages were based on the 712 (29.7%) respondents of the total 2400 terminees. Terminees in active full-time military service or attending school full time and had never been employed were included in the "No Response" category.

[B]The terminees made the judgment as to how their present job was related to the training received in their high school vocational program.

[C]The unemployed and unavailable for employment categories do not include persons in the military service and persons who were in school full time and never had a job.

[D]See page 46 for the listing of reasons Distributive Education Occupations terminees gave for being unavailable for employment.

[E]See page 46 for reasons terminees who were working in present job not related to vocational training gave for not seeking related job before accepting present job. Totals for unrelated columns may not correspond because terminees failed to respond to one of the two questions from which data was drawn.

Below is a list of the reasons given by the terminees for being unavailable for employment. Some respondees indicated two reasons:

Reason	Number
In school full time	39
Presently not working, not interested in a job	2
Homemaker	12
Pregnancy	11
Illness or disability	1
Other	6

Of the 151 terminees who indicated their present jobs were not related to their vocational course, 51 (33.8%) terminees indicated that before they accepted their unrelated job, they tried to get a job that was related to their vocational training. However, 107 (70.9%) of the terminees did not. (The percentages are based on the responses as recorded on the questionnaires).

The following is a list of reasons given by 94 of the 107 terminees who, before taking their present unrelated job, indicated they did not seek a job that was related to their vocational training:

Reason	Number
Wanted different type work	25
Not enough money	19
Not interested	18
Already had a job	14
No job available	5
Not enough training in related jobs	4
Not sure of what I wanted to do	3
Had better job offer	2
Needed to take first job available	2
In school	1
Moved	1

Table 23 shows for the present job, by OE code, the number of 1973-74 secondary Distributive Education Occupations terminees employed by the relatedness of their vocational training to their present job.

	TOTAL ALL AREAS	477	66.9	156	21.9	170	23.8	151	21.2

[A]All percentages were based on the 712 (29.7%) of the 2400 terminees who returned the questionnaire. (Due to rounding, the percentage may not add to the total indicated).

[B]Terminees made the judgment as to how their first job was related to training received in their high school vocational program.

Of the 477 secondary Distributive Education Occupations terminees who indicated present employment, 110 (15.4%) who studied in the area of Food Distribution (Co-op), OE Code 04.0600, were employed. This represented the largest number of employed terminees that studied in any OE Code area.

Of the 110 terminees presently employed that studied Food Distribution, 46 (41.8%) were employed in an area directly related to the training received in their high school vocational program. Twenty-eight (25.5%) terminees who studied in Food Distribution indicated their present job was not related to their high school vocational training. The terminees made the judgment as to how their present job related to the training received in their high school vocational program.

Table 23A is a description of 1973-74 Distributive Education Occupations terminees' present job by OE code area studied, number of returns, type school, termination status, and relatedness of training.

[A]OE Code areas as reported by teachers
[B]Area Vocational Centers
[C]Any terminee who left the program by completing or by high school graduation
[D]Any terminee who the instructor reported as having dropped out of school
[E]The terminees made the judgment as to how their first job was related to the training received in their high school vocational program.

Table 24 indicates the first job salary ranges as compared to the present job salary ranges for the 1973-74 Distributive Education Occupations terminees.

TABLE 24

FIRST-JOB SALARY RANGES AND PRESENT-JOB SALARY RANGES FOR 1973-74 DISTRIBUTIVE EDUCATION OCCUPATIONS TERMINEES

Salary Ranges	First Job		Present Job	
	No.	%	No.	%
Under $250	274	57.4	127	29.8
$250 - $299	65	13.6	61	14.3
$300 - $349	56	11.7	49	11.5
$350 - $399	26	5.5	47	11.0
$400 - $449	26	5.5	49	11.5
$450 - $499	10	2.1	26	6.1
$500 - $599	7	1.5	30	7.0
$600 - $699	4	0.8	20	4.7
$700 or more	9	1.9	17	4.0
TOTAL	477	100.0	426	100.0

Of the 477 terminees reporting a salary range for their first job, 274 (57.4%) indicated a range of under $250 per month. Thirteen terminees reported a first salary of over $600 per month. The median salary range for the first job fell in the range of under $250 per month. The mean salary range for the first job also fell in the range of $250 - $299 per month.

Of the 426 1973-74 Distributive Education Occupations terminees reporting a salary range for their present job, 127 (29.8%) indicated under $250 per month. This salary range was indicative of the mode of the reporting students. The median and mean salary ranges for the present job also fell within the range of $350 - $399 per month. The

median and mean salary ranges of present jobs over first jobs indicate an increase for the reporting Distributive Education Occupations terminees.

Table 24A indicates the first-job salary ranges by relatedness of training and sex of the Distributive Education Occupations terminees.

TABLE 24A

FIRST-JOB SALARY RANGES BY RELATEDNESS OF TRAINING OF 1973-74 DISTRIBUTIVE EDUCATION OCCUPATIONS TERMINEES BY SEX

Salary Ranges	Sex of Terminees Responding		Relatedness of Training to First Job[B]					
			Directly Related		Somewhat Related		Not Related	
	Male	Female	Male	Female	Male	Female	Male	Female
Under $250	138	125	44	49	59	43	35	33
$250 - $299	36	23	14	7	11	10	11	6
$300 - $349	33	21	13	6	12	8	8	7
$350 - $399	16	10	3	3	10	5	3	2
$400 - $449	21	4	7	3	6	1	8	-
$450 - $499	9	1	2	-	5	1	2	-
$500 - $599	7	-	3	-	1	-	3	-
$600 - $699	4	-	1	-	-	-	3	-
$700 or more	8	1	-	-	1	1	7	-
TOTAL[A]	272	185	87	68	105	69	80	48

[A]Totals do not match those of Table 24 because some terminees did not respond to all questions.

[B]The terminees made the judgment as to how their first job was related to the training received in their high school vocational program.

Of the 457 responding terminees 263 (57.5%) were employed at less than $250 per month. Of these 263 terminees, 44 (16.7%) males and 49 (18.6%) females were employed in a job directly related to their training; 59 (22.4%) males and 43 (16.3%) females were employed in jobs somewhat related to their training; while 35 (13.3%) males and 33 (12.5%) females were employed in jobs not related to their training.

Of the 457 responding terminees, 272 (59.5%) were males and 185 (40.5%) were females. Eighty-seven (19.0%) males and 68 (14.9%) females were employed in jobs directly related to their vocational training; 105 (23.0%) males and 69 (15.1%) females were employed in jobs somewhat related to their training; while 80 (17.5%) males and 48 (10.5%) females were employed in jobs not related to their training.

Table 24B indicates the present-job salary ranges by relatedness of training and sex of the Distributive Education Occupations terminees.

TABLE 24B

PRESENT-JOB SALARY RANGES BY RELATEDNESS OF TRAINING OF 1973-74 DISTRIBUTIVE EDUCATION OCCUPATIONS TERMINEES BY SEX

Salary Ranges	Sex of Terminees Responding		Relatedness of Training to Present Job[B]					
			Directly Related		Somewhat Related		Not Related	
	Male	Female	Male	Female	Male	Female	Male	Female
Under $250	54	69	18	25	23	31	13	13
$250 - $299	23	31	9	14	8	11	6	6

$600 - $699	20	-	3	-	7	-	10	-
$700 or more	16	1	3	-	3	1	10	-
TOTAL[A]	251	160	77	57	88	64	86	39

[A]Totals do not match those of Table 24 because some terminees did not respond to all questions.

[B]The terminees made the judgment as to how their present job was related to the training received in their high school vocational program.

Of the 411 responding terminees, 123 (29.9%) were employed at less than $250 per month. Of these 123 terminees, 18 (14.6%) males and 25 (20.3%) females were employed in a job directly related to their training;

23 (18.7%) males and 31 (25.2%) females were employed in jobs somewhat related to their training; while 13 (10.6%) males and 13 (10.6%) females were employed in jobs not related to their training.

Of the 411 responding terminees, 251 (61.1%) were males and 160 (38.9%) were females. Of these 411 terminees, 77 (18.7%) males and 57 (13.9%) females were employed in jobs directly related to their vocational training; 88 (21.4%) males and 64 (15.6%) females were employed in jobs somewhat related to their training; while 86 (20.9%) males and 39 (9.5%) females were employed in jobs not related to their training.

Continuing Education Information

The following section of this report presents information relative to the continuing education of the 1973-74 secondary Distributive Education Occupations terminees.

Table 25 shows the vocational educational training opportunities terminees have participated in since leaving their high school vocational program.

TABLE 25

ADDITIONAL VOCATIONAL EDUCATIONAL TRAINING 1973-74
SECONDARY DISTRIBUTIVE EDUCATION OCCUPATIONS
TERMINEES PARTICIPATED IN SINCE LEAVING
THEIR HIGH SCHOOL VOCATIONAL PROGRAM[A]

Type Training	Number	Percent[B]
On-the-job training (employer-sponsored program)	133	18.7
Public school adult vocational program	13	1.8
Private vocational school program	4	0.6
University of four year college	73	10.3
Junior college	64	9.0
Post-secondary vocational-technical institute (trade school)	26	3.6
Apprenticeship training program	19	2.6
Specialized occupational military training	9	1.3
Other[C]	26	3.6
TOTAL[D]	367	51.5

[A]Of the 712 terminees, 404 (56.7%) gave no indication of being involved in additional vocational training. Of the 712 terminees, 297 (41.7%) took part in one additional vocational training opportunity since leaving their high school program. Thirty-six (5.1%) took part in two and 34 (4.8%) terminees took part in the three additional training opportunities.

[B]Percentages are based on the 712 (29.7%) respondents of the total 269 terminees who returned questionnaires.

[C]See page 62 for the "Other" listing as specified by the terminees.

[D]The total indicated the number of different training programs in which terminees enrolled. As footnoted above, several terminees had enrolled in more than one training program.

Of the responding terminees, 133 (18.7%) participated in the on-the-job training (employer-sponsored program). This represented the largest area where terminees had taken additional vocational training.

Of the 712 responding terminees, 297 (41.7%) had taken part in one additional vocational training program since leaving their high school program. Thirty-six (5.1%) enrolled in two training programs, and 34

(4.8%) terminees had enrolled in three vocational training programs. A large segment of the terminees, 404 (56.7%), indicated they had not enrolled in additional vocational training.

The following is a listing of the "Other" (Table 25) vocational education training terminees indicated they had participated in:

"Other" Vocational Training	Number
College	5
Business College	5
Technical College	2
Construction	2
Data Processing	1
Bible College	1
Nursing School	1
Army Reserve	1
Still in High School	1
American Institute of Banking	1
R. N. Program	1
Industrial Electricity	1
F. C. C. Study Information	1
Police Department Cadet Program	1
Towboat Pilot	1
Crime Lab	1
Metropolitan Area Skills Center	1
Railroad Training Services	1
Plumbing	1
VISTA	1
Welder's Helper	1
Professional Careers of America	1
Deca Alumni	1

Table 26 points out the additional programs the 1973-74 secondary Distributive Education Occupations terminees were presently attending beyond their high school training by whether these programs were related to their high school vocational program.

Of the 712 1973-74 secondary Distributive Education Occupations terminees who responded to the survey, 52 (7.3%) were attending an on-the-job training program (employer-sponsored), 23 (3.2%) were attending a vocational-technical institute, 110 (15.4%) were attending a junior

college, 136 (19.1%) were attending a four-year college or university, 5 (0.7%) were attending a public adult vocational program, 17 (2.4%) were attending private business or trade school, 26 (3.7%) were attending an apprenticeship program, and 26 (3.7%) were attending some other type of school or educational program. (See page 64 for the listing of the other types of schools or educational programs students were attending.)

TABLE 26

PROGRAMS PRESENTLY ATTENDED BY THE 1973-74 SECONDARY DISTRIBUTIVE EDUCATION OCCUPATIONS TERMINEES BY WHETHER THESE PROGRAMS WERE RELATED TO THEIR HIGH SCHOOL VOCATIONAL EDUCATION PROGRAM[A]

Programs Attended	Terminees		Program Related to High School VED Program					
			Yes		No		No Response	
	No.	%	No.	%	No.	%	No.	%
On-the-job training (employer-sponsored)	52	7.3	9	1.3	11	1.5	32	4.5
Vocational-technical institute (Trade School)	23	3.2	8	1.1	12	1.7	3	0.4
Junior college	110	15.4	19	2.7	85	11.9	6	0.8
Four-year college or university	136	19.1	16	2.2	115	16.2	5	0.7
Public school adult vocational program	5	0.7	0	0.0	5	0.7	0	0.0
Private business or trade school	17	2.4	6	0.8	8	1.1	3	0.4
Apprenticeship program	7	1.0	0	0.0	3	0.4	4	0.5
Other[B]	26	3.7	6	0.8	17	2.4	3	0.4
TOTAL	376	52.8	64	9.0	256	36.0	56	7.8

[A]All percentages were based on the 712 responding terminees.

[B]See page 64 for listing of "Other" schools or educational institutions terminees were attending.

Of the 712 Distributive Education Occupations terminees, 376 (52.8%) were presently continuing their education. Sixty-four (9.0%) of the terminees were continuing their education in a program related to their high school vocational program, whereas 256 (36.0%) were attending a program in an area not related to their high school vocational program.

The following is a listing of the "Other" category (Table 26) of additional programs the 1973-74 Distributive Education Occupations terminees were attending:

"Other" School or Program	Number
College	7
High School	7
Trade/Technical School	5
Business College	4
Nursing School	3
Military	2
Bible College	1
Air Traffic Control	1
American Institute of Banking Course	1
La Salle Units	1
Management Training	1
Automotive Electricity	1

Of the 712 responding terminees, 345 (48.5%) indicated they were not attending a school or program but would like to do so. The following is a list of the areas in which these terminees desired to study:

Area of Study	Number
Uncertain	33
Distributive Education	16
Food Service/Distribution	10
Advertising	8
Marketing	7
Fashion Merchandising	7
General Merchandising	5
Hardware & Building Materials	1

(continued)

Area of Study	Number
Sales Representative	1
Cashier	1
Wholesale Trade	1
Finance & Credit	1
Business and Office	44
Management	21
Computer Programming	10
Accounting	8
Data Processing	3
Shorthand	3
Banking	2
IBM	2
Business Law	1
Health Services	8
Nursing	8
Pharmacy	3
Dental Assistant	2
Biological Research	1
X-Ray Technician	1

[A]Since some terminees did not respond to parts of the questions, totals will not correspond.

Job Placement Information

The following section of this report presents information concerning job placement of the 1973-74 secondary Distributive Education Occupations terminees.

Table 28 points out whether the 1973-74 Distributive Education Occupations terminees were seeking full-time employment when they left their high school vocational program and if their vocational teacher attempted to help them get a job.

TABLE 28

WHETHER VOCATIONAL TEACHER ATTEMPTED TO HELP 1973-74 DISTRIBUTIVE EDUCATION OCCUPATIONS TERMINEES GET A JOB IF SEEKING FULL-TIME EMPLOYMENT UPON LEAVING THE HIGH SCHOOL VOCATIONAL PROGRAM[A]

Vocational Teacher Attempted To Get Terminee A Job	Number	Percent
Yes	101	33.1
No	194	63.6
No Response	10	3.3
TOTAL	305	100.0

[A]Of the responding terminees, 397 (55.8%) indicated they were not seeking full-time employment when they left their high school vocational program. Ten (1.4%) of the terminees did not respond to the question.

Of the 305 1973-74 Distributive Education Occupations terminees indicating they were seeking full-time employment when they left their high school vocational program, 101 (33.1%) indicated that their vocational teacher attempted to help them get a job. However, 194 (63.6%)

of the terminees seeking full-time employment indicated that their vocational teacher did not attempt to help them secure employment. It was interesting to note that 397 (55.8%) of the reporting 1973-74 Distributive Education Occupations terminees indicated they were not seeking full-time employment when they left their high school vocational program.

Table 29 illustrates how long it took the 1973-74 Distributive Education Occupations terminees to get their first full-time job after they left their high school vocational program and began actively seeking full-time employment.

TABLE 29

LENGTH OF TIME IT TOOK THE 1973-74 DISTRIBUTIVE EDUCATION OCCUPATIONS TERMINEES TO SECURE FIRST FULL-TIME JOB AFTER LEAVING HIGH SCHOOL VOCATIONAL PROGRAM AND BEGINNING ACTIVELY SEEKING FULL-TIME EMPLOYMENT[A]

Time to Secure First Full-Time Job	Number	Percent
0 - 2 weeks	77	42.6
3 - 4 weeks	42	23.2
5 - 8 weeks	21	11.6
9 - 12 weeks	18	9.9
13 or more weeks	23	12.7
TOTAL	181	100.0

[A]Three hundred six (306) terminees indicated they already had a job when they left their high school vocational program.

Seventy-seven (42.6%) of the 181 secondary Distributive Education Occupations terminees secured their first full-time job within two weeks after they left their high school vocational program and began actively seeking full-time employment. However, 23 (12.7%) of the terminees took

13 or more weeks to secure their first full-time job. There were 306 terminees who indicated they already had a job when they left their high school vocational program.

Table 30 shows how the 1973-74 secondary Distributive Education Occupations terminees indicated they got their first full-time job after leaving their high school vocational program.

TABLE 30

HOW THE 1973-74 DISTRIBUTIVE EDUCATION OCCUPATIONS TERMINEES INDICATED THEY GOT THEIR FIRST FULL-TIME JOB AFTER LEAVING THEIR HIGH SCHOOL VOCATIONAL PROGRAM

How Terminees Secured First Full-Time Job	Number	Percent
Through your vocational teacher	10	4.9
Through your counselor	0	0
Through other school teachers or administrators	2	1.0
Through a friend or relative	89	43.6
Through applications to business or industry	59	28.9
Through state (local) employment office	7	3.4
Through a private employment agency	5	2.5
Through radio, T.V., newspaper, or other news media	5	2.5
Other[A]	27	13.2
TOTAL	204	100.0

[A]See listing on page 73 for the "Other" ways terminees indicated they secured their first full-time job after leaving their high school vocational program.

Of the 204 1973-74 Distributive Education Occupations terminees who responded to the survey item, 89 (43.6%) indicated they got their first full-time job after leaving their high school vocational program through a friend or relative, and 59 (28.9%) of the terminees indicated they got their first full-time job through applications to business or industry.

These represented the two methods that the largest number of Distributive Education Occupations terminees utilized to secure their first full-time job. Only 10 (4.9%) of the terminees indicated they secured their first job through their vocational teacher. No student indicated that a counselor got them their first full-time job after leaving their vocational program. Those students who already had a job before leaving their high school vocational program were not shown in Table 30. (See Table 31, page 74).

The following list indicates the "Other" means the terminees indicated to secure their first full-time jobs after leaving their high school vocational programs.

"Other" Means for Securing First Full-Time Job	Number
Myself	6
Boss/Owner	2
School	1
Advertising Director	1
Transfer from last job	1
Went from part-time to full-time	1
College aid	1
Self-employed	1
Saw sign ("Dishwasher's Needed")	1
Offered job	1
Help of God	1
Interview	1
Army	1

Table 31 shows how the 1973-74 Distributive Education Occupations terminees who were working while in high school taking their vocational program indicated they got those jobs.

Of the 712 reporting 1973-74 Distributive Education Occupations terminees, 548 (77.0%) indicated they were working during the time they

were in high school taking their vocational program. Of those terminees working while in high school, 161 (29.4%) got their job through their vocational instructor, 208 (38.0%) through a friend or relative, and 97 (17.7%) got their jobs through applications to business or industry. These three means were the ways most of the terminees secured a job while they were still in high school taking their vocational program.

TABLE 31

HOW THE 1973-74 DISTRIBUTIVE EDUCATION OCCUPATIONS TERMINEES WHO WERE WORKING WHILE IN HIGH SCHOOL TAKING THEIR VOCATIONAL PROGRAM INDICATED THEY GOT THAT JOB[A]

Who or What Helped Terminee Get Job	Number	Percent
Your vocational teacher	161	29.4
Your counselor	8	1.5
Other school teachers or administrators	6	1.1
Friend or relative	208	38.0
Applications to business or industry	97	17.7
State (local) employment office	3	0.5
Private employment agency	4	0.7
Radio, T.V., newspaper, or other news media	5	0.9
Other	56	10.2
TOTAL	548	100.0

[A]One hundred fifty-six (156) (21.9%) terminees indicated they had no job during the time they were in high school taking their vocational course.

Table 32 reveals the indications of the 1973-74 Distributive Education Occupations terminees as whether, before taking their first jobs, they looked for employment within daily walking or driving distance of home by how their first job related to their vocational training.

Of the 1973-74 Distributive Education Occupations terminees, 250 (85.9%) who were employed in their first job indicated they sought

employment within daily walking or driving distance of home. Forty-one (14.1%) terminees indicated before taking their first job, they looked for a job beyond daily walking or driving distance of home.

Of the 81 terminees who were working in a directly related area, only 10 (12.3%) sought employment beyond daily walking or driving distance of home.

TABLE 32

INDICATIONS OF 1973-74 DISTRIBUTIVE EDUCATION OCCUPATIONS TERMINEES AS TO WHERE THEY LOOKED FOR THEIR FIRST JOB BEFORE TAKING ONE BY HOW THEIR FIRST JOB RELATED TO THEIR TRAINING[A]

Before Taking First Job, Where Terminees Looked for Job	Total Reporting		Total Reporting by Relatedness of First Job to Vocational Training					
			Directly Related		Somewhat Related		Not Related	
	No.	%	No.	%	No.	%	No.	%
Within daily walking or driving distance of home	250	85.9	71	87.7	88	83.8	91	86.7
Beyond daily walking or driving distance of home[B]	41	14.1	10	12.3	17	16.2	14	13.3
TOTAL	291	100.0	81	100.0	105	100.0	105	100.0

[A]One hundred ninety-four (194) terminees indicated they already had their first job while in high school. Of those 194 terminees, 85 (43.8%) were working in a directly related area, 75 (38.6%) in a somewhat related area, while 34 (17.5%) were working in a non-related area.

[B]See listing, page 76, for rersons terminees gave for seeking their first job away from home.

It is interesting to note that of the 105 terminees whose first jobs did not relate to their training, only 14 (13.3%) of those terminees sought employment beyond daily walking or driving distance of home.

One hundred ninety-four (194) terminees indicated they had their first job while in high school. Of those 194 terminees, 85 (43.8%) were

working in a directly related area, 75 (38.6%) in a somewhat related area, and 34 (17.5%) were working in a non-related area.

The following is a listing of reasons terminees gave for seeking a job beyond daily walking or driving distance of their home before accepting their first job:

Reasons for Seeking Job Beyond Daily Walking or Driving Distance Before Accepting First Job	Number
Needed a job	3
No job available	3
Moved	3
Lived out of town	2
Like to travel	1
Cities are close together	1
Friend knew of a job	1
Told of a job	1
Had own transportation	1
Liked the district better	1
Asked to fill in for Mother	1
Wanted to work with computers	1

Table 33 reveals the indications of the 1973-74 Distributive Education Occupations terminees who were working in their first job not related to their training by whether or not they tried to get a job related to their training by where they looked for employment before accepting that first job.

It is important to note that of the 102 terminees who were working in a non-related first job, only three (2.9%) sought related employment beyond daily walking or driving distance of home before accepting his first job.

TABLE 33

INDICATIONS OF THE 1973-74 DISTRIBUTIVE EDUCATION OCCUPATIONS TERMINEES WORKING IN FIRST JOB NOT RELATED TO THEIR TRAINING BY WHETHER OR NOT THEY TRIED TO GET A JOB RELATED TO THEIR TRAINING BY WHERE THEY LOOKED FOR EMPLOYMENT BEFORE ACCEPTING FIRST JOB[A]

Where Terminees Working in Non-Related Areas Looked for Employment Before Accepting First Job	Total Reporting		Before Accepting This First Job Unrelated to Training Whether Terminees Sought Job in Related Area			
			Yes		No[B]	
	No.	%	No.	%	No.	%
Sought employment within daily walking or driving distance of their home	88	86.3	34	91.9	54	83.1
Sought employment beyond daily walking or driving distance of their home	14	13.7	3	8.1	11	16.9
TOTAL	102	100.0	37	100.0	65	100.0

[A]Total in this table may not correspond with totals of terminees for non-related categories in other tables for the following reasons: (1) some terminees had jobs when leaving program and did not have to seek employment and (2) some terminees failed to respond to one or more of the related questions from which data was drawn.

[B]See page 46 for the listing of reasons terminees who were working in non-related jobs gave for not trying to secure a job that was related to their training.

Table 34 illustrates the indications of the 1973-74 Distributive Education Occupations terminees as to where they looked for a job before taking their present job by how their present job is related to their vocational training.

Of the presently employed 1973-74 Distributive Education Occupations terminees, 223 (82.6%) indicated they sought employment within daily walking or driving distance of home. Forty-seven (17.4%) terminees indicated they sought employment beyond daily walking or driving distance of home.

TABLE 34

INDICATIONS OF 1973-74 DISTRIBUTIVE EDUCATION OCCUPATIONS TERMINEES AS TO WHERE THEY LOOKED FOR A JOB BEFORE TAKING THEIR PRESENT JOB BY HOW THEIR PRESENT JOB RELATED TO THEIR TRAINING[A]

Where Terminees Looked for Job Before Taking Present Job	Total Reporting		Total Reporting by Relatedness of Present Job to Vocational Training					
			Directly Related		Somewhat Related		Not Related	
	No.	%	No.	%	No.	%	No.	%
Within daily walking or driving distance of home	223	82.6	55	85.9	79	81.4	89	81.7
Beyond daily walking or driving distance of home[B]	47	17.4	9	14.1	18	18.6	20	18.3
TOTAL	270	100.0	64	100.0	97	100.0	109	100.0

[A]One hundred ninety-three (193) terminees reported they already had their present job while in high school. Of those 193 terminees, 86 (44.5%) were in a directly related area, 69 (35.8%) in a somewhat related area, while 38 (19.7%) were working in a non-related area.

[B]See listing, page 79, for reasons terminees gave for seeking their present job away from home.

Of the 64 terminees who were working in a directly related area, only nine (14.1%) sought employment beyond daily walking or driving distance of home.

Of the 109 terminees who were presently working in a non-related area, 20 (18.3%) sought employment beyond daily walking or driving distance of his home.

Some 193 terminees reported they already had their present job while in high school. Of those 193 terminees, 86 (44.5%) were in directly related areas, 69 (35.8%) in somewhat related areas, and 38 (19.7%) were in non-related areas.

The following is a list of reasons terminees gave for seeking a job beyond daily walking or driving distance of their home before accepting their present job:

Reasons for Seeking Job Beyond Daily Walking or Driving Distance Before Accepting Present Job	Number
No job available	10
Couldn't find job	5
Moved	4
More money	4
No special reason	3
Where school was located	2
Live out of town	2
Needed a job	2
Liked district better	1
Meet more people	1
Taught myself trade	1
My age met the qualifications	1
Needed certain hours	1
More jobs available in larger town	1
Wanted career in computers	1
Wanted to travel	1
Cities close together	1
Had job waiting	1
Church music requires it	1

Table 35 reveals the indications of the 1973-74 Distributive Education Occupations terminees who were working in present jobs not related to their training by whether or not they tried to get a job related to their training by where they looked for employment before accepting that present job.

TABLE 35

INDICATIONS OF THE 1973-74 DISTRIBUTIVE EDUCATION OCCUPATIONS TERMINEES WORKING IN PRESENT JOB NOT RELATED TO THEIR TRAINING BY WHETHER OR NOT THEY TRIED TO GET A JOB RELATED TO THEIR TRAINING BY WHERE THEY LOOKED FOR EMPLOYMENT BEFORE ACCEPTING PRESENT JOB[A]

			Yes		No[B]	
	No.	%	No.	%	No.	%
Sought employment within daily walking or driving distance of their home	93	81.6	35	85.4	58	79.5
Sought employment beyond daily walking or driving distance of their home	21	18.4	6	14.6	15	20.5
TOTAL	114	100.0	41	100.0	73	100.0

[A]Totals in this table may not correspond with totals of terminees for non-related categories in other tables for the following reasons: (1) some terminees had jobs when leaving programs and did not have to seek employment and (2) some terminees failed to respond to one or more of the related questions from which data was drawn.

[B]See page 46 for the listing of reasons terminees who were working in non-related jobs gave for not trying to secure a job that was related to their training.

Only six (5.3%) of the 114 terminees who were working in a non-related area sought related employment beyond daily walking or driving distance of home before accepting his present job.

APPENDIX

PRESENT JOB AND FIRST JOB TITLES OF THE 1973-74 DISTRIBUTIVE EDUCATION OCCUPATIONS TERMINEES

PRESENT JOB AND FIRST JOB TITLES OF THE 1973-74 DISTRIBUTIVE EDUCATION OCCUPATIONS TERMINEES

For those terminees who indicated present or first job occupations, this appendix lists the present job title and first job title by their high school vocational training area (OE Codes). The job titles are listed as the terminees reported them. The number of full-time jobs held by these terminees since completing their high school vocational course is listed, current employment status is listed, and whether the student intended to get a job in the area while in the program.

The following code is used to identify the employment status of the terminees:

0. Unemployed, but seeking employment
1. Employed full time
2. Employed part time, seeking full-time job
3. Employed part time, not seeking full-time job
4. Employed full time and attending school
5. Employed part time and attending school
6. Unavailable for employment

The following code is used to identify whether the student intended to get a job in the area while in the program:

1. No
2. Was not sure
3. Yes

The number in parentheses behind the job titles indicates the relatedness of the high school vocational training to these jobs. The

terminees made the judgment as to the relatedness of their training to these jobs. The following code is used to identify this relatedness:

1. Directly related
2. Somewhat related
3. Not related

The total in each occupational title area may not correspond to the total in each OE Code as listed in Table 23. Some of the terminees failed to indicate the title of their present position. If the first job title was the same as the present job title, the first job title is included under the present job title.

TITLE: AGRIBUSINESS OCCUPATIONS FOLLOW-UP. FOLLOW-UP OF 1973-74 AGRIBUSINESS OCCUPATIONS TERMINEES FROM THE SECONDARY SCHOOL VOCATIONAL PROGRAMS OF ALABAMA. RESEARCH AND DEVELOPMENT REPORT NO. 32.

PERSONAL AUTHOR: MCMATH, JAMES; DRAKE, JAMES BOB

DESCRIPTOR: *VOCATIONAL FOLLOWUP; *AGRIBUSINESS; *OCCUPATIONAL SURVEYS; *SECONDARY EDUCATION; *STATE SURVEYS; VOCATIONAL EDUCATION

IDENTIFIER: ALABAMA

EDRS PRICE: MF AND HC AVAILABILITY WILL BE ANNOUNCED IN VOL. 10, NO. 2.

DESCRIPTIVE NOTE: 118P.; RELATED DOCUMENTS VT 103 321 THROUGH VT 103 335 IN THIS ISSUE.

ABSTRACT: THIS REPORT CONTAINS FOLLOWUP INFORMATION REGARDING 1973-74 AGRIBUSINESS OCCUPATIONS TERMINEES FROM SECONDARY SCHOOL VOCATIONAL PROGRAMS IN ALABAMA. THE INFORMATION WAS COLLECTED THROUGH A QUESTIONNAIRE SURVEY OF 5,109 STUDENT TERMINEES WHO HAD BEEN OUT OF SCHOOL SEVEN TO EIGHT MONTHS. ONE THOUSAND THREE HUNDRED AND FIFTY-TWO OF THE TERMINEES RESPONDED AFTER THE INITIAL MAILING AND ONE FOLLOWUP. INCLUDED IN THE REPORT ARE SECTIONS CONVEYING GENERAL INFORMATION ABOUT THE SURVEY POPULATION, BASIC EMPLOYMENT INFORMATION, CONTINUING EDUCATION INFORMATION, AND JOB PLACEMENT INFORMATION. THE MAJOR PORTION OF EACH SECTION CONSISTS OF TABULAR DATA SUMMARIES. PRESENT JOB AND FIRST JOB TITLES OF THE 1973-74 AGRIBUSINESS TERMINEES ARE APPENDED. (AUTHOR/AB)

Vocational Education and Community Colleges
State Department of Education

December 1975

For their help in refining the survey instrument, special thanks are due the following state supervisors:

Mrs. Divine Bauer, Health Occupations Education
Miss Evelyn Cotney, Home Economics Education
Mr. H. W. Green, Agribusiness Education
Mr. J. C. Lindley, Trade & Industrial Education
Mrs. Anacile Kurth, Distributive Education
Mrs. Sandra Yelverton, Business and Office Education

Appreciation is also extended to the following members of the Occupational Research and Development Unit for their contribution to the study:

Mrs. Bonnie J. Burks, Research Associate
Mr. Paul D. Davis, Research Associate
Mr. Gary Greenshields, Graduate Research Assistant
Mr. John Gross, Research Associate
Dr. Alice S. Morgan, Assistant Professor
Miss Flossi Sergen, Secretary
Mr. Ed. Williams, Duplicating Operator

FOLLOW-UP OF 1973-74 AGRIBUSINESS OCCUPATIONS
TERMINEES FROM THE SECONDARY SCHOOL
VOCATIONAL PROGRAMS OF ALABAMA

Alabama continues to support one of the most progressive and comprehensive vocational education programs in the nation. In addition to serving youth and adults by training them for gainful and useful employment, the diversification of vocational courses meets a serious job need and contributes to the industrial development in the state.

With the millions of tax dollars being spent on vocational education, it is necessary to attempt to account to the taxpayer and decision-makers on the results of those expenditures. Terminee student follow-up studies constitute one of the most valuable techniques for assessing vocational education system outcomes.

The Alabama State Department of Education, Division of Vocational Education and Community Colleges, recognizing this important phase of accountability and evaluation, initiated the development of a statewide follow-up system for its vocational education program terminees at the secondary school level. The Division, under the direction of Dr. T. L. Faulkner, State Director, contracted with the Occupational Research and Development Unit at Auburn University to develop and implement the statewide follow-up system for all its secondary vocational terminees in all service areas.

This report relates the findings of the survey instrument mailed to the 1973-74 Agribusiness Occupations terminees from the secondary

school vocational programs of Alabama. When the terminees received the questionnaire, most had been out of school seven to eight months.

General Information

Student rosters with names and addresses of 1973-74 Agribusiness Occupations terminees were received from 311 secondary school vocational teachers in Alabama. Of the 311 teachers from which student rosters were received, 33 were in Secondary Area Vocational Centers (AVC) and 278 were in programs in schools of other settings. The total of 5,109 student terminees reported to the ORDU were mailed the follow-up forms. Returns were received from 1,352 (26.5%) of the Agribusiness Occupations terminees from the initial mailing and one follow-up. At least one student questionnaire was received from 286 of the 311 teachers.

All terminees reported in this study were in programs administered only by the Division of Agribusiness Occupations Education, State Department of Education.

Table 1 presents data relative to the total population of Agribusiness Occupations terminees and the number of returns categorized by OE codes as reported by teachers.

[A]These Agribusiness Occupations terminees were terminees in programs administered only under the Division of Agribusiness Occupations Education, State Department of Education.

[B]OE Codes as reported by teachers.

* Less than 0.1 percent

Of the 1973-74 Agribusiness Occupations terminees reported by the teachers, the largest number in any specific OE Code was in the occupational title of Agricultural Power Mechanics. This 693 represented 13.6 percent of the reported Agribusiness Occupations terminees. There were 639 (12.5%) terminees listed as studying in the Agribusiness Production cluster (OE Code 01.01-- series), 86 (1.7%) in the Agribusiness Supplies and Services cluster (OE Code 01.02-- series), and 3095 (60.6%) in the Agribusiness Mechanics cluster (OE Code 01.03-- series).

Table 1A is a description of total population and returns by OE Code area, type school, and termination status of the 1973-74 Agribusiness Occupations terminees.

[A]Percentage is based on 5109 total reported terminees.

[B]Percentage is based on returns by grade.

Table 5 shows the number of 1973-74 Agribusiness Occupations terminees who indicated whether they were in active full-time military service.

TABLE 5

ACTIVE FULL-TIME MILITARY STATUS OF 1973-74 AGRIBUSINESS OCCUPATIONS TERMINEES WHO RETURNED QUESTIONNAIRES

Active Full-Time Military Status	Number	Percent
Yes	70	5.2
No	1239	91.6
No Response	43	3.2
TOTAL	1352	100.0

Basic Information Related to the Vocational Education Program

Table 6 points out the number of 1973-74 Agribusiness Occupations terminees who indicated whether this vocational program was a school requirement.

TABLE 6

1973-74 AGRIBUSINESS OCCUPATIONS TERMINEES WHO INDICATED WHETHER THEIR VOCATIONAL PROGRAM WAS A SCHOOL REQUIREMENT

Vocational Courses Was a School Requirement	Number	Percent
Yes	157	11.6
No	1177	87.1
No Response	18	1.3
TOTAL	1352	100.0

Table 7 indicates, according to the 1973-74 Agribusiness Occupations terminees, the primary source of influence in selecting their vocational course.

TABLE 7

PRIMARY INFLUENCES ON THE 1973-74 AGRIBUSINESS OCCUPATIONS TERMINEES IN SELECTING THEIR VOCATIONAL COURSE

Group or Individual Terminees Felt Influenced Them Most in Selecting Vocational Course	Number	Percent
Parent(s) or Guardian(s)	62	4.6
Guidance Counselor	36	2.7
Your Vocational Teacher	171	12.6
Another Teacher or Principal	9	0.7
Student in VED Program	115	8.5
A Friend or Relative	49	3.6
A Businessman	12	0.9
Made Choice Yourself	871	64.4
Other[A]	20	1.5
No Response	7	0.5
TOTAL	1352	100.0

[A]See page 16 for listing of "Others" who influenced Agribusiness terminees in selecting their VED course.

Vocational teachers appeared to be the greatest outside influence on those terminees enrolling in the Agribusiness Occupations program. One hundred seventy-one (12.6%) of the terminees responding indicated that their vocational teacher influenced them most in selecting their Agribusiness Occupations course. However, 871 (64.4%) indicated that they selected their course of study on their own. One hundred fifteen terminees (8.5%) indicated that students in the VED program influenced them most in selecting their program. Sixty-two (4.6%) of the terminees indicated that their parent(s) or guardian(s) influenced them most in selecting their course in Agribusiness Occupations, while 36 (2.7%) indicated a guidance counselor.

Below is the response given to the "Others" category indicated in Table 7 as to the primary source of influence in selecting their vocational course. Although the question asked for a person who influenced the terminees, several provided an influencing factor.

"Other" Factors, Persons, or Groups Who Most Influenced Terminees in Selecting Their VED Course	Number
Specific interest in subject	9
Me/no one else/myself/etc.	6
Course was required (for graduation)	3
Brother	2
Grandmother	1
Coach	1

Table 8 indicates terminees' opinions as to whether they had adequate job or occupational information and school experiences to make a realistic career choice.

TABLE 8

OPINIONS OF 1973-74 AGRIBUSINESS OCCUPATIONS TERMINEES AS TO WHETHER THEY HAD ADEQUATE JOB OR OCCUPATIONAL INFORMATION AND SCHOOL EXPERIENCES TO MAKE A REALISTIC CAREER CHOICE

	Number	Percent
Yes	933	69.0
No	394	29.1
No Response	25	1.8
TOTAL	1352	100.0

Table 9 indicates whether, during the time they were taking their high school vocational program, the reporting 1973-74 terminees intended to get a job in Agribusiness Occupations.

TABLE 9

INDICATIONS OF 1973-74 AGRIBUSINESS OCCUPATIONS TERMINEES AS TO WHETHER, DURING THE TIME THEY WERE TAKING THEIR HIGH SCHOOL VED PROGRAM, THEY PLANNED TO GET A JOB IN THEIR AREA OF STUDY

Intended to Get Job in Area of Study	Number	Percent
Yes	427	31.6
No	229	16.9
Was Not Sure	694	51.3
No Response	2	0.1
TOTAL	1352	100.0

It is interesting to note that only 427 (31.6%) of the 1973-74 reporting Agribusiness Occupations terminees indicated that during

the time they were taking their Agribusiness Occupations program, they intended to get a job in the area they were studying.

Table 10 indicates terminees' opinions on choosing the Agribusiness Occupations program if they had the selection to make again.

A noteworthy point was revealed by the data. Of the 1973-74 Agribusiness Occupations terminees, 1,079 (79.8%) indicated that they would select the same vocational program if they had the choice to make again. Only 68 (5.0%) of the responding terminees indicated that they would not take a vocational program.

TABLE 10

OPINIONS OF 1973-74 AGRIBUSINESS OCCUPATIONS TERMINEES REGARDING THEIR VOCATIONAL PROGRAM

Question: If You Had It To Do Over Again, Would You...?	Number	Percent
Take the same vocational program	1079	79.8
Not take a vocational program	68	5.0
Choose another vocational program offered in your school, such as _____ [A]	115	8.5
Choose another vocational program if it had been offered in your school, such as _____ [B]	71	5.3
No Response	19	1.4
TOTAL	1352	100.0

[A]See listing I-A, page 19, for those other vocational programs offered in terminees' school that they would have taken instead of their agribusiness program.

[B]See listing I-B, page 19, for the vocational programs the terminees would have taken instead of their agribusiness program if it had been offered in their school.

Table 11 indicates the extent to which the reporting 1973-74 Agribusiness Occupations terminees felt their high school vocational programs prepared them for their first job. This data was also broken down by how that first job related to their vocational program.

Terminees who were in full-time active military service or who had never been employed were not asked to respond to the questions from which this data was reported. Also, the terminees who failed to respond to the question items were not indicated in the table.

In noting the extent to which the 1973-74 Agribusiness Occupations terminees felt their high school vocational course prepared them for their

first full-time job by how their first full-time job related to training they received in their high school Agribusiness program, some interesting points were revealed.

TABLE 11

PERCEPTIONS OF 1973-74 AGRIBUSINESS OCCUPATIONS TERMINEES AS TO THE EXTENT THEIR HIGH SCHOOL VOCATIONAL PROGRAM PREPARED THEM FOR THEIR FIRST FULL-TIME JOB BY HOW FIRST FULL-TIME JOB RELATED TO TRAINING

Extent Vocational Course Prepared for First Full-Time Job	Total Reporting		Number Reporting by Relatedness of First Full-Time Job to Training Received					
			Directly Related		Somewhat Related		Not Related	
	No.	%	No.	%	No.	%	No.	%
Excellent	63	8.2	34	30.9	18	6.0	11	3.1
Well Prepared	203	26.4	53	48.2	110	36.4	40	11.2
Fair	191	24.8	17	15.5	121	40.1	53	14.8
Poorly Prepared	40	5.2	4	3.6	16	5.3	20	5.6
Preparation not related to job	273	35.4	2	1.8	37	12.2	234	65.3
TOTAL	770	100.0	110	100.0	302	100.0	358	100.0

Two hundred sixty-six (34.5%) of the 1973-74 Agribusiness Occupations terminees responding to this item indicated "Excellent" or "Well Prepared" for their first full-time job as a result of the training received in their high school vocational education program. Eighty-seven (79.1%) of the 110 terminees employed in their first full-time job related directly to their training felt they were excellent or well prepared for this first job. Only four terminees who were working in an area directly related to their

vocational training felt that they were poorly prepared for their first job. There were two additional terminees who indicated that they were working in an area directly related to their vocational course and felt that their preparation did not relate to their jobs. Of all responding terminees, only 40 (5.2%) felt that they were poorly prepared for their first full-time job. Of these, only four were working in an area directly related to their vocational course.

Table 12 indicates the extent to which the reporting 1973-74 Agribusiness Occupations terminees felt their high school vocational course prepared them for their present job. Also shown in the table is a breakdown of the data by how their present job was related to their vocational program.

TABLE 12

PERCEPTIONS OF 1973-74 AGRIBUSINESS OCCUPATIONS TERMINEES AS TO THE EXTENT THEIR HIGH SCHOOL VOCATIONAL COURSE PREPARED THEM FOR THEIR PRESENT JOB BY HOW THEIR PRESENT JOB RELATED TO TRAINING

Extent Vocational Course Prepared for Present Job	Total Reporting		Number Reporting by Relatedness of Present Job to Training Received					
			Directly Related		Somewhat Related		Not Related	
	No.	%	No.	%	No.	%	No.	%
Excellent	44	5.4	22	18.6	11	3.6	11	2.9
Well Prepared	232	28.7	64	54.2	128	41.7	40	10.4
Fair[A]	135	16.7	27	22.9	84	27.3	24	6.3
Poorly Prepared[B]	33	4.1	4	3.4	19	6.2	10	2.6
Preparation not related to job	364	45.1	1	0.9	65	21.2	298	27.8
TOTAL	808	100.0	118	100.0	307	100.0	383	100.0

[A]See listing, page 23, for reasons terminees specified for only being trained "Fair" by their vocational course for their present job.
[B]See listing, page 25, for reasons terminees specified for only being "Poorly Prepared" by their vocational course for their present job.

Terminees in active full-time military service, and students who were attending school full time and had not had a job, were not asked to respond to the question from which Table 12 was prepared. Also, those other students who failed to respond to the items were not shown on the table.

Of the 808 terminees responding to these items, 276 (34.2%) indicated "Excellent" or "Well Prepared" for their present job as a result of their high school vocational program. Only 33 (4.1%) terminees reported feeling poorly prepared for their present job as a result of their training.

Eighty-six (72.9%) of the 118 responding terminees working in an area directly related to their high school vocational program indicated that they felt excellent or well prepared by their training.

One hundred terminees who indicated "Fair" as the extent their vocational program prepared them for this present job indicated reasons for this. The following lists the reasons the 1973-74 Agribusiness Occupations terminees indicated for being trained only "Fair" by their vocational course for their present job.

1. Found out more was to involved
2. Not enough time
3. Welding
4. Started interest in job
5. Did not cover much
6. Not long enough courses
7. Didn't know enough
8. Wasn't fully equipted
9. Not enough outside training
10. Teacher
11. Not very much auto body work
12. Little experience
13. Not have equipment
14. One year
15. Because of relation to job
16. I already knew most of the things we were doing
17. Ability to work with others

(continued)

18. Doing some of the same thing
19. Same training
20. I am assistant manager and butcher of a grocery store, and I'm the "fix-it" man too
21. Worked with machinery
22. Related work
23. Some of the things they had were too technical
24. Different training
25. Did little classwork
26. Work on farm with father
27. I did not get to weld ever day
28. I learn a little about machinery
29. Needing very little training
30. No information
31. Because I'm farming
32. Did not finish school
33. Closely related
34. Covered the field
35. Service truck
36. I'm doing different stuff
37. Not enough training offered
38. Bookwork in class
39. I had an idea what I would be required to do
40. I went from metal work to animal specialist, but we had a well rounded out vocational program
41. Could only go ½ a year
42. Not closely related
43. Sometimes I have certain jobs not related to course I took
44. I drive trucks and tractors
45. Responsibility
46. Farming
47. I used training sometimes
48. Didn't teach refrigeration
49. Use training part time
50. Doesn't related completely to what I took in Agribusiness
51. Not directly related
52. It didn't consist of row crops or truck crops
53. Didn't learn much new information
54. We never studied D.C. Voltage or very high voltage. We never studied about motor and the different fields.
55. We worked in shop a lot of the year
56. Did not directly relate to it
57. Not that closely related
58. Because the class was short
59. Learned a little welding
60. Study and job relationship
61. Work in woodwork
62. The company has welding, woodworking, sanding, drilling
63. Work part time with lumber company
64. Auto mechanic
65. Funeral home
66. Farming

(continued)

67. Not related much
68. No training
69. Offered flat welding
70. I already knew how to milk cows
71. Construction
72. Did small amount of it
73. All phases weren't covered
74. Supplies were short
75. Because it was in the same field I was already interested in
76. Use of hands
77. Broad area
78. Learned a lot of general training
79. Already knew job
80. Because I work with oxygen tanks
81. Gave training
82. There are a few useful things learned related to job
83. It helped my machanical ability.
84. Out of date
85. Showed how cotton textile mill worked
86. Not enough study materials
87. Both consisted of agriculture
88. I use my learning
89. Already had job
90. Not interested
91. Because of the instructors
92. Not closely related
93. Oil-on-machinery
94. Dealing with people
95. Somewhat related
96. Not directly related
97. Study some about it
98. Learn fundamentals of shop mechanics and tools
99. Metal construction not wood
100. Not needed for the job

Twenty-one of the terminees indicated they were "Poorly Prepared" for their present job by their vocational program. The following lists the reasons Agribusiness Occupations terminees indicated for being "Poorly Prepared."

1. Business near home did not pay enough
2. We didn't have an iron lathe in Agribusiness
3. Teacher
4. Not related
5. Not offered
6. Students know this much about (Vocation)
7. Not a lot of relation
8. Didn't cover it fully
9. Teachers

(continued)

10. Not related to schooling
11. Not available
12. No tools or books or teachers
13. Not enough training
14. Instructor talked very little in the area of automotive mechanics
15. No classes
16. No relations
17. Not interested
18. Did not have proper equipment or teacher in school
19. Not related
20. Poor training
21. No teaching in class

Table 13 focuses on the Agribusiness Occupations student club. The researchers sought to determine the extent to which the 1973-74 Agribusiness Occupations terminees felt that their high school student club aided in preparing them for their present job. Data are also broken down by the relationship of the present job to the vocational training received.

TABLE 13

PERCEPTIONS OF 1973-74 AGRIBUSINESS OCCUPATIONS TERMINEES AS TO THE EXTENT THEIR HIGH SCHOOL VOCATIONAL STUDENT CLUB PREPARED THEM FOR THEIR PRESENT JOB BY HOW THEIR PRESENT JOB RELATED TO TRAINING

Extent High School Vocational Student Club Helped Prepare for Present Job	Total Reporting		Total Reporting by Relatedness of Present Job to Vocational Training					
			Directly Related		Somewhat Related		Not Related	
	No.	%	No.	%	No.	%	No.	%
Excellent	92	13.9	28	25.0	32	11.7	32	11.5
Well Prepared	179	27.0	36	32.1	83	30.4	60	21.6
Fair	258	38.9	36	32.1	115	42.1	107	38.5
Poorly Prepared	134	20.2	12	10.7	43	15.8	79	28.4
TOTAL	663	100.0	112	100.0	273	100.0	278	100.0

[A]Of the 810 who responded, 89 (11.0%) had no related student club available, and 58 (7.2%) were not members of a related student club.

Only respondents who had had a job since terminating their high school vocational Agribusiness program were asked to respond to the question reported in Table 13. Students in active full-time military service were excluded. Eighty-nine (11.0%) of the 810 terminees reported no related student club was available, while 58 (7.2%) were not members of a related student club.

Two hundred seventy-one (40.9%) of the 663 terminees who participated in student club activities indicated they were "Excellent" or "Well Prepared" by their related student club for their present job. One hundred thirty-four (20.2%) indicated they were "Poorly Prepared" by their related student club for their present job. Of those 134, 12 (9.0%) were in a related job, 43 (32.1%) were in somewhat related jobs, and 79 (58.9%) were in non-related jobs.

Of those terminees who were working in an area directly related to the training they received in their high school vocational program, 64 (57.1%) revealed that they were "Excellent" or "Well Prepared" for their present job by their related student club. Only 12 (10.7%) of the 112 terminees who were working in a job directly related to the training they received indicated they were "Poorly Prepared" for their present job by their related student club.

Table 14 reports how the 1973-74 Agribusiness Occupations terminees rated the quality of teaching by their high school vocational instructors.

One thousand seventy-nine (79.8%) of the 1,352 reporting 1973-74 Agribusiness Occupations terminees rated the quality of teaching by their vocational instructor either "Good" or "Excellent." Only 68 (5.0%) rated the quality of teaching by their instructors "Poor" or "Very Poor."

TABLE 14

1973-74 AGRIBUSINESS OCCUPATIONS TERMINEES' RATINGS OF THE QUALITY OF TEACHING BY THEIR HIGH SCHOOL VOCATIONAL INSTRUCTORS

Rating	Number	Percent
Excellent	564	41.7
Good	515	38.1
Fair	200	14.8
Poor	46	3.4
Very Poor	22	1.6
No Response	5	0.4
TOTAL	1352	100.0

Table 15 illustrates how the 1973-74 Agribusiness Occupations terminees rated their high school vocational instructor's interest in their classwork.

TABLE 15

1973-74 AGRIBUSINESS OCCUPATIONS TERMINEES' RATINGS OF THEIR HIGH SCHOOL VOCATIONAL INSTRUCTOR'S INTEREST IN THE STUDENT'S CLASS WORK

Rating	Number	Percent
Excellent	591	43.7
Good	510	37.7
Fair	185	13.7
Poor	40	3.0
Very Poor	21	1.6
No Response	5	0.4
TOTAL	1352	100.0

One thousand one hundred one (81.4%) of the 1,352 reporting 1973-74 Agribusiness Occupations terminees rated the interest exhibited by their

high school vocational instructor in their classwork as "Good" or "Excellent." Only 61 (4.5%) of the terminees rated the interest their vocational instructors showed in their classwork as "Poor" or "Very Poor."

Table 16 points out how the 1973-74 Agribusiness Occupations terminees subjectively rated the knowledge their vocational teachers possessed about their field of study. This rating is also shown in the table by a breakdown of how terminees' present job related to the training they received in their high school vocational program. Terminees were asked to base their judgments on their current knowledge of their job and responsibilities.

TABLE 16

1973-74 AGRIBUSINESS OCCUPATIONS TERMINEES RATINGS OF THE KNOWLEDGE THEIR HIGH SCHOOL VOCATIONAL TEACHER POSSESSED ABOUT THEIR FIELD OF STUDY BY HOW THE TERMINEES' PRESENT JOB RELATED TO THE TRAINING THEY RECEIVED

Excellent	218	26.3	42	35.3	70	22.3	106	26.7
Good	390	47.0	50	42.0	168	53.5	172	43.3
Fair	168	20.2	20	16.8	61	19.4	87	21.9
Poor	45	5.4	6	5.1	13	4.2	26	6.6
Very Poor	9	1.1	1	0.8	2	0.6	6	1.5
TOTAL	830	100.0	119	100.0	314	100.0	397	100.0

[A]Ratings were to be based on terminee's judgment of their current knowledge of their job and responsibilities.

Total responses to this item indicate that 608 (73.3%) of the 830 responding 1973-74 Agribusiness Occupations terminees rated the knowledge their vocational teachers possessed about their field of study either "Good" or "Excellent." For those 119 terminees working in an area directly related to the training they received, 92 (77.3%) rated the knowledge their teachers possessed about their field of study as "Good" or "Excellent." A favorable point was revealed in that only seven (5.9%) of those terminees rated the knowledge their vocational teachers possessed about their field of study as "Poor" or "Very Poor."

If the respondent was working in an area related to his training, he was asked to compare the facilities and equipment in his high school vocational program with those on his present job. Table 17 illustrates how the 1973-74 Agribusiness Occupations terminees responded.

TABLE 17

HOW 1973-74 AGRIBUSINESS OCCUPATIONS TERMINEES WORKING IN A RELATED AREA RATED THE FACILITIES AND EQUIPMENT IN THEIR HIGH SCHOOL VOCATIONAL PROGRAM[A]

Rating[B]	Number	Percent
Better than those on present job	80	21.7
Similar to those on present job	161	43.8
Not as good as those on present job	127	34.5
TOTAL	368	100.0

[A]Five hundred sixty-one (60.4%) of the responding 929 terminees indicated that their present job was not related to their vocational training enough to compare facilities and equipment.

[B]Persons who had not had a job since leaving their vocational program, including those in military service and those who attended school, were asked not to respond to questions from which data was drawn. Returns were received from 1,352 terminees.

Only 80 (21.7%) of the 368 responding 1973-74 Agribusiness Occupations terminees working in an area related to their training rated the facilities and equipment in his high school vocational program as better than those on his present job. One hundred sixty-one (43.8%) rated the facilities and equipment in their high school vocational program as similar to those on their present job; however, 127 (34.5%) rated the facilities and equipment not as good as those on their present job.

Table 18 shows how 1973-74 Agribusiness Occupations terminees, who were in a cooperative work program in school and were now working in an area related to their vocational training, rated the facilities and equipment used in their cooperative work station.

TABLE 18

HOW 1973-74 AGRIBUSINESS OCCUPATIONS TERMINEES NOW WORKING IN A RELATED AREA, WHOSE VOCATIONAL PROGRAM INCLUDED COOPERATIVE WORK, RATED FACILITIES AND EQUIPMENT USED IN THEIR COOPERATIVE WORK STATION[A]

Rating[B]	Number	Percent
Better than those on present job	45	17.1
Similar to those on present job	120	45.6
Working at same place where cooperative training was done	19	7.3
Not as good as those on present job	79	30.0
TOTAL	263	100.0

[A]One hundred eighty-nine (21.9%) of the responding 864 Agribusiness Occupations terminees indicated their vocational program was not a cooperative program. Four hundred twelve (47.7%) terminees indicated they were not working in an area related to their cooperative work; therefore, they did not complete this item on the questionnaire.

[B]Persons who had not had a job since leaving their vocational program, including those in military service and those attending shcool, were asked not to respond to questions from which data was drawn. Returns were received from 1,352 terminees.

Only 45 (17.1%) of the 263 responding 1973-74 Agribusiness Occupations terminees whose vocational programs had included cooperative work and were now working in an area related to their vocational training, rated the facilities and equipment in his cooperative work station as better than those on his present job. One hundred twenty (45.6%) rated the facilities and equipment in their cooperative training station as similar to those on their present job. Seventy-nine (30.0%) rated the facilities and equipment in their cooperative work station not as good as those in their present job. It was noted that only 19 (7.3%) indicated they were working at the same establishment where they did their cooperative training.

Basic Employment Information

The following section of this report offers information relative to employment and job characteristics of the 1973-74 secondary Agribusiness Occupations terminees.

Table 19 illustrates the number of full-time jobs the responding 1973-74 Agribusiness Occupations terminees have had since leaving their high school vocational course.

TABLE 19

NUMBER OF FULL-TIME JOBS HELD BY THE 1973-74 AGRIBUSINESS OCCUPATIONS TERMINEES SINCE LEAVING THEIR HIGH SCHOOL VOCATIONAL COURSE

Number of Full-Time Jobs Held	Number	Percent[A]
One	560	41.4
Two	239	17.7
Three	67	5.0
Four	13	1.0
Five or more	6	0.4
TOTAL	885	65.5

[A]Percentage is based on the 1,352 terminees who returned the questionnaire.

There were 560 (41.4%) of the total 1,352 responding 1973-74 Agribusiness Occupations terminees who had been employed in just one job since leaving their high school vocational program. Two hundred thirty-nine (17.7%) of the terminees reported having two jobs, and 67 (5.0%) reported having three jobs. Nineteen (1.4%) reported having four or more jobs since leaving their high school vocational course seven to eight months ago.

Table 20 reveals the first-job employment status of Agribusiness Occupations terminees who returned the survey by the relatedness of their vocational training to their first job.

TABLE 20

FIRST-JOB EMPLOYMENT STATUS OF AGRIBUSINESS OCCUPATIONS TERMINEES (1973-74) BY RELATEDNESS OF VOCATIONAL TRAINING TO FIRST JOB[A]

First Job After Leaving High School Vocational Program	Total Reporting		Relatedness of Vocational Training to First Job[B]					
			Directly Related		Somewhat Related		Not Related[C]	
	No.	%	No.	%	No.	%	No.	%
Full-Time	778	57.5	110	8.1	305	22.6	363	26.8
Part-Time	131	9.7	17	1.3	49	3.6	65	4.8
TOTAL	909	67.2	127	9.4	354	26.2	428	31.6

[A]All percentages were based on the 1,352 (26.5%) of 5,109 terminees who returned the survey form.

[B]The terminees made the judgment as to how their first job was related to the training received in their high school vocational program.

[C]See page 34 for reasons terminees who were working in first job unrelated to this vocational training gave for not seeking job that was related before accepting their first job.

Of the 1,352 responding 1973-74 Agribusiness Occupations terminees, 778 (57.5%) were employed full time in their first job after leaving their high school vocational program. One hundred thirty-one terminees' first jobs were on a part-time basis.

One hundred twenty-seven (9.4%) of the 111 responding terminees' first jobs (full-time or part-time) were in an area directly related to the training they received in their high school vocational course. Three hundred fifty-four (26.2%) were employed in an area somewhat related while 428 (31.6%) were employed in a first job not related to the training they received. The terminees made the judgment as to how their first job was related to the training they received in their high school vocational program.

Of the 428 terminees who indicated their jobs were not related to their vocational course, 152 (35.5%) terminees indicated that before they accepted their unrelated job, they tried to get a job that was related to their vocational training. However, 276 (64.5%) of the terminees did not.

The following is a list of reasons given by 125 of the 276 terminees who, before taking their first unrelated job, indicated they did not seek a job that was related to their vocational training.

Reason	Number
Couldn't find a related job	12
Didn't consider self adequately qualified/ trained	11
Already had a job	9
Needed job/money quickly, took first job available	9
Lost interest/developed other interests	9
Too young	4
Job not available	3
"Other" job pay was better	3
Was not studying Agribusiness at the time	2

(continued)

Reason	Number
Vocational training was for hobby/own knowledge	2
Don't know	2
Didn't want to	2
More job opportunity outside of field	1
Didn't like vocation	1
Didn't have it in school	1
Still in school	1
Didn't want it	1
No first job after school	1
I really didn't have any in mind	1
Service	1
Did not need any help	1
Had not had training at time	1
No reason	
I was tired up in farming for two years before graduation from high school	1
No help or information	1
Too far to go	1
This is the first full-time job I've ever had	1
Didn't know if I liked it	1
Wanted to be a farmer	1
Didn't know where to try	1
I helped my family farm	1
Other plans	1
I enjoyed what I was doing	1
Wanted job with the railroad	1
Not available for training	1
Did not look	1
Joined the National Guard, off for four months	1
Not presently employed	1
Didn't care	1
Chemical plant	1
I decided I didn't want a vocation job	1
I thought electronics was a better field	1
I asked about one myself	1
Because I couldn't make up my mind on which school to choose	1
Wanted to be a lifeguard at the time	1
Other occupation	1
Took vocational training only for high school credit	1
Because I wanted the other job	1
Was not sure what I wanted to do	1
Because they didn't study how to drive a forklift	1
Just got what I could	1
Wanted inside job	1
No contacts	1
Jobs already taken	1
Knew grocery work only	1
It was cleaning mostly	1
Grocery work	1

(continued)

There was no vocational work in it	1
Didn't like it enough to make a career out of it	1
No experience	1
No course	1
I wanted the training	1
Making money to start trade school	1
I wanted to travel some	1
Before I took the program	1
No opening at the time, so I waited	1
Didn't like	1

Table 21 shows by OE Code for the first job of the 1973-74 Agribusiness Occupations terminees the relatedness of their training to this first job.

TABLE 21

	TOTAL ALL AREAS	934	100.0	129	13.8	361	38.7	444	47.5

[A]Of 5,109 Agribusiness Occupations terminees, 1,352 (26.5%) returned the questionnaire.

[B]The terminees made the judgment as to how their first job was related to the training received in their high school vocational program.

Of the 934 responding 1973-74 Agribusiness Occupations terminees who indicated how their first job related to the training they received in their high school vocational program, 129 (13.8%) were employed in directly related areas. Three hundred sixty-one (38.7%) were employed in somewhat related areas, while 444 (47.5%) terminees were employed in areas not related to their training. The terminees made the judgment as to how their first job was related to the training received in their high school vocational program.

More responding terminees who studied in Agricultural Power Mechanics (OE Code 01.0301) indicated first job employment. This was to be expected since more terminees studied in this occupational objective area (See Table 1). Of the 125 employed 1973-74 terminees who studied in the Occupational area of Agricultural Power Mechanics and indicated relatedness of training, 10 (8.0%) were employed in an area directly related to that training. Forty-eight (38.4%) were employed in their first job in an area somewhat related to their training. However, 67 (53.6%) of these responding terminees indicated that their first job was not related to the training they received in their Agribusiness Occupations program.

Table 21A is a description of 1973-74 Agribusiness Occupations terminees' first job by OE Code area studied, number of returns, type school, termination status, and relatedness of training.

[A]OE Code areas as reported by teachers

[B]Area Vocational Centers

[C]Any terminee who left the program by completing or by high school graduation

[D]Any terminee who the instructor reported as having dropped out of school

[E]The terminees made the judgment as to how their first job was related to the training received in their high school vocational program

Table 22 illustrates the current employment status of the responding terminees by the relatedness of their vocational training to their present jobs. All percentages figured in the table were based on the 1,352 (26.5%) returns from the 5,109 Agribusiness Occupations terminees.

Of the 1,352 responding 1973-74 secondary Agribusiness Occupations terminees, 651 (48.2%) were presently employed full time and not attending school or employed full time and attending school. One hundred three (7.6%) of the terminees were employed part time and attending school, while 84 (6.2%) were unavailable for employment (See page 47 for reasons terminees

were unavailable for employment). One hundred sixty-four (12.1%) of the terminees were unemployed and actively seeking employment, while 36 (2.7%) were employed part time and seeking full-time employment.

TABLE 22

CURRENT EMPLOYMENT STATUS OF AGRIBUSINESS OCCUPATIONS TERMINEES (1973-74) BY RELATEDNESS OF TRAINING TO PRESENT JOB[A]

Employment Status	Total Respondi-ng		Relatedness of Training to Present Job[B]							
			Directly Related		Somewhat Related		Not Related[E]		Employed No Response	
	No.	%	No.	%	No.	%	No.	%	No.	%
Employed full time and not attending school	565	41.8	84	6.2	204	15.1	249	18.4	18	1.3

Employed part time and attending school	103	7.6	10	0.7	39	2.9	49	3.6	3	0.2
Unemployed (actively seeking a job)[C]	164	12.1	N/A		N/A		N/A		N/A	
Unavailable for employment[C&D]	84	6.2	N/A		N/A		N/A		N/A	
No Response	301	22.3	N/A		N/A		N/A		N/A	
TOTAL	1352	100.0	111	8.2	284	18.8	361	26.7	24	1.8

[A]All percentages were based on the 1,352 (26.5%) respondents of the total 5,109 terminees. Terminees in active full-time military service or attending school full-time and had never been employed were included in the "No Response" category.

[B]The terminees made the judgment as to how their present job was related to the training received in their high school vocational program.

[C]The unemployed and unavailable for employment categories do not include persons in the military service and persons who were in school full time and never had a job.

[D]See page 47 for the listing of reasons Agribusiness Occupations terminees gave for being unavailable for employment.

[E]See page 48 for reasons terminees who were working in present job not related to vocatinal training gave for not seeking related job before accepting present job. Totals for unrelated columns may not correspond because terminees failed to respond to one of the two questions from which data was drawn.

The "No Response" category in Table 22 includes three groups: (1) terminees in active full-time military service; (2) terminees who were in school full time and had never had a job; and (3) terminees who failed to respond to the item on the questionnaire.

Of the 1,352 secondary Agribusiness Occupations respondees, 111 (8.2%) were presently employed full time or part time in an area directly related to the training received in their high school vocational course. Two hundred eighty-four (18.8%) were employed either part time or full time in an area somewhat related to their training, while 361 (26.7%) were employed in areas not related to training. The terminees made the judgment as to how their present employment was related to the training received in their high school vocational course.

Below is a list of the reasons given by the terminees for being unavailable for employment. The numbers indicated, in total, exceed the number indicated in Table 22 as "Unavailable for Employment" because some terminees did not respond to all questions.

Reason	Number
In school full time	70
Other	20
Illness or disability	7
Presently not working, not interested in a job	5
Pregnancy	4
Homemaker	3
Laid off	3

Of a total 410 terminees who indicated their present jobs were not related to their vocational course, 144 (35.1%) terminees indicated that before they accepted their unrelated job, they tried to get a job that was related to their vocational training. However, 266 (64.9%) of the terminees did not.

The following is a list of reasons given by terminees who, before taking their present unrelated job, indicated they did not seek a job that was related to their vocational training.

Reason	Number
No job opportunities	56
Already had a job	22
Lack of interest/lost interest	20
Didn't feel adequately qualified	16
Interested in something else	14
Just wanted a job	10
Desired higher paying job	9
Didn't want to	8
Took first job available	8
Desired "better" job	7
Had "other" job opportunity	5
Working with relative	5
Did not know how to find a job in vocation for which trained	4
Don't know	4
Wanted different kind of work	3
Took vocational training for personal, not employment goal	3
Didn't try	2
Lack of experience	2
Still in school	2
Personal	2
Not old enough	2
Laid off	2
Getting ready for career job	1
Not sure what area of training best suited for	1
Had to get married	1
Not enough money to start farm	1
Had one year of mechanics	1
Pipe shop dresser	1
I wanted to go to trade school in the future	1
Taught me the "foots" of lumber	1
Had not started this job at the time	1
I was late getting into my field	1
Not able to finance school	1
Just looking for a summer job	1
Other plans	1
I decided to change courses	1
I was and still am not sure what I want to do	1
I didn't want a vocational job at that time	1
It is a work-study job	1
No reason	1

(continued)

Reason	Number
I needed money for payment of tuition	1
Only needed part-time job to go to school	1
Still in basic training	1
Want none	1
Because I have not made up my mind on what school	1
We just saw what they could do	1
Cows too cheap	1
Because I need an education and got a bank job	1
I was not taking vocational training them	1
The job I have is related to my second choice of training	1
Convenience of the job	1
Because of the employer	1

Table 23 shows for the present job, by OE code, the number of 1973-74 secondary Agribusiness Occupations terminees employed by the relatedness of their vocational training to their present job.

Of the 838 secondary Agribusiness Occupations terminees who indicated present employment, 111 (13.3%) who studied in the area of Agricultural Power Mechanics, OE Code 01.0301, were employed. This represented the largest number of employed terminees that studied in any OE code area.

Of the 111 terminees presently employed that studied Agricultural Power Mechanics, five (4.5%) were employed in an area directly related to the training received in their high school vocational program. Forty-six (41.4%) terminees who studied Agricultural Power Mechanics indicated their present job was somewhat related to their high school vocational training, and 60 (54.1%) indicated their job was not related to their high school vocational training. The terminees made the judgment as to how their present job related to the training received in their high school vocational program.

[A]OE Code areas as reported by teachers

[B]Area Vocational Centers

[C]Any terminee who left the program by completing or by high school graduation

[D]Any terminee who the instructor reported as having dropped out of school

[E]The terminees made the judgment as to how their first job was related to the training received in their high school vocational program

Table 24 indicates the first-job salary ranges as compared to the present-job salary ranges for the 1973-74 Agribusiness Occupations terminees.

TABLE 24

FIRST-JOB SALARY RANGES AND PRESENT-JOB SALARY RANGES FOR 1973-74 AGRIBUSINESS OCCUPATIONS TERMINEES

Salary Ranges	First Job		Present Job	
	No.	%	No.	%
Under $250	275	32.0	152	21.0
$250 - $299	122	14.2	91	12.6
$300 - $349	138	16.0	85	11.8
$350 - $399	97	11.3	90	12.4
$400 - $449	106	12.3	106	14.7
$450 - $499	40	4.7	59	8.2
$500 - $599	45	5.2	79	10.9
$600 - $699	23	2.7	29	4.0
$700 or more	14	1.6	32	4.4
TOTAL	860	100.0	723	100.0

Of the 860 terminees reporting a salary range for their first job, 275 (32.0%) indicated a range of under $250 per month. Fourteen terminees reported a first salary of $700 or more per month. The median salary range for the first job fell in the range of $300 - $349 per month. The mean salary range for the first job also fell high in the range of $300 - $349 per month.

Of the 723 1973-74 Agribusiness Occupations terminees reporting a salary range for their present job, 152 (21.0%) indicated under $250 per month. This salary range was indicative of the mode of the reporting students. The median of salary for present jobs of reporting students was in the $350 - $399 range and the mean salary range for the present job fell high in the $350 - $399 per month range. The median and mean salary ranges of present jobs over first jobs do not indicate a considerable increase for the reporting Agribusiness Occupations terminees.

Table 24A indicates the first-job salary ranges by relatedness of training and sex of the Agribusiness Occupations terminees.

TABLE 24A

FIRST-JOB SALARY RANGES BY RELATEDNESS OF TRAINING OF 1973-74 AGRIBUSINESS OCCUPATIONS TERMINEES BY SEX

Salary Ranges	Sex of Terminees Responding		Relatedness of Training to First Job[B]					
			Directly Related		Somewhat Related		Not Related	
	Male	Female	Male	Female	Male	Female	Male	Female
Under $250	243	17	42	2	91	-	110	15
$250 - $299	107	6	16	-	37	2	54	4
$300 - $349	121	2	12	-	47	-	62	2
$350 - $399	90	1	6	-	42	1	42	-
$400 - $449	99	1	13	-	39	-	47	1
$450 - $499	38	-	5	-	15	-	18	-
$500 - $599	43	-	5	-	22	-	16	-
$600 - $699	20	-	3	-	10	-	7	-
$700 or more	13	-	3	-	6	-	4	-
TOTAL[A]	774	27	105	2	309	3	360	22

[A]Totals do not match those of Table 24 because some terminees did not respond to all questions.

[B]The terminees made the judgment as to how their first job was related to the training received in their high school vocational program.

Two hundred sixty (32.5%) of the 801 responding terminees were employed at less than $250 per month; this represents 31.4% of the males and 63.0% of the females reporting. Of those 260 terminees, 42 (16.1%) males and two (0.8%) females were employed in a job directly related to their training, 91 males (35.0%) and no females were employed in jobs somewhat related to their training, while 110 (42.3%) males and 15 (5.8%) females were employed in jobs not related to their training.

Of the 801 responding terminees, 774 (96.6%) were males and 27 (3.4%) were females. One hundred five (13.1%) and two (0.3%) females were employed in jobs directly related to their vocational training, 309 (38.6%) males and three (0.4%) females were employed in jobs somewhat related to their training, while 360 (44.9%) males and 22 (2.7%) females were employed in jobs not related to their training.

Table 24B indicates the present-job salary ranges by relatedness of training and sex of the Agribusiness Occupations terminees.

$500 - $599	73	1	16	-	31	1	26	-
$600 - $699	25	-	1	-	12	-	12	-
$700 or more	27	1	2	-	11	-	14	1
TOTAL[A]	648	20	88	2	256	2	304	16

[A]Totals do not match those of Table 24 because some terminees did not respond to all questions.

[B]The terminees made the judgment as to how their present job was related to the training received in their high school vocational program.

One hundred thirty-nine (20.8%) of the 668 responding terminees were employed at less than $250 per month. Of these 139 terminees, 15 (10.8%)

males and one (0.7%) females were employed in a job directly related to their training, 48 (34.5%) males and no females were employed in jobs somewhat related to their training, while 68 (48.9%) males and seven (5.1%) females were employed in jobs not related to their training.

Of the 668 responding terminees, 648 (97.0%) were males and 20 (3.0%) were females. Eighty-eight (13.2%) males and two (0.3%) females were employed in jobs directly related to their vocational training, 256 (38.3%) males and two (0.3%) females were employed in jobs somewhat related to their training, while 304 (45.5%) males and 16 (2.4%) females were employed in jobs not related to their training.

Continuing Education Information

The following section of this report presents information relative to the continuing education of the 1973-74 secondary Agribusiness Occupations terminees.

Table 25 shows the vocational educational training opportunities terminees have participated in since leaving their high school vocational program.

Of the total terminees, the 244 (18.1%) who were engaged in on-the-job training represented the largest area where terminees had taken additional vocational training. One hundred thirty (9.6%) terminees have enrolled in Junior Colleges and represent the second largest group engaged in continuing education.

Of the 1,352 responding terminees, 628 (46.5%) had taken part in one additional vocational training program since leaving their high school program. Sixty-eight (5.0%) enrolled in two training programs, and 27

(2.0%) terminees had enrolled in three vocational training programs. Six hundred twenty-nine (46.5%) indicated they had not enrolled in any additional vocational training.

TABLE 25

ADDITIONAL VOCATIONAL EDUCATIONAL TRAINING 1973-74 SECONDARY AGRIBUSINESS OCCUPATIONS TERMINEES PARTICIPATED IN SINCE LEAVING THEIR HIGH SCHOOL VOCATIONAL PROGRAM[A]

Type Training	Number	Percent[B]
On-the-job training (employer-sponsored program)	244	18.1
Public school adult vocational program	19	1.4
Private vocational school program	10	0.7
University or four year college	65	4.8
Junior college	130	9.6
Post-secondary vocational-technical institute (trade school)	86	6.4
Apprenticeship training program	42	3.1
Specialized occupational military training	49	3.6
Other[C]	78	5.8
TOTAL[D]	723	53.5

[A]Six hundred twenty-nine (46.5%) of the 1,352 terminees gave no indication of being involved in additional vocational training. Of the 1,352 terminees, 628 (46.5%) took part in one additional vocational training opportunity since leaving their high school program. Sixty-eight (5.0%) took part in two and 27 (2.0%) terminees took part in the three or more additional training opportunities.

[B]Percentages are based on the 1,352 (26.5%) respondents of the total 5,109 terminees who returned questionnaires.

[C]See page 63 for the "Other" listing as specified by the terminees.

[D]The total indicated the number of different training programs in which terminees enrolled. As footnoted above, several terminees had enrolled in more than one training program.

The following is a listing of the "Other" vocational education training terminees indicated they had participated in:

"Other" Vocational Training	Number
On-the-job training with father	5
Practical application/practice of what was taught	3
Agricultural mechanics	3
Work/work experience	3
Farming	2
Home nursery	1
Raising a beef cow	1
Technical school	1
Classroom flight training	1
Backyard mechanic	1
Studying by myself using my schoolbooks	1
Welding	1
Building vocational school	1
Body work	1
Saw filing	1
Correspondence school	1
Some carpenter work	1
Cottonmill	1
Tree planter	1
Trade school	1
Home training	1
Cattle raising	1
Sent by employer to O.M.C. school in Dallas	1
Technical college	1
University	1
On-the-job training with gold kist	1
On-the-job welding training	1
Part-time with mechanic	1
Plumbing trailers	1
Changed major to criminal justice	1
Technical school	1
Farrier (horseshoeing)	1
Construction company	1
Carpenter	1
Agribusiness woodworking	1
Wireglass Extension - Headland	1
Just working at a fertilizer plant	1
Dozen operator	1
Butcher - own my own	1
I am a technician	1
Heavy equipment	1
Co-op (farm work)	1
Doing as I see fit to do	1
Have been working in construction	1
Industrial development training	1
High school teacher helping me alone	1
VIE in the 13 & 11 grade	1
Went to training center to be sewing machine repairman	1
To increase learning	1
Textile work	1

(continued)

"Other" Vocational Training	Number
High school vocational trade school	1
Woodworking	1
Doing hobby work	1
Electrician work	1
I plan to teach vocational-ag.	1
Trade school	1
On-the-job training	1
Air conditioner ref.	1
Drafting technology	1
Vocational school	1

Table 26 points out the additional programs the 1973-74 secondary Agribusiness Occupations terminees were presently attending beyond their high school training by whether these programs were related to their high school vocational program.

TABLE 26

PROGRAMS PRESENTLY ATTENDED BY THE 1973-74 SECONDARY AGRIBUSINESS OCCUPATIONS TERMINEES BY WHETHER THESE PROGRAMS WERE RELATED TO THEIR HIGH SCHOOL VOCATIONAL EDUCATION PROGRAM[A]

Programs Attended	Terminees		Program Related to High School VED Program					
			Yes		No		No Response	
	No.	%	No.	%	No.	%	No.	%
On-the-job training (employer-sponsored)	97	7.2	12	0.9	7	0.5	78	5.8
Vocational-technical institute (trade school)	78	5.8	29	2.1	36	2.7	13	1.0
Junior college	204	15.1	40	3.0	156	11.5	8	0.6
Four year college or university	117	8.7	25	1.8	86	6.4	6	0.4
Public school adult vocational program	6	0.4	2	0.1	3	0.2	1	0.1
Private business or trade school	16	1.2	6	0.4	8	0.6	2	0.4
Apprenticeship program	11	0.8	1	0.1	2	0.1	6	0.6
Other[B]	53	3.9	15	1.1	20	1.5	18	1.3
TOTAL	582	43.0	130	9.6	318	23.5	134	9.9

[A]All percentages were based on the 1,352 responding terminees.

[B]See page 65 for listing of "Other" schools or educational institutions terminees were attending.

Of the 1,352 1973-74 secondary Agribusiness Occupations terminees who responded to the survey, 97 (7.2%) were attending an on-the-job training program (employer-sponsored), 78 (5.8%) were attending a vocational-technical institute, 204 (15.1%) were attending a junior college, 117 (8.7%) were attending a four year college or university, six (0.4%) were attending a public adult vocational program, 16 (1.2%) were attending private business or trade school, 11 (0.8%) were attending an apprenticeship program, and 53 (3.9%) were attending some other type of school or educational program. (See page 65 for the listing of the other types of schools or educational programs students were attending.)

Five hundred eighty-two (43.0%) of the 1,352 Agribusiness Occupations terminees were presently continuing their education. One hundred thirty (9.6%) of the terminees were continuing their education in a program related to their high school vocational program. Three hundred eighteen (23.5%) were attending a program in an area not related to their high school vocational program.

The following is a listing of the "Other" category (Table 26) of additional programs the 1973-74 Agribusiness Occupations terminees were attending:

"Other" School or Program	Number
High school (undefined)	20
Military service schools	6
Vocational high schools	3
Night school	3
Forestry	2
Correspondence school	2
Railroad training	1
School of nursing	1
Community credit	1
Grocery business	1
Emergency medical training	1
Civil Service	1
Plumbing trailers	1
State employers	1

(continued)

"Other" School or Program	Number
Electronic institute	1
Farming	1
Manage a shoe store	1
Horticulture	1
Agribusiness technology	1
Textile mills	1
Heavy Equipment operator	1

Of the 1,352 responding terminees, 771 (57.0%) indicated they would like further vocational training. The following is a list of the areas in which these terminees desired to study:

Area of Study	Number
Auto/Diesel mechanics	61
Welding	56
Annimal science/livestock production	49
Carpenter/woodwork	39
Forestry	38
Agricultural power mechanics	37
Electricity	35
Machinist/metalworking	33
Electronics	28
Not sure/undecided	27
Farming	25
Agriculture/agribusiness	16
Horticulture	15
Drafting	13
Agribusiness education/teaching	13
Building construction	12
Auto body and fender repair	11
Medical field	9
Business	8
Veterinary medicine	7
Masonry	6
Landscape architecture/design	5
Air conditioning/refrigeration	5
Anything	5
Engineering technician	5
Conservation	4
Heavy equipment operator	4
Agribusiness supplies	3
Architecture	3
General repairs	3
Wildlife/game management	3
Data processing	2
Plumbing	2
Art welding	2
Printing	2
Pipefitting	2

(continued)

Area of Study	Number
Biology	2
Radio and TV broadcasting	2
Electrical engineering	2
Photography	1
Psychology	1
Clothing	1
Marine biology	1
Surveying	1
Management	1
Patternmaking	1
Appliance repair	1
Fire safety and first aid	1
Occupational sewing	1
Chemistry	1
Art	1
Butcher	1
Textiles	1
Criminal science	1
Restaurant management	1
Commercial art	1
Natural resources	1
Music	1
Mathematics	1
Truck driving	1
Meteorology	1
Science	1
Florist	1

Four hundred eleven (30.4%) of the 1,352 responding terminees indicated they did not desire to have further vocational training. One hundred seventy (12.6%) terminees did not respond to the question.

Table 27 illustrates the programs presently attended by the terminees by OE Code area studied by whether it related to their high school vocational program. No attempt was made to show the no response to the data items; therefore, many of the totals do not correspond.

TABLE 27

PROGRAMS PRESENTLY ATTENDED BY THE 1973-74 SECONDARY AGRIBUSINESS OCCUPATIONS TERMINEES BY OE CODE AREA STUDIED BY WHETHER IT RELATED TO THEIR HIGH SCHOOL VOCATIONAL PROGRAMS[A]

OE Code	Occupational Title	TOTAL	Type School or Educational Program Presently Attending

[A]Since some of the terminees did not respond to parts of the questions, totals will not correspond.

Job Placement Information

The following section of this report presents information concerning job placement of the 1973-74 secondary Agribusiness Occupations terminees.

Table 28 points out whether the 1973-74 Agribusiness Occupations terminees were seeking full-time employment when they left their high school vocational program and if their vocational teacher attempted to help them get a job.

TABLE 28

WHETHER VOCATIONAL TEACHER ATTEMPTED TO HELP 1973-74 AGRIBUSINESS OCCUPATIONS TERMINEES GET A JOB IF SEEKING FULL-TIME EMPLOYMENT UPON LEAVING THE HIGH SCHOOL VOCATIONAL PROGRAM[A]

Vocational Teacher Attempted To Get Terminee A Job	Number	Percent
Yes	224	32.8
No	458	67.2
TOTAL	682	100.0

[A]Six hundred twenty-five (46.2%) of the responding terminees indicated they were not seeking full-time employment when they left their high school vocational program. Forty-five (3.3%) of the terminees did not respond to the question.

Of the 682 responding 1973-74 Agribusiness Occupations terminees who indicated they were seeking full-time employment when they left their high school vocational program, 224 (32.8%) indicated that their vocational teacher attempted to help them get a job. However, 458 (67.2%) of the terminees seeking full-time employment indicated that their vocational teacher did not attempt to help them secure employment. It

was interesting to note that 625 (46.2%) of the reporting 1973-74 Agribusiness Occupations terminees indicated that they were not seeking full-time employment when they left their high school vocational program.

Table 29 illustrates how long it took the 1973-74 Agribusiness Occupations terminees to get their first full-time job after they left their high school vocational program and began actively seeking full-time employment.

TABLE 29

LENGTH OF TIME IT TOOK THE 1973-74 AGRIBUSINESS OCCUPATIONS TERMINEES TO SECURE FIRST FULL-TIME JOB AFTER LEAVING HIGH SCHOOL VOCATIONAL PROGRAM AND BEGINNING ACTIVELY SEEKING FULL-TIME EMPLOYMENT[A]

Time to Secure First Full-Time Job	Number	Percent
0 - 2 weeks	278	51.7
3 - 4 weeks	111	20.6
5 - 8 weeks	63	11.7
9 - 12 weeks	39	7.3
13 or more weeks	47	8.7
TOTAL	538	100.0

[A]Four hundred terminees indicated they already had a job when they left their high school vocational program.

Two hundred seventy-eight (51.7%) of the 538 secondary Agribusiness Occupations terminees secured their first full-time job within two weeks after they left their high school vocational program and began actively seeking full-time employment. However, 47 (8.7%) of the terminees took 13 or more weeks to secure their first full-time job. There were 400 terminees who indicated they already had a job when they left their high school vocational program.

Table 30 shows how the 1973-74 secondary Agribusiness Occupations terminees indicated they got their first full-time job after leaving their high school vocational program.

TABLE 30

HOW THE 1973-74 AGRIBUSINESS OCCUPATIONS TERMINEES INDICATED THEY GOT THEIR FIRST FULL-TIME JOB AFTER LEAVING THEIR HIGH SCHOOL VOCATIONAL PROGRAM

How Terminees Secured First Full-Time Job	Number	Percent
Through your vocational teacher	21	3.5
Through your counselor	4	0.7
Through other school teachers or administrators	10	1.7
Through a friend or relative	342	57.3
Through applications to business or industry	148	24.8
Through state (local) employment office	20	3.3
Through a private employment agency	5	0.8
Through radio, T.V., newspaper, or other news media	9	1.5
Other[A]	38	6.4
TOTAL	597	100.0

[A]See listing on page 73 for the "Other" ways terminees indicated they secured their first full-time job after leaving their high school vocational program.

Of the 597 1973-74 Agribusiness Occupations terminees who responded to the survey item, 342 (57.3%) indicated they got their first full-time job after leaving their high school vocational program through a friend or relative. One hundred forty-eight (24.8%) of the terminees indicated they got their first full-time job through applications to business or industry. These represented the two methods that the largest number of

Agribusiness Occupations terminees utilized to secure their first full-time job. Only 21 (3.5%) of the terminees indicated they secured their first job through their vocational teacher. Four (0.7%) students indicated that a counselor got them their first full-time job after leaving their vocational program. Those students who already had a job before leaving their high school vocational program were not shown in Table 30. (See Table 31, page 74)

The following list indicates the "Other" means the terminees indicated for securing their first full-time job:

"Other" Means for Securing First Full-Time Job	Number
Joined military service/National Guard	3
Solicitation from business/industry to individual	2
Work at school/work-study program	2
Started own business	1
By scoring on test	1
Through Labor Union	1
Farming	1
Had worked three years part time, but it was trimming houses; first job	1
Only worked one week	1
Part time	1
Haven't gotten it yet; part time	1

Table 31 shows how the 1973-74 Agribusiness Occupations terminees who were working while in high school taking their vocational program indicated they got that job.

Six hundred twenty-nine (46.5%) of the 1,352 reporting 1973-74 Agribusiness Occupations terminees indicated they were working during the time they were in high school taking their vocational program. Of those terminees working while in high school, 310 (49.3%) got their job through a friend or relative, 88 (14.0%) through applications to business or industry, and 66 (10.5%) got jobs through their vocational instructor. These three means were the ways most of the terminees secured a job while they were still in high school taking their vocational program.

TABLE 31

HOW THE 1973-74 AGRIBUSINESS OCCUPATIONS TERMINEES WHO WERE WORKING WHILE IN HIGH SCHOOL TAKING THEIR VOCATIONAL PROGRAM INDICATED THEY GOT THAT JOB[A]

Who or What Helped Terminees Get Job	Number	Percent
Your vocational teacher	66	10.5
Your counselor	7	1.1
Other school teachers or administrators	22	3.5
Friend or relative	310	49.3
Applications to business or industry	88	14.0
State (local) employment office	10	1.6
Private employment agency	12	1.9
Radio, T.V., newspaper, or other news media	2	0.3
Other[B]	112	17.8
TOTAL	629	100.0

[A]Seven hundred fourteen (52.8%) terminees indicated they had no job during the time they were in high school taking their vocational course.

[B]See listing below for the "Other" means the terminee indicated in securing a job while they were still taking their vocational program.

The following list indicates "Other" means the terminee indicated in securing a job while they were still taking their vocational program:

"Other" Means of Securing Job While Still in High School Vocational Program	Number
Worked/lived on farm	13
Bus driver/bus route	2
Experience in mechanics/knowledge of machinery	2
Textile mill/yarn mill	2
Agriculture/agribusiness	1
Green house manager	1
Neither	1
Poultry processing	1
The man called me	1
Not sure	1
Paper route	1
No one	1
Gas plant	1
Undecided	1
I had two jobs	1

Table 32 reveals the indications of the 1973-74 Agribusiness Occupations terminees as whether, before taking their first job, they looked for employment within daily walking or driving distance of home by how their first job related to their vocational training.

TABLE 32

INDICATIONS OF 1973-74 AGRIBUSINESS OCCUPATIONS TERMINEES AS TO WHERE THEY LOOKED FOR THEIR FIRST JOB BEFORE TAKING ONE BY HOW THEIR FIRST JOB RELATED TO THEIR TRAINING[A]

Before Taking First Job, Where Terminees Looked for Job	Total Reporting		Total Reporting by Relatedness of First Job to Vocational Training					
			Directly Related		Somewhat Related		Not Related	
	No.	%	No.	%	No.	%	No.	%
Within daily walking or driving distance of home	462	76.4	54	81.8	171	75.7	237	75.7
Beyond daily walking or driving distance of home[B]	143	23.6	12	18.2	55	24.3	76	24.3
TOTAL	605	100.0	66	100.0	226	100.0	313	100.0

[A]Two hundred eighty terminees indicated they already had their first job while in high school. Of the 280 terminees, 60 (21.4%) were working in a directly related area, 114 (40.7%) in a somewhat related area, while 106 (37.9%) were working in a non-related area.

[B]See listing, page 77, for reasons terminees gave for seeking their first job away from home.

Four hundred sixty-two (76.4%) of the 1973-74 Agribusiness Occupations terminees who were employed in their first job indicated they sought employment within daily walking or driving distance of home. One hundred forty-three (23.6%) terminees indicated before taking their first job, they looked for a job beyond daily walking or driving distance of home.

Of the 66 terminees who were working in a directly related area, only 12 (18.2%) sought employment beyond daily walking or driving distance of home.

It is interesting to note that of the 313 terminees whose first jobs did not relate to their training, only 76 (24.3%) of those terminees sought employment beyond daily walking or driving distance of home.

Two hundred eighty terminees indicated they had their first job while in high school. Of those 280 terminees, 60 (21.4%) were working in a directly related area, 114 (40.7%) in a somewhat related area, and 106 (37.9%) were working in a non-related area.

The following is a listing of reasons terminees gave for seeking a job beyond daily walking or driving distance of their home before accepting their first job. Of the 143 terminees who indicated they sought a job beyond daily walking or driving distance of home before accepting their first job, 52 gave reasons why they sought that job.

Reasons for Seeking Job Beyond Daily Walking or Driving Distance Before Accepting First Job	Number
No jobs around home/none close by	18
Desired more money/better pay	7
Better salary and opportunities	1
I didn't like to work close to home	1
Went into service	1
I didn't look, it came to me	1
Live out of town ten miles	1
Decater	1
Three or four other places	1
Wanted a job with railroad	1
To get away from home	1
To do my business	1
Within distance of home	1
Nearest town	1
That's where my school is	1
I moved from home and married	1

(continued)

Reasons for Seeking Job Beyond Daily Walking or Driving Distance Before Accepting First Job	Number
Because that was the only place I looked	1
Am a seasonal ranger in Great Smokies National Park	1
50 miles	1
Considered working away from home	1
A friend	1
Hometown isn't an industrial town	1
Married	1
Because I needed a job	1
Live out of town	1
No factories where we live	1
Cause I need a job	1
For training	1
I was going to school full time	1

Table 33 reveals the indications of the 1973-74 Agribusiness Occupations terminees who were working in their first job not related to their training by whether or not they tried to get a job related to their training by where they looked for employment before accepting that first job.

TABLE 33

INDICATIONS OF THE 1973-74 AGRIBUSINESS OCCUPATIONS TERMINEES WORKING IN FIRST JOB NOT RELATED TO THEIR TRAINING BY WHETHER OR NOT THEY TRIED TO GET A JOB RELATED TO THEIR TRAINING BY WHERE THEY LOOKED FOR EMPLOYMENT BEFORE ACCEPTING FIRST JOB[A]

Where Terminees Working in Non-Related Areas Looked for Employment Before Accepting First Job	Total Reporting		Before Accepting This First Job Unrelated to Training Whether Terminees Sought Job in Related Area			
			Yes		No	
	No.	%	No.	%	No.	%
Sought employment within daily walking or driving distance of home	232	75.3	96	78.0	136	73.5
Sought employment beyond daily walking or driving distance of home	76	24.7	27	22.0	49	26.5
TOTAL	308	100.0	123	100.0	185	100.0

[A]Total in this table may not correspond with totals of terminees for non-related categories in other tables for the following reasons: (1) some terminees had jobs when leaving program and did not have to seek employment and (2) some terminees failed to respond to one or more of the related questions from which data was drawn.

[B]See page 34 for the listing of reasons terminees who were working in non-related jobs gave for not trying to secure a job that was related to their training.

It is important to note that of the 308 terminees who were working in a non-related first job, only 27 (8.8%) sought related employment beyond daily walking or driving distance of home before accepting his first job.

Table 34 illustrates the indications of the 1973-74 Agribusiness Occupations terminees as to where they looked for a job before taking their present job by how their present job is related to their vocational training.

TABLE 34

INDICATIONS OF 1973-74 AGRIBUSINESS OCCUPATIONS TERMINEES AS TO WHERE THEY LOOKED FOR A JOB BEFORE TAKING THEIR PRESENT JOB BY HOW THEIR PRESENT JOB RELATED TO THEIR TRAINING[A]

Where Terminees Looked for Job Before Taking Present Job	Total Reporting		Total Reporting by Relatedness of Present Job to Vocational Training					
			Directly Related		Somewhat Related		Not Related	
	No.	%	No.	%	No.	%	No.	%
Within daily walking or driving distance of home	413	75.9	44	71.0	137	71.0	232	80.3
Beyond daily walking or driving distance of home[B]	131	24.1	18	29.0	56	29.0	57	19.7
TOTAL	544	100.0	62	100.0	193	100.0	289	100.0

[A]Two hundred fifty-two terminees reported they already had their present job while in high school. Of those 252 terminees, 51 (20.2%) were in a directly related area, 111 (44.1%) in a somewhat related area, while 90 (35.7%) were working in a non-related area.

[B]See listing, page 80, for reasons terminees gave for seeking their present job away from home.

Four hundred thirteen (75.9%) of the presently employed 1973-74 Agribusiness Occupations terminees indicated they sought employment within

daily walking or driving distance of home. One hundred thirty-one (24.1%) terminees indicated they sought employment beyond daily walking or driving distance of home.

Of the 62 terminees who were working in a directly related area, 18 (29.0%) sought employment beyond daily walking or driving distance of home.

Of the 289 terminees who were presently working in a non-related area, 57 (19.7%) sought employment beyond daily walking or driving distance of his home.

Two hundred fifty-two terminees reported they already had their present job while in high school. Of those 252 terminees, 51 (20.2%) were in directly related areas, 111 (44.1%) in somewhat related areas, and 90 (35.7%) were in non-related areas.

The following is a list of reasons terminees gave for seeking a job beyond daily walking or driving distance of their home before accepting their present job.

Reasons for Seeking Job Beyond Daily Walking or Driving Distance Before Accepting Present Job	Number
None (jobs) available near home	29
Better pay	14
Live in the country	3
Better job/more opportunity	3
There was no close job I was interested in	1
Was waiting on this job but had another	1
Easily acceptable, regular pay	1
My dad's company was in Birmingham	1
Because it was the job I preferred	1
Closest to home	1
Went into service	1
Necessity	1
I had worked there before	
Larger town	1
Full-time employment, higher wages	1
New York state	1
Wanted to see the U.S.	1

(continued)

Reasons for Seeking Job Beyond Daily Walking or Driving Distance Before Accepting Present Job	Number
Wanted to start my own	1
My business	1
I wanted to work away from home	1
Moved out of state	1
Lived too far away	1
I travel to my work	1
Look for anything I could find	1
I couldn't get a descent one until now	1
Nearest town	1
That is where my school is	1
Away from parents	1
I moved from home and married	1
Travelling was involved	1
Yes, I did	1
Wanted job close to college	1
The only place to look	1
Don't have a car	1
Because I'm living in another city, away from home	1
Hometown isn't industrial	1
Go to school there	1
Married	1
Birmingham	1
To move into town	1
Main office APCO	1
It was near school	1
Because I wnated training	1
Because my father got me the job	1
Because better pay and no good job	1

Table 35 reveals the indications of the 1973-74 Agribusiness Occupations terminees who were working in their present job not related to their training by whether or not they tried to get a job related to their training by where they looked for employment before accepting that present job.

Only 23 (7.9%) of the 292 terminees who were working in a non-related area sought related employment beyond daily walking or driving distance of home before accepting his present job.

TABLE 35

INDICATIONS OF THE 1973-74 AGRIBUSINESS OCCUPATIONS TERMINEES WORKING IN PRESENT JOB NOT RELATED TO THEIR TRAINING BY WHETHER OR NOT THEY TRIED TO GET A JOB RELATED TO THEIR TRAINING BY WHERE THEY LOOKED FOR EMPLOYMENT BEFORE ACCEPTING THEIR PRESENT JOB[A]

Before Accepting Present Job Where Terminees Working in Non-Related Areas Looked for Employment	Total Reporting		Before Accepting This Present Job Unrelated to Training Whether or Not Terminees Sought Job in Related Area			
			Yes		No	
	No.	%	No.	%	No.	%
Sought employment within daily walking or driving distance of their home	231	79.1	100	81.3	131	77.5
Sought employment beyond daily walking or driving distance of their home	61	20.9	23	18.7	38	22.5
TOTAL	292	100.0	123	100.0	169	100.0

[A]Totals in this table may not correspond with totals of terminees for non-related categories in other tables for the following reasons: (1) some terminees had jobs when leaving programs and did not have to seek employment and (2) some terminees failed to respond to one or more of the related questions from which data was drawn.

[B]See page 48 for the listing of reasons terminees who were working in non-related jobs gave for not trying to secure a job that was related to their training.

APPENDIX

PRESENT JOB AND FIRST JOB TITLES OF THE 1973-74
AGRIBUSINESS OCCUPATIONS TERMINEES

PRESENT JOB AND FIRST JOB TITLES OF THE 1973-74 AGRIBUSINESS OCCUPATIONS TERMINEES

For those terminees who indicated present or first job occupations, this appendix lists the present job title and first job title by their high school vocational training area (OE Codes). The job titles are listed as the terminees reported them. The number of full-time jobs held by these terminees since completing their high school vocational course is listed, current employment status is listed, and whether the student intended to get a job in the area while in the program.

The following code is used to identify the employment status of the terminees:

0. Unemployed, but seeking employment
1. Employed full time
2. Employed part time, seeking full-time job
3. Employed part time, not seeking full-time job
4. Employed full time and attending school
5. Employed part time and attending school
6. Unavailable for employment

The following code is used to identify whether the student intended to get a job in the area while in the program:

1. No
2. Was not sure
3. Yes

The number in parenthesis behind the job titles indicates the relatedness of the high school vocational training to these jobs. The terminees

made the judgment as to the relatedness of their training to these jobs. The following code is used to identify this relatedness:

1. Directly related
2. Somewhat related
3. Not related

The total in each occupations title area may not correspond to the total in each OE Code as listed in Table 23. Some of the terminees failed to indicate the title of their present position. If the first job title was the same as the present job title, the first job title is included under the present job title.

OE Code 01.0000 - Agribusiness

No.	Employment Status	Full-Time Jobs Held Since High School Voc. Course	Intent of Employment in Area	Present Job	First Job

TITLE: OCCUPATIONAL HOME ECONOMICS FOLLOW-UP. FOLLOW-UP OF 1973-74 OCCUPATIONAL HOME ECONOMICS TERMINEES FROM THE SECONDARY SCHOOL VOCATIONAL PROGRAMS OF ALABAMA. RESEARCH AND DEVELOPMENT REPORT NO. 33.

PERSONAL AUTHOR: MORGAN, ALICE S.; DRAKE, JAMES ROB

DESCRIPTOR: *OCCUPATIONAL HOME ECONOMICS; *VOCATIONAL FOLLOWUP; *OCCUPATIONAL SURVEYS; *SECONDARY EDUCATION; *STATE SURVEYS; VOCATIONAL EDUCATION

IDENTIFIER: ALABAMA

EDRS PRICE: MF AND HC AVAILABILITY WILL BE ANNOUNCED IN VOL. 10, NO. 2.

DESCRIPTIVE NOTE: 76P.; RELATED DOCUMENTS VT 103 321 THROUGH VT 103 335 IN THIS ISSUE.

ABSTRACT: THIS REPORT RELATES THE FINDINGS OF A STATEWIDE FOLLOWUP SURVEY OF 1973-74 OCCUPATIONAL HOME ECONOMICS OCCUPATIONS TERMINEES FROM THE SECONDARY SCHOOL VOCATIONAL PROGRAMS IN ALABAMA. QUESTIONNAIRES WERE MAILED TO 1,339 STUDENT TERMINEES APPROXIMATELY SEVEN TO EIGHT MONTHS AFTER LEAVING SCHOOL. RETURNS WERE RECEIVED FROM 474 (33.4 PERCENT) HOME ECONOMICS OCCUPATIONS TERMINEES FROM THE INITIAL MAILING AND ONE FOLLOWUP. DATA ARE PRESENTED IN TABLES WITH ACCOMPANYING NARRATIVE SUMMARIES ORGANIZED ACCORDING TO THESE MAJOR SECTIONS: GENERAL INFORMATION ON THE TERMINEES; BASIC INFORMATION RELATED TO THE VOCATIONAL PROGRAM; BASIC EMPLOYMENT INFORMATION; CONTINUING EDUCATION INFORMATION; AND JOB PLACEMENT INFORMATION. PRESENT AND FIRST JOB TITLES OF THE 1973-74 HOME ECONOMICS OCCUPATIONS TERMINEES ARE APPENDED. (NJ)

FOLLOW-UP OF 1973-74 OCCUPATIONAL HOME ECONOMICS
TERMINEES FROM THE SECONDARY SCHOOL
VOCATIONAL PROGRAMS OF ALABAMA

Alabama continues to support one of the most progressive and comprehensive vocational education programs in the nation. In addition to serving youth and adults by training them for gainful and useful employment, the diversification of vocational courses meets a serious job need and contributes to the industrial development in the state.

With the millions of tax dollars being spent on vocational education, it is necessary to attempt to account to the taxpayer and decision-makers on the results of those expenditures. Terminee student follow-up studies constitute one of the most valuable techniques for assessing vocational education system outcomes.

The Alabama State Department of Education, Division of Vocational Education and Community Colleges, recognizing this important phase of accountability and evaluation, initiated the development of a statewide follow-up system for its vocational education program terminees at the secondary school level. The Division, under the direction of Dr. T. L. Faulkner, State Director, contracted with the Occupational Research and Development Unit at Auburn University to Develop and implement the statewide follow-up system for all its secondary vocational terminees in all service areas.

This report relates the findings of the survey instrument mailed to the 1973-74 Occupational Home Economics terminees from the secondary

school vocational programs of Alabama. When the terminees received the questionnaire, most had been out of school seven to eight months.

General Information

Student rosters with names and addresses of 1973-74 Occupational Home Economics terminees were received from 93 secondary school vocational teachers in Alabama. Of the 93 teachers from which student rosters were received, 47 were in Secondary Area Vocational Centers (AVC) and 46 were in programs in schools of other settings. The total of 1,399 student terminees reported to the ORDU were mailed the follow-up forms. Returns were received from 474 (33.9%) of the Occupational Home Economics terminees from the initial mailing and one follow-up. At least one student questionnaire was received from 88 of the 93 teachers.

All terminees reported in this study were in programs administered only by the Division of Home Economics Education, State Department of Education.

Table 1 presents data relative to the total population of Occupational Home Economics terminees and the number of returns categorized by OE codes as reported by teachers.

TABLE 1

DESCRIPTION OF TOTAL POPULATION AND RETURNS BY OE CODE OF 1973-74 OCCUPATIONAL HOME ECONOMICS TERMINEES[A]

OE Code[B]	Occupational Title	Total Number of Students	Percent of Students by OE Code	Number of Returns	Percent of Returns for OE Code Area
07.0303	Nursing Assistance	5	0.4	3	60.0
09.0200	Occupational Preparation	136	9.7	38	27.9
09.0201	Care & Guidance of Children	328	23.4	138	42.1
09.0202	Clothing Management, Production and Services	387	27.7	155	40.1
09.0203	Food Management, Production and Services	331	23.6	100	30.2
09.0205	Institutional & Home Management & Supporting Services	5	0.4	1	20.0
09.0299	Occupational Preparation, Other	179	12.8	30	16.8
14.0702	Secretaries	3	0.2	1	33.3
17.3302	Tailoring	25	1.8	8	32.0
	TOTAL ALL AREAS	1399	100.0	474	33.9

[A]These Occupational Home Economics terminees were terminees in programs administered only under the Divison of Home Economics Education, State Department of Education.

[B]OE Codes as reported by teachers.

Of the 1973-74 Occupational Home Economics terminees reported by the teachers, the largest number in any OE code was in the occupational title area of Clothing Management, Production, and Services. This 387 represented 27.7 percent of the reported Occupational Home Economics terminees. There

were 331 (23.6%) terminees reported in Food Management, Production, and Services; and 328 (23.4%) listed as studying Care and Guidance of Children. The combined enrollments of these three areas was 1046, and this represented 74.8 percent of the total enrollment in the Occupational Home Economics area.

Table 1A is a description of total population and returns by OE Code area, type school, and termination status of the 1973-74 Occupational Home Economics terminees.

TABLE 1A

DESCRIPTION OF TOTAL POPULATION AND RETURNS BY OE CODE AREA, TYPE SCHOOL, AND TERMINATION STATUS OF THE 1973-74 OCCUPATIONAL HOME ECONOMICS TERMINEES

Basic Information Related to the Vocational Education Program

Table 6 points out the number of 1973-74 Occupational Home Economics terminees who indicated whether this vocational program was a school requirement.

TABLE 6

1973-74 OCCUPATIONAL HOME ECONOMICS TERMINEES WHO INDICATED WHETHER THEIR VOCATIONAL PROGRAM WAS A SCHOOL REQUIREMENT

Vocational Courses Was a School Requirement	Number	Percent
Yes	60	12.6
No	408	86.1
No Response	6	1.3
Total	474	100.0

Table 7 indicates, according to the 1973-74 Occupational Home Economics terminees, the primary source of influence in selecting their vocational course.

TABLE 7

PRIMARY INFLUENCES ON THE 1973-74 OCCUPATIONAL HOME ECONOMICS TERMINEES IN SELECTING THEIR VOCATIONAL COURSE

Group or Individual Terminees Felt Influenced Them Most in Selecting Vocational Course	Number	Percent
Parent(s) or Guardian(s)	19	4.0
Guidance Counselor	25	5.3
Your Vocational Teacher	26	5.5
Another Teacher or Principal	11	2.3
Student in VED Program	53	11.2
A Friend or Relative	28	5.9
A Businessman	2	0.4
Made Choice Yourself	299	63.1
Other (husband)[A]	8	1.7
No Response	3	0.6
TOTAL	474	100.0

[A]See page 10 for listing of "Others" who influenced Occupational Home Economics terminees in selecting their VED course.

A student in the VED Program appeared to be the greatest outside influence on those terminees enrolling in the Occupational Home Economics program. Fifty-three (11.2%) of the terminees responding indicated that another student in the VED program influenced them most in selecting their Occupational Home Economics course. However, 299 (63.1%) indicated that they selected their course of study on their own. Only 25 terminees (5.3%) indicated that a guidance counselor influenced them most in selecting their program. Twenty-six (5.5%) of the terminees indicated that their vocational teacher influenced them most in selecting their course in Occupational Home Economics.

Below are the responses given to the "Others" category indicated in Table 7 as to the primary source of influence in selecting their vocational course.

"Other" Persons or Groups Who Most Influenced Terminees in Selecting Their VED Course	Number
Two credits (no interest)	1
Took it for credit	1
Husband	1
No discussion	1
Enjoy children	1
Like to sew	1

Table 8 indicates terminees' opinions as to whether they had adequate job or occupational information and school experiences to make as realistic career choice.

TABLE 8

OPINIONS OF 1973-74 OCCUPATIONAL HOME ECONOMICS TERMINEES AS TO WHETHER THEY HAD ADEQUATE JOB OR OCCUPATIONAL INFORMATION AND SCHOOL EXPERIENCES TO MAKE A REALISTIC CAREER CHOICE

	Number	Percent
Yes	344	72.6
No	112	23.6
No Response	18	3.8
TOTAL	474	100.0

Table 9 indicates whether, during the time they were taking their high school vocational program, the reporting 1973-74 terminees intended to get a job in Occupational Home Economics.

TABLE 9

INDICATIONS OF 1973-74 OCCUPATIONAL HOME ECONOMICS TERMINEES AS TO WHETHER, DURING THE TIME THEY WERE TAKING THEIR HIGH SCHOOL VED PROGRAM, THEY PLANNED TO GET A JOB IN THEIR AREA OF STUDY

Intended To Get Job In Area of Study	Number	Percent
Yes	185	39.0
No	77	16.3
Was Not Sure	210	44.3
No Response	2	0.4
TOTAL	474	100.0

It is interesting to note that only 185 (39.0%) of the 1973-74 reporting Occupational Home Economics terminees indicated that during the time they were taking their Occupational Home Economics program, they intended to get a job in the area they were studying.

Table 10 indicates terminees' opinions on choosing the Occupational Home Economics program if they had the selection to make again.

A noteworthy point was revealed by the data. Of the 1973-74 Occupational Home Economics terminees, 366 (77.2%) indicated that they would select the same vocational program if they had the choice to make again. Only 15 (3.2%) of the responding terminees indicated that they would not take a vocational program.

TABLE 10

OPINIONS OF 1973-74 OCCUPATIONAL HOME ECONOMICS TERMINEES REGARDING THEIR VOCATIONAL PROGRAM

Question: If You Had It To Do Over Again, Would You...?	Number	Percent
Take the same vocational program	366	77.2
Not take a vocational program	15	3.2
Choose another vocational program offered in your school, such as _____ [A]	63	13.3
Choose another vocational program if it had been offered in your school, such as _____ [B]	19	4.0
No Response	11	2.3
TOTAL	474	100.0

[A]See listing IA below for those other vocational programs offered in terminees' school that they would have taken instead of their occupational home economics programs.

[B]See listing IB below for the vocational programs the terminee would have taken instead of their occupational home economics program if it had been offered in their school.

Table 11 indicates the extent to which the reporting 1973-74 Occupational Home Economics terminees felt their high school vocational programs prepared them for their first job. This data was also broken down by how that first job related to their vocational program.

Terminees who were in full-time active military service or who had never been employed were not asked to respond to the questions from which this data was reported. Also, the terminees who failed to respond to the question items were not indicated in the table.

In noting the extent to which the 1973-74 Occupational Home Economics terminees felt their high school vocational course prepared them for their

first full-time job by how their first full-time job related to the training they received in their high school occupational home economics program, some interesting points were revealed.

TABLE 11

PERCEPTIONS OF 1973-74 OCCUPATIONAL HOME ECONOMICS TERMINEES AS TO THE EXTENT THEIR HIGH SCHOOL VOCATIONAL PROGRAM PREPARED THEM FOR THEIR FIRST FULL-TIME JOB BY HOW FIRST FULL-TIME JOB RELATED TO TRAINING

Extent Vocational Course Prepared for Present Job	Total Reporting		Number Reporting by Relatedness of Present Job to Training Received					
			Directly Related		Somewhat Related		Not Related	
	No.	%	No.	%	No.	%	No.	%
Excellent	19	14.5	13	41.9	3	10.0	3	4.3
Well Prepared	40	30.5	16	51.6	16	53.4	8	11.4
Fair	6	4.6	0	0.0	4	13.3	2	2.9
Poorly Prepared	6	4.6	2	6.5	3	10.0	1	1.4
Preparation not related to job	60	45.8	0	0.0	4	13.3	56	80.0
TOTAL	131	100.0	31	100.0	30	100.0	70	100.0

Fifty-nine (45.0%) of the 1973-74 Occupational Home Economics terminees responding to this item indicated "Excellent" or "Well Prepared" for their first full-time job as a result of the training received in their high school vocational education program. Twenty-nine (93.5%) of the 31 terminees employed in their first full-time job related directly to their training felt they were excellent or well prepared for this first job. Only two terminees who were working in an area directly related to their vocational training felt they were poorly prepared for their first job. There were no terminees who indicated

they were working in an area directly related to their vocational course and felt that their preparation did not relate to their job. Of all the responding terminees, only six (4.6%) felt that they were poorly prepared for their first full-time job. Of these, only two were working in an area directly related to their vocational course.

Table 12 indicates the extent to which the reporting 1973-74 Occupational Home Economics terminees felt their high school vocational course prepared them for their present job. Also shown in the table is a breakdown of the data by how their present job was related to their vocational program.

TABLE 12

PERCEPTIONS OF 1973-74 OCCUPATIONAL HOME ECONOMICS TERMINEES AS TO THE EXTENT THEIR HIGH SCHOOL VOCATIONAL COURSE PREPARED THEM FOR THEIR PRESENT JOB BY HOW THEIR PRESENT JOB RELATED TO TRAINING

Extent Vocational Course Prepared for Present Job	Total Reporting		Number Reporting by Relatedness of Present Job to Training Received					
			Directly Related		Somewhat Related		Not Related	
	No.	%	No.	%	No.	%	No.	%

Fair[A]	8	5.3	0	0.0	5	15.2	3	3.3
Poorly Prepared	3	2.0	0	0.0	2	6.1	1	1.1
Preparation not related to job	78	52.0	0	0.0	7	21.2	71	78.9
TOTAL	150	100.0	27	100.0	33	100.0	90	100.0

[A]See listing p. 16 for reasons terminees specified for only being trained "Fair" by their vocational course for their present job.

Terminees in active full-time military service, and students who were attending school full time and had not had a job, were not asked to respond to the question from which Table 12 was prepared. Also, those other students who failed to respond to the items were not shown on the table.

Of the 150 terminees responding to these items, 61 (40.7%) indicated "Excellent" or "Well Prepared" for their present job as a result of their high school vocational program. Only three terminees (2.0%) reported feeling poorly prepared for their present job as a result of their training.

All 27 (100.0%) of the 27 responding terminees working in an area directly related to their high school vocational program indicated that they felt excellent or well prepared by their training.

Three terminees who indicated "fair" as the extent their vocational program prepared them for this present job indicated reasons for this. The following lists the reasons the 1973-74 Occupational Home Economics terminees indicated for being trained only "fair" by their vocational course for their present job.

1. Didn't finish
2. They didn't care
3. Some was not taught

Two of the terminees who indicated they were "poorly prepared" for their present job by their vocational program gave reasons why they felt that way. The following are the reasons given:

1. No English involved
2. Never sewed draperies

Table 13 focuses on the Occupational Home Economics student club. The researchers sought to determine the extent to which the 1973-74 Occupational Home Economics terminees felt that their high school student club aided in preparing them for their present job. Data are also broken down by the relationship of the present job to the vocational training received.

TABLE 13

PERCEPTIONS OF 1973-74 OCCUPATIONAL HOME ECONOMICS TERMINEES AS TO THE EXTENT THEIR HIGH SCHOOL VOCATIONAL STUDENT CLUB PREPARED THEM FOR THEIR PRESENT JOB BY HOW THEIR PRESENT JOB RELATED TO TRAINING[A]

Extent High School Vocational Student Club Helped Prepare for Present Job	Total Reporting		Total Reporting by Relatedness of Present Job to Vocational Training					
			Directly Related		Somewhat Related		Not Related	
	No.	%	No.	%	No.	%	No.	%
Excellent	16	19.0	5	31.3	2	8.0	9	20.9
Well Prepared	28	33.3	5	31.3	10	40.0	13	30.2
Fair	25	29.8	5	31.3	10	40.0	10	23.3
Poorly Prepared	15	17.9	1	6.2	3	12.0	11	25.6
TOTAL	84	100.0	16	100.0	25	100.0	43	100.0

[A]Of the 178 who responded, 20 (11.2%) had no related student club available, and 74 (41.6%) were not members of a related student club.

Only respondents who had had a job since terminating their high school vocational Occupational Home Economics program were asked to respond to the question reported in Table 13. Students in active full-time military service were excluded, 20 (11.2%) of the 178 terminees reported no related student club was available, while 74 were not members of a related student club.

Forty-four (52.3%) of the 84 terminees who participated in student club activities indicated they were "Excellent" or "Well Prepared" by their related student club for their present job. Fifteen (17.9%) indicated they were "Poorly Prepared" by their related student club for their present job. Of those 15, one (6.7%) was in a related job, three (20.0%) were in a somewhat related job, and 11 (73.3%) were in a non-related job.

Of those terminees who were working in an area directly related to the training they received in their high school vocational program, 10 (62.6%) revealed that they were "Excellent" or "Well Prepared" for their present job by their related student club. Only one (6.2%) of the 16 terminees who were working in a job directly related to the training they received indicated he was "Poorly Prepared" for his present job by his related student club.

Table 14 reports how the 1973-74 Occupational Home Economics terminees rated the quality of teaching by their high school vocational instructors.

TABLE 14

1973-74 OCCUPATIONAL HOME ECONOMICS TERMINEES' RATINGS OF THE QUALITY OF TEACHING BY THEIR HIGH SCHOOL VOCATIONAL INSTRUCTORS

Rating	Number	Percent
Excellent	239	50.4
Good	173	36.5
Fair	46	9.7
Poor	9	1.9
Very Poor	5	1.1
No Response	2	0.4
TOTAL	474	100.0

Four hundred twelve (86.9%) of the 474 reporting 1973-74 Occupational Home Economics terminees rated the quality of teaching by their vocational instructor either "Good" or "Excellent". Only 7 (1.5%) rated the quality of teaching by their instructors "Poor" or "Very Poor".

Table 15 illustrates how the 1973-74 Occupational Home Economics terminees rated their high school vocational instructor's interest in their class work.

TABLE 15

1973-74 OCCUPATIONAL HOME ECONOMICS TERMINEES' RATINGS OF THEIR HIGH SCHOOL VOCATIONAL INSTRUCTOR'S INTEREST IN THE STUDENT'S CLASS WORK

Rating	Number	Percent
Excellent	235	49.6
Good	172	36.3
Fair	46	9.7
Poor	12	2.5
Very Poor	7	1.5
No Response	2	0.4
TOTAL	474	100.0

Four hundred seven (85.9%) of the 474 reporting 1973-74 Occupational Home Economics terminees rated the interest exhibited by their high school vocational instructor in their class work as "Good" or "Excellent" Only 19 (4.0%) of the terminees rated the interest their vocational instructors showed in their class work as "Poor" or "Very Poor".

Table 16 points out how the 1973-74 Occupational Home Economics terminees subjectively rated the knowledge their vocational teachers possessed about their field of study. This rating is also shown in

the table by a breakdown of how the terminees' present job related to the training they received in their high school vocational program. Terminees were asked to base their judgments on their current knowledge of their job and responsibilities.

TABLE 16

1973-74 OCCUPATIONAL HOME ECONOMICS TERMINEES' RATINGS OF THE KNOWLEDGE THEIR HIGH SCHOOL VOCATIONAL TEACHER POSSESSED ABOUT THEIR FIELD OF STUDY BY HOW THE TERMINEES' PRESENT JOB RELATED TO THE TRAINING THEY RECEIVED

Ratings[A]	Total Reporting		Number Reporting by Relatedness of Present Job to Training Received					
			Directly Related		Somewhat Related		Not Related	
	No.	%	No.	%	No.	%	No.	%
Excellent	61	38.4	12	42.9	10	29.4	39	40.2
Good	75	47.2	14	50.0	19	55.9	42	43.3
Fair	17	10.7	2	7.1	4	11.8	11	11.4
Poor	4	2.5	0	0.0	0	0.0	4	4.1
Very Poor	2	1.2	0	0.0	1	2.9	1	1.0
TOTAL	159	100.0	28	100.0	34	100.0	97	100.0

[A]Ratings were to be based on terminee's judgment of their current knowledge of their job and responsibilities.

Total responses to this item indicates that 136 (85.6%) of the 159 responding 1973-74 Occupational Home Economics terminees rated the knowledge their vocational teachers possessed about their field of study either "Good" or "Excellent". For those 28 terminees working in an area directly related to the training they received, 26 (92.9%) rated the knowledge their teachers

possessed about their field of study as "Good" or "Excellent". A favorable point was revealed in that only six (3.7%) of those terminees rated the knowledge their vocational teachers possessed about their field of study as "Poor" or "Very Poor".

If the respondent was working in an area related to his training, he was asked to compare the facilities and equipment in his high school vocational program with those on his present job. Table 17 illustrates how the 1973-74 Occupational Home Economics terminees responded.

TABLE 17

HOW 1973-74 OCCUPATIONAL HOME ECONOMICS TERMINEES WORKING IN A RELATED AREA RATED THE FACILITIES AND EQUIPMENT IN THEIR HIGH SCHOOL VOCATIONAL PROGRAM[A]

Rating[B]	Number	Percent
Better than those on present job	9	16.7
Similar to those on present job	37	63.8
Not as good as those on present job	6	10.3
TOTAL	58	100.0

[A]One hundred nineteen (67.2%) of the responding 177 terminees indicated that their present job was not related to their vocational training enough to compare facilities and equipment.

[B]Persons who had not had a job since leaving their vocational program, including those in military service and those who attended school, were asked not to respond to questions from which data was drawn. Returns were received from 474 terminees.

Only 15 (25.9%) of the 58 responding 1973-74 Occupational Home Economics terminees working in an area related to their training rated the facilities and equipment in their high school vocational program as better than those on their present job. Thirty-seven (63.8%) rated the facilities and equipment in their high school vocational program as

similar to those on their present job; however, six (10.3%) rated the facilities and equipment not as good as those on their present job.

Table 18 shows how 1973-74 Occupational Home Economics terminees, who were in a cooperative work program in school and were now working in an area related to their vocational training, rated the facilities and equipment used in their cooperative work station.

TABLE 18

HOW 1973-74 OCCUPATIONAL HOME ECONOMICS TERMINEES NOW WORKING IN A RELATED AREA, WHOSE VOCATIONAL PROGRAM INCLUDED COOPERATIVE WORK, RATED FACILITIES AND EQUIPMENT USED IN THEIR COOPERATIVE WORK STATION[A]

Rating[B]	Number	Percent
Better than those on present job	9	16.7
Similar to those on present job	29	53.7
Working at same place where cooperative training was done	12	22.2
Not as good as those on present job	4	7.4
TOTAL	54	100.0

[A]Twenty-three (13.2%) of the responding 174 Occupational Home Economics terminees indicated their vocational program was not a cooperative program. Ninety-seven (55.7%) terminees indicated they were not working in an area reltated to their cooperative work; therefore, they did not complete this item on the questionniare.

[B]Persons who had not had a job since leaving their vocational program, including those in military service and those attending school, were asked not to respond to questions from which data was drawn. Returns were received from 474 terminees.

Only nine (16.7%) of the 54 responding 1973-74 Occupational Home Economics terminees whose vocational programs had included cooperative work and were now working in an area related to their vocational training,

rated the facilities and equipment in his cooperative work station as better than those on his present job. Twenty-nine (53.7%) rated the facilities and equipment in their cooperative training station as similar to those on their present job. Only four (7.4%) rated the facilities and equipment in their cooperative owrk station not as good as those in their present job. It was significant to note that 12 (22.2%) indicated they were working at the same establishment where they did their cooperative training.

Basic Employment Information

The following section of this report offers information relative to employment and job characteristics of the 1973-74 secondary Occupational Home Economics terminees.

Table 19 illustrates the number of full-time jobs the responding 1973-74 Occupational Home Economics terminees have had since leaving their high school vocational course.

TABLE 19

NUMBER OF FULL-TIME JOBS HELD BY THE 1973-74 OCCUPATIONAL HOME ECONOMICS TERMINEES SINCE LEAVING THEIR HIGH SCHOOL VOCATIONAL COURSE

Number of Full-Time Jobs Held	Number	Percent[A]
One	129	27.2
Two	27	5.7
Three	2	0.4
Four	1	0.2
Five or more	3	0.6
TOTAL	162	34.1

[A]Percentage is based on the 474 terminees who returned the questionnaire.

There were 129 (29.2%) of the total 474 responding 1973-74 Occupational Home Economics terminees who had been employed in just one job since leaving their high school vocational program. Only 33 (6.9%) of of the terminees reported having two or more jobs since leaving their high school vocational course seven to eight months ago.

Table 20 reveals the first job employment status of Occupational Home Economics terminees who returned the survey by the relatedness of their vocational training to their first job.

TABLE 20

FIRST-JOB EMPLOYMENT STATUS OF OCCUPATIONAL HOME ECONOMICS TERMINEES (1973-74) BY RELATEDNESS OF VOCATIONAL TRAINING TO FIRST JOB[A]

First Job After Leaving High School Vocational Program	Total Reporting		Relatedness of Vocational Training to First Job[B]					
			Directly Related		Somewhat Related		Not Related[C]	
	No.	%	No.	%	No.	%	No.	%
Full-Time	133	28.1	31	6.5	31	6.5	71	15.0
Part-Time	48	10.1	7	1.5	10	2.1	31	6.5
TOTAL	181	38.2	38	8.0	41	8.6	102	21.5

[A]All percentages were based on the 474 (33.9%) of 1399 terminees who returned the survey form.

[B]The terminees made the judgment as to how their first job was related to the training received in their high school vocational program.

[C]See page 25 for reasons terminees who were working in first job unrelated to this vocational training gave for not seeking job that was related before accepting their first job.

Of the 474 responding 1973-74 Occupational Home Economics terminees 133 (28.1%) were employed full time in their first job after leaving their high school vocational program. Forty-eight terminees' first jobs were on

a part-time basis.

Thirty-eight (8.0%) of the 474 responding terminees' first jobs (full-time or part-time) were in an area directly related to the training they received in their high school vocational course. Forty-one (8.6%) were employed in an area somewhat related while 102 (21.5%) were employed in a first job not related to the training they received. The terminees made the judgment as to how their first job was related to the training they received. The terminees made the judgment as to how their first job was related to the training they received in their high school vocational program.

Of the 102 terminees who indicated their jobs were not related to their vocational course, 57 (55.9%) terminees indicated that before they accepted their unrelated job, they tried to get a job that was related to their vocational training. However, 45 (44.1%) of the terminees did not.

The following is a list of reasons given by the terminees who, before taking their first unrelated job indicated they did not seek a job that was related to their vocational training.

Reasons	Number
Lack of interest	7
None available	4
Not enough training	3
Changed interests	3
Already had job	1
Got married	1

Table 21 shows by OE Code for the first job of the 1973-74 Occupational Home Economics terminees the relatedness of their training to this first job.

TABLE 21

	TOTAL ALL AREAS	191	100.0	41	21.5	41	21.5	109	57.0

[A]Of 1399 Occupational Home Economics terminees, 474 (33.9%) returned the questionnaire.

[B]The terminees made the judgment as to how their first job was related to the training received in their high school vocational program.

Of the 191 responding 1973-74 Occupational Home Economics terminees who indicated how their first job related to the training they received in their high school vocational program 41 (21.5%) were employed in directly related areas. Forty-one (21.5%) were employed in somewhat related areas while 109 (57.0%) terminees were employed in areas not related to their training.

The terminees made the judgment as to how their first job was related to the training received in their high school vocational program.

More responding terminees who studied in Clothing Management, Production & Services (09.0202) indicated first job employment. This was to be expected since more terminees studied in this occupational objective area (See Table 1). Of the 61 employed 1973-74 terminees who studied in this Occupational area and indicated relatedness of training, 17 (27.9%) were employed in an area directly related to that training. Eighteen (29.5%) were employed in their first job in an area somewhat related to their training. However, 26 (42.6%) of these responding terminees indicated that their first job was not related to the training they received in their Occupational Home Economics program.

Table 21A is a description of 1973-74 Occupational Home Economics terminees' first job by OE code area studied, number of returns, type school, termination status, and relatedness of training.

[A]OE Code areas as reported by teachers.
[B]Area Vocational Centers.
[C]Any terminee who left the program by completing or by high school graduation.
[D]Any terminee who the instructor reported as having dropped out of school.
[E]The terminees made the judgment as to how their first job was related to the training received in their high school vocational program.

Table 22 illustrates the current employment status of the responding terminees by the relatedness of their vocational training to their present jobs. All percentages figured in the table were based on the 474 (33.9%) returns from the 1399 Occupational Home Economics terminees.

Of the 474 responding 1973-74 secondary Occupational Home Economics terminees, 101 (21.3%) were presently employed full time and not attending school or employed full time and attending school. Twenty-three (4.9%) of the terminees were employed part time and attending school, while 13 (2.7%) were unavailable for employment (See page 32 for reasons terminees were unavailable for employment). Only 43 (9.1%) of the terminees were unemployed and actively seeking employment, while 12 (3.5%) were employed part time and seeking full-time employment.

TABLE 22

CURRENT EMPLOYMENT STATUS OF OCCUPATIONAL HOME ECONOMICS TERMINEES (1973-74) BY RELATEDNESS OF TRAINING TO PRESENT JOB[A]

Employment Status	Total Responding		Relatedness of Training to Present Job[B]							
			Directly Related		Somewhat Related		Not Related[E]		Employed No Response	
	No.	%	No.	%	No.	%	No.	%	No.	%
Employed full time and not attending school	94	19.8	16	3.4	21	4.4	55	11.6	2	0.4

Employed part-time and not seeking full-time job	3	0.6	1	0.2	0	0.0	2	0.4	0	0.0
Employed part time and attending school	23	4.9	4	0.8	5	1.1	14	3.0	0	0.0
Unemployed (actively seeking a job)[C]	43	9.1	NA	NA	NA	NA	NA	NA	NA	NA
Unavailable for employment[C&D]	13	2.7	NA	NA	NA	NA	NA	NA	NA	NA
No Response	279	58.9	NA	NA	NA	NA	NA	NA	NA	NA
TOTAL	474	100.0	23	4.8	30	6.3	82	17.3	4	0.8

[A]All percentages were based on the 474 (33.9%) respondents of the total 1399 terminees. Terminees in active full-time military service or attending school full-time and had never been employed were included in the "No Response" category.

[B]The terminees made the judgment as to how their present job was related to the training received in their high school vocational program.

[C]The unemployed and unavailable for employment categories do not include persons in the military service and persons who were in school full time and never had a job.

[D]See page 29 for the listing of reasons Occupational Home Economics terminees gave for being unavailable for employment.

[E]See page 30 for reasons terminees who were working in present job not related to vocational training gave for not seeking related job before accepting present job. Totals for unrelated columns may not correspond because terminees failed to respond to one of the two questions from which data was drawn.

The "No Response" category in Table 22 includes three groups: (1) terminees in active full-time military service; (2) terminees who were in school full time and had never had a job; and (3) terminees who failed to respond to the item on the questionnaire.

Of the 474 secondary Occupational Home Economics respondees, 23 (4.8%) were presently employed full time or part time in an area directly related to the training received in their high school vocational course. Thirty (6.3%) were employed either part time or full time in an area somewhat related to their training, while 82 (17.3%) were employed in areas not related to their training. The terminees made the judgment as to how their present employment was related to the training received in their high school vocational course.

Below is a list of the reasons given by the terminees for being unavailable for employment.

Reason	Number
In school full time	26
Presently not working, not interested in a job	8
Homemaker	22
Pregnancy	30
Illness or disability	3
Other	15

Of the 102 terminees who indicated their present jobs were not related to their vocational course, 54 (52.9%) terminees indicated that before they accepted their unrelated job, they tried to get a job that was related to their vocational training. However, 48 (47.1%) of the terminees did not.

The following is a list of reasons given by the terminees who, before taking their present unrelated job, indicated they did not seek a job that was related to their vocational training.

Reasons	Number
Money	5
None available	9
Not interested	11
Not enough training	3
Changed interests	8
Needed a job	5
Had a job	3
Convenient hours	3
Not working	1

Table 23 shows for the present job, by OE code, the number of 1973-74 secondary Occupational Home Economics terminees employed by the relatedness of their vocational training to their present job.

Of the 160 secondary Occupational Home Economics who indicated present employment, 51 (10.8%) who studied in the area of Care & Guidance of Children, OE Code 09.0201, and 49 (10.4%) who studied in the area of Clothing Management & Production, OE Code 09.0202 were employed. These represented the largest numbers of employed terminees that studied in the OE Code areas.

Of the 100 terminees presently employed that studied in these two areas, 16 (16.0%) were employed in an area directly related to the training received in their high school vocational program. Sixty-four (6.4%) of the 100 employed terminees who studied in these two areas indicated their present jobs were not related to their high school vocational training. The terminees made the judgment as to how their present job related to the training received in their high school vocational program.

[A]OE Code areas as reported by teachers.

[B]Area Vocational Centers.

[C]Any terminee who left the program by completing or by high school graduation.

[D]Any terminee who the instructor reported as having dropped out of school.

[E]The terminees made the judgment as to how their first job was related to the training received in their high school vocational program.

Table 24 indicates the first job salary ranges as compared to the present job salary ranges for the 1973-74 Occupational Home Economics terminees.

TABLE 24

FIRST-JOB SALARY RANGES AND PRESENT-JOB SALARY RANGES FOR 1973-74 OCCUPATIONAL HOME ECONOMICS TERMINEES

Salary Ranges	First Job		Present Job	
	No.	%	No.	%
Under $250	107	62.9	63	51.7
$250 - $299	30	17.6	20	16.4
$300 - $349	19	11.1	15	12.3
$350 - $399	4	2.4	6	4.9
$400 - $449	3	1.8	10	8.2
$450 - $499	1	0.6	2	1.6
$500 - $599	3	1.8	5	4.1
$600 - $699	1	0.6	1	0.8
$700 or more	2	1.2	0	0.0
TOTAL	170	100.0	122	100.0

Of the 170 terminees reporting a salary range for their first job, 107 (62.9%) indicated a range of under $250 per month. Three terminees reported a first salary of more than $600 per month. The median salary range for the first job fell in the range of under $250 per month. The mean salary range for the first job fell in the range of $250 - $299 per month.

Of the 122 1973-74 Occupational Home Economics terminees reporting a salary range for their present job, 63 (51.7%) indicated under $250 per month. This salary range was indicative of the mode of the reporting students. The median and mean salary ranges for the present job fell within the range of $250 - $299 per month or less. The salary ranges of

present jobs over first jobs do not indicate a considerable increase for the reporting Occupational Home Economics terminees.

Table 24A indicates the first-job salary ranges by relatedness of training and sex of the Occupational Home Economics terminees.

TABLE 24A

FIRST-JOB SALARY RANGES BY RELATEDNESS OF TRAINING OF 1973-74 OCCUPATIONAL HOME ECONOMICS TERMINEES BY SEX

Salary Ranges	Sex of Terminees Responding		Relatedness of Training to First Job[B]					
			Directly Related		Somewhat Related		Not Related	
	Male	Female	Male	Female	Male	Female	Male	Female
Under $250	7	87	1	22	0	19	6	46
$250 - $299	2	28	2	5	0	7	0	16
$300 - $349	0	14	0	3	0	2	0	9
$350 - $399	2	2	1	0	0	0	1	2

$450 - $499	0	1	0	0	0	0	0	1
$500 - $599	1	2	0	0	0	1	1	1
$600 - $699	0	1	0	0	0	0	0	1
$700 or more	0	2	0	0	0	1	0	1
TOTAL[A]	12	140	4	30	0	31	8	79

[A]Totals do not match those of Table 24 because some terminees did not respond to all questions.

[B]The terminees made the judgment as to how their first job was related to the training received in their high school vocational program.

Ninety-four (61.8%) of the 152 responding terminees were employed at less than $250 per month. Of these 94 terminees, one (1.1%) male and 22 (23.4%) females were employed in a job directly related to their training, 19 (20.2%) females were employed in jobs somewhat related to their training, while six (6.4%) males and 46 (48.9%) females were employed in jobs not related to their training.

Of the 152 responding terminees, 12 (7.9%) were males and 140 (92.1%) were females. Four (2.6%) males and 30 (19.7%) females were employed in jobs directly related to their vocational training, no males and 31 (20.4%) females were employed in jobs somewhat related to their training, while 8 (5.3%) males and 79 (52.0%) females were employed in jobs not related to their training.

Table 24B indicates the present-job salary ranges by relatedness of training and sex of the Occupational Home Economics terminees.

TABLE 24B

PRESENT-JOB SALARY RANGES BY RELATEDNESS OF TRAINING OF 1973-74 OCCUPATIONAL HOME ECONOMICS TERMINEES BY SEX

Salary Ranges	Sex of Terminees Responding		Relatedness of Training to First Job[B]					
			Directly Related		Somewhat Related		Not Related	
	Male	Female	Male	Female	Male	Female	Male	Female
Under $250	3	58	2	11	0	13	1	34
$250 - $299	4	15	1	4	0	5	3	6

$600 - $699	0	1	0	0	0	0	0	1
$700 or more	0	0	0	0	0	0	0	0
TOTAL[A]	11	107	3	20	1	26	7	61

[A]Totals do not match those of Table 24 because some terminees did not respond to all questions.

[B]The terminees made the judgment as to how their present job was related to the training received in their high school vocational program.

Sixty-one (51.7%) of the 118 responding terminees were employed at less than $250 per month. Of these 61 terminees, 11 (18.0%) females and two (3.3%)

males were employed in a job directly related to their training, 15 (21.3%) females were employed in jobs somewhat related to their training, while one (1.6%) male and 34 (55.7%) females were employed in jobs not related to their training.

Of the 118 responding terminees, 11 (9.3%) were males and 107 (90.7%) were females. Three (2.6%) males and 20 (17.0%) females were employed in jobs directly related to their vocational training, one (0.8%) male and 26 (22.0%) females were employed in jobs somewhat related to their training, while seven (5.9%) males and 61 (51.7%) females were employed in jobs not related to their training.

Continuing Education Information

The following section of this report presents information relative to the continuing education of the 1973-74 secondary Occupational Home Economics terminees.

Table 25 shows the vocational educational training opportunities terminees have participated in since leaving their high school vocational program.

Of the total terminees, the 34 (7.2%) who were enrolled in a university or four-year college, and the 33 (7.0%) who were enrolled in Junior Colleges represented the largest areas where terminees had taken additional vocational training.

Of the 474 responding terminees, 154 (32.5%) had taken part in one additional vocational training program since leaving their high school program. Thirteen (2.7%) enrolled in two training programs, and one (0.1%) terminee had enrolled in three vocational training programs. Three hundred twenty (67.5%) indicated they had not enrolled in any additional vocational

training.

TABLE 25

ADDITIONAL VOCATIONAL EDUCATIONAL TRAINING 1973-74 SECONDARY OCCUPATIONAL HOME ECONOMICS TERMINEES PARTICIPATED IN SINCE LEAVING THEIR HIGH SCHOOL VOCATIONAL PROGRAM[A]

Type Training	Number	Percent[B]
On-the-job training (employer-sponsored program)	29	6.1
Public school adult vocational program	7	1.5
Private vocational school program	4	0.8
University or four-year college	34	7.2
Junior college	33	7.0
Post-secondary vocational-technical institute (trade school)	27	5.7
Apprenticeship training program	6	1.3
Specialized occupational military training	1	0.2
Other[C]	27	5.7
TOTAL[D]	168	35.5

[A]Three hundred twenty (67.5%) of the 474 terminees gave no indication of being involved in additional vocational training. Of the 474 terminees 154 (32.5%) took part in one additional vocational training opportunity since leaving their high school program. Thirteen (2.7%) took part in two and one (0.2%) took part in the three additional training opportunities.

[B]Percentages are based on the 474 (33.9%) respondents of the total 1399 terminees who returned questionnaires.

[C]See page 43 for the "Other" listing as specified by the terminees.

[D]The total indicates the number of different training programs in which terminees enrolled. As footnoted above, several terminees had enrolled in more than one training program.

The following is a listing of the "Other" (Table 25) vocational education training terminees indicated they had participated in:

"Other" Vocational Training	Number
Business College	5
Nursing School	3
Home Economics	2
At home	3
Part-time	8
K.P. Cook	1
Special Education	1
Substitute Teaching	1

Table 26 points out the additional programs the 1973-74 secondary Occupational Home Economics terminees were presently attending beyond their high school training by whether these programs were related to their high school vocational program.

TABLE 26

PROGRAMS PRESENTLY ATTENDED BY THE 1973-74 SECONDARY OCCUPATIONAL HOME ECONOMICS TERMINEES BY WHETHER THESE PROGRAMS WERE RELATED TO THEIR HIGH SCHOOL VOCATIONAL EDUCATION PROGRAM[A]

Programs Attended	Terminees		Program Related to High School VED Program					
			Yes		No		No Response	
	No.	%	No.	%	No.	%	No.	%
On-the-job training (employer-sponsored)	6	1.3	2	0.4	3	0.6	1	0.2
Vocational-technical institute (Trade School)	28	5.9	10	2.1	15	3.2	3	0.6
Junior College	41	8.6	12	2.5	29	6.1	0	0.0
Four year college or university	29	6.1	9	1.9	20	4.2	0	0.0
Public school adult vocational program	5	1.1	2	0.4	3	0.6	0	0.0
Private business or trade school	7	1.4	2	0.4	5	1.1	0	0.0
Apprenticeship program	1	0.2	0	0.0	1	0.2	0	0.0
Other[B]	14	3.0	4	0.8	10	2.1	0	0.0
TOTAL	131	27.6	41	8.6	86	18.1	4	0.8

[A]All percentages were based on the 474 responding terminees.

[B]See page 44 for listing of "Other" colleges or educational institutions terminees were attending.

Of the 474 1973-74 secondary Occupational Home Economics terminees who responded to the survey, six (1.3%) were attending an on-the-job training program (employer-sponsored) 28 (5.9%) were attending a vocational-technical institute, 41 (8.6%) were attending a junior college, 29 (6.1%) were attending a four year college or university, 5 (1.1%) were attending a public adult vocational program, seven (1.4%) were attending private business or trade school, one (0.2%) was attending an apprenticeship program, and 14 (3.0%) were attending some other type of school or education program. (See below for the listing of the other types of schools or educational programs students were attending.)

One hundred thirty-one (27.6%) of the 474 Occupational Home Economics terminees were presently continuing their education. Forty-one (8.6%) of the terminees were continuing their education in a program related to their high school vocational program. Eighty-six (18.1%) were attending a program in an area not related to their high school vocational program.

The following is a listing of the "Other" category (Table 25) of additional programs the 1973-74 Occupational Home Economics terminees were attending:

"Other" School or Program	Number
American School (correspondence course)	1
Home Study	2
Teacher's Aide	2
National Guard	1

Of the 474 responding terminees, 278 (58.7%) indicated they were not attending a school or program but would like to do so. The following is a list of the areas in which these terminees desired to study:

Area of Study	Number
Business	48
Clothing	69
Nursing	28
Child Care	44
Foods	23
Cosmetology	4
Sales	2
Interior Decorating	6
Teacher	7
Brick Mason	1
Welding	1
Telephone Operator	1
Electronics	1
Vet	1
Undecided	11
Industrial	3
Modeling	2
Auto Mechanical	1
Home Economics	6
Floristry	1

One hundred twenty-nine (27.2%) of the 474 responding terminees indicated they were not attending a school or program and did not desire to do so. Sixty-seven (14.1%) terminees did not respond to the question.

Table 27 illustrates the programs presently attended by the terminees by OE Code area studied by whether it related to their high school vocational program. No attempt was made to show the no responses to the data items; therefore, many of the totals do not correspond.

TABLE 27

PROGRAMS PRESENTLY ATTENDED BY THE 1973-74 SECONDARY OCCUPATIONAL HOME ECONOMICS TERMINEES BY OE CODE AREA STUDIED BY WHETHER IT RELATED TO THEIR HIGH SCHOOL VOCATIONAL PROGRAMS[A]

[A]Since some terminees did not respond to parts of the questions, totals will not correspond.

Job Placement Information

The following section of this report presents information concerning job placement of the 1973-74 secondary Occupational Home Economics terminees.

Table 28 points out whether the 1973-74 Occupational Home Economics terminees were seeking full-time employment when they left their high school vocational program and if their vocational teacher attempted to help them get a job.

TABLE 28

WHETHER VOCATIONAL TEACHER ATTEMPTED TO HELP 1973-74 OCCUPATIONAL HOME ECONOMICS TERMINEES GET A JOB IF SEEKING FULL-TIME EMPLOYMENT UPON LEAVING THE HIGH SCHOOL VOCATIONAL PROGRAM[A]

Vocational Teacher Attempted To Get Terminee A Job	Number	Percent
Yes	111	48.3
No	119	51.7
TOTAL	230	100.0

[A]Two hundred thirty-one (48.7%) of the responding terminees indicated they were not seeking full-time employment when they left their high school vocational program. Thirteen (2.7%) of the terminees did not respond to the question.

Of the 232 responding 1973-74 Occupational Home Economics terminees indicating they were seeking full-time employment when they left their high school vocational program, 111 (48.3%) indicated that their vocational teacher attempted to help them get a job. However, 119 (51.7%)

of the terminees seeking full-time employment indicated that their vocational teacher did not attempt to help them secure employment. It was interesting to note that 231 (48.7%) of the reporting 1973-74 Occupational Home Economics terminees indicated that they were not seeking full-time employment when they left their high school vocational program.

Table 29 illustrates how long it took the 1973-74 Occupational Home Economics terminees to get their first full-time job after they left their high school vocational program and began actively seeking full-time employment.

TABLE 29

LENGTH OF TIME IT TOOK THE 1973-74 OCCUPATIONAL HOME ECONOMICS TERMINEES TO SECURE FIRST FULL-TIME JOB AFTER LEAVING HIGH SCHOOL VOCATIONAL PROGRAM AND BEGINNING ACTIVELY SEEKING FULL-TIME EMPLOYMENT[A]

Time to Secure First Full-Time Job	Number	Percent
0 - 2 weeks	42	33.6
3 - 4 weeks	20	16.0
5 - 8 weeks	13	10.4
9 - 12 weeks	22	17.6
13 or more weeks	28	22.4

[A]Forty-six terminees indicated they already had a job when they left their high school vocational program.

Forty-two (33.6%) of the 125 secondary Occupational Home Economics terminees secured their first full-time job within two weeks after they left their high school vocational program and began actively full-time employment. However, twenty-eight (22.4%) of the terminees took 13

or more weeks to secure their first full-time job. There were 46 terminees who indicated they already had a job when they left their high school vocational program.

Table 30 shows how the 1973-74 secondary Occupational Home Economics terminees indicated they got their first full-time job after leaving their high school vocational program.

TABLE 30

HOW THE 1973-74 OCCUPATIONAL HOME ECONOMICS TERMINEES INDICATED THEY GOT THEIR FIRST FULL-TIME JOB AFTER LEAVING THEIR HIGH SCHOOL VOCATIONAL PROGRAM

How Terminees Secured First Full-Time Job	Number	Percent
Through your vocational teacher	11	7.5
Through your counselor	1	0.7
Through other school teachers or administrators	1	0.7
Through a friend or relative	51	34.9
Through applications to business or industry	49	33.6
Through state (local) employment office	13	8.9
Through a private employment agency	4	2.7
Through radio, T.V., newspaper, or other news media	2	1.4
Other[A]	14	9.6
TOTAL	146	100.0

[A]See listing on page 50 for the "Other" ways terminees indicated they secured their first full-time job after leaving their high school vocational program.

Of the 146 1973-74 Occupational Home Economics terminees who responded to the survey item, 49 (33.6%) indicated they got their first full-time job after leaving their high school vocational program through applications to business and industry. Fifty-one (34.9%) of

the termineee also indicated they got their first full-time job through a friend or relative. These represented the two methods that the largest number of Occupational Home Economics termineee utilized to secure their first full-time job. Only 11 (7.5%) of the termineee indicated they secured their first job through their vocational teacher. Only one student indicated that a counselor got her the first full-time job after leaving her vocational program. Those students who already had a job before leaving their high school vocational program were not shown in Table 30. (See Table 31, page 51).

Several of the termineee who checked the "Other" category specified the means by how they secured their first full-time job after leaving their high school vocational program. The following list indicates the "Other" means the termineee indicated.

"Other" Means for Securing First Full-Time Job	Number
Haven't had one	4
They called me	3
Myself	2
Sign outside	1
Vocational School	1

Table 31 shows how the 1973-74 Occupational Home Economice termineee who were working while in high school taking vocational program indicated they got that job.

One hundred one (21.3%) of the 474 reporting 1973-74 Occupational Home Economics termineee indicated they were working during the time they were in high school taking their vocational program. Of those termineee working while in high school, 30 (29.7%) got their job through their vocational instructor, 34 (33.7%) through a friend or relative, and 18 (17.8%) got jobs through applications to business or industry.

These three means were the ways most of the terminees secured a job while they were still in high school taking their vocational program.

TABLE 31

HOW THE 1973-74 OCCUPATIONAL HOME ECONOMICS TERMINEES WHO WERE WORKING WHILE IN HIGH SCHOOL TAKING THEIR VOCATIONAL PROGRAM INDICATED THEY GOT THAT JOB[A]

Who or What Helped Terminee Get Job	Number	Percent
Your vocational teacher	30	29.7
Your counselor	2	2.0
Other school teachers or administrators	6	5.9
Friend or relative	34	33.7
Applications to business or industry	18	17.8
State (local) employment office	3	3.0

TOTAL	101	100.0

[A]Three hundred seventy-three (78.7%) terminees indicated they had no job during the time they were in high school taking their vocational course.

Table 32 reveals the indications of the 1973-74 Occupational Home Economics terminees as whether, before taking their first job, they looked for employment within daily walking or driving distance of home by how their first job related to their vocational training.

One hundred four (78.8%) of the 1973-74 Occupational Home Economics terminees who were employed in their first job indicated they sought employment within daily walking or driving distance of home. Twenty-eight (21.2%) terminees indicated before taking their first job they looked for a job beyond daily walking or driving distance of home.

Of the 32 terminees who were working in a directly related area,

only six (18.7%) sought employment beyond daily walking or driving distance of home.

TABLE 32

INDICATIONS OF 1973-74 OCCUPATIONAL HOME ECONOMICS TERMINEES AS TO WHERE THEY LOOKED FOR THEIR FIRST JOB BEFORE TAKING ONE BY HOW THEIR FIRST JOB RELATED TO THEIR TRAINING[A]

Before Taking First Job Where Terminees Looked for Job	Total Reporting		Total Reporting by Relatedness of First Job to Vocational Training					
			Directly Related		Somewhat Related		Not Related	
	No.	%	No.	%	No.	%	No.	%
Within daily walking or driving distance of home	104	78.8	26	81.3	22	73.3	56	80.0
Beyond daily walking or driving distance of home[B]	28	21.2	6	18.7	8	26.7	14	20.0
TOTAL	132	100.0	32	100.0	30	100.0	70	100.0

[A]Thirty-seven terminees indicated they already had their first job while in high school. Of those 37 terminees, five (13.5%) were working in a directly related area, eight (21.6%) in a somewhat related area, while 24 (64.9%) were working in a non-related area.

[B]See listing, page 53, for reasons terminees gave for seeking their first job away from home.

It is interesting to note that of the 70 terminees whose first jobs did not relate to their training, only 14 (20.0%) of those terminees sought employment beyond daily walking or driving distance of home.

Thirty-seven terminees indicated they had their first job while in high school. Of those 37 terminees, five (13.5%) were working in a directly related area, eight (21.6%) in a somewhat related area, and 24 (64.9%) were working in a non-related area.

The following is a listing of reasons terminees gave for seeking a job beyond daily walking or driving distance of their home before accepting their first job. Of the 28 terminees who indicated they sought a job beyond daily walking or driving distance of home before accepting their first job, nine gave reasons why they sought that job.

			Yes		No[B]	
	No.	%	No.	%	No.	%
Sought employment within daily walking or driving distance of their home	57	82.6	38	80.9	19	84.4
Sought employment beyond daily walking or driving distance of their home	12	17.4	9	19.1	3	13.6
TOTAL	69	100.0	47	100.0	22	100.0

[A]Totals in this table may not correspond with totals of terminees for non-related categories in other tables for the following reasons: (1) some terminees had jobs when leaving program and did not have to seek employment questions from which data was drawn.

[B]See page 25 for the listing of reasons terminees who were working in non-related jobs gave for not trying to secure a job that was related to their training.

It is important to note that of the 69 terminees who were working in a non-related first job, only nine (13.0%) sought related employment beyond daily walking or driving distance of home before accepting his first job.

Table 34 illustrates the indications of the 1973-74 Occupational Home Economics terminees as to where they looked for a job before taking their present job by how their present job is related to their vocational training.

TABLE 34

INDICATIONS OF 1973-74 OCCUPATIONAL HOME ECONOMICS TERMINEES AS TO WHERE THEY LOOKED FOR A JOB BEFORE TAKING THEIR PRESENT JOB BY HOW THEIR PRESENT JOB RELATED TO THEIR TRAINING[A]

[A]Thirty terminees reported they already had their present job while in high school. Of those 30 terminees, four (13.3%) were in a directly related area, six (20.0%) in a somewhat related area, while 20 (66.7%) were working in a non-related area.

[B]See listing, page 55 for reasons terminees gave for seeking their present job away from home.

Ninety-one (76.5%) of the presently employed 1973-74 Occupational Home Economics terminees indicated they sought employment within daily

walking or driving distance of home. Twenty-eight (23.5%) terminees indicated they sought employment beyond daily walking or driving distance of home.

Of the 22 terminees who were working in a directly related area, only five (22.7%) sought employment beyond daily walking or driving distance of home.

Of the 69 terminees who were presently working in a non-related area, only 13 (18.8%) sought employment beyond daily walking or driving distance of his home.

Thirty terminees reported they already had their present job while in high school. Of those 30 terminees, four (13.3%) were in directly related areas, six (20.0%) in somewhat related areas, and 20 (66.7%) were in non-related areas.

The following is a list of reasons terminees gave for seeking a job beyond daily walking or driving distance of their home before accepting their present job. Of the 28 terminees who indicated they sought a job beyond daily walking or driving distance of home before accepting their present job, 24 gave reasons why they sought that job.

Table 35 reveals the indications of the 1973-74 Occupational Home Economics terminees who were working in their present job not related to their training by whether or not they tried to get a job related to their training by where they looked for employment before accepting that present job.

TABLE 35

INDICATIONS OF THE 1973-74 OCCUPATIONAL HOME ECONOMICS TERMINEES WORKING IN PRESENT JOB NOT RELATED TO THEIR TRAINING BY WHETHER OR NOT THEY TRIED TO GET A JOB RELATED TO THEIR TRAINING BY WHERE THEY LOOKED FOR EMPLOYMENT BEFORE ACCEPTING PRESENT JOB[A]

Before Accepting Present Job Where Terminees Working in Non-Related Areas Looked for Employment	Total Reporting		Before Accepting This Present Job Unrelated to Training Whether or Not Terminees Sought Job in Related Area			
			Yes		No[B]	
	No.	%	No.	%	No.	%
Sought employment within daily walking or driving distance of their home	56	80.0	39	81.3	17	77.3
Sought employment beyond daily walking or driving distance of their home	14	20.0	9	18.7	5	22.7
TOTAL	70	100.0	48	100.0	22	100.0

[A]Totals in this table may not correspond with totals of terminees for non-related categories in other tables for the following reasons: (1) some terminees had jobs when leaving programs and did not have to seek employment and (2) some terminees failed to respond to one or more of the related questions from which data was drawn.

[B]See page 33 for the listing of reasons terminees who were working in non-related jobs gave for not trying to secure a job that was related to their training.

Only nine (12.9%) of the 70 terminees who were working in a non-related area sought related employment beyond daily walking or driving distance of home before accepting his present job.

APPENDIX

PRESENT JOB AND FIRST JOB TITLES OF THE 1973-74
OCCUPATIONAL HOME ECONOMICS TERMINEES

PRESENT JOB AND FIRST JOB TITLES OF THE 1973-74 OCCUPATIONAL HOME ECONOMICS TERMINEES

For those terminees who indicated present or first job occupations, this appendix lists the present job title and first job title by their high school vocational training area (OE Codes). The job titles are listed as the terminees reported them. The number of full-time jobs held by these terminees since completing their high school vocational course is listed, current employment status is listed, and whether the student intended to get a job in the area while in the program.

The following code is used to identify the employment status of the terminees:

0. Unemployed, but seeking employment
1. Employed full time
2. Employed part time, seeking full-time job
3. Employed part time, not seeking full-time job
4. Employed full time and attending school
5. Employed part time and attending school
6. Unavailable for employment

The following code is used to identify whether the student intended to get a job in the area while in the program:

1. No
2. Was not sure
3. Yes

The number in parenthesis behind the job titles indicates the relatedness of the high school vocational training to these jobs. The terminees made the judgment as to the relatedness of their training

to these jobs. The following code is used to identify this relatedness:

1. Directly related
2. Somewhat related
3. Not related

The total in each occupational title area may not correspond to the total in each OE Code as listed in Table 23. Some of the terminees failed to indicate the title of their present position. If the first job title was the same as the present job title, the first job title is included under the present job title.

TITLE: COSMETOLOGY FOLLOW-UP. FOLLOW-UP OF 1973-74 COSMETOLOGY TERMINEES FROM THE SECONDARY SCHOOL VOCATIONAL PROGRAMS OF ALABAMA. RESEARCH AND DEVELOPMENT REPORT NO. 34.

PERSONAL AUTHOR: MORGAN, ALICE S.; DRAKE, JAMES BOB

DESCRIPTOR: *COSMETOLOGY; *VOCATIONAL FOLLOWUP; *OCCUPATIONAL SURVEYS; *SECONDARY EDUCATION; VOCATIONAL EDUCATION; STATE SURVEYS

IDENTIFIER: ALABAMA

EDRS PRICE: MF AND HC AVAILABILITY WILL BE ANNOUNCED IN VOL. 10, NO. 2.

DESCRIPTIVE NOTE: 53P.; RELATED DOCUMENTS VT 103 321 THROUGH VT 103 335 IN THIS ISSUE.

ABSTRACT: THIS REPORT RELATES THE FINDINGS OF A STATEWIDE FOLLOWUP SURVEY OF 1973-74 COSMETOLOGY TERMINEES FROM THE SECONDARY SCHOOL VOCATIONAL PROGRAMS IN ALABAMA. QUESTIONNAIRES WERE MAILED TO 182 STUDENT TERMINEES APPROXIMATELY SEVEN TO EIGHT MONTHS AFTER LEAVING SCHOOL. RETURNS WERE RECEIVED FROM 59 (32.4 PERCENT) COSMETOLOGY TERMINEES FROM THE INITIAL MAILING AND ONE FOLLOWUP. DATA ARE PRESENTED IN TABLES WITH ACCOMPANYING NARRATIVE SUMMARIES ORGANIZED ACCORDING TO THESE MAJOR SECTIONS: GENERAL INFORMATION ON THE TERMINEES; BASIC INFORMATION RELATED TO THE VOCATIONAL PROGRAM; BASIC EMPLOYMENT INFORMATION; CONTINUING EDUCATION INFORMATION; AND JOB PLACEMENT INFORMATION. PRESENT AND FIRST JOB TITLES OF THE 1973-74 COSMETOLOGY TERMINEES ARE APPENDED. (NJ)

Vocational Education and Community Colleges
State Department of Education

February 1976

For their help in refining the survey instrument, special thanks are due the following state supervisors:

Mrs. Divine Bauer, Health Occupations Education
Miss Evelyn Cotney, Home Economics Education
Mr. H. W. Green, Agribusiness Education
Mr. J. C. Lindley, Trade & Industrial Education
Mrs. Anacile Kurth, Distributive Education
Mrs. Sandra Yelverton, Business and Office Education

Appreciation is also extended to the following members of the Occupational Research and Development Unit for their contribution to the study:

Ms. Bonnie J. Burks, Research Associate
Mr. Paul D. Davis, Research Associate
Mr. Gary Greenshields, Graduate Research Assistant
Mr. John Gross, Research Associate
Mr. James McMath, Graduate Research Assistant
Ms. Flossi Sergen, Secretary
Mr. Ed. Williams, Duplicating Operator

FOLLOW-UP OF 1973-74 COSMETOLOGY TERMINEES
FROM THE SECONDARY SCHOOL VOCATIONAL
PROGRAMS OF ALABAMA

Alabama continues to support one of the most progressive and comprehensive vocational education programs in the nation. In addition to serving youth and adults by training them for gainful and useful employment, the diversification of vocational courses meets a serious job need and contributes to the industrial development in the state.

With the millions of tax dollars being spent on vocational education, it is necessary to attempt to account to the taxpayer and decision-makers on the results of those expenditures. Terminee student follow-up studies constitute one of the most valuable techniques for assessing vocational education system outcomes.

The Alabama State Department of Education, Division of Vocational Education and Community Colleges, recognizing this important phase of accountability and evaluation, initiated the development of a statewide follow-up system for its vocational education program terminees at the secondary school level. The Division, under the direction of Dr. T. L. Faulkner, State Director, contracted with the Occupational Research and Development Unit at Auburn University to develop and implement the statewide follow-up system for all its secondary vocational terminees in all service areas.

This report relates the findings of the survey instrument mailed to the 1973-74 Cosmetology terminees from the secondary school vocational

programs of Alabama. When the terminees received the questionnaire, most had been out of school seven to eight months.

General Information

Student rosters with names and addresses of 1973-74 Cosmetology terminees were received from 16 secondary school vocational teachers in Alabama. Of the 16 teachers from which student rosters were received, eight were in Secondary Area Vocational Centers (AVC) and eight were in programs in schools of other settings. The total of 182 student terminees reported to the ORDU were mailed the follow-up forms. Returns were received from 59 (32.4%) of the Cosmetology terminees from the initial mailing and one follow-up. At least one student questionnaire was received from 15 of the 16 programs.

At the time this information was collected, all terminees reported in this study were in programs administered only by the Division of Home Economics Education, State Department of Education.

Table 1 presents data relative to the total population of Cosmetology terminees and the number of returns categorized by type school and termination status.

TABLE 1

DESCRIPTION OF TOTAL POPULATION AND RETURNS OF 1973-74 COSMETOLOGY TERMINEES BY TYPE SCHOOL AND TERMINATION STATUS[A]

Type School and Termination Status	Total Number Reported	Number of Returns	Percent of Returns
Area Vocational Centers			
Total	87	31	35.6
Completers[B]	66	23	34.8
Dropouts[C]	21	8	38.1
Other Type Schools			
Total	95	28	29.5
Completers	75	23	30.7
Dropouts	20	5	25.0
Grand Total	182	59	32.4
Completers	141	46	32.6
Dropouts	41	13	31.7

[A]These Cosmetology terminees were in programs administered only under the service area of Home Economics Education, State Department of Education.

[B]Any terminee who left the program by completing or by high school graduation.

[C]Any terminee the instructor reported as having dropped out of school.

Table 2 illustrates the sex characteristics of those 1973-74 Cosmetology terminees reported by the instructors and those who returned survey forms.

TABLE 2

SEX OF THE 1973-74 COSMETOLOGY TERMINEES REPORTED AND BY WHO RETURNED QUESTIONNAIRES

Sex[A]	Reported		Returns	
	Number	Percent	Number	Percent
Male	2	1.1	2	3.4
Female	178	97.8	56	94.9
Not Known	2	1.1	1	1.7
TOTAL	182	100.0	59	100.0

[A]Sex as reported by teacher.

Table 3 presents the racial or ethnic characteristics of those 1973-74 Cosmetology terminees reported by instructors and who returned survey forms.

TABLE 3

RACIAL OR ETHNIC CHARACTERISTICS OF THE 1973-74 COSMETOLOGY TERMINEES REPORTED AND BY WHO RETURNED QUESTIONNAIRES

Racial or Ethnic Group[A]	Reported		Returns	
	Number	Percent	Number	Percent
American Indian	0	0.0	0	0.0

Not Known	0	0.0	0	0.0
TOTAL	182	100.0	59	100.0

[A]Racial or Ethnic Group as reported by teacher.

Table 4 illustrates the number and grade level of the 1973-74 Cosmetology terminees reported who dropped out of school during the academic year and by who returned the questionnaire.

TABLE 4

NUMBER OF THE 1973-74 COSMETOLOGY TERMINEES REPORTED WHO DROPPED OUT OF SCHOOL DURING THE 1973-74 SCHOOL YEAR BY GRADE LEVEL

Grade Level Upon Dropping Out of School	Reported		Returns	
	Number	Percent[A]	Number	Percent[B]
Ninth	5	2.8	2	40.0
Tenth	3	1.6	1	33.3
Eleventh	15	8.2	2	13.3
Twelfth	4	2.2	1	25.0
Grade Level Not Indicated by Teacher	14	7.7	7	50.0
TOTAL	41	22.5	13	31.7

[A]Percentage is based on 182 total reported terminees.

[B]Percentage is based on returns by grade.

Table 5 shows the number of 1973-74 Cosmetology terminees who indicated whether they were in active full-time military service.

TABLE 5

ACTIVE FULL-TIME MILITARY STATUS OF 1973-74 COSMETOLOGY TERMINEES WHO RETURNED QUESTIONNAIRES

Active Full-Time Military Status	Number	Percent
Yes	3	5.1
No	47	79.6
No Response	9	15.3
TOTAL	59	100.0

Basic Information Related to the Vocational Education Program

Table 6 points out the number of 1973-74 Cosmetology terminees who indicated whether this vocational program was a school requirement.

TABLE 6

1973-74 COSMETOLOGY TERMINEES WHO INDICATED WHETHER THEIR VOCATIONAL PROGRAM WAS A SCHOOL REQUIREMENT

Vocational Courses Was a School Requirement	Number	Percent
Yes	3	5.1
No	49	83.1
No Response	7	11.8
TOTAL	59	100.0

Table 7 indicates, according to the 1973-74 Cosmetology terminees, the primary source of influence in selecting their vocational course.

TABLE 7

PRIMARY INFLUENCES ON THE 1973-74 COSMETOLOGY TERMINEES IN SELECTING THEIR VOCATIONAL COURSE

Group or Individual Terminees Felt Influenced Them Most in Selecting Vocational Course	Number	Percent
Parent(s) or Guardian(s)	7	11.9
Guidance Counselor	6	10.2
Your Vocational Teacher	3	5.1
Another Teacher or Principal	0	0.0
Student in VED Program	6	10.2
A Friend or Relative	5	8.4
A Businessman	0	0.0
Made Choice Yourself	32	54.2
Other	0	0.0
No Response	0	0.0
TOTAL	59	100.0

Parents or Guardians appeared to be the greatest outside influence on those terminees enrolling in the Cosmetology program. Seven (11.9%) of the terminees responding indicated that their Parent(s) or Guardian(s) influenced them most in selecting their Cosmetology course. However, 32 (54.2%) indicated that they selected their course of study on their own. Six terminees (10.2%) indicated that a guidance counselor influenced them most in selecting their program. Only three (5.1%) of the terminees indicated that their vocational teacher influenced them most in selecting their course in Cosmetology.

Table 8 indicates terminees' opinions as to whether they had adequate job or occupational information and school experiences to make as realistic career choice.

TABLE 8

OPINIONS OF 1973-74 COSMETOLOGY TERMINEES AS TO WHETHER THEY HAD ADEQUATE JOB OR OCCUPATIONAL INFORMATION AND SCHOOL EXPERIENCES TO MAKE A REALISTIC CAREER CHOICE

	Number	Percent
Yes	36	61.0
No	14	23.7
No Response	9	15.3
TOTAL	59	100.0

Table 9 indicates whether, during the time they were taking their high school vocational program, the reporting 1973-74 terminees intended to get a job in Cosmetology.

TABLE 9

INDICATIONS OF 1973-74 COSMETOLOGY TERMINEES AS TO WHETHER, DURING THE TIME THEY WERE TAKING THEIR HIGH SCHOOL VED PROGRAM, THEY PLANNED TO GET A JOB IN THEIR AREA OF STUDY

Intended to Get Job in Area of Study	Number	Percent
Yes	23	39.0
No	31	52.5
Was Not Sure	5	8.5
No Response	0	0.0
TOTAL	59	100.0

It is interesting to note that only 23 (39.0%) of the 1973-74 reporting Cosmetology terminees indicated that during the time they were taking their Cosmetology program, they intended to get a job in the area they were studying.

Table 10 indicates terminees' opinions on choosing the Cosmetology program if they had the selection to make again.

A noteworthy point was revealed by the data. Of the 1973-74 Cosmetology terminees, 36 (61.0%) indicated that they would select the same vocational program if they had the choice to make again. Only two (3.4%) of the responding terminees indicated that they would not take a vocational program.

TABLE 10

OPINIONS OF 1973-74 COSMETOLOGY TERMINEES REGARDING THEIR VOCATIONAL PROGRAM

Question: If You Had It To Do Over Again, Would You...?	Number	Percent
Take the same vocational program	36	61.0
Not take a vocational program	2	3.4
Choose another vocational program offered in your school, such as _____ [A]	12	20.3
Choose another vocational program if it had been offered in your school, such as _____ [B]	4	6.8
No Response	5	8.5
TOTAL	59	100.0

[A]See listing IA below for those other vocational programs offered in terminees' school that they would have taken instead of their Cosmetology programs.

[B]See listing IB, page 10, for the vocational programs the terminee would have taken instead of their Cosmetology program if it had been offered in their school.

Listing IA -- Courses offered in their school that Cosmetology terminees indicated they would have taken if they had it all to do over again.

Course	Number
Business	5
Nursing	2
Sales and Marketing	2
Cooking	1
Tailoring	1
Auto Mechanics	1
Physical Education	1
Sewing	1

Listing IB -- Courses Cosmetology terminees indicated they would have taken if they had it all to do over again and the course were offered in their school.

Course	Number
Nursing	3
Interior Decorating	1

Table 11 indicates the extent to which the reporting 1973-74 Cosmetology terminees felt their high school vocational programs prepared them for their first job. This data was also broken down by how that first job related to their vocational program.

Terminees who were in full-time active military service or who had never been employed were not asked to respond to the questions from which this data was reported. Also, the terminees who failed to respond to the question items were not indicated in the table.

TABLE 11

PERCEPTIONS OF 1973-74 COSMETOLOGY TERMINEES AS TO THE EXTENT THEIR HIGH SCHOOL VOCATIONAL PROGRAM PREPARED THEM FOR THEIR FIRST FULL-TIME JOB BY HOW FIRST FULL-TIME JOB RELATED TO TRAINING

Extent Vocational Course Prepared for First Full-Time Job	Total Reporting		Number Reporting by Relatedness of First Full-Time Job to Training Received					
			Directly Related		Somewhat Related		Not Related	
	No.	%	No.	%	No.	%	No.	%
Excellent	3	16.6	2	100.0	0	0.0	1	7.1
Well Prepared	1	5.6	0	0.0	1	50.0	0	0.0
Fair	1	5.6	0	0.0	1	50.0	0	0.0
Poorly Prepared	0	0.0	0	0.0	0	0.0	0	0.0
Preparation not related to job	13	72.2	0	0.0	0	0.0	13	92.9
TOTAL	18	100.0	2	100.0	2	100.0	14	100.0

In noting the extent to which the 1973-74 Cosmetology terminees felt their high school vocational course prepared them for their first full-time job related to the training they received in their high school Cosmetology program, some interesting points were revealed. Four (22.2%) of the 1973-74 Cosmetology terminees responding to this item indicated "Excellent" or "Well Prepared" for their first full-time job as a result of the training received in their high school vocational education program. Both terminees employed in their first full-time job related directly to their training felt they were excellently prepared for this first job. Fourteen of the eighteen terminees felt that preparation did not relate to their job.

Table 12 indicates the extent to which the reporting 1973-74 Cosmetology terminees felt their high school vocational course prepared them for their present job. Also shown in the table is a breakdown of the data by how their present job was related to their vocational program.

Terminees in active full-time military service, and students who were attending school full time and had not had a job, were not asked to respond to the question from which Table 12 was prepared. Also, those other students who failed to respond to the items were not shown on the table.

Of the 13 terminees responding to these items, two (15.4%) indicated "Excellent" or "Well Prepared" for their present job as a result of their high school vocational program. Only one terminee reported feeling poorly prepared for her present job as a result of her training.

One (50.0%) of the two responding terminees working in an area directly related to their high school vocational program indicated that she felt excellent or well prepared by her training, and one (50.0%) reported fair. This terminee indicated she did not get to finish her course.

TABLE 12

PERCEPTIONS OF 1973-74 COSMETOLOGY TERMINEES AS TO THE EXTENT THEIR HIGH SCHOOL VOCATIONAL COURSE PREPARED THEM FOR THEIR PRESENT JOB BY HOW THEIR PRESENT JOB RELATED TO TRAINING

Extent Vocational Course Prepared for Present Job	Total Reporting		Number Reporting by Relatedness of Present Job to Training Received					
			Directly Related		Somewhat Related		Not Related	
	No.	%	No.	%	No.	%	No.	%
Excellent	1	7.7	1	50.0	0	0.0	0	0.0
Well Prepared	1	7.7	0	0.0	0	0.0	1	10.0
Fair[A]	1	7.7	1	50.0	0	0.0	0	0.0
Poorly Prepared	1	7.7	0	0.0	1	100.0	0	0.0
Preparation not related to job	9	69.2	0	0.0	0	0.0	9	90.0
TOTAL	13	100.0	2	100.0	1	100.0	10	100.0

[A]The reason the terminee specified for only being trained "Fair" by her vocational course for her present job was that she didn't get to finish the course.

The terminee who indicated she was "Poorly Prepared" for her present job by her vocational program gave no reason why she felt that way.

Table 13 focuses on the Cosmetology student club. The researchers sought to determine the extent to which the 1973-74 Cosmetology terminees felt that their high school student club aided in preparing them for their present job. Data are also broken down by the relationship of the present job to the vocational training received.

TABLE 13

PERCEPTIONS OF 1973-74 COSMETOLOGY TERMINEES AS TO THE EXTENT THEIR HIGH SCHOOL VOCATIONAL STUDENT CLUB PREPARED THEM FOR THEIR PRESENT JOB BY HOW THEIR PRESENT JOB RELATED TO TRAINING[A]

Extent High School Vocational Student Club Helped Prepare for Present Job	Total Reporting		Total Reporting by Relatedness of Present Job to Vocational Training					
			Directly Related		Somewhat Related		Not Related	
	No.	%	No.	%	No.	%	No.	%
Excellent	1	20.0	0	0.0	0	0.0	1	25.0
Well Prepared	1	20.0	0	0.0	1	100.0	0	0.0
Fair	2	40.0	0	0.0	0	0.0	2	50.0
Poorly Prepared	1	20.0	0	0.0	0	0.0	1	25.0
TOTAL	5	100.0	0	100.0	1	100.0	4	100.0

[A]Of the 23 who responded, four (17.4%) had no related student club available, and 14 (60.9%) were not members of a related student club.

Only respondents who had had a job since terminating their high school vocational Cosmetology program were asked to respond to the question reported in Table 13. Students in active full-time military service were excluded. Four (17.4%) of the 23 terminees reported no related student club was available, while 14 (60.9%) were not members of a related student club.

Two (40.0%) of the five terminees who participated in student club activities indicated they were "Excellent" or "Well Prepared" by their related student club for their present job. One (20.0%) indicated she was "Poorly Prepared" by her related student club for her present job. She was in a non-related job.

No terminees were working in an area directly related to the training they received in their high school vocational program.

Table 14 reports how the 1973-74 Cosmetology terminees rated the quality of teaching by their high school vocational instructors.

TABLE 14

1973-74 COSMETOLOGY TERMINEES' RATINGS OF THE QUALITY OF TEACHING BY THEIR HIGH SCHOOL VOCATIONAL INSTRUCTORS

Rating	Number	Percent
Excellent	25	42.4
Good	18	30.5
Fair	10	16.9
Poor	6	10.2
Very Poor	0	0.0
No Response	0	0.0
TOTAL	59	100.0

Forty-three (72.9%) of the 59 reporting 1973-74 Cosmetology terminees rated the quality of teaching by their vocational instructor either "Good" or "Excellent." Only six (10.2%) rated the quality of teaching by their instructors "Poor" and none "Very Poor."

Table 15 illustrates how the 1973-74 Cosmetology terminees rated their high school vocational instructor's interest in their class work.

Forty-seven (79.6%) of the 59 reporting 1973-74 Cosmetology terminees rated the interest exhibited by their high school vocational instructor in their class work as "Good" or "Excellent." Only seven (11.9%) of the terminees rated the interest their vocational instructors showed in their class work as "Poor" or "Very Poor."

TABLE 15

1973-74 COSMETOLOGY TERMINEES' RATINGS OF THEIR HIGH SCHOOL VOCATIONAL INSTRUCTOR'S INTEREST IN THE STUDENT'S CLASS WORK

Rating	Number	Percent
Excellent	30	50.8
Good	17	28.8
Fair	5	8.5
Poor	5	8.5
Very Poor	2	3.4
TOTAL	59	100.0

Table 16 points out how the 1973-74 Cosmetology terminees subjectively rated the knowledge their vocational teachers possessed about their field of study. This rating is also shown in the table by a breakdown of how the terminees' present job related to the training they received in their high school vocational program. Terminees were asked to base their judgments on their current knowledge of their job and responsibilities.

Total responses to this item indicates that 13 (92.8%) of the 14 responding 1973-74 Cosmetology terminees rated the knowledge their vocational teachers possessed about their field of study either "Good" or "Excellent." For those terminees working in an area directly related to the training they received, both rated the knowledge their teachers possessed about their field of study "Excellent." A favorable point was revealed in that only one of those terminees rated the knowledge their vocational teachers possessed about their field of study as "Poor," and she was working in an unrelated area.

TABLE 16

1973-74 COSMETOLOGY TERMINEES' RATINGS OF THE KNOWLEDGE THEIR HIGH SCHOOL VOCATIONAL TEACHER POSSESSED ABOUT THEIR FIELD OF STUDY BY HOW THE TERMINEES' PRESENT JOB RELATED TO THE TRAINING THEY RECEIVED

Ratings[A]	Total Reporting		Number Reporting by Relatedness of Present Job to Training Received					
			Directly Related		Somewhat Related		Not Related	
	No.	%	No.	%	No.	%	No.	%
Excellent	8	57.1	2	100.0	1	100.0	5	45.5
Good	5	35.7	0	0.0	0	0.0	5	45.5
Fair	0	0.0	0	0.0	0	0.0	0	0.0
Poor	1	7.2	0	0.0	0	0.0	1	9.0
Very Poor	0	0.0	0	0.0	0	0.0	0	0.0
TOTAL	14	100.0	2	100.0	1	100.0	11	100.0

[A]Ratings were to be based on terminee's judgment of their current knowledge of their job and responsibilities.

If the respondent was working in an area related to his training, he was asked to compare the facilities and equipment in his high school vocational program with those on his present job. Table 17 illustrates how the 1973-74 Cosmetology terminees responded.

Only one (16.7%) of the six responding 1973-74 Cosmetology terminees working in an area related to their training rated the facilities and equipment in her high school vocational program as better than those on her present job. Three (50.0%) rated the facilities and equipment in their high school vocational program as similar to those on their present job; however, two (33.3%) rated the facilities and equipment not as good as those on their present job.

TABLE 17

HOW 1973-74 COSMETOLOGY TERMINEES WORKING IN A RELATED AREA RATED THE FACILITIES AND EQUIPMENT IN THEIR HIGH SCHOOL VOCATIONAL PROGRAM[A]

Rating[B]	Number	Percent
Better than those on present job	1	16.7
Similar to those on present job	3	50.0
Not as good as those on present job	2	33.3
TOTAL	6	100.0

[A]Thirteen (72.2%) of the responding 18 terminees indicated that their present job was not related to their vocational training enough to compare facilities and equipment.

[B]Persons who had not had a job since leaving their vocational program, including those in military service and those who attended school, were asked not to respond to questions from which data was drawn. Returns were received from 59 terminees.

Table 18 shows how 1973-74 Cosmetology terminees, who were in a cooperative work program in school and were now working in an area related to their vocational training, rated the facilities and equipment used in their cooperative work station.

None of the four responding 1973-74 Cosmetology terminees whose vocational programs had included cooperative work and were now working in an area related to their vocational training, rated the facilities and equipment in cooperative work station as better than those on present job. Three (75.0%) rated the facilities and equipment in their cooperative training station as similar to those on their present job. Only one (25.0%) rated the facilities and equipment in their cooperative work station not as good as those in their present job. None of the terminees indicated they were working at the same establishment where they did their cooperative training.

TABLE 18

HOW 1973-74 COSMETOLOGY TERMINEES NOW WORKING IN A RELATED AREA, WHOSE VOCATIONAL PROGRAM INCLUDED COOPERATIVE WORK, RATED FACILITIES AND EQUIPMENT USED IN THEIR COOPERATIVE WORK STATION[A]

Rating[B]	Number	Percent
Better than those on present job	0	0.0
Similar to those on present job	3	75.0
Working at same place where cooperative training was done	0	0.0
Not as good as those on present job	1	25.0
TOTAL	4	100.0

[A]One (16.7%) of the responding 18 Cosmetology terminees indicated her vocational program was not a cooperative program. Thirteen (72.2%) terminees indicated they were not working in an area related to their cooperative work; therefore, they did not complete this item on the questionnaire.

[B]Persons who had not had a job since leaving their vocational program, including those in military service and those attending school, were asked not to respond to questions from which data was drawn. Returns were received from 59 terminees.

Basic Employment Information

The following section of this report offers information relative to employment and job characteristics of the 1973-74 secondary Cosmetology terminees.

Table 19 illustrates the number of full-time jobs the responding 1973-74 Cosmetology terminees have had since leaving their high school vocational course.

There were 11 (18.6%) of the total 59 responding 1973-74 Cosmetology terminees who had been employed in just one job since leaving their high

school vocational program. Only four (6.8%) of the terminees reported having two or more jobs since leaving their high school vocational course seven to eight months ago.

TABLE 19

NUMBER OF FULL-TIME JOBS HELD BY THE 1973-74 COSMETOLOGY TERMINEES SINCE LEAVING THEIR HIGH SCHOOL VOCATIONAL COURSE

Number of Full-Time Jobs Held	Number	Percent[A]
One	11	18.6
Two	4	6.8
Three	0	0.0
Four	0	0.0
Five or more	0	0.0
TOTAL	15	25.4

[A]Percentage is based on the 59 terminees who returned the questionnaire.

Table 20 reveals the first-job employment status of Cosmetology terminees who returned the survey by the relatedness of their vocational training to their first job.

Of the 59 responding 1973-74 Cosmetology terminees, 19 (32.2%) were employed full time in their first job after leaving their high school vocational program. None of the responding terminees' first jobs were on a part-time basis.

Two (3.4%) of the 59 responding terminees' first jobs were in an area directly related to the training they received in their high school vocational course. Two (3.4%) were employed in an area somewhat related while 15 (25.4%) were employed in a first job not related to the training they received. The terminees made the judgment as to

how their first job was related to the training they received in their high school vocational program.

TABLE 20

FIRST-JOB EMPLOYMENT STATUS OF COSMETOLOGY TERMINEES (1973-74) BY RELATEDNESS OF VOCATIONAL TRAINING TO FIRST JOB[A]

First Job After Leaving High School Vocational Program	Total Reporting		Relatedness of Vocational Training to First Job[B]					
			Directly Related		Somewhat Related		Not Related[C]	
	No.	%	No.	%	No.	%	No.	%
Full-Time	19	32.2	2	3.4	2	3.4	15	25.4
Part-Time	0	0.0	0	0.0	0	0.0	0	0.0
TOTAL	19	32.2	2	3.4	2	3.4	15	25.4

[A]All percentages were based on the 59 (32.4%) of 182 terminees who returned the survey form.

[B]The terminees made the judgment as to how their first job was related to the training received in their high school vocational program.

[C]See page 21 for reasons terminees who were working in first job unrelated to this vocational training gave for not seeking job that was related before accepting their first job.

Of the 15 terminees who indicated their jobs were not related to their vocational course, six (40.0%) terminees indicated that before they accepted their unrelated job, they tried to get a job that was related to their vocational training. However, nine (60.0%) of the terminees did not.

The following is a list of reasons given by eight of the nine terminees who, before taking their first unrelated job, indicated they did not seek a job that was related to their vocational training.

Reasons	Number
Money	1
Unlicensed	1
Already employed	1
Couldn't go to school and work	1
Changed interests	1
Needed job	1
None available	1
Small town	1

Table 21 shows number of returns by type school and termination status for the first job of the 1973-74 Cosmetology terminees, and the relatedness of their training to this first job.

TABLE 21

NUMBER OF RETURNS BY TYPE SCHOOL AND TERMINATION STATUS FOR 1973-74 COSMETOLOGY TERMINEES FIRST JOB, AND RELATEDNESS OF TRAINING

Dropouts	13	3	15.8	0	0.0	0	0.0	3	100.0

[A]Of 182 Cosmetology terminees, 59 (32.4%) returned the questionnaire.
[B]Area Vocational Centers.
[C]Any terminee who left the program by completing or by high school graduation.
[D]Any terminee who the instructor reported as having dropped out of school.
[E]The terminees made the judgment as to how their first job was related to the training received in their high school vocational program.

Table 22 illustrates the current employment status of the responding terminees by the relatedness of their vocational training to their present jobs. All percentages figured in the table were based on the 59 (32.4%) returns from the 182 Cosmetology terminees.

Of the 59 responding 1973-74 secondary Cosmetology terminees, eight (13.6%) were presently employed full time and not attending school or employed full time and attending school. None of the terminees were employed part time and attending school, and only one was unavailable for employment (See page 24 for reasons terminees gave for being unavailable for employment). Only nine (15.2%) of the terminees were unemployed and actively seeking employment, while two (3.4%) were employed part time and seeking full-time employment.

The "No Response" category in Table 22 inlcudes three groups: (1) terminees in active full-time military service; (2) terminees who were in school full time and had never had a job; and (3) terminees who failed to respond to the item on the questionnaire.

Of the 59 secondary Cosmetology respondees, only one was presently employed full time or part time in an area directly related to the training received in their high school vocational course. None were employed either part time or full time in an area somewhat related to their training, while eight (13.6%) were employed in areas not related to training. The terminees made the judgment as to how their present employment was related to the training received in their high school vocational course.

Of the 12 terminees who indicated their present jobs were not related to their vocational course, four (25.0%) terminees indicated that before they accepted their unrelated job, they tried to get a job that was related to their vocational training. However, eight (75.0%) of the terminees did not.

TOTAL	59	100.0	1	1.7	0	0.0	8	13.6	1	1.7

[A]All percentages were based on the 59 (32.4%) respondents of the total 182 terminees. Terminees in active full-time military service or attending school full-time and had never been employed were included in the "No Response" category.

[B]The terminees made the judgment as to how their present job was related to the training received in their high school vocational program.

[C]The unemployed and unavailable for employment categories do not include persons in the military service and persons who were in school full time and never had a job.

[D]See page 24 for the listing of reasons Cosmetology terminees gave for being unavailable for employment.

[E]See page 24 for reasons terminees who were working in present job not related to vocational training gave for not seeking related job before accepting present job. Totals for unrelated columns may not correspond because terminees failed to respond to one of the two questions from which data was drawn.

Below is a list of the reasons given by the terminees for being unavailable for employment.

Reason	Number
In school full time	7
Homemaker	4
Pregnancy	3
Other	3
Presently not working, not interested in a job	0
Illness or disability	0

The following is a list of reasons given by the terminees who, before taking their present unrelated job, indicated they did not seek a job that was was related to their vocational training.

Reason	Number
None available	2
Needed job	1
Already employed	1
Changed fields	1
Couldn't go to school and work	1
Not interested	1
Money	1

Table 23 shows for the present job, the number of 1973-74 secondary Cosmetology terminees employed by the relatedness of their vocational training to their present job.

Of the 14 Cosmetology terminees presently employed, only two (14.3%) were employed in an area directly related to the training received in their high school vocational program, while 11 indicated their present job was not related to their high school vocational training. The terminees made the judgment as to how their present job related to the training received in their high school vocational program.

[A]All percentages were based on the 59 (32.4%) of the 182 terminees who returned the questionnaire.

[B]Area Vocational Centers.

[C]Any terminee who left the program by completing or by high school graduation.

[D]Any terminee who the instructor reported as having dropped out of school.

[E]The terminees made the judgment as to how their first job was related to the training received in their high school vocational program.

Table 24 indicates the first job salary ranges as compared to the present job salary ranges for the 1973-74 Cosmetology terminees.

Of the 18 terminees reporting a salary range for their first job, 14 (77.8%) indicated a range of under $250 per month. No terminee reported a first salary of over $600 per month. The median and mean salary ranges for the first job fell in the range of under $250 per month.

TABLE 24

FIRST-JOB SALARY RANGES AND PRESENT-JOB SALARY RANGES FOR 1973-74 COSMETOLOGY TERMINEES

Salary Ranges	First Job		Present Job	
	No.	%	No.	%
Under $250	14	77.8	4	40.0
$250 - $299	2	11.1	4	40.0
$300 - $349	0	0.0	1	10.0
$350 - $399	0	0.0	0	0.0
$400 - $449	0	0.0	0	0.0
$450 - $499	0	0.0	1	10.0
$500 - $599	2	11.1	0	0.0
$600 - $699	0	0.0	0	0.0
$700 or more	0	0.0	0	0.0
TOTAL	18	100.0	10	100.0

Of the ten 1973-74 Cosmetology terminees reporting a salary range for their present job, four (40.0%) indicated under $250 per month. The median and mean salary ranges for the present job fell within the range of $250 - $299 per month.

Table 24A indicates the first-job salary ranges by relatedness of training of the Cosmetology terminees.

Fourteen (82.4%) of the 17 responding terminees were employed at less than $250 per month. Of these 14 terminees, one (7.1%) was employed in a job directly related to her training, two (14.3%) were employed in jobs somewhat related to their training, while 11 (78.1%) were employed in jobs not related to their training.

All of the 17 responding terminees were females. Two (11.8%) were employed in jobs directly related to their vocational training, two (11.8%) were employed in jobs somewhat related to their training, while 13 (76.4%) were employed in jobs not related to their training.

TABLE 24A

FIRST-JOB SALARY RANGES BY RELATEDNESS OF TRAINING OF 1973-74 COSMETOLOGY TERMINEES

Salary Ranges	Total Responding	Relatedness of Training to First Job[B]		
		Directly Related	Somewhat Related	Not Related
Under $250	14	1	2	11
$250 - $299	2	0	0	2
$300 - $349	0	0	0	0
$350 - $399	0	0	0	0
$400 - $449	0	0	0	0
$450 - $499	0	0	0	0

$600 - $699	0	0	0	0
$700 or more	0	0	0	0
TOTAL[A]	17	2	2	13

[A]Totals do not match those of Table 24 because some terminees did not respond to all questions.

[B]The terminees made the judgment as to how their first job was related to the training received in their high school vocational program.

Table 24B indicates the present-job salary ranges by relatedness of training of the Cosmetology terminees.

Four (40.0%) of the ten responding terminees were employed at less than $250 per month. Of these four terminees, none were employed in a job directly related to their training, one was employed in a job somewhat related to her training, while three were employed in jobs not related to their training.

All of the ten responding terminees were females. Only two (20.0%) were employed in jobs directly related to their vocational training, one (10.0%) was employed in a job somewhat related to her training, while seven (70.0%) were employed in jobs not related to their training.

TABLE 24B

PRESENT-JOB SALARY RANGES BY RELATEDNESS OF TRAINING
OF 1973-74 COSMETOLOGY TERMINEES

Salary Ranges	Total Responding	Relatedness of Training to Present Job[B]

$450 - $499	1	0	0	1
$500 - $599	0	0	0	0
$600 - $699	0	0	0	0
$700 or more	0	0	0	0
TOTAL[A]	10	2	1	7

[A]Totals do not match those of Table 24 because some terminees did not respond to all the questions.

[B]The terminees made the judgment as to how their present job was related to the training received in their high school vocational program.

Continuing Education Information

The following section of this report presents information relative to the continuing education of the 1973-74 secondary Cosmetology terminees.

Table 25 shows the vocational educational training opportunities terminees have participated in since leaving their high school vocational program.

Of the total terminees, the 33 (58.9%) who were enrolled in on-the-job training represented the largest area where terminees had taken additional vocational training.

TABLE 25

ADDITIONAL VOCATIONAL EDUCATIONAL TRAINING 1973-74 SECONDARY COSMETOLOGY TERMINEES PARTICIPATED IN SINCE LEAVING THEIR HIGH SCHOOL VOCATIONAL PROGRAM[A]

Type Training	Number	Percent[B]
On-the-job training (employer-sponsored program)	33	55.9
Public school adult vocational program	2	3.4
Private vocational school program	1	1.7
University or four year college	3	5.1
Junior college	0	0.0
Post-secondary vocational-technical institute (trade school)	1	1.7
Apprenticeship training program	8	13.6
Specialized occupational military training	1	1.7
Other[C]	7	11.9
TOTAL[D]	56	95.0

[A]Only four (6.7%) of the 59 terminees gave no indication of being involved in additional vocational training. Of the 59 terminees, 55 (93.2%) took part in one additional vocational training opportunity since leaving their high school program. One (1.7%) took part in two and no terminees took part in the three additional training opportunities.

[B]Percentages are based on the 59 (32.4%) respondents of the total 182 terminees who returned questionnaires.

[C]See page 30 for the "Other" listing as specified by the terminees.

[D]The total indicated the number of different training programs in which terminees enrolled. As footnoted above, one terminee had enrolled in more than one training program.

Of the 59 responding terminees, 55 (93.2%) had taken part in one additional vocational training program since leaving their high school program. One (1.7%) enrolled in two training programs, and no terminee had enrolled in three vocational training programs. Only four (6.7%) indicated they had not enrolled in any additional vocational training.

The following is a listing of the "Other" (Table 25) vocational education training terminees indicated they had participated in:

"Other" Vocational Training	Number
Home study	1
Career training institution	1
Part-time	1
Aviation school	1
Still in school	1

Table 26 points out the additional programs the 1973-74 secondary Cosmetology terminees were presently attending beyond their high school training by whether these programs were related to their high school vocational program.

TABLE 26

PROGRAMS PRESENTLY ATTENDED BY THE 1973-74 SECONDARY COSMETOLOGY TERMINEES BY WHETHER THESE PROGRAMS WERE RELATED TO THEIR HIGH SCHOOL VOCATIONAL EDUCATION PROGRAM[A]

Programs Attended	Terminees		Program Related to High School VED Program					
			Yes		No		No Response	
	No.	%	No.	%	No.	%	No.	%
On-the-job training (employer-sponsored)	2	3.4	0	0.0	1	1.7	1	1.7
Vocational-technical institute (trade school)	12	20.3	8	13.6	3	5.1	1	1.7
Junior college	3	5.1	0	0.0	2	3.4	1	1.7
Four year college or university	2	3.4	0	0.0	2	3.4	0	0.0
Public school adult vocational program	0	0.0	0	0.0	0	0.0	0	0.0
Private business or trade school	3	5.1	0	0.0	3	5.1	0	0.0
Apprenticeship program	0	0.0	0	0.0	0	0.0	0	0.0
Other[B]	3	5.1	0	0.0	3	5.1	0	0.0
TOTAL	25	42.4	8	13.6	14	23.7	3	5.1

[A]All percentages were based on the 59 responding terminees.

[B]See page 31 for listing of "Other" schools or educational institutions terminees were attending.

Of the 59 1973-74 secondary Cosmetology terminees who responded to the survey, two (3.4%) were attending an on-the-job training program (employer-sponsored), 12 (20.3%) were attending a vocational-technical institute, three (5.1%) were attending a junior college, two (3.4%) were attending a four year college or university, none were attending a public adult vocational program, three (5.1%) were attending private business or trade school, none were attending an apprenticeship program, and three (5.1%) were attending some other type of school or educational program. (See below for the listing of the other types of schools or educational programs students were attending.)

Twenty-five (42.4%) of the 59 Cosmetology terminees were presently continuing their education. Eight (13.6%) of the terminees were continuing their education in a program related to their high school vocational program. Fourteen (23.7%) were attending a program in an area not related to their high school vocational program.

The following is a listing of the "Other" category (Table 26) of additional programs the 1973-74 Cosmetology terminees were attending:

"Other" School or Program	Number
Career training institute	1
Aviation school	1
Night school	1
Still in high school	1

Of the 59 responding terminees, 35 (59.3%) indicated they would like further vocational training. The following is a list of the areas in which these terminees desired to study:

Area of Study	Number
Nursing	12
Cosmetology	10
Business	5
Welding	1

(continued)

Area of Study	Number
Cooking	1
Sewing	1
Auto Mechanics	1
Modeling	1
Interior decorating	1
Sales	1
Not sure	1

Fourteen (23.7%) of the 59 responding terminees indicated they did not desire further training. Ten (16.9%) terminees did not respond to the question.

Job Placement Information

The following section of this report presents information concerning job placement of the 1973-74 secondary Cosmetology terminees.

Table 27 points out whether the 1973-74 Cosmetology terminees were seeking full-time employment when they left their high school vocational program and if their vocational teacher attempted to help them get a job.

TABLE 27

WHETHER VOCATIONAL TEACHER ATTEMPTED TO HELP 1973-74 COSMETOLOGY TERMINEES GET A JOB IF SEEKING FULL-TIME EMPLOYMENT UPON LEAVING THE HIGH SCHOOL VOCATIONAL PROGRAM[A]

Vocational Teacher Attempted to Get Terminee a Job	Number	Percent
Yes	11	44.0
No	14	56.0
TOTAL	25	100.0

[A]Thirty-three (55.9%) of the responding terminees indicated they were not seeking full-time employment when they left their high school vocational program. One (1.7%) of the terminees did not respond to the question.

Of the 25 responding 1973-74 Cosmetology terminees indicating they were seeking full-time employment when they left their high school vocational program, 11 (44.0%) indicated that their vocational teacher attempted to help them get a job. However, 14 (56.0%) of the terminees seeking full-time employment indicated that their vocational teacher did not attempt to help them secure employment. It was interesting to note that 33 (55.9%) of the reporting 1973-74 Cosmetology terminees indicated that they were not seeking full-time employment when they left their high school vocational program.

Table 28 illustrates how long it took the 1973-74 Cosmetology terminees to get their first full-time job after they left their high school vocational program and began actively seeking full-time employment.

TABLE 28

LENGTH OF TIME IT TOOK THE 1973-74 COSMETOLOGY TERMINEES TO SECURE FIRST FULL-TIME JOB AFTER LEAVING HIGH SCHOOL VOCATIONAL PROGRAM AND BEGINNING ACTIVELY SEEKING FULL-TIME EMPLOYMENT[A]

Time to Secure First Full-Time	Number	Percent
0 - 2 weeks	2	14.3
3 - 4 weeks	2	14.3
5 - 8 weeks	3	21.4
9 - 12 weeks	0	0.0
13 or more weeks	7	50.0
TOTAL	14	100.0

[A]Six terminees indicated they already had a job when they left their high school vocational program.

Two (14.3%) of the 14 secondary Cosmetology terminees secured their first full-time job within two weeks after they left their high school vocational program and began actively seeking full-time employment.

However, seven (50.0%) of the terminees took 13 or more weeks to secure their first full-time job. There were six terminees who indicated they already had a job when they left their high school vocational program.

Table 29 shows how the 1973-74 secondary Cosmetology terminees indicated they got their first full-time job after leaving their high school vocational program.

TABLE 29

HOW THE 1973-74 COSMETOLOGY TERMINEES INDICATED THEY GOT THEIR FIRST FULL-TIME JOB AFTER LEAVING THEIR HIGH SCHOOL VOCATIONAL PROGRAM

How Terminees Secured First Full-Time Job	Number	Percent
Through your vocational teacher	1	5.0
Through your counselor	0	0.0
Through other school teachers or administrators	0	0.0
Through a friend or relative	4	20.0
Through applications to business or industry	6	30.0
Through state (local) employment office	7	35.0
Through a private employment agency	0	0.0
Through radio, T.V., newspaper, or other news media	1	5.0
Other[A]	1	5.0
TOTAL	20	100.0

[A]See listing on page 35 for the "Other" ways terminees indicated they secured their first full-time job after leaving their high school vocational program.

Of the 20 1973-74 Cosmetology terminees who responded to the survey item, seven (35.0%) indicated they got their first full-time job after leaving their high school vocational program through the state employment office, and six (30.0%) through applications to business and industry.

Four (20.0%) of the terminees also indicated they got their first full-time job through a friend or relative. These represented the three methods that the largest number of Cosmetology terminees utilized to secure their first full-time job. Only one (5.0%) of the terminees indicated they secured their first job through their vocational teacher. No student indicated that a counselor got them their first full-time job after leaving their vocational program. Those students who already had a job before leaving their high school vocational program were not shown in Table 29. (See Table 30, page 36)

The terminee who checked the "Other" category specified the means by how he secured his first full-time job after leaving his high school vocational program as follows:

"Other" Means for Securing First Full-Time Job	Number
School Placement	1

Table 30 shows how the 1973-74 Cosmetology terminees who were working while in high school taking their vocational program indicated they got that job.

Ten (16.9%) of the 59 reporting 1973-74 Cosmetology terminees indicated they were working during the time they were in high school taking their vocational program. Of those terminees working while in high school, four (40.0%) got their job through their vocational instructor, and three (30.0%) through their counselor. These two means were the ways most of the terminees secured a job while they were still in high school taking their vocational program.

TABLE 30

HOW THE 1973-74 COSMETOLOGY TERMINEES WHO WERE WORKING WHILE IN HIGH SCHOOL TAKING THEIR VOCATIONAL PROGRAM INDICATED THEY GOT THAT JOB[A]

Who or What Helped Terminee Get Job	Number	Percent
Your vocational teacher	4	40.0
Your counselor	3	30.0
Other school teachers or administrators	1	10.0
Friend or relative	1	10.0
Applications to business or industry	0	0.0
State (local) employment office	0	0.0
Private employment agency	0	0.0
Radio, T.V., newspaper, or other news media	0	0.0
Other	1	10.0
TOTAL	10	100.0

[A]Forty-nine (83.1%) terminees indicated they had no job during the time they were in high school taking their vocational course.

Table 31 reveals the indications of the 1973-74 Cosmetology terminees as whether, before taking their first job, they looked for employment within daily walking or driving distance of home by how their first job related to their vocational training.

Six (60.0%) of the 1973-74 Cosmetology terminees who were employed in their first job indicated they sought employment within daily walking or driving distance of home. Four (40.0%) terminees indicated before taking their first job, they looked for a job beyond daily walking or driving distance of home.

All ten terminees first jobs were in areas not related to their vocational training.

Four terminees indicated they had their first job while in high school. Of those four terminees, none were working in a directly

related area, one (25.0%) in a somewhat related area, and three (75.0%) were working in a non-related area.

TABLE 31

INDICATIONS OF 1973-74 COSMETOLOGY TERMINEES AS TO WHERE THEY LOOKED FOR THEIR FIRST JOB BEFORE TAKING ONE BY HOW THEIR FIRST JOB RELATED TO THEIR TRAINING[A]

Before Taking First Job, Where Terminees Looked for Job	Total Reporting		Total Reporting by Relatedness of First Job to Vocational Training					
			Directly Related		Somewhat Related		Not Related	
	No.	%	No.	%	No.	%	No.	%
Within daily walking or driving distance of home	6	60.0	0	0.0	0	0.0	6	60.0
Beyond daily walking or driving distance of home[B]	4	40.0	0	0.0	0	0.0	4	40.0
TOTAL	10	100.0	0	100.0	0	100.0	10	100.0

[A]Four terminees indicated they already had their first job while in high school. Of those four terminees, none were working in a directly related area, one (25.0%) in a somewhat related area, while three (75.0%) were working in a non-related area.

[B]See listing below for reasons terminees gave for seeking their first job away from home.

The following is a listing of reasons terminees gave for seeking a job beyond daily walking or driving distance of their home before accepting their first job. The four terminees who indicated they sought a job beyond daily walking or driving distance of home before accepting their first job gave reasons why they sought that job.

Reasons for Seeking Job Beyond Daily Walking or Driving Distance Before Accepting First Job	Number
No job close to home	1
Money	1
No license	1
Already employed	1

Table 32 reveals the indications of the 1973-74 Cosmetology terminees who were working in their first job not related to their training by whether or not they tried to get a job related to their training by where they looked for employment before accepting that first job.

TABLE 32

INDICATIONS OF THE 1973-74 COSMETOLOGY TERMINEES WORKING IN FIRST JOB NOT RELATED TO THEIR TRAINING BY WHETHER OR NOT THEY TRIED TO GET A JOB RELATED TO THEIR TRAINING BY WHERE THEY LOOKED FOR EMPLOYMENT BEFORE ACCEPTING FIRST JOB[A]

Where Terminees Working in Non-Related Areas Looked for Employment Before Accepting First Job	Total Reporting		Before Accepting This First Job Unrelated to Training Whether Terminees Sought Job in Related Area			
			Yes		No[B]	
	No.	%	No.	%	No.	%
Sought employment within daily walking or driving distance of their home	6	60.0	2	50.0	4	66.7
Sought employment beyond daily walking or driving distance of their home	4	40.0	2	50.0	2	33.3
TOTAL	10	100.0	4	100.0	6	100.0

[A]Totals in this table may not correspond with totals of terminees for non-related categories in other tables for the following reasons: (1) some terminees had jobs when leaving program and did not have to seek employment and (2) some terminees failed to respond to one or more of the related questions from which data was drawn.

[B]See page 21 for the listing of reasons terminees who were working in non-related jobs gave for not trying to secure a job that was related to their training.

Of the ten terminees who were working in a non-related first job, only two (20.0%) sought related employment beyond daily walking or driving distance of home before accepting their first job.

Table 33 illustrates the indications of the 1973-74 Cosmetology terminees as to where they looked for a job before taking their present job by how their present job is related to their vocational training.

TABLE 33

INDICATIONS OF 1973-74 COSMETOLOGY TERMINEES AS TO WHERE THEY LOOKED FOR A JOB BEFORE TAKING THEIR PRESENT JOB BY HOW THEIR PRESENT JOB RELATED TO THEIR TRAINING[A]

Where Terminees Looked for Job Before Taking Present Job	Total Reporting		Total Reporting by Relatedness of Present Job to Vocational Training					
			Directly Related		Somewhat Related		Not Related	
	No.	%	No.	%	No.	%	No.	%
Within daily walking or driving distance of home	4	50.0	0	0.0	0	0.0	4	50.0
Beyond daily walking or driving distance of home[B]	4	50.0	0	0.0	0	0.0	4	50.0
TOTAL	8	100.0	0	100.0	0	100.0	8	100.0

[A]Two terminees reported they already had their present job while in high school. Both were working in non-related areas.

[B]See listing, page 40, for reasons terminees gave for seeking their present job away from home.

Four (50.0%) of the presently employed 1973-74 Cosmetology terminees indicated they sought employment within daily walking or driving distance of home. Four (50.0%) terminees indicated they sought employment beyond daily walking or driving distance of home.

All eight terminees who were presently working were in a non-related area. Four (50.0%) sought employment beyond daily walking or driving distance of his home.

Two terminees reported they already had their present job while in high school. Both were in non-related areas.

The following is a list of reasons terminees gave for seeking a job beyond daily walking or driving distance of their home before accepting their present job. The four terminees who indicated they sought a job beyond daily walking or driving distance of home before accepting their present job gave reasons why they sought that job.

Reasons for Seeking Job Beyond Daily Walking or Driving Distance Before Accepting Present Job	Number
No jobs in small town	2
Was not many choices around	1
Not trained	1

Table 34 reveals the indications of the 1973-74 Cosmetology terminees who were working in their present job not related to their training by whether or not they tried to get a job related to their training by where they looked for employment before accepting that present job.

Only two (25.0%) of the eight terminees who were working in a non-related area sought related employment beyond daily walking or driving distance of home before accepting their present job.

TABLE 34

INDICATIONS OF THE 1973-74 COSMETOLOGY TERMINEES WORKING IN PRESENT JOB NOT RELATED TO THEIR TRAINING BY WHETHER OR NOT THEY TRIED TO GET A JOB RELATED TO THEIR TRAINING BY WHERE THEY LOOKED FOR EMPLOYMENT BEFORE ACCEPTING PRESENT JOB[A]

Before Accepting Present Job Where Terminees Working in Non-Related Areas Looked for Employment	Total Reporting		Before Accepting This Present Job Unrelated to Training Whether or Not Terminees Sought Job In Related Area			
			Yes		No[B]	
	No.	%	No.	%	No.	%
Sought employment within daily walking or driving distance of their home	4	50.0	1	33.3	3	60.0
Sought employment beyond daily walking or driving distance of their home	4	50.0	2	66.7	2	40.0
TOTAL	8	100.0	3	100.0	5	100.0

[A]Totals in this table may not correspond with totals of terminees for non-related categories in other tables for the following reasons: (1) some terminees had jobs when leaving programs and did not have to seek employment and (2) some terminees failed to respond to one or more of the related questions from which data was drawn.

[B]See page 24 for the listing of reasons terminees who were working in non-related jobs gave for not trying to secure a job that was related to their training.

APPENDIX

PRESENT JOB AND FIRST JOB TITLES OF THE 1973-74
COSMETOLOGY TERMINEES

PRESENT JOB AND FIRST JOB TITLES OF THE 1973-74 COSMETOLOGY TERMINEES

For those terminees who indicated present or first job occupations, this appendix lists the present job title and first job title. The job titles are listed as the terminees reported them. The number of full-time jobs held by these terminees since completing their high school vocational course is listed, current employment status is listed, and whether the student intended to get a job in the area while in the program.

The following code is used to identify the employment status of the terminees:

0. Unemployed, but seeking employment
1. Employed full time
2. Employed part time, seeking full-time job
3. Employed part time, not seeking full-time job
4. Employed full time and attending school
5. Employed part time and attending school
6. Unavailable for employment

The following code is used to identify whether the student intended to get a job in the area while in the program:

1. No
2. Was not sure
3. Yes

The number in parenthesis behind the job titles indicates the relatedness of the high school vocational training to these jobs. The terminees

made the judgment as to the relatedness of their training to these jobs. The following is used to identify this relatedness:

1. Directly related
2. Somewhat related
3. Not related

The total does not correspond to the total reporting since some of the terminees failed to indicate the title of their present position. If the first job title was the same as the present job title, the first job title is included under the present job title.

OE Code 17.2602 - Cosmetology

No.	Employment Status	Full-Time Jobs Held Since High School Voc. Course	Intent of Employment in Area	Present Job	First Job
1	0	0	2	Stock cashier, helper (1)	
2	4	0	1	N.Y.C. desk reces. (3)	Out-reach field worker (3)
3	1	1	3	Cosmetologist (1)	
4	0	0	3	Food service worker (3)	
5	1	1	3	Cotton mill winder hand (3)	
6	1	1	2	Ticket server (3)

TITLE: WELDING FOLLOW-UP. FOLLOW-UP OF 1973-74 WELDING TERMINEES FROM THE SECONDARY SCHOOL VOCATIONAL PROGRAMS OF ALABAMA. RESEARCH AND DEVELOPMENT REPORT NO. 35.

PERSONAL AUTHOR: MORGAN, ALICE S.; DRAKE, JAMES BOB

DESCRIPTOR: *WELDING; *VOCATIONAL FOLLOWUP; *OCCUPATIONAL SURVEYS; *STATE SURVEYS; *SECONDARY EDUCATION; VOCATIONAL EDUCATION

IDENTIFIER: ALABAMA

EDRS PRICE: MF AND HC AVAILABILITY WILL BE ANNOUNCED IN VOL. 10, NO. 2.

DESCRIPTIVE NOTE: 57P.; RELATED DOCUMENTS VT 103 321 THROUGH VT 103 335 IN THIS ISSUE.

ABSTRACT: THIS REPORT RELATES THE FINDINGS OF A STATEWIDE FOLLOWUP SURVEY OF 1973-74 WELDING TERMINEES FROM THE SECONDARY SCHOOL VOCATIONAL PROGRAMS IN ALABAMA. QUESTIONNAIRES WERE MAILED TO 469 STUDENT TERMINEES APPROXIMATELY SEVEN TO EIGHT MONTHS AFTER LEAVING SCHOOL. RETURNS WERE RECEIVED FROM 130 (27.7 PERCENT) WELDING TERMINEES FROM THE INITIAL MAILING AND ONE FOLLOWUP. DATA ARE PRESENTED IN TABLES WITH ACCOMPANYING NARRATIVE SUMMARIES ORGANIZED ACCORDING TO THESE MAJOR SECTIONS: GENERAL INFORMATION ON THE TERMINEES; BASIC INFORMATION RELATED TO THE VOCATIONAL PROGRAM; BASIC EMPLOYMENT INFORMATION; CONTINUING EDUCATION INFORMATION; AND JOB PLACEMENT INFORMATION. PRESENT AND FIRST JOB TITLES OF THE 1973-74 WELDING TERMINEES ARE APPENDED. (NJ)

For their help in refining the survey instrument, special thanks are due the following state supervisors:

Mrs. Divine Bauer, Health Occupations Education
Miss Evelyn Cotney, Home Economics Education
Mr. H. W. Green, Agribusiness Education
Mr. J. C. Lindley, Trade & Industrial Education
Mrs. Anacile Kurth, Distributive Education
Mrs. Sandra Yelverton, Business and Office Education

Appreciation is also extended to the following members of the Occupational Research and Development Unit for their contribution to the study:

Mrs. Bonnie J. Burks, Research Associate
Mr. Paul D. Davis, Research Associate
Mr. Gary Greenshields, Graduate Research Assistant
Mr. John Gross, Research Associate
Mr. James McMath, Graduate Research Assistant
Miss Flossi Sergen, Secretary
Mr. Ed Williams, Duplicating Operator

FOLLOW-UP OF 1973-74 WELDING TERMINEES
FROM THE SECONDARY SCHOOL VOCATIONAL
PROGRAMS OF ALABAMA

Alabama continues to support one of the most progressive and comprehensive vocational education programs in the nation. In addition to serving youth and adults by training them for gainful and useful employment, the diversification of vocational courses meets a serious job need and contributes to the industrial development in the state.

With the millions of tax dollars being spent on vocational education, it is necessary to attempt to account to the taxpayer and decision-makers on the results of those expenditures. Terminee student follow-up studies constitute one of the most valuable techniques for assessing vocational education system outcomes.

The Alabama State Department of Education, Division of Vocational Education and Community Colleges, recognizing this important phase of accountability and evaluation, initiated the development of a statewide follow-up system for its vocational education program terminees at the secondary school level. The Division, under the direction of Dr. T. L. Faulkner, State Director, contracted with the Occupational Research and Development Unit at Auburn University to develop and implement the statewide follow-up system for all its secondary vocational terminees in all service areas.

This report relates the findings of the survey instrument mailed to the 1973-74 Welding terminees from the secondary school vocational

programs of Alabama. When the terminees received the questionnaire, most had been out of school seven to eight months.

General Information

Student rosters with names and addresses of 1973-74 Welding terminees were received from 54 secondary school vocational teachers in Alabama. Of the 54 teachers from which student rosters were received, 26 were in Secondary Area Vocational Centers (AVC) and 28 were in programs in schools of other settings. The total of 469 student terminees reported to the ORDU were mailed the follow-up forms. Returns were received from 130 (27.7%) of the Welding terminees from the initial mailing and one follow-up. At least one student questionnaire was received from 36 of the 54 programs.

All terminees reported in this study were in programs administered only by the Division of Trade & Industrial Education, State Department of Education.

Table 1 presents data relative to the total population of Welding terminees and the number of returns categorized by type school and termination status.

TABLE 1

DESCRIPTION OF TOTAL POPULATION AND RETURNS OF 1973-74 WELDING TERMINEES BY TYPE SCHOOL AND TERMINATION STATUS[A]

Type School and Termination Status	Total Number Reported	Number of Returns	Percent of Returns
Area Vocational Centers			
Total	275	85	30.9
Completers[B]	192	72	37.5
Dropouts[C]	83	13	15.7
Other Type Schools			
Total	194	45	23.2
Completers	128	40	31.3
Dropouts	66	5	7.6
Grand Total	469	130	27.7
Completers	320	112	35.0
Dropouts	149	18	12.1

[A]These Welding terminees were in programs administered only under the service area of Trade and Industrial Education, State Department of Education.

[B]Any terminee who left the program by completing or by high school graduation.

[C]Any terminee the instructor reported as having dropped out of school.

Table 2 illustrates the sex characteristics of those 1973-74 Welding terminees reported by the instructors and those who returned survey forms.

TABLE 2

SEX OF THE 1973-74 WELDING TERMINEES REPORTED AND BY WHO RETURNED QUESTIONNAIRES

Sex[A]	Reported		Returns	
	Number	Percent	Number	Percent
Male	446	95.1	124	95.4
Female	1	0.2	1	0.8
Not Known	22	4.7	5	3.8
TOTAL	469	100.0	130	100.0

[A]Sex as reported by teacher.

Table 3 presents the racial or ethnic characteristics of those 1973-74 Welding terminees reported by instructors and who returned survey forms.

TABLE 3

RACIAL OR ETHNIC CHARACTERISTICS OF THE 1973-74 WELDING TERMINEES REPORTED AND BY WHO RETURNED QUESTIONNAIRES

Racial or Ethnic Group[A]	Reported		Returns	
	Number	Percent	Number	Percent
American Indian	0	0.0	0	0.0
Black	126	26.9	21	16.2
Oriental	0	0.0	0	0.0
Spanish Surnamed American	0	0.0	0	0.0
White	335	71.4	107	82.3
Other	0	0.0	0	0.0
Not Known	8	1.7	2	1.5
TOTAL	469	100.0	130	100.0

[A]Racial or Ethnic Group as reported by teacher.

Table 4 illustrates the number and grade level of the 1973-74 Welding terminees reported who dropped out of school during the academic year and by who returned the questionnaire.

TABLE 4

NUMBER OF THE 1973-74 WELDING TERMINEES REPORTED WHO DROPPED OUT OF SCHOOL DURING THE 1973-74 SCHOOL YEAR BY GRADE LEVEL

Grade Level Upon Dropping Out of School	Reported		Returns	
	Number	Percent[A]	Number	Percent[B]
Ninth	12	2.6	1	8.3
Tenth	33	7.0	4	12.1
Eleventh	46	9.8	5	10.9
Twelfth	24	5.1	3	12.5
Grade Level Not Indicated by Teacher	34	7.2	5	14.7
TOTAL	149	31.7	18	12.1

[A]Percentage is based on 469 total reported terminees.

[B]Percentage is based on returns by grade.

Table 5 shows the number of 1973-74 Welding terminees who indicated whether they were in active full-time military service.

TABLE 5

ACTIVE FULL-TIME MILITARY STATUS OF 1973-74 WELDING TERMINEES WHO RETURNED QUESTIONNAIRES

Active Full-Time Military Status	Number	Percent
Yes	4	3.1
No	119	91.5
No Response	7	5.4
TOTAL	130	100.0

Basic Information Related to the Vocational Education Program

Table 6 points out the number of 1973-74 Welding terminees who indicated whether this vocational program was a school requirement.

TABLE 6

1973-74 WELDING TERMINEES WHO INDICATED WHETHER THEIR VOCATIONAL PROGRAM WAS A SCHOOL REQUIREMENT

Vocational Courses Was a School Requirement	Number	Percent
Yes	9	6.9
No	120	92.3
No Response	1	0.8
TOTAL	130	100.0

Table 7 indicates, according to the 1973-74 Welding terminees, the primary source of influence in selecting their vocational course.

TABLE 7

PRIMARY INFLUENCES ON THE 1973-74 WELDING TERMINEES IN SELECTING THEIR VOCATIONAL COURSE

Group or Individual Terminees Felt Influenced Them Most in Selecting Vocational Course	Number	Percent
Parent(s) or Guardian(s)	11	8.5
Guidance Counselor	6	4.6
Your Vocational Teacher	4	3.1
Another Teacher or Principal	3	2.3
Student in VED Program	4	3.1
A Friend or Relative	3	2.3
A Businessman	1	0.8
Made Choice Yourself	97	74.6
Other (Brother)	1	0.8
No Response	0	0.0
TOTAL	130	100.0

Parents or Guardians appeared to be the greatest outside influence on those terminees enrolling in the Welding program. Eleven (8.5%) of the terminees responding indicated that their Parent(s) or Guardian(s) influenced them most in selecting their Welding course. However, 97 (74.6%) indicated that they selected their course of study on their own. Six terminees (4.6%) indicated that a guidance counselor influenced them most in selecting their program. Four (3.1%) of the terminees indicated that their vocational teacher influenced them most in selecting their course in Welding.

Table 8 indicates terminees' opinions as to whether they had adequate job or occupational information and school experiences to make a realistic career choice.

TABLE 8

OPINIONS OF 1973-74 WELDING TERMINEES AS TO WHETHER THEY HAD ADEQUATE JOB OR OCCUPATIONAL INFORMATION AND SCHOOL EXPERIENCES TO MAKE A REALISTIC CAREER CHOICE

	Number	Percent
Yes	113	86.9
No	16	12.3
No Response	1	0.8
TOTAL	130	100.0

Table 9 indicates whether, during the time they were taking their high school vocational program, the reporting 1973-74 terminees intended to get a job in Welding.

TABLE 9

INDICATIONS OF 1973-74 WELDING TERMINEES AS TO WHETHER, DURING THE TIME THEY WERE TAKING THEIR HIGH SCHOOL VED PROGRAM, THEY PLANNED TO GET A JOB IN THEIR AREA OF STUDY

Intended To Get Job In Area of Study	Number	Percent
Yes	92	70.8
No	7	5.4
Was Not Sure	31	23.8
No Response	0	0.0
TOTAL	130	100.0

It is interesting to note that 92 (70.8%) of the 1973-74 reporting Welding terminees indicated that during the time they were taking their Welding program, they intended to get a job in the area they were studying.

Table 10 indicates terminees' opinions on choosing the Welding program if they had the selection to make again.

A noteworthy point was revealed by the data. Of the 1973-74 Welding terminees, 116 (89.2%) indicated that they would select the same vocational program if they had the choice to make again. Only one (0.8%) of the responding terminees indicated that they would not take a vocational program.

TABLE 10

OPINIONS OF 1973-74 WELDING TERMINEES REGARDING THEIR VOCATIONAL PROGRAM

Question: If You Had It To Do Over Again, Would You...?	Number	Percent
Take the same vocational program	116	89.2
Not take a vocational program	1	0.8
Choose another vocational program offered in your school, such as _____ [A]	10	7.7
Choose another vocational program if it had been offered in your school, such as _____ [B]	1	0.8
No Response	2	1.5
TOTAL	130	100.0

[A]See listing I-A below for those other vocational programs offered in terminees' school that they would have taken instead of their Welding programs.

[B]See listing I-B below for the vocational programs the terminee would have taken instead of their Welding program if it had been offered in their school.

Listing I-A -- Courses offered in their school that Welding terminees indicated they would have taken if they had it all to do over again.

Course	Number
Auto mechanics	2
Commercial art	1
Mechanics	1
Air conditioning/refrigeration	1
Electricity	1
Electronics	1

Listing I-B -- Courses Welding terminees indicated they would have taken if they had it all to do over again and the course were offered in their school.

Course	Number
Electricity	2
Electronics	1
Landscaping	1
Auto mechanics	1

Table 11 indicates the extent to which the reporting 1973-74 Welding terminees felt their high school vocational programs prepared them for their first job. This data was also broken down by how that first job related to their vocational program.

Terminees who were in full-time active military service or who had never been employed were not asked to respond to the questions from which this data was reported. Also, the terminees who failed to respond to the question items were not indicated in the table.

TABLE 11

PERCEPTIONS OF 1973-74 WELDING TERMINEES AS TO THE EXTENT THEIR HIGH SCHOOL VOCATIONAL PROGRAM PREPARED THEM FOR THEIR FIRST FULL-TIME JOB BY HOW FIRST FULL-TIME JOB RELATED TO TRAINING

Extent Vocational Course Prepared for First Full-Time Job	Total Reporting		Number Reporting by Relatedness of First Full-Time Job to Training Received

Poorly Prepared	3	3.3	1	2.8	1	5.3	1	2.9
Preparation not related to job	26	28.9	0	0.0	1	5.3	25	71.4
TOTAL	90	100.0	36	100.0	19	100.0	35	100.0

In noting the extent to which the 1973-74 Welding terminees felt their high school vocational course prepared them for their first full-time job by how their first full-time job related to the training they

received in their high school Welding program, some intersting points were revealed. Fifty-two (57.8%) of the 1973-74 Welding terminees responding to this item indicated "Excellent" or "Well Prepared" for their first full-time job as a result of the training received in their high school vocational education program. Thirty (83.3%) of the 36 terminees employed in their first full-time job related directly to their training felt they were excellent or well prepared for this first job. Thirty-five of the 90 terminees felt that their preparation did not relate to their job. Of all the responding terminees, only three (3.3%) felt that they were poorly prepared for their first full-time job. Of these, only one was working in an area directly related to his vocational course.

Table 12 indicates the extent to which the reporting 1973-74 Welding terminees felt their high school vocational course prepared them for their present job. Also shown in the table is a breakdown of the data by how their present job was related to their vocational program.

Terminees in active full-time military service, and students who were attending school full time and had not had a job, were not asked to respond to the question from which Table 12 was prepared. Also, those other students who failed to respond to the items were not shown on the table.

Of the 88 terminees responding to these items, 45 (51.2%) indicated "Excellent" or "Well Prepared" for their present job as a result of their high school vocational program. Only two (2.3%) terminees reported feeling poorly prepared for their present job as a result of their training.

TABLE 12

PERCEPTIONS OF 1973-74 WELDING TERMINEES AS TO THE EXTENT THEIR HIGH SCHOOL VOCATINAL COURSE PREPARED THEM FOR THEIR PRESENT JOB BY HOW THEIR PRESENT JOB RELATED TO TRAINING

Extent Vocational Course Prepared for Present Job	Total Reporting		Number Reporting by Relatedness of Present Job to Training Received					
			Directly Related		Somewhat Related		Not Related	
	No.	%	No.	%	No.	%	No.	%

TOTAL	88	100.0	30	100.0	21	100.0	37	100.0

[A]See listing below for reasons terminees specified for only being trained "Fair" by their vocational course for their present job.

Twenty (66.7%) of the 30 responding terminees working in an area directly related to their high school vocational program indicated that they felt excellent or well prepared by their training.

Several terminees who indicated "Fair" as the extent their vocational program prepared them for this present job indicated reasons for this. The following lists the reasons the 1973-74 Welding terminees indicated for being trained only "Fair" by their vocational course for their present job:

1. Used wrong techniques
2. Did well one year
3. Only had three years

(continued)

4. Not enough
5. Do some welding
6. Enrolled too late
7. Waiting for building
8. Different type machines
9. Not enough time
10. Needed different type welding

None of the terminees who indicated they were "Poorly Prepared" for their present job by their vocational program gave reasons why they felt that way.

Table 13 focuses on the Welding student club. The researchers sought to determine the extent to which the 1973-74 Welding terminees felt that their high school student club aided in preparing them for their present job. Data are also broken down by the relationship of the present job to the vocational training received.

TABLE 13

PERCEPTIONS OF 1973-74 WELDING TERMINEES AS TO THE EXTENT THEIR HIGH SCHOOL VOCATIONAL STUDENT CLUB PREPARED THEM FOR THEIR PRESENT JOB BY HOW THEIR PRESENT JOB RELATED TO TRAINING[A]

Extent High School Vocational Student Club Helped Prepare for Present Job	Total Reporting		Total Reporting by Relatedness of Present Job to Vocational Training					
			Directly Related		Somewhat Related		Not Related	
	No.	%	No.	%	No.	%	No.	%
Excellent	8	15.7	4	21.0	2	14.3	2	11.1
Well Prepared	12	23.5	6	31.6	2	14.3	4	22.2
Fair	28	54.9	8	42.1	9	64.3	11	61.1
Poorly Prepared	3	5.9	1	5.3	1	7.1	1	5.6
TOTAL	51	100.0	19	100.0	14	100.0	18	100.0

[A]Of the 94 who responded, 13 (13.8%) had no related student club available, and 30 (19.1%) were not members of a related student club.

Only respondents who had had a job since terminating their high school vocational Welding program were asked to respond to the question reported in Table 13. Students in active full-time military service were excluded. Thirteen (13.8%) of the 94 terminees reported no related student club was available, while 30 (19.1%) were not members of a related student club.

Twenty (39.2%) of the 51 terminees who participated in student club activities indicated they were "Excellent" or "Well Prepared" by their related student club for their present job. Three (5.9%) indicated they were "Poorly Prepared" by their related student club for their present job. Of those three, only one (33.3%) was in a related job.

Of those terminees who were working in an area directly related to the training they received in their high school vocational program, ten (52.6%) revealed that they were "Excellent" or "Well Prepared" for their present job by their related student club. Only one (5.3%) of the 19 terminees who were working in a job directly related to the training they received indicated he was "Poorly Prepared" for his present job by his related student club.

Table 14 reports how the 1973-74 Welding terminees rated the quality of teaching by their high school vocational instructors.

One hundred eighteen (90.8%) of the 130 reporting 1973-74 Welding terminees rated the quality of teaching by their vocational instructor either "Good" or "Excellent." Only two (1.5%) rated the quality of teaching by their instructors "Poor" or "Very Poor."

TABLE 14

1973-74 WELDING TERMINEES' RATINGS OF THE QUALITY OF TEACHING BY THEIR HIGH SCHOOL VOCATIONAL INSTRUCTORS

Rating	Number	Percent
Excellent	85	65.4
Good	33	25.4
Fair	9	6.9
Poor	0	0.0
Very Poor	2	1.5
No Response	1	0.8
TOTAL	130	100.0

Table 15 illustrates how the 1973-74 Welding terminees rated their high school vocational instructor's interest in their class work.

TABLE 15

1973-74 WELDING TERMINEES' RATINGS OF THEIR HIGH SCHOOL VOCATIONAL INSTRUCTOR'S INTEREST IN THE STUDENT'S CLASS WORK

Rating	Number	Percent
Excellent	80	61.5
Good	41	31.5
Fair	7	5.4
Poor	0	0.0
Very Poor	2	1.5
No Response	0	0.0
TOTAL	130	100.0

One hundred twenty-one (93.0%) of the 130 reporting 1973-74 Welding terminees rated the interest exhibited by their high school vocational

instructor in their class work as "Good" or "Excellent." Only two (1.5%) of the terminees rated the interest their vocational instructors showed in their class work as "Poor" or "Very Poor."

Table 16 points out how the 1973-74 Welding terminees subjectively rated the knowledge their vocational teachers possessed about their field of study. This rating is also shown in the table by a breakdown of how the terminees' present job related to the training they received in their high school vocational program. Terminees were asked to base their judgments on their current knowledge of their job and responsibilities.

TABLE 16

1973-74 WELDING TERMINEES' RATINGS OF THE KNOWLEDGE THEIR HIGH SCHOOL VOCATIONAL TEACHER POSSESSED ABOUT THEIR FIELD OF STUDY BY HOW THE TERMINEES' PRESENT JOB RELATED TO THE TRAINING THEY RECEIVED

Rating[A]	Total Reporting		Number Reporting by Relatedness of Present Job to Training Received					
			Directly Related		Somewhat Related		Not Related	
	No.	%	No.	%	No.	%	No.	%
Excellent	49	52.7	19	63.3	10	47.6	20	47.6
Good	31	33.3	5	16.7	11	52.4	15	35.7
Fair	12	12.9	6	20.0	0	0.0	6	14.3
Poor	1	1.1	0	0.0	0	0.0	1	2.4
Very Poor	0	0.0	0	0.0	0	0.0	0	0.0
TOTAL	93	100.0	30	100.0	21	100.0	42	100.0

[A]Ratings were to be based on terminee's judgment of their current knowledge of their job and responsibilities.

Total responses to this item indicates that 80 (86.0%) of the 93 responding 1973-74 Welding terminees rated the knowledge their vocational teachers possessed about their field of study either "Good" or "Excellent." For those 30 terminees working in an area directly related to the training they received, 24 (80.0%) rated the knowledge their teachers possessed about their field of study as "Good" or "Excellent." A favorable point was revealed in that only one of those terminees rated the knowledge their vocational teachers possessed about their field of study as "Poor" and none "Very Poor."

If the respondent was working in an area related to his training, he was asked to compare the facilities and equipment in his high school vocational program with those on his present job. Table 17 illustrates how the 1973-74 Welding terminees responded.

TABLE 17

HOW 1973-74 WELDING TERMINEES WORKING IN A RELATED AREA RATED THE FACILITIES AND EQUIPMENT IN THEIR HIGH SCHOOL VOCATIONAL PROGRAM[A]

Rating[B]	Number	Percent
Better than those on present job	8	26.7
Similar to those on present job	17	56.7
Not as good as those on present job	5	16.6
TOTAL	30	100.0

[A]Thirty-five (53.8%) of the responding 65 terminees indicated that their present job was not related to their vocational training enough to compare facilities and equipment.

[B]Persons who had not had a job since leaving their vocational program, including those in military service and those who attended school, were asked not to respond to questions from which data was drawn. Returns were received from 130 terminees.

Eight (26.7%) of the 30 responding 1973-74 Welding terminees working in an area related to their training rated the facilities and equipment in their high school vocational program as better than those on their present job. Seventeen (56.7%) rated the facilities and equipment in their high school vocational program as similar to those on their present job, while five (16.6%) rated the facilities and equipment not as good as those on their present job.

Table 18 shows how 1973-74 Welding terminees, who were in a cooperative work program in school and were now working in an area related to their vocational training, rated the facilities and equipment used in their cooperative work station.

TABLE 18

HOW 1973-74 WELDING TERMINEES NOW WORKING IN A RELATED AREA, WHOSE VOCATIONAL PROGRAM INCLUDED COOPERATIVE WORK, RATED FACILITIES AND EQUIPMENT USED IN THEIR COOPERATIVE WORK STATION[A]

Rating[B]	Number	Percent
Better than those on present job	6	24.0
Similar to those on present job	15	60.0
Working at same place where cooperative training was done	0	0.0
Not as good as those on present job	4	16.0
TOTAL	25	100.0

[A]Four (6.7%) of the responding 60 Welding terminees indicated their vocational program was not a cooperative program. Thirty-one (51.7%) terminees indicated they were not working in an area related to their cooperative work; therefore, they did not complete this item on the questionnaire.

[B]Persons who had not had a job since leaving their vocational program, including those in military service and those attending school, were asked not to respond to questions from which data was drawn. Returns were received from 130 terminees.

Six (24.0%) of the 25 responding 1973-74 Welding terminees whose vocational programs had included cooperative work and were now working in an area related to their vocational training, rated the facilities and equipment in his cooperative work station as better than those on his present job. Fifteen (60.0%) rated the facilities and equipment in their cooperative training station as similar to those on their present job. Only four (16.0%) rated the facilities and equipment in their cooperative work station not as good as those in their present job. It was significant to note that none indicated they were working at the same establishment where they did their cooperative training.

Basic Employment Information

The following section of this report offers information relative to employment and job characteristics of the 1973-74 secondary Welding terminees.

Table 19 illustrates the number of full-time jobs the responding 1973-74 Welding terminees have had since leaving their high school vocational course.

TABLE 19

NUMBER OF FULL-TIME JOBS HELD BY THE 1973-74 WELDING TERMINEES SINCE LEAVING THEIR HIGH SCHOOL VOCATIONAL COURSE

Number of Full-Time Jobs Held	Number	Percent[A]
One	35	26.9
Two	26	20.0
Three	5	3.9
Four	0	0.0
Five or more	0	0.0
TOTAL	66	50.8

[A]Percentage is based on the 130 terminees who returned the questionnaire.

There were 35 (26.9%) of the total 130 responding 1973-74 Welding terminees who had been employed in just one job since leaving their high school vocational program. Twenty-six (20.9%) of the terminees reported having two jobs since leaving their high school vocational course seven to eight months ago, and five (3.9%) reported three jobs.

Table 20 reveals the first-job employment status of Welding terminees who returned the survey by the relatedness of their vocational training to their first job.

TABLE 20

FIRST-JOB EMPLOYMENT STATUS OF WELDING TERMINEES (1973-74) BY RELATEDNESS OF VOCATIONAL TRAINING TO FIRST JOB[A]

First Job After Leaving High School Vocational Program	Total Reporting		Relatedness of Vocational Training to First Job[B]					
			Directly Related		Somewhat Related		Not Related[C]	
	No.	%	No.	%	No.	%	No.	%
Full-Time	93	71.5	36	27.7	19	14.6	38	29.2
Part-Time	5	3.8	0	0.0	1	0.8	4	3.1
TOTAL	98	75.3	36	27.7	20	15.4	42	32.3

[A]All percentages were based on the 130 (27.7%) of 469 terminees who returned the survey form.

[B]The terminees made the judgment as to how their first job was related to the training received in their high school vocational program.

[C]See page 21 for reasons terminees who were working in first job unrelated to this vocational training gave for not seeking job that was related before accepting their first job.

Of the 130 responding 1973-74 Welding terminees, 93 (71.5%) were employed full time in their first job after leaving their high school vocational program. Five terminees' first jobs were on a part-time basis.

Thirty-six (27.7%) of the 130 responding terminees' first jobs (full-time or part-time) were in an area directly related to the training they received in their high school vocational course. Twenty (15.4%) were employed in an area somewhat related, while 42 (32.3%) were employed in a first job not related to the training they received. The terminees made the judgment as to how their first job was related to the training they received in their high school vocational program.

Of the 42 terminees who indicated their jobs were not related to their vocational course, 27 (64.3%) terminees indicated that before they accepted their unrelated job, they tried to get a job that was related to their vocational training. However, 15 (35.7%) of the terminees did not.

The following is a list of reasons given by the terminees who, before taking their first unrelated job, indicated they did not seek a job that was related to their vocational training.

Reason	Number
Not enough experience	1
Already had a job	1
Layoffs in the field	1
Didn't want to	1
Didn't learn how	1
Only had one half year	1
No trade school	1

Table 21 shows number of returns by type school and termination status for the first job of the 1973-74 Welding terminees, and the relatedness of their training to this first job.

TABLE 21

NUMBER OF RETURNS BY TYPE SCHOOL AND TERMINATION STATUS FOR 1973-74 WELDING TERMINEES FIRST JOB, AND RELATEDNESS OF TRAINING

Type School and Termination Status	Number of Returns[A]	Total Employed		Relatedness of Training to First Job[E]					
				Directly Related		Somewhat Related		Not Related	
		No.	%	No.	%	No.	%	No.	%

Dropouts	18	9	8.9	1	11.1	0	0.0	8	88.9

[A]Of 469 Welding terminees, 130 (27.7%) returned the questionnaires.

[B]Area Vocational Centers.

[C]Any terminee who left the program by completing or by high school graduation.

[D]Any terminee who the instructor reported as having dropped out of school.

[E]The terminees made the judgment as to how their first job was related to the training received in their high school vocational program.

Table 22 illustrates the current employment status of the responding terminees by the relatedness of their vocational training to their present jobs. All percentages figured in the table were based on the 130 (27.7%) returns from the 469 Welding terminees.

TABLE 22

CURRENT EMPLOYMENT STATUS OF WELDING TERMINEES (1973-74)
BY RELATEDNESS OF TRAINING TO PRESENT JOB[A]

Employmens Status	Total Respond-ing		Relatedness of Training to Present Job[B]							
			Directly Related		Somewhat Related		Not Related[E]		Employed No Response	
	No.	%	No.	%	No.	%	No.	%	No.	%
Employed full time and not attending school	75	57.7	26	20.0	17	13.1	32	24.6	0	0.0
Employed full time and attending school	6	4.6	2	1.5	1	0.8	3	2.3	0	0.0
Employed part time and seeking full-time job	4	3.1	0	0.0	2	1.5	1	0.8	1	0.8
Employed part time and not seeking full-time job	0	0.0	0	0.0	0	0.0	0	0.0	0	0.0
Employed part time and attending school	5	3.8	1	0.8	0	0.0	4	3.1	0	0.0
Unemployed (actively seeking a job)[C]	13	10.0	N/A		N/A		N/A		N/A	
Unavailable for employment[C&D]	1	0.8	N/A		N/A		N/A		N/A	
No Response	26	20.0	N/A		N/A		N/A		N/A	
TOTAL	130	100.0	29	22.3	20	15.4	40	30.8	1	0.8

[A]All percentages were based on the 130 (27.7%) respondents of the total 469 terminees. Terminees in active full-time military service or attending school full time and had never been employed were included in the "No Response" category.

[B]The terminees made the judgment as to how their present job was related to the training received in their high school vocational program.

[C]The unemployed and unavailable for employment categories do not include persons in the military service and persons who were in school full time and never had a job.

[D]See page 24 for the listing of reasons Welding terminees gave for being unavailable for employment.

[E]See page 25 for reasons terminees who were working in present job not related to vocational training gave for not seeking related job before accepting present job. Totals for unrelated columns may not correspond because terminees failed to respond to one of the two questions from which data was drawn.

Of the 130 responding 1973-74 secondary Welding terminees, 81 (62.3%) were presently employed full time and not attending school or employed full time and attending school. Five (3.8%) of the terminees were employed part time and attending school, while only one (0.8%) was unavailable for employment (See page 24 for reasons terminees were unavailable for employment). Only 13 (10.0%) of the terminees were unemployed and actively seeking employment, while four (3.1%) were employed part time and seeking full-time employment.

The "No Response" category in Table 22 includes three groups: (1) terminees in active full-time military service; (2) terminees who were in school full time and had never had a job; and (3) terminees who failed to respond to the item on the questionnaire.

Of the 130 secondary Welding respondees, 29 (22.3%) were presently employed full time or part time in an area directly related to the training received in their high school vocational course. Twenty (15.4%) were employed either part time or full time in an area somewhat related to their training, while 40 (30.8%) were employed in areas not related to their training. The terminees made the judgment as to how their present employment was related to the training received in their high school vocational course.

Below is a list of the reasons given by the terminees for being unavailable for employment.

Reason	Number
In school full time	4
Presently not working, not	0
interested in a job	0
Homemaker	0
Pregnancy	0
Illness or disability	0
Other	0

Of the 43 terminees who indicated their present jobs were not related to their vocational course, 29 (67.4%) terminees indicated that before

they accepted their unrelated job, they tried to get a job that was related to their vocational training. However, 14 (32.6%) of the terminees did not.

The following is a list of reasons given by the terminees who, before taking their present unrelated job, indicated they did not seek a job that was related to their vocational training.

Reason	Number
Worked full time	1
Left Welding	1
Already had job	1
Didn't finish	1
Money	1
No jobs	1
Not enough training	1
Changed fields	1
No part-time jobs	1
Pay too low	1
Have asthma	1

Table 23 shows for the present job, by termination status, the number of 1973-74 secondary Welding terminees employed by the relatedness of their vocational training to their present job. The terminees made the judgment as to how their present job related to the training received in their high school vocational program.

TABLE 23

NUMBER OF RETURNS BY TYPE SCHOOL AND TERMINATION STATUS FOR 1973-74 WELDING TERMINEES PRESENT JOB, AND RELATEDNESS OF TRAINING

Completers	112	85	65.4	29	22.3	21	16.2	35	26.9
Dropouts	18	8	6.2	1	0.8	0	0.0	7	5.4

[A]All percentages were based on the 130 (27.7%) of the 469 terminees who returned the questionnaire.

[B]Area Vocational Centers.

[C]Any terminee who left the program by completing or by high school graduation.

[D]Any terminee who the instructor reported as having dropped out of school.

[E]The terminees made the judgment as to how their first job related to the training received in their high school vocational program.

Table 24 indicates the first-job salary ranges as compared to the present-job salary ranges for the 1973-74 Welding terminees.

Of the 94 terminees reporting a salary range for their first job, 19 (20.2%) indicated a range of under $250 per month. Six terminees reported a first salary of over $600 per month. The median and mean

salary ranges for the first job fell in the range of $300 - $349 per month.

TABLE 24

FIRST-JOB SALARY RANGES AND PRESENT-JOB SALARY RANGES FOR 1973-74 WELDING TERMINEES

Salary Ranges	First Job		Present Job	
	No.	%	No.	%
Under $250	19	20.2	11	12.5
$250 - $299	16	17.0	4	4.5
$300 - $349	17	18.1	15	17.0
$350 - $399	8	8.5	10	11.4
$400 - $449	13	13.8	10	11.4
$450 - $499	8	8.5	10	11.4
$500 - $599	7	7.5	14	15.9
$600 - $699	2	2.1	7	8.0
$700 or more	4	4.3	7	8.0
TOTAL	94	100.0	88	100.0

Of the 88 1973-74 Welding terminees reporting a salary range for their present job, 15 (17.0%) indicated between $300 - $349 per month. This salary range was indicative of the mode of the reporting students. The median and mean salary ranges for the present job fell within the range of $350 - $399 per month or less. The median and mean salary ranges of present jobs over first jobs indicate some increase for the reporting Welding terminees.

Table 24A indicates the first-job salary ranges by relatedness of training of the Welding terminees.

Seventeen (19.3%) of the 88 responding terminees were employed at less than $250 per month. Of these 17 terminees, five (29.4%) were employed in a job directly related to their training, three (17.7%) were employed in jobs somewhat related to their training, while nine (52.9%) were employed in jobs not related to their training.

TABLE 24A

FIRST-JOB SALARY RANGES BY RELATEDNESS OF TRAINING OF 1973-74 WELDING TERMINEES

Salary Ranges	Total Terminees Responding	Relatedness of Training to First Job[B]		
		Directly Related	Somewhat Related	Not Related
Under $250	17	5	3	9

$500 - $599	7	1	4	2
$600 - $699	2	2	0	0
$700 or more	4	2	2	0
TOTAL[A]	88	30	18	40

[A]Totals do not match those of Table 24 because some terminees did not respond to all questions.

[B]The terminees made the judgment as to how their first job was related to the training received in their high school vocational program.

All of the 88 responding terminees were males. Thirty (34.1%) were employed in jobs directly related to their vocational training, 18 (20.5%) were employed in jobs somewhat related to their training, while 40 (45.4%) were employed in jobs not related to their training.

Table 24B indicates the present-job salary ranges by relatedness of training of the Welding terminees.

Ten (11.8%) of the 85 responding terminees were employed at less than $250 per month. Of these ten terminees, one (10.0%) was employed in a job directly related to his training, one (10.0%) was employed in a job somewhat related to his training, while eight (80.0%) were employed in jobs not related to their training.

TABLE 24B

PRESENT-JOB SALARY RANGES BY RELATEDNESS OF TRAINING OF 1973-74 WELDING TERMINEES

Salary Ranges	Total Terminees Responding	Relatedness of Training to Present Job[B]		
		Directly Related	Somewhat Related	Not Related
Under $250	10	1	1	8
$250 - $299	4	1	0	3
$300 - $349	14	3	5	6
$350 - $399	10	3	0	7
$400 - $449	10	4	1	5
$450 - $499	10	3	3	4
$500 - $599	13	6	5	2
$600 - $699	7	2	3	2
$700 or more	7	4	2	1
TOTAL[A]	85	27	20	38

[A]Totals do not match those of Table 24 because some terminees did not respond to all questions.

[B]The terminees made the judgment as to how their present job was related to the training received in their high school vocational program.

All of the 85 responding terminees were males. Twenty-seven (31.8%) were employed in jobs directly related to their vocational training. Twenty (23.5%) were employed in jobs somewhat related to their training, while 38 (44.7%) were employed in jobs not related to their training.

Continuing Education Information

The following section of this report presents information relative to the continuing education of the 1973-74 secondary Welding terminees.

Table 25 shows the vocational educational training opportunities terminees have participated in since leaving their high school vocational program.

TABLE 25

ADDITIONAL VOCATIONAL EDUCATIONAL TRAINING 1973-74 SECONDARY WELDING TERMINEES PARTICIPATED IN SINCE LEAVING THEIR HIGH SCHOOL VOCATIONAL PROGRAM[A]

Type Training	Number	Percent[B]
On-the-job training (employer-sponsored program)	17	13.1
Public school adult vocational program	7	5.4
Private vocational school program	1	0.8
University or four year college	1	0.8
Junior college	5	3.8
Post-secondary vocational-technical institute (trade school)	9	6.9
Apprenticeship training program	7	5.4
Specialized occupational military training	2	1.5
Other[C]	5	3.8
TOTAL[D]	54	41.5

[A]Eighty-two (63.1%) of the 130 terminees gave no indication of being involved in additional vocational training. Of the 130 terminees, 42 (32.3%) took part in one additional vocational training opportunity since leaving their high school program. Three (2.3%) took part in two and three (2.3%) terminees took part in the three additional training opportunities.

[B]Percentages are based on the 130 (27.7%) respondents of the total 469 terminees who returned questionnaires.

[C]See page 31 for the "Other" listing as specified by the terminees.

[D]The total indicated the number of different training programs in which terminees enrolled. As footnoted above, several terminees had enrolled in more than one training program.

Of the total terminees, the 17 (13.1%) who were enrolled in on-the-job training represented the largest area where terminees had taken additional vocational training.

Of the 130 responding terminees, 42 (32.3%) had taken part in one additional vocational training program since leaving their high school program. Three (2.3%) enrolled in two training programs, and three (2.3%) terminees had enrolled in three vocational training program. Eighty-two (63.1%) indicated they had not enrolled in any additional vocational training.

The following is a listing of the "Other" (Table 25) vocational education training terminees indicated they had participated in:

"Other" Vocational Training	Number
Learn on the job	1
Not in Welding	1
No work in the area	1
Practice at work	1
Welding training school	1
Builder's school	1

Table 26 points out the additional programs the 1973-74 secondary Welding terminees were presently attending beyond their high school training by whether these programs were related to their high school vocational program.

Of the 130 1973-74 secondary Welding terminees who responded to the survey, one (0.8%) was attending an on-the-job training program (employer-sponsored), five (3.7%) were attending a vocational-technical institute, seven (5.4%) were attending a junior college, four (3.0%) were attending a four year college or university, one (0.8%) was attending a public adult vocational program, one (0.8%) was attending private business or trade school, one (0.8%) was attending an apprenticeship program, and two (1.6%) were attending some other type of school or educational program. (See page 33 for the listing of the other types of school or educational programs students were attending.)

TABLE 26

PROGRAMS PRESENTLY ATTENDED BY THE 1973-74 SECONDARY WELDING TERMINEES BY WHETHER THESE PROGRAMS WERE RELATED TO THEIR HIGH SCHOOL VOCATIONAL EDUCATION PROGRAM[A]

Programs Attended	Terminees		Program Related to High School VED Program			
			Yes		No	
	No.	%	No.	%	No.	%
On-the-job training (employer-sponsored)	1	0.8	1	0.8	0	0.0
Vocational-technical institute (trade school)	5	3.7	5	3.7	0	0.0
Junior college	7	5.4	1	0.8	6	4.6
Four year college or university	4	3.0	0	0.0	4	3.0
Public school adult vocational program	1	0.8	1	0.8	0	0.0
Private business or trade school	1	0.8	0	0.0	1	0.8
Apprenticeship program	1	0.8	1	0.8	0	0.0
Other[B]	2	1.6	1	0.8	1	0.8
TOTAL	22	16.9	10	7.7	12	9.2

[A]All percentages were based on the 130 responding terminees.

[B]See page 33 for listing of "Other" schools or educational institutions terminees were attending.

Twenty-two (16.9%) of the 130 Welding terminees were presently continuing their education. Ten (7.7%) of the terminees were continuing their education in a program related to their high school vocational program. Twelve (9.2%) were attending a program in an area not related to their high school vocational program.

The following is a listing of the "Other" category (Table 26) of additional programs the 1973-74 Welding terminees were attending:

"Other" School or Program	Number
High school vocational	1
Job corps	1
Vocational-technical	1

Of the 130 responding terminees, 83 (63.9%) indicated they would like further vocational training. The following is a list of the areas in which these terminees desired to study:

Area of Study	Number
Welding	46
Electricity	6
Auto mechanics	4
Mechanics	3
Welding and diesel mechanics	2
Conservation forestry	1
Supervisor	1
Respiratory therapy	1
Drafting	1
Blueprint reading	1
Carpenter	1
Pipe fitter	1
Power plant operation	1
Not sure	1

Twenty-nine (22.3%) of the 130 responding terminees indicated they did not desire further training. Eighteen (13.8%) terminees did not respond to the question.

Job Placement Information

The following section of this report presents information concerning job placement of the 1973-74 secondary Welding terminees.

Table 27 points out whether the 1973-74 Welding terminees were seeking full-time employment when they left their high school vocational program and if their vocational teacher attempted to help them get a job.

TABLE 27

WHETHER VOCATIONAL TEACHER ATTEMPTED TO HELP 1973-74 WELDING TERMINEES GET A JOB IF SEEKING FULL-TIME EMPLOYMENT UPON LEAVING THE HIGH SCHOOL VOCATIONAL PROGRAM[A]

Vocational Teacher Attempted To Get Terminee A Job	Number	Percent
Yes	72	81.8
No	16	18.2
TOTAL	88	100.0

[A]Thirty-nine (30.0%) of the responding terminees indicated they were not seeking full-time employment when they left their high school vocational program. Three (2.3%) of the terminees did not respond to the question.

Of the 88 responding 1973-74 Welding terminees indicating they were seeking full-time employment when they left their high school vocational program, 72 (81.8%) indicated that their vocational teacher attempted to help them get a job. However, 16 (18.2%) of the termienes seeking full-time employment indicated that their vocational teacher did not attempt to help them secure employment. It was interesting to note that 39 (30.0%) of the reporting 1973-74 Welding terminees indicated that they were not seeking full-time employment when they left their high school vocational program.

Table 28 illustrates how long it took the 1973-74 Welding terminees to get their first full-time job after they left their high school vocational program and began actively seeking full-time employment.

Thirty-five (56.5%) of the 62 secondary Welding terminees secured their first full-time job within two weeks after they left their high

school vocational program and began actively seeking full-time employment. However, six (9.7%) of the terminees took 13 or more weeks to secure their first full-time job. There were 40 terminees who indicated they already had a job when they left their high school vocational program.

TABLE 28

LENGTH OF TIME IT TOOK THE 1973-74 WELDING TERMINEES TO SECURE FIRST FULL-TIME JOB AFTER LEAVING HIGH SCHOOL VOCATIONAL PROGRAM AND BEGINNING ACTIVELY SEEKING FULL-TIME EMPLOYMENT[A]

Time to Secure First Full-Time Job	Number	Percent
0 - 2 weeks	35	56.5
3 - 4 weeks	7	11.3
5 - 8 weeks	10	16.1
9 - 12 weeks	4	6.4
13 or more weeks	6	9.7
TOTAL	62	100.0

[A]Forty terminees indicated they already had a job when they left their high school vocational program.

Table 29 shows how the 1973-74 secondary Welding terminees indicated they got their first full-time job after leaving their high school vocational program.

Of the 65 1973-74 Welding terminees who responded to the survey item, 25 (38.5%) indicated they got their first full-time job after leaving their high school vocational program through a friend or relative. Fourteen (21.5%) of the terminees also indicated they got their first full-time job through applications to business and industry. These represented the two methods that the largest number of Welding terminees utilized to secure their first full-time job. Only ten (15.4%)

of the terminees indicated they secured their first job through their vocational teacher. One student indicated that a counselor got him his first full-time job after leaving his vocational program. Those students who already had a job before leaving their high school vocational program were not shown in Table 29. (See Table 30, page 37)

TABLE 29

HOW THE 1973-74 WELDING TERMINEES INDICATED THEY GOT THEIR FIRST FULL-TIME JOB AFTER LEAVING THEIR HIGH SCHOOL VOCATIONAL PROGRAM

How Terminees Secured First Full-Time Job	Number	Percent
Through your vocational teacher	10	15.4
Through your counselor	1	1.5
Through other school teachers or administrators	2	3.1
Through a friend or relative	25	38.5
Through applications to business or industry	14	21.5
Through state (local) employment office	8	12.3
Through a private employment agency	0	0.0
Through radio, T.V., newspaper, or other news media	2	3.1
Other[A]	3	4.6
TOTAL	65	100.0

[A]See listing on page 36 for the "Other" ways terminees indicated they secured their first full-time job after leaving their high school vocational program.

The following list indicates the "Other" means the terminees indicated for securing their first full-time job after leaving their high school vocational program.

"Other" Means for Securing First Full-Time Job	Number
Myself	1
Teacher and parent	1

Table 30 shows how the 1973-74 Welding terminees who were working while in high school taking their vocational program indicated they got that job.

TABLE 30

HOW THE 1973-74 WELDING TERMINEES WHO WERE WORKING WHILE IN HIGH SCHOOL TAKING THEIR VOCATIONAL PROGRAM INDICATED THEY GOT THAT JOB[A]

Who or What Helped Terminee Get Job	Number	Percent
Your vocational teacher	6	11.1
Your counselor	1	1.9
Other school teachers or administrators	3	5.6
Friend or relative	22	40.7
Applications to business or industry	8	14.8
State (local) employment office	3	5.6
Private employment agency	0	0.0
Radio, T.V., newspaper, or other news media	1	1.9
Other[B]	10	18.5
TOTAL	54	100.0

[A]Seventy-six (58.5%) terminees indicated they had no job during the time they were in high school taking their vocational course.

[B]See listing, page 38, for "Other" ways terminees listed for securing their job held while in high school.

Fifty-four (41.5%) of the 130 reporting 1973-74 Welding terminees indicated they were working during the time they were in high school taking their vocational program. Of those terminees working while in high school, 22 (40.7%) got their job through a friend or relative, eight (14.8%) got jobs through applications to business or industry, and six (11.1%) through their vocational instructor. These three means were the ways most of the terminees secured a job while they were still in high school taking their vocational program.

The following list indicates the "Other" means the terminees indicated for securing their job while in high school.

"Other" Means for Securing Job While in High School	Number
Myself	2
Father gave job	1
Employer came to school	1
Vocational-technical janitor	1

Table 31 reveals the indications of the 1973-74 Welding terminees as whether, before taking their first job, they looked for employment within daily walking or driving distance of home by how their first job related to their vocational training.

TABLE 31

INDICATIONS OF 1973-74 WELDING TERMINEES AS TO WHERE THEY LOOKED FOR THEIR FIRST JOB BEFORE TAKING ONE BY HOW THEIR FIRST JOB RELATED TO THEIR TRAINING[A]

Before Taking First Job, Where Terminees Looked for Job	Total Reporting		Total Reporting by Relatedness of First Job to Vocational Training					
			Directly Related		Somewhat Related		Not Related	
	No.	%	No.	%	No.	%	No.	%
Within daily walking or driving distance of home	59	83.1	18	81.8	10	83.3	31	83.8
Beyond daily walking or driving distance of home	12	16.9	4	18.2	2	16.7	6	16.2
TOTAL	71	100.0	22	100.0	12	100.0	37	100.0

[A]Twenty-five terminees indicated they already had their first job while in high school. Of those 25 terminees, 11 (44.0%) were working in a directly related area, eight (32.0%) in a somewhat related area, while six (24.0%) were working in a non-related area.

Fifty-nine (83.1%) of the 1973-74 Welding terminees who were employed in their first job indicated they sought employment within daily walking or driving distance of home. Twelve (16.9%) terminees indicated before taking their first job, they looked for a job beyond daily walking or driving distance of home.

Of the 22 terminees who were working in a directly related area, only four (18.2%) sought employment beyond daily walking or driving distance of home.

It is intersting to note that of the 37 terminees whose first jobs did not relate to their training, only six (16.2%) of those terminees sought employment beyond daily walking or driving distance of home.

Twenty-five terminees indicated they had their first job while in high school. Of those 25 terminees, 11 (44.0%) were working in a directly related area, eight (32.0%) in a somewhat related area, and six (24.0%) were working in a non-related area.

None of the terminees who indicated they sought a job beyond daily walking or driving distance of home before accepting their first job, gave reasons why they sought that job.

Table 32 reveals the indications of the 1973-74 Welding terminees who were working in their first job not related to their training by whether or not they tried to get a job related to their training by where they looked for employment before accepting that first job.

It is important to note that of the 35 terminees who were work-in in a non-related first job, only three (8.6%) sought related employment beyond daily walking or driving distance of home before accepting their first job.

TABLE 32

INDICATIONS OF THE 1973-74 WELDING TERMINEES WORKING IN FIRST JOB NOT RELATED TO THEIR TRAINING BY WHETHER OR NOT THEY TRIED TO GET A JOB RELATED TO THEIR TRAINING BY WHERE THEY LOOKED FOR EMPLOYMENT BEFORE ACCEPTING FIRST JOB[A]

Where Terminees Working in Non-Related Areas Looked for Employment Before Accepting First Job	Total Reporting		Before Accepting This First Job Unrelated to Training Whether Terminees Sought Job in Related Area			
			Yes		No[B]	
	No.	%	No.	%	No.	%
Sought employment within daily walking or driving distance of their home	29	82.9	21	87.5	8	72.7
Sought employment beyond daily walking or driving distance of their homg	6	17.1	3	12.5	3	27.3
TOTAL	35	100.0	24	100.0	11	100.0

[A]Totals in this table may not correspond with totals of terminees for non-related categories in other tables for the following reasons: (1) some terminees had jobs when leaving program and did not have to seek employment and (2) some terminees failed to respond to one or more of the related questions from which data was drawn.

[B]See page 21 for the listing of reasons terminees who were working in non-related jobs gave for not trying to secure a job that was related to their training.

Table 33 illustrates the indications of the 1973-74 Welding terminees as to where they looked for a job before taking their present job by how their present job is related to their vocational training.

Fifty-four (78.3%) of the presently employed 1973-74 Welding terminees indicated they sought employment within daily walking or driving distance of home. Fifteen (21.7%) terminees indicated they sought employment beyond daily walking or driving distance of home.

TABLE 33

INDICATIONS OF 1973-74 WELDING TERMINEES AS TO WHERE THEY LOOKED FOR A JOB BEFORE TAKING THEIR PRESENT JOB BY HOW THEIR PRESENT JOB RELATED TO THEIR TRAINING[A]

Where Terminees Looked for Job Before Taking Present Job	Total Reporting		Total Reporting by Relatedness of Present Job to Vocational Training					
			Directly Related		Somewhat Related		Not Related	
	No.	%	No.	%	No.	%	No.	%
Within daily walking or driving distance of home	54	78.3	17	77.3	8	72.7	29	80.6
Beyond daily walking or driving distance of home[B]	15	21.7	5	22.7	3	27.3	7	19.4
TOTAL	69	100.0	22	100.0	11	100.0	36	100.0

[A]Twenty-two terminees reported they already had their present job while in high school. Of those 22 terminees, seven (31.8%) were in a directly related area, ten (45.5%) in a somewhat related area, while five (22.7%) were working in a non-related area.

[B]See listing, page 42, for reasons terminees gave for seeking their present job away from home.

Of the 22 terminees who were working in a directly related area, only five (22.7%) sought employment beyond daily walking or driving distance of home.

Twenty-two terminees reported they already had their present job while in high school. Of those 22 terminees, seven (31.8%) were in directly related areas, ten (45.5%) in somewhat related areas, and five (22.7%) were in non-related areas.

The following is a list of reasons terminees gave for seeking a job beyond daily walking or driving distance of their home before accepting

their present job. The terminees who indicated they sought a job beyond daily walking or driving distance of home before accepting their present job gave the following reasons.

Reasons for Seeking Job Beyond Daily Walking or Driving Distance Before Accepting Present Job	Number
No jobs	4
Good pay	3
Needed job badly	2
Looked in three states	1
To make it on my own	1
Chance of advancement	1
Only people hiring	1
Called by counselor	1
Uncertain	1
Full-time work	1

Table 34 reveals the indications of the 1973-74 Welding terminees who were working in their present job not related to their training by whether or not they tried to get a job related to their training by where they looked for employment before accepting that present job.

Only four (11.1%) of the 36 terminees who were working in a non-related area sought related employment beyond daily walking or driving distance of home before accepting their present job.

TABLE 34

INDICATIONS OF THE 1973-74 WELDING TERMINEES WORKING IN PRESENT JOB NOT RELATED TO THEIR TRAINING BY WHETHER OR NOT THEY TRIED TO GET A JOB RELATED TO THEIR TRAINING BY WHERE THEY LOOKED FOR EMPLOYMENT BEFORE ACCEPTING PRESENT JOB[A]

Before Accepting Present Job Where Terminees Working in Non-Related Areas Looked for Employment	Total Reporting		Before Accepting This Present Job Unrelated to Training Whether or Not Terminees Sought Job in Related Area			
			Yes		No[B]	
	No.	%	No.	%	No.	%
Sought employment within daily walking or driving distance of their home	29	80.5	22	84.6	7	70.0
Sought employment beyond daily walking or driving distance of their home	7	19.5	4	15.4	3	30.0
TOTAL	36	100.0	26	100.0	10	100.0

[A]Totals in this table may not correspond with totals of terminees for non-related categories in other tables for the following reasons: (1) some terminees had jobs when leaving programs and did not have to seek employment and (2) some terminees failed to respond to one or more of the related questions from which data was drawn.

[B]See page 25 for the listing of reasons terminees who were working in non-related jobs gave for not trying to secure a job that was related to their training.

APPENDIX

PRESENT JOB AND FIRST JOB TITLES OF THE
1973-74 WELDING TERMINEES

PRESENT JOB AND FIRST JOB TITLES OF THE 1973-74 WELDING TERMINEES

For those terminees who indicated present or first job occupations, this appendix lists the present job title and first job title. The job titles are listed as the terminees reported them. The number of full-time jobs held by these terminees since completing their high school vocational course is listed, current employment status is listed, and whether the student intended to get a job in the area while in the program.

The following code is used to identify the employment status of the terminees:

0. Unemployed, but seeking employment
1. Employed full time
2. Employed part time, seeking full-time job
3. Employed part time, not seeking full-time job
4. Employed full time and attending school
5. Employed part time and attending school
6. Unavailable for employment

The following code is used to identify whether the student intended to get a job in the area while in the program:

1. No
2. Was not sure
3. Yes

The number in parenthesis behind the job titles indicates the relatedness of the high school vocational training to these jobs. The terminees

made the judgment as to the relatedness of their training to these jobs. The following code is used to identify this relatedness:

1. Directly related
2. Somewhat related
3. Not related

The total does not correspond to the total reporting, since some of the terminees failed to indicate the title of their present position. If the first job title was the same as the present job title, the first job title is included under the present job title.

OE Code 17.2306 - Welding

TITLE: CONSUMER HOME ECONOMICS FOLLOW-UP. FOLLOW-UP OF 1973-74 CONSUMER HOME ECONOMICS TERMINEES FROM THE SECONDARY SCHOOL VOCATIONAL PROGRAMS OF ALABAMA.

PERSONAL AUTHOR: DAVIS, PAUL D.; DRAKE, JAMES BOB

DESCRIPTOR: *CONSUMER EDUCATION; *HOME ECONOMICS EDUCATION; *VOCATIONAL FOLLOWUP; *OCCUPATIONAL SURVEYS; *SECONDARY EDUCATION; STATE SURVEYS; VOCATIONAL EDUCATION

IDENTIFIER: ALABAMA

EDRS PRICE: MF AND HC AVAILABILITY WILL BE ANNOUNCED IN VOL. 10, NO. 2.

DESCRIPTIVE NOTE: 78P.; RELATED DOCUMENTS VT 103 321 THROUGH VT 103 335 IN THIS ISSUE.

ABSTRACT: THIS REPORT RELATES THE FINDINGS OF A STATEWIDE FOLLOWUP SURVEY OF 1973-74 CONSUMER HOME ECONOMICS TERMINEES FROM THE SECONDARY SCHOOL VOCATIONAL PROGRAMS IN ALABAMA. QUESTIONNAIRES WERE MAILED TO 9,006 STUDENT TERMINEES APPROXIMATELY SEVEN TO EIGHT MONTHS AFTER LEAVING SCHOOL. RETURNS WERE RECEIVED FROM 2,714 (30.1 PERCENT) CONSUMER HOME ECONOMICS TERMINEES FROM THE INITIAL MAILING AND ONE FOLLOWUP. DATA ARE PRESENTED IN TABLES WITH ACCOMPANYING NARRATIVE SUMMARIES ORGANIZED ACCORDING TO THESE MAJOR SECTIONS: GENERAL INFORMATION ON THE TERMINEES; BASIC INFORMATION RELATED TO THE VOCATIONAL PROGRAM; BASIC EMPLOYMENT INFORMATION; CONTINUING EDUCATION INFORMATION; AND JOB PLACEMENT INFORMATION. PRESENT AND FIRST JOB TITLES OF THE 1973-74 CONSUMER HOME ECONOMICS TERMINEES ARE APPENDED. (NJ)

For their help in refining the survey instrument, special thanks are due the following state and district supervisors:

Miss Evelyn Cotney, State Supervisor, Home Economics Education
Miss Julia Cobb
Miss Betty Coe
Miss Sue Dawson
Mrs. Margueritte Holt
Miss Kay Johnson
Mrs. Virginia Medders
Mrs. Ruby Phillips
Mrs. Sue Smith

Appreciation is also extended to the following members of the Occupational Research and Development Unit for their contribution to the study:

Mrs. Bonnie Burks, Research Associate
Mr. Gary Greenshields, Graduate Research Assistant
Mr. John Gross, Research Associate
Mr. James McMath, Graduate Research Associate
Dr. Alice Morgan, Assistant Professor
Miss Flossi Sergen, Secretary
Mr. Ed Williams, Duplicating Operator

FOLLOW-UP OF 1973-74 CONSUMER HOME ECONOMICS
TERMINEES FROM THE SECONDARY SCHOOL
VOCATIONAL PROGRAMS OF ALABAMA

The State of Alabama continues to support one of the most progressive and comprehensive consumer homemaking programs in the nation. In addition to serving youth and adults by training them in consumer homemaking the diversification of consumer home economics program meets a serious job need and contributes to the industrial development in the state.

With millions of dollars being spent in consumer home economics education and vocational education, it is necessary to attempt to account to the taxpayer and decisionmakers on the results of those expenditures. Terminee student follow-up studies constitute one of the most valuable techniques for assessing educational systems outcomes.

The Alabama State Department of Education, Division of Vocational Education and Community Colleges, recognizing this important phase of accountability and evaluation, initiated the development of a statewide follow-up system for its program terminees at the secondary level. The Division, under the direction of Dr. T. L. Faulkner, State Director, contracted with the Occupational Research and Development Unit at Auburn University to develop and implement the state-wide follow-up system for all its secondary terminees in all service areas.

Fully realizing the many goals and objectives of the consumer home economics program in the state and with no intention of de-emphasizing any aspect of that program, the follow-up focused primarily on the employment and world of work aspects of the program.

This report related the findings of the survey instrument mailed to all the 1973-74 Consumer Home Economics terminees from the secondary school programs of Alabama. When the terminees received the questionnaire most had been out of school 7 to 8 months.

General Information

Student rosters with names and addresses were received from 341 secondary school consumer home economics teachers in Alabama. The total of 9,006 student terminees reported to the Occupational Research and Development Unit were mailed the follow-up form. Returns were received from 2,714 (30.1%) of the Consumer Home Economics terminees from the initial mailing and one follow-up. At least one student questionnaire was received from 326 of the 341 programs.

Table 1 presents data relative to the total population of Consumer Home Economics terminees and the number of returns categorized by OE codes as reported by teachers.

Of the 1973-74 Consumer Home Economics terminees reported by the teachers, the largest number in any OE code was in the occupational title area of Homemaking: Preparation for Personal, Home and Family Living. This represented 74.1% percent of the reported Consumer Home Economics terminees.

TABLE 1

DESCRIPTION OF TOTAL POPULATION AND RETURNS BY OE CODE AREA STUDIED OF 1973-74 CONSUMER HOME ECONOMICS TERMINEES[A]

Basic Information Related to the Consumer Home Economics Education Program

Table 7 reveals whether or not the 1973-74 Consumer Home Economics terminees took another vocational course or courses while enrolled in high school.

There were 1,298 (47.8%) of the reporting 2,714 1973-74 Consumer Home Economics terminees who indicated that they took another vocational course while in high school.

Table 8 shows the other types of vocational course or courses that the terminees indicated they took while in high school.

TABLE 7

WHETHER OR NOT THE 1973-74 CONSUMER HOME MAKING TERMINEES TOOK ANOTHER VOCATIONAL COURSE OR COURSES WHILE IN HIGH SCHOOL

Enrolled in Other Vocational Course(s) While in High School	Number	Percent
Yes	1,298	47.8
No	1,394	51.4
No Response	22	0.8
TOTAL	2,714	100.0

TABLE 8

OTHER VOCATIONAL COURSE OR COURSES THAT THE 1973-74 CONSUMER HOME ECONOMICS TERMINEES INDICATED THEY TOOK WHILE IN HIGH SCHOOL

Type Courses	Number Courses Taken by Terminees[A]	Percent of Courses Taken by Total Terminees[B]
Agribusiness Education	77	2.8
Business and Office Education	809	29.8
Distributive Education	81	3.0
Health Occupations Education	89	3.3
Occupational Home Economics	215	7.9
Trade and Industrial Education	76	2.8
TOTAL COURSES TAKEN[C]	1,347	49.6

[A]Some terminees may have taken more than one additional vocational course. There were 1,192 (43.9%) of the 2,714 total responding terminees who took one additional vocational course. Fifty-eight (2.1%) terminees took two additional vocational courses while 13 (0.5%) terminees took three vocational program.

[B]The percentages were based on the total 2,714 terminees who responded to the survey.

[C]There were 35 terminees who stated that they took an additional course or courses and gave no indication as to what those courses were.

There were 1,192 (43.9%) of the 2,714 total responding terminees who took one additional vocational course while still in high school. Fifty-eight (2.1%) terminees took two additional vocational courses, while 13 (0.5%) terminees took three vocational programs.

Eight hundred nine (29.8%) of all responding 1973-74 Consumer Home Economics terminees indicated they took Business and Office Education while in high school. Also, 215 (7.9%) terminees indicated they took Occupational Home Economics while in high school. It was interesting to note that 46.5 percent of the 1973-74 Consumer Home Economics terminees took another vocational course or courses while in high school.

Table 9 indicates, according to the 1973-74 Consumer Home Economics terminees, the primary source of influence in selecting their Consumer Home Economics program.

Students themselves appeared to be the greatest influence on the Consumer Home Economics terminees enrolling in the Consumer Home Economics program. Eighteen hundred forty (67.8%) of the responding terminees indicated that they made the choice themselves in selecting their Consumer Home Economics course. Two hundred twenty-three (8.2%) terminees revealed that parents or guardian primarily influenced them in selecting their Consumer Home Economics course. Sixty-nine (2.5%) terminees indicated influences other than the categories listed by the researchers as being primary in their selection of their Consumer Home Economics program. (See page 10 for the categorization of "Other" listings as the primary influence on terminee's selection of the Consumer Home Economics program.)

TABLE 9

WHO THE 1973-74 CONSUMER HOME ECONOMICS TERMINEES
FELT INFLUENCED THEM MOST IN SELECTING
THEIR VOCATIONAL COURSE

Group or Individual Terminees Felt Influenced Them Most In Selecting Consumer Home Economics	Number	Percent
Parent(s) or Guardian	223	8.2
Guidance Counselor	53	2.0
Your Home Economics Teacher	177	6.5
Another Teacher or Principal	30	1.1
A Student in the Home Economics Program	178	6.6
A Friend or Relative	120	4.4
A Businessman	1	0.0[B]
Made Choice Yourself	1,840	67.8
Other[A]	69	2.5
No Response	23	0.9
TOTAL	2,714	100.0

[A]See page 10 for listing of "Others" who influenced Consumer Home Economics terminees in selecting their consumer home course.

[B]Less than 0.1 of one percent.

Table 10 lists by frequency count the breakdown of the "Other" category indicated in Table 9 as to the primary source of influence in selecting their Consumer Home Economics course.

TABLE 10

"OTHER" PERSONS OR GROUPS WHO MOST INFLUENCED 1973-74 CONSUMER HOME ECONOMICS TERMINEES IN SELECTING THEIR CONSUMER HOME ECONOMICS COURSE[A]

Other Persons or Groups Who Most Influenced Terminees in Selecting Their Consumer Home Economics Course	Number	Percent of Total Returns
Self Interest	27	1.0
Required course	26	1.0
Relatives	1	*
School curriculum very limited	5	0.2
Only thing available	6	0.2
An easy course	1	*
Because course was important	1	*
The great program	1	*
Office worker	1	*
TOTAL	69	

[A]If percentage less than 0.1%, percentage was not shown.

Twenty-seven (1.0%) terminees indicated that they selected their Consumer Home Economics program because of self interest. Another 26 (1.0%) revealed that it was a required course.

Table 11 reveals, when the terminees were taking their Consumer Home Economics course, how they planned to use it.

TABLE 11

WHEN THE 1973-74 CONSUMER HOME ECONOMICS TERMINEES WERE TAKING THEIR COURSE HOW THEY PLANNED TO USE IT

How Terminees Planned to Use Course	Number	Percent
A. Use the instruction in homemaking	1,491	54.9
B. Major in home economics in college	94	3.5
C. Get a job which utilized home economics knowledge and skills	152	5.6
D. A, B, and C above	20	0.7
E. A and B above	42	1.6
F. A and C above	63	2.3
G. B and C above	14	0.5
H. Was not sure	809	29.8
No Response	29	1.1
TOTAL	2,714	100.0

Of the 2,714 terminees, 1,491 (54.9%) indicated they just planned to utilize the instruction in homemaking. Ninety-four (3.5%) revealed that they planned to utilize the course to major in home economics in college. There were 152 (5.6%) terminees who indicated they planned to utilize the course to get a job which utilized home economics knowledge and skills. It was also noted that 809 (29.8%) terminees were not sure how they planned to use their home economics course during the time they were taking it.

Table 12 points out the extent to which the reporting 1973-74 Consumer Home Economics terminees felt their high school Consumer

Home Economics program prepared them for success in their first job. This data was also broken down by how that first full-time job related to their Consumer Home Economics program.

TABLE 12

PERCEPTIONS OF 1973-74 CONSUMER HOME ECONOMICS TERMINEES AS TO THE EXTENT THEIR HIGH SCHOOL CONSUMER HOME ECONOMICS PROGRAM PREPARED THEM FOR SUCCESS IN THEIR FIRST FULL-TIME JOB BY HOW FIRST JOB RELATED TO TRAINING

Extent Consumer Home Economics Training Prepared for Success in First Full-Time Job	Total Reporting		Number Reporting by Relatedness of First Full-Time Job to Training Received					
			Directly Related		Somewhat Related		Not Related	
	No.	%	No.	%	No.	%	No.	%
Excellent	105	8.6	32	33.3	51	11.8	22	3.2
Good	357	29.2	55	57.3	218	50.2	84	12.1
Fair	138	11.3	6	6.3	88	20.3	44	6.4
Poor	40	3.3	1	1.0	17	3.9	22	3.2
Preparation not related to job	582	47.6	2	2.1	60	13.8	520	75.1
TOTALS	1,222	100.0	96	100.0	434	100.0	692	100.0

Terminees in active full-time military service, and students who were attending school full time and had not had a job, were not asked to respond to the question from which Table 12 was prepared. Also, those other terminees who failed to respond to the question items were not shown on the table.

Of the 1,222 terminees responding to these items, 462 (37.8%) indicated "Excellent" to "Well Prepared" for success in their first job as a result of their Consumer Home Economics Program. Five hundred eighty-two (47.6%) terminees indicated that their preparation was not related

to their first job. However, it was also noted that 520 (89.3%) of the 582 terminees who indicated that their preparation was not related to their first job were working in areas not related to their high school Consumer Home Economics program.

It was revealing in that 87 (90.6%) of the 96 terminees who were working in areas directly related to their high school Consumer Home Economics program indicated that they were "Excellent" to "Well Prepared" for success in their first full-time job. Only one terminee working in an area directly related to the Home Economics program indicated that she was "Poorly Prepared" for success in her first full-time job.

Table 13 shows the extent to which the reporting 1973-74 Consumer Home Economics terminees felt their high school Consumer Home Economics program prepared them for success in their present job.

TABLE 13

PERCEPTIONS OF 1973-74 CONSUMER HOME ECONOMICS TERMINEES AS TO THE EXTENT THEIR HIGH SCHOOL CONSUMER HOME ECONOMICS PROGRAM PREPARED THEM FOR SUCCESS IN THEIR PRESENT JOB BY HOW THEIR PRESENT JOB RELATED TO TRAINING

Extent Consumer Home Economics Training Prepared for Success	Total Reporting		Number Reporting by Relatedness of Present Job to Training Received					
			Directly Related		Somewhat Related		Not Related	
	No.	%	No.	%	No.	%	No.	%
Excellent	63	6.1	15	19.7	31	9.0	17	2.8

Preparation not related to job	566	54.8	4	5.3	57	16.4	505	82.8
TOTALS	1,033	100.0	76	100.0	347	100.0	610	100.0

Of the 76 terminees who were presently working in an area directly related to the training they received in their Consumer Home Economics program, 64 (84.2%) pointed out that they were "Excellent" to "Well Prepared" for success in their present job. None of the terminees working in an area directly related to their training indicated that they were "Poorly Prepared" for success in their present job.

Table 14 focuses on the job preparation aspects of the Consumer Home Economics youth club, Future Homemakers of America (FHA). The researchers sought to determine the extent to which the 1973-74 Consumer Home Economics terminees felt that their high school youth club (FHA) aided in preparing them for their present job. Data are also broken down by the relationship of the present job to the training received.

TABLE 14

Extent to Which FHA Helped Prepare Terminees for Present Job	Total Reporting		Total Reporting by Relatedness of Present Job to Consumer Home Economics Training					
			Directly Related		Somewhat Related		Not Related	
	No.	%	No.	%	No.	%	No.	%
Excellent	69	10.3	10	16.1	32	12.8	27	7.5
Well Prepared	236	35.2	27	43.6	103	41.4	106	29.5
Fair	190	28.3	18	29.0	74	29.7	98	27.2
Poorly Prepared	176	26.2	7	11.3	40	16.1	129	35.8
TOTALS	671	100.0	62	100.0	249	100.0	360	100.0

[A]Of the 1,327 terminees who responded to the question, 25 indicated that no club was available and 341 were not members of FHA. There were 290 terminees who indicated they were not employed, therefore, they were not included in table data. Terminees who were in active full-time military service and terminees who had not had a job were not asked to respond to the related survey questions.

Only respondents who had had a job since terminating their high school Consumer Home Economics program were asked to respond to the question reported in Table 14. Students who were in active full-time military service were excluded. Of the 1,327 responding terminees 341 were not members of FHA, while 25 terminees indicated that no FHA club was available.

Three hundred five (45.5%) terminees who participated in FHA indicated they were from "Excellent" to "Well Prepared" for their present job as a result of their FHA club. However, 37 (59.7%) of the terminees who were working in an area directly related to their Consumer Home Economics program reported they were from "Excellent" to "Well Prepared" for their present job as a result of their youth club. Only seven (11.3%) terminees who were working in an area directly related to their Consumer Home Economics training indicated they were "Poorly Prepared" for their present job. Of the 176 (26.2%) terminees who indicated they were "Poorly Prepared" for their present job, 129 (73.3%) were working in areas not related to their Consumer Home Economics training.

Table 15 reports how the 1973-74 Consumer Home Economics terminees rated the quality of teaching by their high school Consumer Home Economics instructors.

Of the 2,714 responding terminees, 2,059 (75.9%) rated the quality of teaching by their Consumer Home Economics teachers from "Good" to "Excellent". Only 160 (5.9%) terminees rated the quality of teaching by their instructors from "Poor" to "Very Poor".

Table 16 illustrates how the 1973-74 Consumer Home Economics terminees rated their high school Consumer Home Economics instructors interest in their class work.

TABLE 15

1973-74 CONSUMER HOME ECONOMICS TERMINEE'S RATINGS OF THE QUALITY OF TEACHING BY THEIR HIGH SCHOOL CONSUMER HOME ECONOMICS INSTRUCTORS

Rating	Number	Percent
Excellent	872	32.1
Good	1,187	43.8
Fair	481	17.7
Poor	95	3.5
Very Poor	65	2.4
No Response	14	0.5
TOTAL	2,714	100.0

TABLE 16

1973-74 CONSUMER HOME ECONOMICS TERMINEES' RATINGS OF THEIR HIGH SCHOOL CONSUMER HOME ECONOMICS INSTRUCTOR'S INTEREST IN THE TERMINEES' CLASS WORK

Rating	Number	Percent
Excellent	1,063	39.1
Good	1,045	38.5
Fair	431	15.9
Poor	106	3.9
Very Poor	48	1.8
No Response	21	0.8
TOTAL	2,714	100.0

Of the 2,714 responding 1973-74 Consumer Home Economics terminees, 2,108 (77.6%) rated their instructor's interest in their class work

from "Good" to "Excellent". However, 154 (5.7%) terminees rated their instructor's interest in their class work from "Poor" to "Very Poor".

Table 17 points out how the 1973-74 Consumer Home Economics terminees subjectively rated the knowledge of their Home Economics teachers. Terminees were asked to base their judgments on their current knowledge of their job and responsibilities. The rating is also shown in the table by a breakdown of how the terminees' present job related to the training they received in their Consumer Home Economics Program.

Terminees who were in active full-time military service, presently unemployed, in school full time, and/or had never had a job were not asked to respond to the questions from which data were drawn for interpretation.

TABLE 17

1973-74 CONSUMER HOME ECONOMICS TERMINEES' RATINGS OF THE KNOWLEDGE THEIR HIGH SCHOOL CONSUMER HOME ECONOMICS TEACHER POSSESSED ABOUT THEIR FIELD OF STUDY BY HOW THE TERMINEES' PRESENT JOB RELATED TO THE TRAINING THEY RECEIVED[A]

Ratings[B]	Total Reporting		Number Reporting By Relatedness of Present Job to Training Received					
			Directly Related		Somewhat Related		Not Related	
	No.	%	No.	%	No.	%	No.	%
Excellent	213	20.8	27	33.7	79	22.0	107	18.3
Good	440	42.9	34	42.5	181	50.3	225	38.4
Fair	232	22.6	16	20.0	84	23.3	132	22.5
Poor	89	8.7	2	2.5	12	3.3	75	12.8
Very Poor	52	5.0	1	1.3	4	1.1	47	8.0
TOTAL	1,026	100.0	80	100.0	360	100.0	586	100.0

[A]Terminees who were in active full-time military service, in school full time, and/or had never had a job were not asked to respond to the questions from which data were drawn for interpretation. Those not presently employed and those not responding to the questions were not included in the table.

[B]Ratings were to be based on terminees' judgment of their current knowledge of their job and responsibilities.

Of the 1,026 responding 1973-74 Consumer Home Economics terminees, 653 (63.7%) rated the knowledge the Consumer Home Economics teacher possessed about their field of study from "Good" to "Excellent". Sixty-one (76.2%) of the 80 terminees who were working in areas directly related to their home economics training rated their teacher's knowledge about their field of study from "Good" to "Excellent". A very favorable point was revealed in that only three (3.8%) terminees working in areas directly related to their training rated their teacher's knowledge of their field of study as "Poor or Very Poor".

Table 18 reveals how the 1973-74 Consumer Home Economics terminees, if they were homemakers, felt the facilities and equipment in their high school Consumer Home Economics program compared with those in their home.

TABLE 18

HOW THE 1973-74 CONSUMER HOME ECONOMICS TERMINEES, IF THEY WERE HOMEMAKERS, FELT THE FACILITIES AND EQUIPMENT IN THEIR CONSUMER HOME ECONOMICS PROGRAM COMPARED WITH THOSE IN THEIR HOME[A]

Comparison Ratings	Number	Percent
Better than those in your home	147	17.4
Similar to those in your home	583	69.0
Not as good as those in your home	115	13.6
TOTAL	845	100.0

[A]Five hundred sixty-nine terminees indicated they were not homemakers. The following terminees were not asked to respond to the question from which data were drawn for interpretation: (1) terminees in active full-time military service and had not had a job since leaving high school; (2) terminees who were in school full time and had never been employed since leaving school; and (3) terminees who had never had a job.

The following terminees were not asked to respond to the question from which the data were drawn for interpretation: (1) terminees in active full-time military service and had not had a job since leaving high school; (2) terminees who were in school full time and had never been employed since leaving school; and (3) terminees who had never had a job. There were 569 terminees who indicated they were not homemakers.

The following indicated how the 1973-74 Consumer Home Economics terminees, if they were homemakers, felt the facilities and equipment in their high school Consumer Home Economics program compared with those in their home: (1) 147 (17.4%) indicated they were better than those in their home (2) 115 (13.6%) indicated they were not as good as those in their home; and (3) 583 (69.0%) reported they were similar to those in their homes.

If the respondent was working in an area related to the training received in her Consumer Home Economics program, she was asked to compare the facilities and equipment in her high school Consumer Home Economics program with those on her present job. Table 19 illustrates how the 1973-74 Consumer Home Economics terminees responded.

Sixty-seven (22.9%) of the 293 responding 1973-74 Consumer Home Economics terminees rated the facilities and equipment in their high school Consumer Home Economics program as better than those on their present job. One hundred sixty-seven (57.0%) terminees rated the facilities and equipment in their home economics program as similar to those on their present job; however, 59 (20.1%) rated the facilities and equipment not as good as those on their present job.

TABLE 19

HOW 1973-74 CONSUMER HOME ECONOMICS TERMINEES WORKING IN AREAS RELATED TO TRAINING COMPARED THE FACILITIES AND EQUIPMENT IN THEIR HIGH SCHOOL CONSUMER HOME ECONOMICS PROGRAM WITH THOSE ON THEIR PRESENT JOB[A]

Comparison Rating	Number	Percent
Better than those on your present job	67	22.9
Similar to those on your present job	167	57.0
Not as good as those on your present job	59	20.1
TOTAL	293	100.0

[A]There were 987 terminees who indicated they were not working in an area related to their Consumer Home Economics training. Therefore, they did not rate the facilities and equipment item.

Table 20 reports terminees opinions as to whether they had adequate job or occupational information and school experiences to make a realistic career choice.

TABLE 20

OPINIONS OF 1973-74 CONSUMER HOME ECONOMICS TERMINEES AS TO WHETHER THEY HAD ADEQUATE JOB OR OCCUPATIONAL INFORMATION AND SCHOOL EXPERIENCES TO MAKE A REALISTIC CAREER CHOICE

Adequate Job or Occupational Information and School Experiences	Number	Percent
Yes	1,768	65.1
No	860	31.7
No Response	86	3.2
TOTAL	2,714	100.0

Of the responding terminees, 1,768 (65.1%) felt they had been given adequate job or occupational information and school experiences to make a realistic career choice. However, 860 (31.7%) of the terminees did not feel they had been provided adequate occupational information to make a realistic career choice.

Table 21 indicates terminees' opinions on choosing the Consumer Home Economics program if they had it all to do over again.

TABLE 21

OPINIONS OF 1973-74 CONSUMER HOME ECONOMICS TERMINEES REGARDING CHOOSING THEIR CONSUMER HOME ECONOMICS PROGRAM AGAIN

Question: If you had it all to do over again, which would you choose?	Number	Percent
Take the same home economics program	1,794	66.1
Not take a home economics program	219	8.1
Choose home economics and another vocational course	555	20.4
Choose another vocational program in your school[A]	56	2.1
Choose another vocational program if it had been offered in your school[B]	90	3.3
TOTAL	2,714	100.0

[A]See page 23 for listing of vocational courses terminees would take in their school, if the terminee had it to do over again.

[B]See page 22 for listing of vocational courses terminees would have taken if it had been offered in their school.

Of the 2,714 responding 1973-74 Consumer Home Economics terminees, 1,794 (66.1%) indicated they would select the same Consumer Home Economics program if they had it all to do over again. Only 219 (8.1%) terminees indicated they would not take home economics. Fifty-six (2.1%) terminees reported they would have taken another vocational program in

their school while 555 (20.4%) indicated they would have taken home economics and a vocational course. Ninety (3.3%) terminees revealed that if they had it all to do over, they would choose a vocational program if it had been offered in their school.

The following is a listing by categories of the type vocational program the terminees indicated they would have taken if they had been offered in their school:

Vocational Program Listing That Terminees Would Have Taken If They Had Been Offered in their School	Number
Agriculture for girls	5
Arts or Crafts	6
Auto Body Repair	6
Business Courses or Business Education	16
Computer Technology or Keypunch	4
Cosmetology	5
Distributive Education	5

V.I.C.A.	1

Basic Employment and Homemaking Information

The following section of this report offers information relative to homemaking, employment, and job characteristics of the 1973-74 secondary Consumer Home Economics terminees.

Table 22 illustrates the number of full-time jobs the responding 1973-74 Consumer Home Economics terminees have had since leaving their high school Consumer Home Economics course.

There were 1,111 (41.0%) of the 2,714 responding terminees who reported having full-time jobs since leaving their high school Consumer Home Economics program. There were 854 (31.5%) terminees who had had one full-time job, 214 (7.9%) had had two, 33 (1.2%) had had three, eight (0.3%) had had four, and three (0.1%) had had five or more. Of the responding terminees, 1,603 (59.0%) did not report having a previous full-time job or failed to respond to the related question.

TABLE 22

NUMBER OF FULL-TIME JOBS HELD BY THE 1973-74 CONSUMER HOME ECONOMICS TERMINEES SINCE LEAVING THEIR HIGH SCHOOL CONSUMER HOME ECONOMICS PROGRAM[A]

Full-Time Jobs Held	Number	Percent
One	854	31.5
Two	214	7.9
Three	33	1.2
Four	8	0.3
Five or more	3	0.1
TOTAL	1,111	41.0

[A]There were 2,714 terminees who returned questionnaires and all percentages were figured based on the total returns.

Table 23 reveals the first-job employment status of Consumer Home Economics terminees who returned the survey by the relatedness of their Consumer Home Economics training to their first job.

TABLE 23

FIRST JOB EMPLOYMENT STATUS OF CONSUMER HOME ECONOMICS TERMINEES (1973-74) BY RELATEDNESS OF CONSUMER HOME ECONOMICS TRAINING TO FIRST JOB[A]

First Job After Leaving High School Consumer Home Economics Program	Total Reporting		Relatedness of Consumer Home Economics Training to First Job[B]					
			Directly Related		Somewhat Related		Not Related	
	No.	%	No.	%	No.	%	No.	%
Full-Time	826	30.4	77	2.8	310	11.4	439	16.2
Part-Time	399	14.7	19	0.7	132	4.9	248	9.1
TOTAL	1,225	45.1	96	3.5	442	16.3	687	25.3

[A]All percentages were based on the 2,714 (30.1%) of the 9,006 terminees who returned the survey form.
[B]The terminees made the judgment as to how their first job was related to the training received in their high school vocational program.

Of the 2,714 responding 1973-74 Consumer Home Economics terminees, 826 (30.4%) were employed full time in their first job after leaving their high school Consumer Home Economics program. Three hundred ninety-nine (14.7%) terminees' first jobs were on a part-time basis.

Ninety-six (3.5%) of the 2,714 responding terminees' first jobs (full time or part time) were in areas directly related to the training they received in their high school Consumer Home Economics course. Four hundred forty-two (16.3%) were employed in an area somewhat related while 687 (25.3%) were employed in a first job which was not related to the training they received. The terminees made the judgment as to how their first job was related to the training they received in their Consumer Home Economics program.

Table 24 shows by OE Code for the first job of the 1973-74 Consumer Home Economics terminees by the relatedness of their training to that first job.

Of the 1,265 responding 1973-74 Consumer Home Economics terminees who indicated how their first job related to the training they received in their Consumer Home Economics program, 100 (7.9%) were employed in directly related areas. Four hundred fifty (35.6%) were employed in somewhat related areas, while 715 (56.5%) terminees were employed in areas not related to their training. The terminees made the judgment as to how their first job was related to the training received in their high school Consumer Home Economics program.

More responding terminees who studied in Homemaking: Preparation for Personal, Home and Family Living (OE Code 9.0100) indicated first job employment. This was to be expected since more terminees studied in this occupational objective area (See Table 1). Of the 859 employed 1973-74 terminees in the occupational objective area of "Homemaking: Preparation for Personal, Home and Family Living" OE Code 9.0100),

66 (7.7%) were employed in an area directly related to that training.

TABLE 24

1973-74 CONSUMER HOME ECONOMICS TERMINEES' FIRST JOB BY OE CODE AREA STUDIED AND RELATEDNESS OF TRAINING[A]

OE Code	Title of Occupational Objective Studied	Total Employed by Area Studied		Relatedness of Training to First Job[B]					
				Directly Related		Somewhat Related		Not Related	
		No.	%	No.	%	No.	%	No.	%
9.0100	Homemaking: Preparation for Personal, Home and Family Living	859	67.9	66	7.7	307	35.7	486	56.6

9.0108	Home Management	1	0.1	0	0.0	1	100.0	0	0.0
9.0199	Homemaking, Other	161	12.7	16	9.9	62	38.5	83	51.6
9.0201	Care and Guidance of Children	1	0.1	0	0.0	0	0.0	1	100.0
	TOTAL ALL AREAS	1,265	100.0	100	7.9	450	35.6	715	56.5

[A]All percentages were based on the 2,714 (30.1%) of the 9,006 terminees who returned the survey form.

[B]The terminees made the judgment as to how their first job was related to the training received in their high school vocational program.

Three hundred seven (35.7%) were employed in their first job in an area somewhat related to their training. Four hundred eighty-six (56.6%) of these responding terminees indicated that their first job was not related to the training they received in their Consumer Home Economics program.

Table 25 illustrates the homemaking and/or current employment status of the responding terminees by the relatedness of their Consumer Home Economics training to their present jobs. All percentages figured in the table were based on the 2,714 (30.1%) returns from 9,006 Consumer Home Economics terminees.

Of the 2,714 responding 1973-74 Consumer Home Economics terminees, 622 (22.9%) were presently employed full time. Two hundred fifty-two (9.3%) were gainfully employed part time and attending school. Three hundred fifty-six (13.1%) indicated they were unavailable for gainful employment (See Table 26 for reasons terminees gave for being unavailable for gainful employment). Only 91 (3.4%) terminees noted that they were unemployed because they were solely homemakers. There were 444 (16.4%) terminees who indicated they were unemployed and actively seeking a job.

The "No Response" category included four groups: (1) terminees in active full-time military service and had not had a job since leaving their Consumer Home Economics program; (2) terminees attending school full time and had not had a job; (3) all other terminees who had not had a job; and (4) those terminees who did not respond to the related questions. The "No Response" category include 937 (34.5%) terminees.

Based on the total percentages of returns, 57 (2.1%) were gainfully employed full time in an area directly related to their Consumer Home Economics training, 193 (7.1%) were gainfully employed full time in an area somewhat related, while 323 (11.9%) were gainfully employed full time in an area not related. There were 49 (1.8%) terminees who were gainfully employed full time and did not indicate how their job was related to their training.

TABLE 23

CURRENT EMPLOYMENT STATUS OF 1973-74 CONSUMER HOME ECONOMICS TERMINEES BY RELATEDNESS OF TRAINING TO PRESENT JOB[A]

Employment Status	Total Responding		Relatedness of Training to Present Job[B]							
			Directly Related		Somewhat Related		Not Related		No. Response	
	No.	%	No.	%	No.	%	No.	%	No.	%
Employed full time, not attending school	562	20.7	54	2.0	181	6.7	288	10.6	39	1.4
Employed full time, and attending school	60	2.2	3	0.1	12	0.4	35	1.3	10	0.4
Employed part time, seeking full time job	62	2.3	4	0.1	18	0.7	32	1.2	8	0.3
Employed part time, not seeking full time job	41	1.5	2	+	16	0.6	21	0.8	2	+
Employed part time and attending school	252	9.3	4	0.1	72	2.6	165	6.1	11	0.4
Unemployed (actively seeking a job but have not found one)	444	16.4	N/A		N/A		N/A		N/A	
Unavailable for employment[C]	356	13.1	N/A		N/A		N/A		N/A	
No Response[D]	937	34.5	N/A		N/A		N/A		N/A	
TOTAL	2714	100.0	76	2.5	361	11.0	626	19.9	70	2.6

[A]All percentages were based on the 2,714 (30.1%) respondents of the total 9,006 terminees. Some percentages may be off due to rounding. If percentages were less than 0.1 percent, they were not shown.

[B]The terminees made the judgment as to how their present job was related to the training they received in their Consumer Home Economics program.

[C]See Table 26 for the listing of the reasons Consumer Home Economics terminees gave for being unavailable for employment.

[D]The "No Response" category includes terminees who made no response to the related questions as well as those terminees who were in active full-time military service and had not had a job since leaving their Consumer Home Economics program, terminees attending school full time and had not had a job, and all other terminees who had never had a job.

+ Less than 0.1 of one percent.

Considering the total employment pattern of the 1973-74 Consumer Home Economics terminees, 76 (2.5%) terminees were employed in some manner in directly related areas, 361 (11.0%) were employed in somewhat related areas, and 70 (2.6%) gave no indication as to how their current employment related to the training they received. Four hundred forty-four (16.4%) terminees indicated they were unemployed, actively seeking a job.

Table 26 reports reasons given by the 1973-74 Consumer Home Economics terminees for being unavailable for employment.

TABLE 26

REASONS INDICATED BY 1973-74 SECONDARY CONSUMER HOME ECONOMICS TERMINEES FOR BEING UNAVAILABLE FOR EMPLOYMENT

Reasons	Number	Percent
In school full time	234	50.3
Not working, not interested in a job	24	1.2
Homemaker	91	19.6
Pregnancy	52	11.2
Illness or disability	7	1.5
Other	57	12.3
TOTAL[A]	465	100.0

[A]This total does not correspond with appropriate totals in Table 25. Some terminees who answered other than unavailable for employment also responded to this question category and all responses were reported as indicated.

There were 234 (50.3%) of the 465 terminees who indicated they were unavailable for employment because they were in school full time.

Table 27 shows for the present job, by OE code area studied, the number of 1973-74 secondary Consumer Home Economics terminees employed

by the relatedness of their Consumer Home Economics training to their present job.

TABLE 27

EMPLOYED 1973-74 CONSUMER HOME ECONOMICS TERMINEES BY OE CODE AREA STUDIED AND BY RELATEDNESS OF TRAINING TO PRESENT JOB

TOTAL ALL AREAS		1,086	40.0	80	7.4	368	33.9	638	58.7

[A]Percentage of this column is based on the 2,714 (30.1%) respondents of the 9,006 terminees surveyed.

[B]Terminees made the judgment as to how their present job related to training they received in their Consumer Home Economics program.

[C]Percentages in related columns are based on total employed by area studied.

+ Less than 0.1 of one percent.

Of the 2,714 1973-74 Consumer Home Economics terminees who returned survey forms, 741 (27.3%) who studied in Homemaking: Preparation for Personal, Home and Family Living (OE Code 9.0100) indicated having employment. This was the largest OE Code group indicating employment; however, this was to be expected since more terminees studied in this area than any other area.

Of the 741 employed terminees who studied in Homemaking: Preparation, Home and Family Living (OE Code 9.0100) 54 (7.3%) were working in a directly related area, 249 (33.6%) were working in a somewhat related area, while 438 (59.1%) were working in non-related areas. The terminees made the judgment as to how their job related to the training they received in their Consumer Home Economics program.

A list of the job titles, as indicated by the terminees, for the first job and present job of the 1973-74 Consumer Home Economics terminees is included in the appendix. The listing is according to the OE Code area in which the teacher indicated the terminee studied. The jobs are coded according to the relatedness of Consumer Home Economics training to both the present and first jobs. The terminees made the judgment regarding the relatedness of their Consumer Home Economics training to these present jobs. The current employment status and the number of full-time jobs held since completing the high school Consumer Home Economics course is also included.

Table 28 indicates, by OE Code area studied, the area most closely related to the 1973-74 Consumer Home Economics terminees present job.

Of the 1,251 1973-74 Consumer Home Economics terminees who indicated areas most closely related to their present job, the following

TABLE 28

[A]Of 9,006 terminees, 2,714 (30.1%) returned survey forms.
[B]Percentage is based on the 1,251 terminees indicating employment.
[C]Percentages were based on the total terminees in each individual OE Code area where they studied.
[D]Advise or counseling for children.
[E]Advise persons on selection of brands, materials, use of money, etc.
[F]Household aide, housing management aide, waitress, laundress, general maid, etc.

were noted: (1) 389 (31.1%) indicated Clothing and Textiles; (2) 138 (11.0%) indicated Foods and Nutrition; (3) 30 (2.4%) indicated Housing and Home Furnishings; (4) 63 (5.1%) indicated Child Development (advise or counseling for children); (5) 59 (4.7%) indicated Consumer Education (advise persons on selection of brands, materials, use of money, etc.); (6) 55 (4.4%) indicated Home Management (household aide, housing management aide, waitress, laundress, general maid, etc.) and (7) 517 (41.3%) indicated Other areas.

Table 29 indicates the first job salary ranges compared to the present job salary ranges for 1973-74 Consumer Home Economics terminees.

TABLE 29

FIRST JOB SALARY RANGES AND PRESENT JOB SALARY RANGES PER MONTH FOR 1973-74 CONSUMER HOME ECONOMICS TERMINEES[A]

Salary Ranges	First Job		Present Job	
	No.	%	No.	%
Under $250	693	57.1	381	47.3
$250 - $299	196	16.1	124	15.4
$300 - $349	165	13.6	113	14.0
$350 - $399	76	6.2	84	10.4
$400 - $449	47	3.9	52	6.5
$450 - $499	18	1.5	24	3.0
$500 - $599	15	1.2	15	1.9
$600 - $699	2	0.2	7	0.9
$700 or more	2	0.2	5	0.6
TOTAL	1,214	100.0	805	100.0

[A]Overtime not included

Of the 1,171 terminees reporting a salary range for their first job, 693 (57.1%) indicated a range of under $250 per month. Only two (0.2%) terminees reported a salary range for their first job of over $700 per month.

Of the 805 1973-74 Consumer Home Economics terminees reporting salary ranges for their present job, 381 (47.3%) terminees reported making $250 or less. Five (0.6%) terminees reported making $700 or more.

Continuing Education Information

The following section of this report presents information relative to the continuing education of the 1973-74 secondary Consumer Home Economics terminees.

Table 30 shows the vocational educational training opportunities terminees have participated in since leaving their high school vocational program.

Of the enrollment in additional vocational programs, junior colleges with an enrollment of 424 (30.7%) represented the largest training area. Four-year colleges and universities were indicated as the second largest training area with an enrollment of 292 (21.2%) closely followed by on-job-training (employed sponsored program) with an enrollment of 270 (19.6%) terminees

TABLE 30

ADDITIONAL VOCATIONAL EDUCATIONAL TRAINING 1973-74 SECONDARY CONSUMER HOME ECONOMICS TERMINEES PARTICIPATED IN SINCE LEAVING THEIR HIGH SCHOOL VOCATIONAL PROGRAM[A]

Type Training	Number	Percent
On-the-job training (employer-sponsored program)	270	19.6
Public school adult vocational program	42	3.0
Private vocational school program	19	1.4
University or four-year college	292	21.2
Junior college	424	30.7
Post-secondary vocational-technical institute (trade school)	168	12.2
Apprenticeship training program	13	0.9
Specialized occupational military training	15	1.1
Other[B]	136	9.9
TOTAL[C]	1,379	100.0

[A]Of the 2,714 responding terminees, 1,479 (54.5%) gave no indication of being involved in additional vocational training. Of the 2,714 terminees 1,103 (40.6%) took part in one additional vocational training opportunity since leaving their high school program. One hundred twenty (4.4%) took part in two, and 12 (0.4%) took part in three additional training opportunities.

[B]See page 36 for the "Other" listing as specified by the terminees.

[C]The total indicated the number of different training programs in which terminees enrolled. As footnoted above, several terminees had enrolled in more than one training program.

Of the 2,714 responding terminees, 1,103 (40.6%) had taken part in one additional vocational training program since leaving their high school program. One hundred twenty (4.4%) enrolled in two training programs, 12 (0.4%) enrolled in three vocational training programs, and 1,479 (54.5%) indicated they had not enrolled in any additional vocational training.

The following is a listing of the "Other" (Table 30) vocational education training terminees indicated they had participated in:

"Other" Vocational Training	Number
Other - not specified	24
Aribusiness	1
Business Education	8
Cake Decorating	1

[A]All percentages were based on the 2,714 responding terminees.

[B]See page 39 for listing of "Other" schools or educational institutions terminees were attending.

+ Less than 0.1 of one percent.

Of the 2,714 1973-74 secondary Consumer Home Economics terminees who responded to the survey, 128 (4.7%) were attending a vocational-technical institute, 463 (17.1%) were attending a junior college, 368 (13.6%) were attending a four year college or university, 12 (0.4%) were attending a public school adult vocational program, 30 (1.1%) were attending private business or trade school, 32 (1.2%) were in on-the-job training (employer sponsored) programs and 84 (3.1%) were attending some other type of school or educational program. (See page 38 for the listing of the other types of schools or educational programs students were attending.)

Of the 2,714 Consumer Home Economics terminees responding, 1,117 (41.2%) were continuing their education. One hundred forty-eight (5.4%) of the terminees were continuing their education in a program related to their high school vocational program. Nine hundred sixty-nine (35.7%) of the terminees were attending a program in an area not related to their high school vocational program.

The following is a list of the "Other" category (Table 31) of additional education programs or schools the 1973-74 Consumer Home Economics terminees were presently attending:

"Other" School or Education Program Presently Attending	Terminees Attending

Another interesting observation revealed from the data was that of 2,714 responding Consumer Home Economics terminees, 262 (9.7%) indicated that when they were taking their home economics course in high school they planned to major in home economics in college. One hundred thirty-five (51.5%) of the 262 terminees indicated they were presently attending an educational program or school. Twelve (4.6%) are enrolled in a vocational-technical institute, 43 (16.4%) are in a junior college, 69 (26.3%) are attending a four year college or university, two (0.8%) are in private business or trade school, while nine (3.4%) have listed "Other".

Job Placement Information

The following section of this report presents information concerning job placement of the 1973-74 secondary Consumer Home Economics terminees.

Table 32 points out whether the 1973-74 Consumer Home Economics terminees were seeking full-time employment when they left their high school vocational program and whether their Consumer Home Economics teacher attempted to help them get a job.

Of the 782 responding 1973-74 Consumer Home Economics terminees indicating they were seeking full-time employment when they left their high school Consumer Home Economics program, 133 (14.1%) indicated that their Consumer Home Economics teacher attempted to help them get a job. However, 811 (85.9%) of the terminees seeking full-time employment indicated that their Consumer Home Economics teacher did not attempt to help them secure employment. It was interesting to note that 1,741 (64.8%) of the reporting

TABLE 32

WHETHER CONSUMER HOME ECONOMICS TEACHERS ATTEMPTED TO HELP 1973-74 CONSUMER HOME ECONOMICS TERMINEES GET A JOB IF SEEKING FULL-TIME EMPLOYMENT UPON LEAVING THE HIGH SCHOOL CONSUMER HOME ECONOMICS PROGRAM[A]

Vocational Teacher Attempted to Get Terminees a Job	Number	Percent
Yes	133	14.1
No	811	85.9
TOTAL	944	100.0

[A]Of the responding terminees, 1,741 (64.8%) indicated they were not seeking full-time employment when they left their high school vocational program.

1973-74 Consumer Home Economics terminees indicated they were not seeking full-time employment when they left their high school Consumer Home Economics program.

Table 33 illustrates how long it took the 1973-74 Consumer Home Economics terminees to get their first full-time job after they left their high school Consumer Home Economics program and began actively seeking full-time employment.

Of the 960 secondary Consumer Home Economics terminees, 325 (33.8%) secured their first full-time job within two weeks after they had left their high school Consumer Home Economics program and began actively seeking full-time employment. However, 219 (22.8%) of the terminees took 13 or more weeks to secure their first full-time job. There were 285 terminees who indicated they already had a job when they left their high school Consumer Home Economics program.

TABLE 33

LENGTH OF TIME IT TOOK THE 1973-74 CONSUMER HOME ECONOMICS TERMINEES TO SECURE FIRST FULL-TIME JOB AFTER LEAVING HIGH SCHOOL CONSUMER HOME ECONOMICS PROGRAM AND BEGINNING ACTIVELY SEEKING FULL-TIME EMPLOYMENT[A]

Time to Secure First Full-Time Job	Number	Percent
0 - 2 weeks	325	33.8
3 - 4 weeks	183	19.1
5 - 8 weeks	135	14.1
9 - 12 weeks	98	10.2
13 or more weeks	219	22.8
TOTAL	960	100.0

[A]Of the responding terminees, 285 indicated they already had ajob when they left their high school vocational program.

Table 34 shows how the 1973-74 secondary Consumer Home Economics terminees indicated they got their first full-time job after leaving their high school Consumer Home Economics program.

Of the 1,056 1973-74 Consumer Home Economics terminees who responded to the survey item, 431 (40.8%) indicated they got their first full-time job after leaving their high school Consumer Home Economics program through a friend or relative. This represented the method that the largest number of Consumer Home Economics terminees utilized to secure their first full-time job. Applications to business and industry were used by 383 (36.3%) terminees to secure employment. Seventy-eight (7.4%) terminees utilized the services of the state (local) employment office in securing their first job after leaving their high school Consumer Home Economics program. Those students who already had a job before leaving their high school Consumer

TABLE 34

HOW THE 1973-74 CONSUMER HOME ECONOMICS TERMINEES INDICATED THEY GOT THEIR FIRST FULL-TIME JOB AFTER LEAVING THEIR HIGH SCHOOL CONSUMER HOME ECONOMICS PROGRAM

How Terminees Secured First Full-Time Job	Number	Percent
Through their home economics teacher	7	0.7
Through their counselor	13	1.2
Through other school teachers of administrators	36	3.4
Through a friend or relative	431	40.8
Through applications to business or industry	383	36.3

Table 35 reveals the indications of the 1973-74 Consumer Home Economics Education terminees as whether, before taking their first job, they looked for employment within daily walking or driving distance of home by how their first job related to their vocational training.

Seven hundred forty-four (80.5%) of the 1973-74 Consumer Home Economics Education terminees who were employed in their first job indicated they sought employment within daily walking or driving distance of home. One hundred eighty (19.5%) terminees indicated before taking their first job, they looked for a job beyond daily walking or driving distance of home.

Of the 80 terminees who were working in a directly related area, only 13 (19.5%) sought employment beyond daily walking or driving distance of home. It is interesting to note that of the 516 terminees whose first jobs did not relate to their training, only 97 of those terminees sought employment beyond daily walking or driving distance of home.

Two hundred thirty-five terminees indicated they had their first job while in high school. Of those 235 terminees, 13 (5.5%) were working in a directly related area, 86 (36.6%) in a somewhat related area, and 136 (57.9%) were working in a non-related area.

TABLE 35

INDICATIONS OF 1973-74 CONSUMER HOME ECONOMICS EDUCATION TERMINEES AS TO WHERE THEY LOOKED FOR THEIR FIRST JOB BEFORE TAKING ONE BY HOW THEIR FIRST JOB RELATED TO THEIR TRAINING[A]

Before Taking First Job, Where Terminees Looked for Job	Total Reporting		Total Reporting by Relatedness of First Job to Vocational Training					
			Directly Related		Somewhat Related		Not Related	
	No.	%	No.	%	No.	%	No.	%
Within daily walking or driving distance of home	744	80.5	67	83.7	258	78.7	419	81.2
Beyond daily walking or driving distance of home[B]	180	19.5	13	16.3	70	21.3	97	18.8
TOTAL	924	100.0	80	100.0	328	100.0	516	100.0

[A]Two hundred ninety-nine terminees indicated they already had their first job while in high school. Of those 235 terminees, 13 (5.5%) were working in a directly related area, 86 (36.6%) in a somewhat related area, while 136 (57.9%) were working in a non-related area.

[B]See listing below for reasons terminees gave for seeking their first job away from home.

The following is a listing of reasons terminees gave for seeking a job beyond daily walking or driving distance of their home before accepting their first job.

Reasons for Seeking Job Beyond Daily Walking or Driving Distance Before Accepting First Job	Number
No job near home	32
More choices (Better Opportunities)	4
Money (Better Pay)	3
To be on my own	1
Employment office	1
Moved	3
Transportation	1
Parents	1
Made no difference	2
Previous summer job	1
Wanted to work there	3

Table 36 reveals the indications of the 1973-74 Consumer Home Economics Education terminees who were working in their first job not related to their training by whether or not they tried to get a job related to their training by where they looked for employment before accepting that first job.

TABLE 36

INDICATIONS OF THE 1973-74 CONSUMER HOME ECONOMICS EDUCATION TERMINEES WORKING IN FIRST JOB NOT RELATED TO THEIR TRAINING BY WHETHER OR NOT THEY TRIED TO GET A JOB RELATED TO THEIR TRAINING BY WHERE THEY LOOKED FOR EMPLOYMENT BEFORE ACCEPTING FIRST JOB[A]

Where Terminees Working in Non-Related Areas Looked for Employment Before Accepting First Job	Total Reporting		Before Accepting This First Job Unrelated to Training Whether Terminees Sought Job in Related Area			
			Yes		No	
	No.	%	No.	%	No.	%
Sought employment within daily walking or driving distance of their home	399	80.3	63	73.3	336	81.8
Sought employment beyond daily walking or driving distance of their home	98	19.7	23	26.7	75	18.2
TOTAL	497	100.0	86	100.0	411	100.0

[A]Totals in this table may not correspond with totals of terminees for non-related categories in other tables for the following reasons: (1) some terminees had jobs when leaving program and did not have to seek employment and (2) some terminees failed to respond to one or more of the related questions from which data was drawn.

[B]See page 47 for the listing of reasons terminees who were working in non-related jobs gave for not trying to secure a job that was related to their training.

It is important to note that of the 497 terminees who were working in a non-related first job, only 23 (4.6%) sought related employment beyond daily walking or driving distance of home before accepting their first job.

Table 37 illustrates the indications of the 1973-74 Consumer Home Economics Education terminees as to where they looked for a job before taking their present job by how their present job is related to their vocational training.

Six hundred fifty-nine (80.0%) of the presently employed 1973-74 Consumer Home Economics Education terminees indicated they sought employment within daily walking or driving distance of home. One hundred sixty-five (20.0%) terminees indicated they sought employment beyond daily walking or driving distance of home.

TABLE 37

INDICATIONS OF 1973-74 CONSUMER HOME ECONOMICS EDUCATION TERMINEES AS TO WHERE THEY LOOKED FOR A JOB BEFORE TAKING THEIR PRESENT JOB BY HOW THEIR PRESENT JOB RELATED TO THEIR TRAINING[A]

Where Terminees Looked for Job Before Taking Present Job	Total Reporting		Total Reporting by Relatedness of Present Job to Vocational Training					
			Directly Related		Somewhat Related		Not Related	
	No.	%	No.	%	No.	%	No.	%
Within daily walking or driving distance of home	659	80.0	48	77.4	219	78.2	392	81.3
Beyond daily walking or driving distance of home[B]	165	20.0	14	22.6	61	21.8	90	18.7
TOTAL	824	100.0	62	100.0	280	100.0	482	100.0

[A]One hundred ninety-nine terminees reported they already had their present job while in high school. Of those 199 terminees, 13 (6.5%) were in a directly related area, 66 (33.2%) in a somewhat related area, while 120 (60.3%) were working in a non-related area.

[B]See listing, page 50, for reasons terminees gave for seeking their present job away from home.

Of the 62 terminees who were working in a directly related area, only 14 (22.6%) sought employment beyond daily walking or driving distance of home.

Of the 482 terminees who were presently working in a non-related area, only 90 (18.7%) sought employment beyond daily walking or driving distance of his home.

One hundred ninety-nine terminees reported they already had their present job while in high school. Of those 199 terminees, 13 (6.5%) were in directly related areas, 66 (33.2%) in somewhat related areas, and 120 (60.3%) were in non-related areas.

The following is a list of reasons terminees gave for seeking a job beyond daily walking or driving distance of their home before accepting their present job. Of the 165 terminees who indicated they sought a job beyond daily walking or driving distance of home before accepting their present job, 115 gave reasons why they sought that job.

Reasons for Seeking Job Beyond Daily Walking or Driving Distance Before Accepting Present Job	Number
No job near home	63
More choices (better opportunities)	18
To be on my own	5
Employment office	1
Money (better pay)	6
Moved	2
Transportation	1
Parents or Relative	4
Made no difference	4
Attend school and work	7
Wanted to work there	4

Table 38 reveals the indications of the 1973-74 Consumer Home Economics Education terminees who were working in their present job not related to their training by whether or not they tried to get a job related to

their training by where they looked for employment before accepting that present job.

TABLE 38

INDICATIONS OF THE 1973-74 CONSUMER HOME ECONOMICS EDUCATION TERMINEES WORKING IN PRESENT JOB NOT RELATED TO THEIR TRAINING BY WHETHER OR NOT THEY TRIED TO GET A JOB RELATED TO THEIR TRAINING BY WHERE THEY LOOKED FOR EMPLOYMENT BEFORE ACCEPTING PRESENT JOB[A]

Before Accepting Present Job Where Terminees Working in Non-Related Areas Looked for Employment	Total Reporting		Before Accepting This Present Job Unrelated To Training Whether or Not Terminees Sought Job in Related Area			
			Yes		No[B]	
	No.	%	No.	%	No.	%
Sought employment within daily walking or driving distance of their home	390	78.9	65	74.7	325	79.9
Sought employment beyond daily walking or driving distance of their home	104	21.1	22	25.3	82	20.1
TOTAL	494	100.0	87	100.0	407	100.0

[A]Totals in this table may not correspond with totals of terminees for non-related categories in other tables for the following reasons: (1) some terminees had jobs when leaving programs and did not have to seek employment and (2) some terminees failed to respond to one or more of the related questions from which data was drawn.

[B]See page 48 for the listing of reasons terminees who were working in non-related jobs gave for not trying to secure a job that was related to their training.

Only 22 (4.4%) of the 494 terminees who were working in a non-related area sought related employment beyond daily walking or driving distance of home before accepting their present job.

APPENDIX

PRESENT JOB AND FIRST JOB TITLES OF THE 1973-74 CONSUMER HOME ECONOMICS TERMINEES

PRESENT JOB AND FIRST JOB TITLES OF THE 1973-74 CONSUMER HOME ECONOMICS OCCUPATIONS TERMINEES

For those terminees who indicated present or first job occupations, this appendix lists the present job title and first job title by their high school vocational training area (OE Codes). The job titles are listed as the terminees reported them. The number of full-time jobs held by these terminees since completing their high school vocational course is listed, current employment status is listed, and whether the student intended to get a job in the area while in the program.

The following code is used to identify the employment status of the terminees:

1. Employed full time, not attending school
2. Employed full time and attending school
3. Employed part time, seeking full-time job
4. Employed part time, not seeking full-time job
5. Employed part time and attending school
6. Unemployed (you are actively seeking a job but have not found a job)
7. Unavailable for employment

The following code is used to identify whether the student intended to get a job in the area while in the program:

1. Use the instruction in homemaking
2. Major in home economics in college
3. Get a job which utilized home economics knowledge and skills
4. Was not sure
5. Use the instruction in homemaking and major in home economics in college
6. Use the instruction in homemaking and get a job which utilized home economics knowledge and skills
7. Major in home economics knowledge and skills
8. Use the instruction in homemaking, major in home economics in college, and get a job which utilized home economics knowledge and skills

The number in parenthesis behind the job titles indicates the relatedness of the high school vocational training to these jobs. The terminees made the judgment as to the relatedness of their training to these jobs. The following code is used to identify this relatedness:

1. Directly related
2. Somewhat related
3. Not related

The total in each occupational title area may not correspond to the total in each OE Code as listed in Table 27. Some of the terminees failed to indicate the title of their employment position. If the first job title was the same as the present job title, the first job title is included under the present job title.

TITLE: MASONRY FOLLOW-UP. FOLLOW-UP OF 1973-74 MASONRY TERMINEES FROM THE SECONDARY SCHOOL VOCATIONAL PROGRAMS OF ALABAMA. RESEARCH AND DEVELOPMENT REPORT NO. 37.

PERSONAL AUTHOR: MORGAN, ALICE S.; DRAKE, JAMES BOB

DESCRIPTOR: *MASONRY; *VOCATIONAL FOLLOWUP; *OCCUPATIONAL SURVEYS; *STATE SURVEYS; *SECONDARY EDUCATION; VOCATIONAL EDUCATION

IDENTIFIER: ALABAMA

EDRS PRICE: MF AND HC AVAILABILITY WILL BE ANNOUNCED IN VOL. 10, NO. 2.

DESCRIPTIVE NOTE: 52P.; RELATED DOCUMENTS VT 103 321 THROUGH VT 103 335 IN THIS ISSUE.

ABSTRACT: THIS REPORT RELATES THE FINDINGS OF A STATEWIDE FOLLOWUP SURVEY OF 1973-74 MASONRY TERMINEES FROM THE SECONDARY SCHOOL VOCATIONAL PROGRAMS IN ALABAMA. QUESTIONNAIRES WERE MAILED TO 345 STUDENT TERMINEES APPROXIMATELY SEVEN TO EIGHT MONTHS AFTER LEAVING SCHOOL. RETURNS WERE RECEIVED FROM 74 (21.5 PERCENT) MASONRY TERMINEES FROM THE INITIAL MAILING AND ONE FOLLOWUP. DATA ARE PRESENTED IN TABLES WITH ACCOMPANYING NARRATIVE SUMMARIES ORGANIZED ACCORDING TO THESE MAJOR SECTIONS: GENERAL INFORMATION ON THE TERMINEES; BASIC INFORMATION RELATED TO THE VOCATIONAL PROGRAM; BASIC EMPLOYMENT INFORMATION; CONTINUING EDUCATION INFORMATION; AND JOB PLACEMENT INFORMATION. PRESENT AND FIRST JOB TITLES OF THE 1973-74 MASONRY TERMINEES ARE APPENDED. (NJ)

For their help in refining the survey instrument, special thanks are due the following state supervisors:

Mrs. Divine Bauer, Health Occupations Education
Miss Evelyn Cotney, Home Economics Education
Mr. H. W. Green, Agribusiness Education
Mr. J. C. Lindley, Trade & Inducstrial Education
Mrs. Anacile Kurth, Distributive Education
Mrs. Sandra Yelverton, Business and Office Education

Appreciation is also extended to the following members of the Occupational Research and Development Unit for their contribution to the study:

Mrs. Bonnie J. Burks, Research Associate
Mr. Paul Davis, Research Associate
Mr. Gary Greenshields, Graduate Research Assistant
Mr. John Gross, Research Associate
Mr. James McMath, Graduate Research Assistant
Miss Flossi Sergen, Secretary
Mr. Ed Williams, Duplicating Operator

FOLLOW-UP OF 1973-74 MASONRY TERMINEES
FROM THE SECONDARY SCHOOL VOCATIONAL
PROGRAMS OF ALABAMA

Alabama continues to support one of the most progressive and comprehensive vocational education programs in the nation. In addition to serving youth and adults by training them for gainful and useful employment, the diversification of vocational course meets a serious job need and contributes to the industrial development in the state.

With the millions of tax dollars being spent on vocational education, it is necessary to attempt to account to the taxpayer and decisionmakers on the results of those expenditures. Terminee student follow-up studies constitute one of the most valuable techniques for assessing vocational education system outcomes.

The Alabama State Department of Education, Division of Vocational Education and Community Colleges, recognizing this important phase of accountability and evaluation, initiated the development of a statewide follow-up system for its vocational education program terminees at the secondary school level. The Division, under the direction of Dr. T. L. Faulkner, State Director, contracted with the Occupational Research and Development Unit at Auburn University to develop and implement the statewide follow-up system for all its secondary vocational terminees in all service areas.

This report relates the findings of the survey instrument mailed to the 1973-74 Masonry terminees from the secondary school vocational programs of Alabama. When the terminees received the quesionnaire, most had been out of school seven to eight months.

General Information

Student rosters with names and addresses of 1973-74 Masonry terminees were received from 40 secondary school vocational teachers in Alabama. Of the 40 teachers from which student rosters were received, 20 were in Secondary Area Vocational Centers (AVC) and 20 were in programs in schools of other settings. The total of 345 student terminees reported to the ORDU were mailed the follow-up forms. Returns were received from 74 (21.5%) of the Masonry terminees from the initial mailing and one follow-up. At least one student questionnaire was received from 31 of the 40 teachers.

All terminees reported in this study were in programs administered only by the Division of Trade and Industrial Education, State Department of Education.

Table 1 presents data relative to the total population of Masonry terminees and the number of returns categorized by type school and termination status.

TABLE 1

DESCRIPTION OF TOTAL POPULATION AND RETURNS OF 1973-74 MASONRY TERMINEES BY TYPE SCHOOL AND TERMINATION STATUS[A]

Type School and Termination Status	Total No. Reported	Number of Returns	Percent of Returns
Area Vocational Centers			
Total	238	54	22.7
Completers[B]	161	43	26.7
Dropouts[C]	77	11	14.3
Other Type Schools			
Total	107	20	18.7
Completers	74	15	20.3
Dropouts	33	5	15.2
Grand Total	345	74	21.5
Completers	235	58	24.7
Dropouts	110	16	14.5

[A]These Masonry terminees were in programs administered only under the service area of Trade and Industrial Education, State Department of Education.

[B]Any terminee who left the program by completing or by high school graduation.

[C]Any terminee the instructor reported as having dropped out of school.

Table 2 illustrates the sex characteristics of those 1973-74 Masonry terminees reported by the instructors and those who returned survey forms.

TABLE 2

SEX OF THE 1973-74 MASONRY TERMINEES REPORTED AND BY WHO RETURNED QUESTIONNAIRES

Sex[A]	Reported		Returns	
	Number	Percent	Number	Percent
Male	331	95.9	72	97.3
Female	0	0	0	0
Not Known	14	4.1	2	2.7
TOTAL	345	100.0	74	100.0

[A]Sex as reported by teacher.

Table 3 presents the racial or ethnic characteristics of those 1973-74 Masonry terminees reported by instructors and who returned survey forms.

TABLE 3

RACIAL OR ETHNIC CHARACTERISTICS OF THE 1973-74 MASONRY TERMINEES REPORTED AND BY WHO RETURNED QUESTIONNAIRES

Racial or Ethnic Group[A]	Reported		Returns	
	Number	Percent	Number	Percent
American Indian	4	1.2	0	0.0
Black	258	74.8	53	71.6
Oriental	0	0.0	0	0.0
Spanish Surnamed American	0	0.0	0	0.0
White	80	23.2	20	27.0
Other	1	0.3	1	1.4
Not Known	2	0.5	0	0.0
TOTAL	345	100.0	74	100.0

[A]Racial or Ethnic Group as reported by teacher.

Table 4 illustrates the number and grade level of the 1973-74 Masonry terminees reported who dropped out of school during the academic year and by who returned the questionnaire.

TABLE 4

NUMBER OF THE 1973-74 MASONRY TERMINEES REPORTED WHO DROPPED OUT OF SCHOOL DURING THE 1973-74 SCHOOL YEAR BY GRADE LEVEL

Grade Level Upon Dropping Out of School	Reported		Returns	
	Number	Percent[A]	Number	Percent[B]
Ninth	7	2.0	0	0.0
Tenth	26	7.5	6	23.1
Eleventh	38	11.0	6	15.8
Twelfth	26	7.5	4	15.4
Grade Level Not Indicated by Teacher	13	3.8	0	0.0
TOTAL	110	31.8	16	14.5

[A]Percentage is based on 345 total reported terminees.
[B]Percentage is based on returns by grade.

Table 5 shows the number of 1973-74 Masonry terminees who indicated whether they were in active full-time military service.

TABLE 5

ACTIVE FULL-TIME MILITARY STATUS OF 1973-74 MASONRY TERMINEES WHO RETURNED QUESTIONNAIRES

Active Full-Time Military Status	Number	Percent
Yes	3	4.1
No	69	93.2
No Response	2	2.7
TOTAL	74	100.0

Basic Information Related to the Vocational Education Program

Table 6 points out the number of 1973-74 Masonry terminees who indicated whether this vocational program was a school requirement.

TABLE 6

1973-74 MASONRY TERMINEES WHO INDICATED WHETHER THEIR VOCATIONAL PROGRAM WAS A SCHOOL REQUIREMENT

Vocational Course Was a School Requirement	Number	Percent
Yes	5	6.8
No	69	93.2
No Response	0	0.0
TOTAL	74	100.0

Table 7 indicates, according to the 1973-74 Masonry terminees, the primary source of influence in selecting their vocational course.

TABLE 7

PRIMARY INFLUENCES ON THE 1973-74 MASONRY TERMINEES IN SELECTING THEIR VOCATIONAL COURSE

Group or Individual Terminees Felt Influenced Them Most in Selecting Vocational Course	Number	Percent
Parent(s) or Guardian(s)	2	2.7
Guidance Counselor	3	4.1
Your Vocational Teacher	7	9.5
Another Teacher or Principal	1	1.3
Student in VED Program	7	9.5
A Friend or Relative	6	8.1
A Businessman	1	1.3
Made Choice Yourself	46	62.2
Other	1	1.3
No Response	0	0.0
TOTAL	74	100.0

The vocational teacher or a student in the VED program appeared to be the greatest outside influences on those terminees enrolling in the masonry program. Seven (9.5%) of the terminees responding indicated that their vocational teacher influenced them most in selecting their masonry course, and seven (9.5%) indicated a VED student influenced them in their selection. However, 46 (62.6%) indicated that they selected their course of study on their own. Only three terminees (4.1%) indicated that a guidance counselor influenced them most in selecting their program.

Table 8 indicates terminees' opinions as to whether they had adequate job or occupational information and school experiences to make as realistic career choice.

TABLE 8

OPINIONS OF 1973-74 MASONRY TERMINEES AS TO WHETHER THEY HAD ADEQUATE JOB OR OCCUPATIONAL INFORMATION AND SCHOOL EXPERIENCES TO MAKE A REALISTIC CAREER CHOICE

Response	Number	Percent
Yes	55	74.3
No	19	25.7
No Response	0	0.0
TOTAL	74	100.0

Table 9 indicates whether, during the time they were taking their high school vocational program, the reporting 1973-74 terminees intended to get a job in Masonry.

TABLE 9

INDICATIONS OF 1973-74 MASONRY TERMINEES AS TO WHETHER, DURING THE TIME THEY WERE TAKING THEIR HIGH SCHOOL VED PROGRAM, THEY PLANNED TO GET A JOB IN THEIR AREA OF STUDY

Intended To Get Job In Area of Study	Number	Percent
Yes	40	54.0
No	5	6.8
Was Not Sure	29	39.2
No Response	0	0.0
TOTAL	74	100.0

It is interesting to note that only 40 (54.0%) of the 1973-74 reporting Masonry terminees indicated that during the time they were taking their Masonry program, they intended to get a job in the area they were studying.

Table 10 indicates terminees' opinions on choosing the Masonry program if they had the selection to make again.

A noteworthy point was revealed by the data. Of the 1973-74 Masonry terminees, 62 (83.8%) indicated that they would select the same vocational program if they had the choice to make again. Only four (5.4%) of the responding terminees indicated that they would not take a vocational program.

TABLE 10

OPINIONS OF 1973-74 MASONRY TERMINEES REGARDING THEIR VOCATIONAL PROGRAM

Question: If You Had It To Do Over Again, Would You...?	Number	Percent
Take the same vocational program	62	83.8
Not take a vocational program	4	5.4
Choose another vocational program offered in your school, such as _____ A	5	6.8
Choose another vocational program if it had been offered in your school, such as _____ B	3	4.0
No Response	0	0.0
TOTAL	74	100.0

[A]See listing IA below for those other vocational programs offered in terminees' school that they would have taken instead of their Masonry programs.

[B]See listing IB below for the vocational programs the terminee would have taken instead of their masonry program if it had been offered in their school.

Listing I-A-- Courses offered in their school that masonry terminees indicated they would have taken if they had it all to do over again.

1. Auto Mechanics
2. Machine Shop
3. VIE
4. Body Work
5. Electricity

Listing I-B-- Courses masonry terminees indicated they would have taken if they had it all to do over again and the course were offered in their school.

1. Mechanics
2. Shoe Repairing
3. Welding II
4. Body & Fender Repair
5. Cement Finishing
6. Blue Print Reading
7. Electrician
8. Auto Chem.
9. Auto Mechanics

Table 11 indicated the extent to which the reporting 1973-74 masonry terminees felt their high school vocational programs prepared them for their first job. This data was also broken down by how that first job related to their vocational program.

Terminees who were in full-time active military service or who had never been employed were not asked to respond to the questions from which this data was reported. Also, the terminees who failed to respond to the question items were not indicated in the table.

TABLE 11

PERCEPTIONS OF 1973-74 MASONRY TERMINEES AS TO THE EXTENT THEIR HIGH SCHOOL VOCATIONAL PROGRAM PREPARED THEM FOR THEIR FIRST FULL-TIME JOB BY HOW FIRST FULL-TIME JOB RELATED TO TRAINING

Extent Vocational Course Prepared for First Full-Time Job	Total Reporting		Number Reporting by Relatedness of First Full-Time Job to Training Received					
			Directly Related		Somewhat Related		Not Related	
	No.	%	No.	%	No.	%	No.	%
Excellent	8	17.0	5	38.5	1	16.7	2	7.1
Well Prepared	14	29.8	6	46.1	3	50.0	5	17.9
Fair	6	12.8	2	15.4	1	16.7	3	10.7
Poorly Prepared	0	0.0	0	0.0	0	0.0	0	0.0
Preparation not related to job	19	40.4	0	0.0	1	16.7	18	64.3
TOTAL	47	100.0	13	100.0	6	100.0	28	100.0

In noting the extent to which the 1973-74 Masonry terminees felt their high school vocational course prepared them for their first full-time job by how their first full-time job related to the training they received in their high school Masonry program, some interesting points were revealed.

Twenty-two (46.8%) of the 1973-74 Masonry terminees responding to this item indicated "Excellent" or "Well Prepared" for their first full-time job as a result of the training received in their high school vocational education program. Eleven (84.6%) of the 13 terminees employed in their first full-time job related directly to their training felt they were excellent or well prepared for this first job. No terminees working in an area directly related to their vocational training felt they was poorly prepared for their first job. Of all the responding terminees, none felt that they were poorly prepared for their first full-time job.

Table 12 indicated the extent to which the reporting 1973-74 Masonry terminees felt their high school vocational course prepared them for their present job. Also shown in the table is a breakdown of the data by how their present job was related to their vocational program.

TABLE 12

PERCEPTIONS OF 1973-74 MASONRY TERMINEES AS TO THE EXTENT THEIR HIGH SCHOOL VOCATIONAL COURSE PREPARED THEM FOR THEIR PRESENT JOB BY HOW THEIR PRESENT JOB RELATED TO TRAINING

Extent Vocational Course Prepared for Present	Total Reporting		Number Reporting by Relatedness of Present Job to Training Received					
			Directly Related		Somewhat Related		Not Related	
	No.	%	No.	%	No.	%	No.	%
Excellent	5	11.9	1	14.3	2	20.0	2	8.0
Well Prepared	14	33.3	5	71.4	3	30.0	6	24.0
Fair[A]	3	7.2	1	14.3	0	0.0	2	8.0
Poorly Prepared	1	2.4	0	0.0	0	0.0	1	4.0
Preparation not related to job	19	45.2	0	0.0	5	50.0	14	56.0
TOTAL	42	100.0	7	100.0	10	100.0	25	100.0

[A]See listing below for reasons terminees specified for only being trained "Fair" by their vocational course for their present job.

Six (85.7%) of the 7 responding terminees working in an area directly related to their high school vocational program indicated that they felt excellent or well prepared by their training.

Terminees who indicated "fair" as the extent their vocational program prepared them for this present job indicated reasons for this. The following lists the reasons the 1973-74 Masonry terminees indicated for being trained only "fair" by their vocational course for their present job.

1. Teacher not interested
2. Not much training
3. Not enough equipment
4. Poor machine operation

The terminees who indicated he was "poorly prepared" for his present job by his vocational program gave no reason why he felt that way.

Table 13 focuses on the Masonry student club. The researchers sought to determine the extent to which the 1973-74 Masonry terminees felt that their high school student club aided in preparing them for their present job. Data are also broken down by the relationship of the present job to the vocational training received.

Only respondents who had had a job since terminating their high school vocational Masonry program were asked to respond to the question reported in Table 13. Students in active full-time military service were excluded. Nine (26.5%) of the 44 terminees reported no related student club was available, while 16 (36.4%) were not members of a related student club.

Thirteen (68.4%) of the 19 terminees who participated in student club activities indicated they were "Excellent" or "Well Prepared" by their related student club for their present job. Three (15.8%) indicated they were "Poorly Prepared" by their related student club for their present job. Of those 3, all 3 were in a non-related job.

TABLE 13

PERCEPTIONS OF 1973-74 MASONRY TERMINEES AS TO THE EXTENT THEIR HIGH SCHOOL VOCATIONAL STUDENT CLUB PREPARED THEM FOR THEIR PRESENT JOB BY HOW THEIR PRESENT JOB RELATED TO TRAINING[A]

Extent High School Vocational Student Club Helped Prepare for Present Job	Total Reporting		Total Reporting by Relatedness of Present Job to Vocational Training					
			Directly Related		Somewhat Related		Not Related	
	No.	%	No.	%	No.	%	No.	%
Excellent	8	42.1	2	50.0	4	66.6	2	22.2
Well Prepared	5	26.3	2	50.0	1	16.7	2	22.2
Fair	3	15.8	0	0.0	1	16.7	2	22.2
Poorly Prepared	3	15.8	0	0.0	0	0.0	3	33.3
TOTAL	19	100.0	4	100.0	6	100.0	9	100.0

[A]Of the 44 who responded, 9 (26.5%) had no related student club available, and 16 (36.4%) were not members of a related student club.

All 4 of the terminees who were working in an area directly related to the training they received in their high school vocational program revealed that they were "Excellent" or "Well Prepared" for their related student club.

Table 14 reports how the 1973-74 Masonry terminees rated the quality of teaching by their high school vocational instructors.

Sixty-seven (90.5%) of the 74 reporting 1973-74 Masonry terminees rated the quality of teaching by their vocational instructor either "Good" or "Excellent." None rated the quality of teaching by their instructors "Poor" or "Very Poor."

TABLE 14

1973-74 MASONRY TERMINEES' RATINGS OF THE QUALITY OF TEACHING BY THEIR HIGH SCHOOL VOCATIONAL INSTRUCTORS

Rating	Number	Percent
Excellent	38	51.3
Good	29	39.2
Fair	6	8.1
Poor	0	0.0
Very Poor	0	0.0
No Response	1	1.4
TOTAL	74	100.0

Table 15 illustrates how the 1973-74 Masonry terminees rated their high school vocational instructor's interest in their class work.

Sixty-five (87.8%) of the 74 reporting 1973-74 Masonry terminees rated the interest exhibited by their high school vocational instructor in their class work as "Good" or "Excellent." Only 2 (2.8%) of the terminees rated the interest their vocational instructors showed in their class work as "Poor" or "Very Poor."

TABLE 15

1973-74 MASONRY TERMINEE'S RATINGS OF THEIR HIGH SCHOOL VOCATIONAL INSTRUCTOR'S INTEREST IN THE STUDENT'S CLASS WORK

Rating	Number	Percent
Excellent	37	50.0
Good	28	37.8
Fair	6	8.1
Poor	1	1.4
Very Poor	1	1.4
No Response	1	1.4
TOTAL	74	100.0

Table 16 points out how the 1973-74 Masonry terminees subjectively rated the knowledge their vocational teachers possessed about their field of study. This rating is also shown in the table by a breakdown of how the terminees' present job related to the training they received in their high school vocational program. Terminees were asked to base their judgments on their current knowledge of their job and responsibilities.

TABLE 16

1973-74 MASONRY TERMINEES' RATINGS OF THE KNOWLEDGE THEIR HIGH SCHOOL VOCATIONAL TEACHER POSSESSED ABOUT THEIR FIELD OF STUDY BY HOW THE TERMINEES' PRESENT JOB RELATED TO THE TRAINING THEY RECEIVED

Ratings[A]	Total Reporting		Number Reporting by Relatedness of Present Job to Training Received					
			Directly Related		Somewhat Related		Not Related	
	No.	%	No.	%	No.	%	No.	%
Excellent	21	48.8	4	57.1	4	40.0	13	50.0
Good	18	41.8	2	28.6	4	40.0	12	46.2
Fair	2	4.7	1	14.3	0	0.0	1	3.8
Poor	2	4.7	0	0.0	2	20.0	0	0.0
Very Poor	0	0.0	0	0.0	0	0.0	0	0.0
TOTAL	43	100.0	7	100.0	10	100.0	26	100.0

[A]Ratings were to be based on terminee's judgment of their current knowledge of their job and responsibilities.

Total responses to this item indicates that 39 (90.6%) of the 43 responding 1973-74 Masonry terminees rated the knowledge their vocational teachers possessed about their field of study either "Good" or "Excellent." For those seven terminees working in an area direclty related to the training

they received, six (85.7%) rated the knowledge their teachers possessed about their field of study as "Good" or "Excellent." A favorable point was revealed in that only two (3.7%) of the terminees rated the knowledge their vocational teachers possessed about their field of study as "Poor", and none as "Very Poor."

If the respondent was working in an area related to his training, he was asked to compare the facilities and equipment in his his high school vocational program with those on his present job. Table 17 illustrates how the 1973-74 Masonry terminees responded.

TABLE 17

HOW 1973-74 MASONRY TERMINEES WORKING IN A RELATED AREA RATED THE FACILITIES AND EQUIPMENT IN THEIR HIGH SCHOOL VOCATIONAL PROGRAM[A]

Rating[B]	Number	Percent
Better than those on present job	3	21.4
Similar to those on present job	9	64.3
Not as good as those on present job	2	14.3
TOTAL	14	100.0

[A]Thirty-seven (72.5%) of the responding 51 terminees indicated that their present job was not related to their vocational training enough to compare facilities and equipment.

[B]Persons who had not had a job since leaving their vocational program, including those in military service and those who attended school, were asked not to respond to questions from which data was drawn. Returns were received from 74 terminees.

Only three (21.4%) of the 14 responding 1973-74 Masonry terminees working in an area related to their training rated the facilities and equipment in his high school vocational program as better than those on his present job. Nine (64.3%) rated the facilities and equipment in

their high school vocational program as similar to those on their present job; however, two (14.3%) rated the facilities and equipment not as good as those on their present job.

Table 18 shows how 1973-74 Masonry terminees, who were in a cooperative work program in school and were now working in an area related to their vocational training, rated the facilities and equipment used in their cooperative work station.

TABLE 18

HOW 1973-74 MASONRY TERMINEES NOW WORKING IN A RELATED AREA, WHOSE VOCATIONAL PROGRAM INCLUDED COOPERATIVE WORK, RATED FACILITIES AND EQUIPMENT USED IN THEIR COOPERATIVE WORK STATION[A]

Rating[B]	Number	Percent
Better than those on present job	3	21.4
Similar to those on present job	7	50.0
Working at same place where cooperative training was done	2	14.3
Not as good as those on present job	2	14.3
TOTAL	14	100.0

[A]Seven (13.7%) of the responding 51 Masonry terminees indicated their vocational program was not a cooperative program. Thirty (58.8%) terminees indicated they were not working in an area related to their cooperative work; therefore, they did not complete this item on the questionnaire.

[B]Persons who had not had a job since leaving their vocational program, including those in military service and those attending school, were asked not to respond to questions from which data was drawn. Returns were received from 7[illegible] terminees.

Only three (2[illegible].4%) of the 14 responding 1973-74 Masonry terminees whose vocational programs had included cooperative work and were now working in an area related to their vocational training, rated the facilities and equipment in his cooperative work station as better than those on his present job. Seven (50.0%) rated the facilities and equipment

in their cooperative training station as similar to those on their present job. Only 2 (14.3%) rated the facilities and equipment in their cooperative work station not as good as those in their present job. An additional 2 (14.3%) indicated they were working at the same establishment where they did their cooperative training.

Basic Employment Information

The following section of this report offers information relative to employment and job characteristics of the 1973-74 secondary Masonry terminees.

Table 19 illustrates the number-of full-time jobs the responding 1973-74 Masonry terminees have had since leaving their high school vocational course.

TABLE 19

NUMBER OF FULL-TIME JOBS HELD BY THE 1973-74 MASONRY TERMINEES SINCE LEAVING THEIR HIGH SCHOOL VOCATIONAL COURSE

Number of Full-Time Jobs Held	Number	Percent[A]
One	31	41.9
Two	16	21.6
Three	4	5.4
Four	0	0.0
Five or more	0	0.0
TOTAL	51	68.9

[A]Percentage is based on the 74 terminees who returned the questionnaire.

There were 31 (41.9%) of the total 74 responding 1973-74 Masonry terminees who had been employed in just one job since leaving their high school vocational program. Twenty (26.0%) of the terminees reported having two or more jobs since leaving their high school vocational course seven to eight months ago.

Table 20 reveals the first-job employment status of Masonry terminees who returned the survey by the relatedness of their vocational training to their first job.

TABLE 20

FIRST-JOB EMPLOYMENT STATUS OF MASONRY TERMINEES (1973-74) BY RELATEDNESS OF VOCATIONAL TRAINING TO FIRST JOB[A]

First Job After Leaving High School Vocational Program	Total Reporting		Relatedness of Vocational Training to First Job[B]					
			Directly Related		Somewhat Related		Not Related[C]	
	No.	%	No.	%	No.	%	No.	%
Full-Time	47	63.5	13	17.6	6	8.1	28	37.8
Part-Time	4	5.4	0	0.0	0	0.0	4	5.4
TOTAL	51	68.9	13	17.6	6	8.1	32	43.2

[A]All percentages were based on the 74 (21.5%) of 345 terminees who returned the survey form.

[B]The terminees made the judgment as to how their first job was related to the training received in their high school vocational program.

[C]See page 20 for reasons terminees who were working in first job unrelated to this vocational training gave for not seeking job that was related before accepting their first job.

Of the 74 responding 1973-74 Masonry terminees, 47 (63.5%) were employed full time in their first job after leaving their high school vocational program. Four terminee's first jobs were on a part-time basis.

Thirteen (17.6%) of the 74 responding terminees' first jobs (full-time or part-time) were in an area directly related to the training they received in their high school vocational course. Six (8.1%) were employed in an area somewhat related while 32 (43.2%) were employed in a first job not related to the training they received. The terminees made the judgment as to how their first job was related to the training they received in their high school vocational program.

Of the 32 terminees who indicated their jobs were not related to their vocational course, 14 (43.8%) terminees indicated that before they

accepted their unrelated job, they tried to get a job that was related to their vocational training. However, 18 (56.2%) of the terminees did not.

The following is a list of reasons given by the terminees who, before taking their first unrelated job indicated they did not seek a job that was related to their vocational training.

Reasons	Number
Wasn't good enough	1
Didn't want one	1
Couldn't find one	1
Needed a job	1
No one needed	1
Job would have been tiresome	1
Didn't look for one	1

Table 21 shows number of returns, type school & termination status for the first job of the 1973-74 Masonry terminees, and the relatedness of their training to this first job.

TABLE 21

NUMBER OF RETURNS BY TYPE SCHOOL AND TERMINATION STATUS FOR 1973-74 MASONRY TERMINEES' FIRST JOB, AND RELATEDNESS OF TRAINING[A]

Type School & Termination Status	No. Returns	Total Employed		Relatedness of Training to First Job[E]

[A]Of 345 Masonry terminees, 74 (21.5%) returned the questionnaire.
[B]Area Vocational Centers.
[C]Any terminee who left the program by completing or by high school graduation.
[D]Any terminee who the instructor reported as having dropped out of school.
[E]The terminees made the judgment as to how their first job was related to the training received in their high school vocational program.

Table 22 illustrates the current employment status of the responding terminees by the relatedness of their vocational training to their present jobs. All percentages figured in the table were based on the 74 (21.5%) returns from the 345 Masonry terminees.

Of the 74 responding 1973-74 secondary Masonry terminees, 35 (47.3%) were presently employed full time and not attending school or employed full time and attending school. None of the terminees were employed part time and attending school, while three (4.0%) were unavailable for employment). (See page 23 for reasons terminees were unavailable for employment). Only 11 (14.9%) of the terminees were unemployed and actively seeking employment, while four (5.4%) were employed part time and seeking full-time employment.

The "No Response" category in Table 22 includes three groups: (1) terminees in active full-time military service; (2) terminees who were in school full time and had never had a job; and (3) terminees who failed to respond to the item on the questionnaire.

Of the 74 secondary respondees, seven (9.4%) were presently employed full time or part time in an area directly related to the training received in their high school vocational course. Nine (12.2%) were employed either part time or full time in an area somewhat related to their training, while 22 (29.7%) were employed in areas not related to training. The terminees made the judgment as to how their present employment was related to the training received in their high school vocational course.

Of the 28 terminees who indicated their present jobs were not related to their vocational course, 15 (53.6%) terminees indicated that before they accepted their unrelated job, they tried to get a job that was related to their vocational training. However, 13 (46.4%) of the terminees did not.

TABLE 22

CURRENT EMPLOYMENT STATUS OF MASONRY TERMINEES (1973-74) BY RELATEDNESS OF TRAINING TO PRESENT JOB[A]

Employment Status	Total Respond-ing		Relatedness of Training to Present Job[B]							
			Directly Related		Somewhat Related		Not Related[E]		Employed No Response

Unavailable for employment[C&D]	3	4.0	N/A		N/A		N/A		N/A	
No Response	21	28.4	N/A		N/A		N/A		N/A	
TOTAL	74	100.0	7	9.4	9	12.2	22	29.7	1	1.4

[A]All percentages were based on the 74 (21.5%) respondents of the total 345 terminees. Terminees in active full-time military service or attending school full-time and had never been employed were included in the "No Response" category.

[B]The terminees made the judgment as to how their present job was related to the training received in their high school vocational program.

[C]The unemployed and unavailable for employment categories do not include persons in the military service and persons who were in school full time and never had a job.

[D]See page 23 for the listing of reasons Masonry terminees gave for being unavailable for employment.

[E]See page 23 for reasons terminees who were working in present job not related to vocational training gave for not seeking related job before accepting present job. Totals for unrelated columns may not correspond because terminees failed to respond to one of the two questions from which data was drawn.

Below is a list of the reasons given by the terminees for being unavailable for employment.

Reason	Number
In school full time	3
Presently not working, not interested in a job	1
Homemaker	0
Pregnancy	0
Illness or disability	0
Other	1

The following is a list of reasons given by the terminees who, before taking their present unrelated job, indicated they did not seek a job that was related to their vocational training.

Reason	Number
Relative found me job	1
Got another job	1
Didn't look for one	3
In yarn business	1
Can't find one	2
Wanted present job	1
Already had job	1
No transportation	1
Wanted traffic management	1
Needed job immediately	1
Don't know	1
Wanted to try something new	1

Table 23 shows for the present job the number of 1973-74 secondary Masonry terminees employed by the relatedness of their vocational training to their present job.

Of the 43 Masonry terminees presently employed, seven (9.5%) were employed in an area directly related to the training received in their high school vocational program, while 26 (35.1%) indicated their present job was not related to their high school vocational training. The terminees made the judgment as to how their present job related to the training received in their high school vocational program.

[A]All percentages were based on the 74 (21.5%) of the 345 terminees who returned the questionnaire.

[B]Area Vocational Centers

[C]Any terminee who left the program by completing or by high school graduation.

[D]Any terminee who the instructor reported as having dropped out of school.

[E]The terminees made the judgment as to how their first job was related to the training received in their high school vocational program.

Table 24 indicates the first job salary ranges as compared to the present job salary ranges for the 1973-74 Masonry terminees.

Of the 53 terminees reporting a salary range for their first job, 16 (30.2%) indicated a range of under $250 per month. Only three (5.7%) reported a first salary of over $500 per month. The median salary range for the first job fell in the range of $300-$349 per month. The mean salary range for the first job fell in the range of $350-$399 per month.

Of the 36 1973-74 Masonry terminees reporting a salary range for their present job, 10 (27.8%) indicated under $250 per month. The median salary

range for the present job fell within the range of $300-$349 per month or less, while the mean salary range was $350-$399. The median and mean salary ranges of present jobs over first jobs indicate very little increase for the reporting Masonry terminees.

TABLE 24

FIRST-JOB SALARY RANGES AND PRESENT-JOB SALARY RANGES FOR 1973-74 MASONRY TERMINEES

Salary Ranges	First Job		Present Job	
	No.	%	No.	%
Under $250	16	60.5	10	27.8
$250-$299	10	18.9	5	13.9
$300-$349	6	11.3	8	22.2
$350-$399	6	11.3	2	5.6
$400-$449	8	15.1	2	5.6
$450-$499	4	7.5	3	8.3
$500-$599	0	0.0	2	5.6
$600-$699	1	1.9	3	8.3
$700 or more	2	3.8	1	2.7
TOTAL	53	100.0	36	100.0

Table 24A indicates the first-job salary ranges by relatedness of training of the Masonry terminees.

Fifteen (31.3%) of the 48 responding terminees were employed at less than $250 per month. Of these 15 terminees, two (13.3%) were employed in a job directly related to their training, one (6.7%) was employed in a job somewhat related to his training, while 12 (80.0%) were employed in jobs not related to their training.

All of the 48 responding terminees were males. Thirteen (27.1%) were employed in jobs directly related to their vocational training, six (12.5%) were employed in jobs somewhat related to their training, while 29 (60.4%) were employed in jobs not related to their training.

TABLE 24A

FIRST-JOB SALARY RANGES BY RELATEDNESS OF TRAINING
OF 1973-74 MASONRY TERMINEES

Salary Ranges	Terminees Responding	Relatedness of Training to First Job[B]		
		Directly Related	Somewhat Related	Not Related
Under $250	15	2	1	12
$250-$299	8	3	0	5
$300-$349	4	0	2	2
$350-$399	6	2	2	2
$400-$449	8	1	1	3
$450-$499	4	1	0	3
$500-$599	0	0	0	0
$600-$699	1	1	0	0
$700 or more	2	0	0	2
TOTAL[A]	48	13	6	29

[A]Totals do not match those of Table 24 because some terminees did not respond to all questions.

[B]The terminees made the judgment as to how their first job was related to the training received in their high school vocational program.

Table 24B indicates the present-job salary ranges by relatedness of training of the Masonry terminees.

Eight (25.8%) of the 31 responding terminees were employed at less than $250 per month. Of these eight terminees, two (25.0%) were employed in a job directly related to their training, two (25.0%) were employed in jobs somewhat related to their training, while four (50.0%) were employed in jobs not related to their training.

All of the 31 responding terminees were males. Seven (22.5%) were employed in jobs directly related to their vocational training, six (19.4%) were employed in jobs somewhat related to their training, while 18 (58.1%) were employed in jobs not related to their training.

TABLE 24B

$600-$699	3	1	1	1
$700 or more	0	0	0	0
TOTAL[A]	31	7	6	18

[A]Totals do not match those of Table 24 because some terminees did not respond to all questions.

[B]The terminees made the judgment as to how their present job was related to the training received in their high school vocational program.

Continuing Education Information

The following section of this report presents information relative to the continuing education of the 1973-74 secondary Masonry terminees.

Table 25 shows the vocational educational training opportunities terminees have participated in since leaving their high school vocational program.

Of the total terminees, the eight (10.8%) who were enrolled in on-the-job training represented the largest area where terminees had taken additional vocational training.

Of the 74 responding terminees, 27 (36.5%) had taken part in one additional vocational training program since leaving their high school program. One (1.4%) enrolled in two training programs, and no terminee had enrolled in three vocational training programs. Forty-six (62.2%) indicated they had not enrolled in any additional vocational training.

TABLE 25

ADDITIONAL VOCATIONAL EDUCATIONAL TRAINING 1973-74
SECONDARY MASONRY TERMINEES PARTICIPATED
IN SINCE LEAVING THEIR HIGH SCHOOL
VOCATIONAL PROGRAM[A]

Type Training	Number	Percent[B]
On-the-job training (employer-sponsored program)	8	10.8
Public school adult vocational program	1	1.4
Private vocational school program	0	0.0
University or four year college	2	2.7
Junior college	2	2.7
Post-secondary vocational-technical institute (trade school)	3	4.1
Apprenticeship training program	7	9.5
Specialized occupational military training	1	1.4
Other[C]	4	5.4
TOTAL[D]	28	38.0

[A]Forty-six (62.2%) of the 74 terminees gave no indication of being involved in additional vocational training. Of the 74 terminees, 27 (36.5%) took part in one additional vocational training opportunity since leaving their high school program. One (1.4%) took part in two and no terminee took part in the three additional training opportunities.

[B]Percentages are based on the 74 (21.5%) respondents of the total terminees who returned questionnaires.

[C]See below the "Other" listing as specified by the terminees.

[D]The total indicated the number of different training programs in which terminees enrolled. As footnoted above, several terminees had enrolled in more than one training program.

The following is a listing of the "Other" (Table 25) vocational education training terminees indicated they had participated in:

"Other" Vocational Training	Number
Wanted to go on to school, but not financially able	1
Working around city	1
Four year college	1
Mason	1

Table 26 points out the additional programs the 1973-74 secondary Masonry terminees were presently attending beyond their high school training by whether these programs were related to their high school vocational program.

Of the 74 1973-74 secondary Masonry terminees who responded to the survey, three (4.1%) were attending an on-the-job training program (employer-sponsored), four (5.4%) were attending a vocational technical institute, four (5.4%) were attending a junior college, two (2.7%) were attending a four year college or university, none were attending a public adult vocational program, two (2.7%) were attending private business or trade school, one (1.4%) was attending an apprenticeship program, and one (1.4%) was attending some other type of school or educational program.

TABLE 26

PROGRAMS PRESENTLY ATTENDED BY THE 1973-74 SECONDARY MASONRY TERMINEES BY WHETHER THESE PROGRAMS WERE RELATED TO THEIR HIGH SCHOOL VOCATIONAL EDUCATION PROGRAM[A]

Programs Attended	Terminees		Program Related to High School VED Program			
			Yes		No	
	No.	%	No.	%	No.	%

TOTAL	16	21.6	6	8.1	10	13.5

[A] All percentages were based on the 74 responding terminees.

Sixteen (21.6%) of the 74 Masonry terminees were presently continuing their education. Six (8.1%) of the terminees were continuing their education in a program related to their high school vocational program. Ten (13.5%) were attending a program in an area not related to their high school vocational program.

Of the 74 responding terminees, 43 (58.1%) indicated they would like further vocational training. The following is a list of the areas in which these terminees desired to study:

Area of Study	Number
Electronics	1
Masonry	20
Auto Mechanics	1
Carpentry	3
AUM	1
Mechanical drawing	1
Welding	1
Truck driver	1
Heavy equipment	1
Accounting	1

Job Placement Information

The following section of this report presents information concerning job placement of the 1973-74 secondary Masonry terminees.

Table 27 points out whether the 1973-74 Masonry terminees were seeking full-time employment when they left their high school vocational program and if their vocational teacher attempted to help them get a job.

Of the 46 responding 1973-74 Masonry terminees indicating they were seeking full-time employment when they left their high school vocational program, 28 (60.9%) indicated that their vocational teacher attempted to help them get a job. However, 18 (39.1%) of the terminees seeking full-time

employment indicated that their vocational teacher did not attempt to help them secure employment. It was interesting to note that 27 (36.5%) of the reporting 1973-74 Masonry terminees indicated that they were not seeking full-time employment when they left their high school vocational program.

TABLE 27

WHETHER VOCATIONAL TEACHER ATTEMPTED TO HELP 1973-74 MASONRY TERMINEES GET A JOB IF SEEKING FULL-TIME EMPLOYMENT UPON LEAVING THE HIGH SCHOOL VOCATIONAL PROGRAM[A]

Vocational Teacher Attempted To Get Terminee A Job	Number	Percent
Yes	28	60.9
No	18	39.1
TOTAL	46	100.0

[A]Twenty-seven (36.5%) of the responding terminees indicated they were not seeking full-time employment when they left their high school vocational program. One (1.4%) of the terminees did not respond to the question.

Table 28 illustrates how long it took the 1973-74 Masonry terminees to get their first full-time job after they left their high school vocational program and began actively seeking full-time employment.

TABLE 28

LENGTH OF TIME IT TOOK THE 1973-74 MASONRY TERMINEES TO SECURE FIRST FULL-TIME JOB AFTER LEAVING HIGH SCHOOL VOCATIONAL PROGRAM AND BEGINNING ACTIVELY SEEKING FULL-TIME EMPLOYMENT[A]

Time to Secure First Full-Time Job	Number	Percent
0 - 2 weeks	14	41.2
3 - 4 weeks	9	26.5
5 - 8 weeks	4	11.8
9 - 12 weeks	3	8.8
13 or more weeks	4	11.7
TOTAL	34	100.0

[A]Twenty-one terminees indicated they already had a job when they left their high school vocational program.

Fourteen (41.2%) of the 34 secondary Masonry terminees secured their first full-time job within two weeks after they left their high school vocational program and began actively seeking full-time employment. However, four (11.7%) of the terminees took 13 or more weeks to secure their first full-time job. There were 21 terminees who indicated they already had a job when they left their high school vocational program.

Table 29 shows how the 1973-74 secondary Masonry terminees indicated they got their first full-time job after leaving their high school vocational program.

TABLE

HOW THE 1973-74 MASONRY TERMINEES INDICATED THEY GOT THEIR FIRST FULL-TIME JOB AFTER LEAVING THEIR HIGH SCHOOL VOCATIONAL PROGRAM

How Terminees Secured First Full-Time Job	Number	Percent
Through your vocational teacher	1	2.8
Through your counselor	1	2.8
Through other school teachers or administrators	0	0.0
Through a friend or relative	18	50.0
Through applications to business or industry	9	25.0
Through state (local) employment office	4	11.1
Through a private employment agency	1	2.8
Through radio, T.V., newspaper, or other news media	0	0.0
Other[A]	2	5.5
TOTAL	36	100.0

[A]See listing on page 33 for the "Other" ways terminees indicated they secured their first full-time job after leaving their high school vocational program.

Of the 36 1973-74 Masonry terminees who responded to the survey item, 18 (50.0%) indicated they got their first full-time job after leaving their high school vocational program through a friend or relative. Nine (25.0%) of the terminees also indicated they got their first full-time job through

applications to business or industry. These represented the two methods that the largest number of Masonry terminees utilized to secure their first full-time job. Only one (2.8%) of the terminees indicated he secured his first job through his vocational teacher. Another student indicated that a counselor got him his first full-time job after leaving his vocational program. Those students who already had a job before leaving their high school vocational program were not shown in Table 29. (See Table 30, page 34)

Only one of the terminees who checked the "Other" category specified the means by how he secured his first full-time job after leaving his high school vocational program. The following list indicates the "Other" means the terminee indicated.

"Other" Means for Securing First Full-Time Job	Number
Looked for one	1

Table 30 shows how the 1973-74 Masonry terminees who were working while in high school taking their vocational program indicated they got that job.

Thirty-five (47.3%) of the 74 reporting 1973-74 Masonry terminees indicated they were working during the time they were in high school taking their vocational program. Of those terminees working while in high school, six (17.1%) got their job through their vocational instructor, 17 (48.6%) through a friend or relative, and four (11.4%) got jobs through applications to business or industry. These three means were the ways most of the terminees secured a job while they were still in high school taking their vocational program.

TABLE 30

HOW THE 1973-74 MASONRY TERMINEES WHO WERE WORKING WHILE IN HIGH SCHOOL TAKING THEIR VOCATIONAL PROGRAM INDICATED THEY GOT THAT JOB[A]

Who or What Helped Terminee Get Job	Number	Percent
Your vocational teacher	6	17.1
Your counselor	0	0.0
Other school teachers or administrators	1	2.9
Friend or relative	17	48.6
Applications to business or industry	4	11.4
State (local) employment office	0	0.0
Private employment agency	0	0.0
Radio, T.V., newspaper, or other news media	0	0.0
Other	7	20.0
TOTAL	35	100.0

[A]Thirty-nine (52.7%) terminees indicated they had no job during the time they were in high school taking their vocational course.

Table 31 reveals the indications of the 1973-74 Masonry terminees as whether, before taking their first job, they looked for employment within daily walking or driving distance of home by how their first job related to their vocational training.

Twenty-seven (75.0%) of the 1973-74 Masonry terminees who were employed in their first job indicated they sought employment within daily walking or driving distance of home. Nine (25.0%) terminees indicated before taking their first job, they looked for a job beyond daily walking or driving distance of home.

Of the seven terminees who were working in a directly related area, four (57.1%) sought employment beyond daily walking or driving distance of home.

TABLE 31

INDICATIONS OF 1973-74 MASONRY TERMINEES AS TO WHERE THEY LOOKED FOR THEIR FIRST JOB BEFORE TAKING ONE BY HOW THEIR FIRST JOB RELATED TO THEIR TRAINING[A]

Before Taking First Job, Where Terminees Looked for Job	Total Reporting		Total Reporting by Relatedness of First Job to Vocational Training					
			Directly Related		Somewhat Related		Not Related	
	No.	%	No.	%	No.	%	No.	%
Within daily walking or driving distance of home	27	75.0	3	42.9	6	100.0	18	78.3
Beyond daily walking or driving distance of home[B]	9	25.0	4	57.1	0	0.0	5	21.7
TOTAL	36	100.0	7	100.0	6	100.0	23	100.0

[A]Twelve terminees indicated they already had their first job while in high school. Of those 12 terminees, six (50.0) were woking in a directly related area, one (8.3%) in a somewhat related area, while five (41.7%) were working in a non-related area.

[B]See listing, page 36, for reasons terminees gave for seeking their first job away from home.

It is interesting to note that of the 23 terminees whose first jobs did not relate to their training, only five (21.7%) of those terminees sought employment beyond daily walking or driving distance of home.

Twelve terminees indicated they had their first job while in high school. Of those 11 terminees, six (50.0%) were working in a directly related area, one (8.3%) in a somewhat related area, and five (41.7%) were working in a non-related area.

The following is a listing of reasons terminees gave for seeking a job beyond daily walking or driving distance of their home before accepting their first job. Of the nine terminees who indicated they sought a job beyond daily walking or driving distance of home before accepting their first job, two gave reasons why they sought that job.

Reasons for Seeking Job Beyond Daily Walking or Driving Distance Before Accepting First Job	Number
Jobs were in town	1
No work at home	1

Table 32 reveals the indications of the 1973-74 Masonry terminees who were working in their first job not related to their training by whether or not they tried to get a job related to their training by where they looked for employment before accepting that first job.

TABLE 32

INDICATIONS OF THE 1973-74 MASONRY TERMINEES WORKING IN FIRST JOB NOT RELATED TO THEIR TRAINING BY WHETHER OR NOT THEY TRIED TO GET A JOB RELATED TO THEIR TRAINING BY WHERE THEY LOOKED FOR EMPLOYMENT BEFORE ACCEPTING FIRST JOB[A]

Where Terminees Working in Non-Related Areas Looked for Employ-	Total Reporting		Before Accepting This First Job Unrelated to Training Whether Terminees Sought Job in Related Area			
			Yes		No[B]	
	No.	%	No.	%	No.	%
Sought employment within daily walking or driving distance of their home	17	77.3	8	61.5	9	100.0
Sought employment beyond daily walking or driving distance of their home	5	22.7	5	38.5	0	0.0
TOTAL	22	100.0	13	100.0	9	100.0

[A]Totals in this table may not correspond with totals of terminees for nonrelated categories in other tables for the following reasons: (1) some terminees had jobs when leaving program and did not have to seek employment and (2) some terminees failed to respond to one or more of the related questions from which data was drawn.

[B]See page 20 for the listing of reasons terminees who were working in non-related jobs gave for not trying to secure a job that was related to their training.

It is important to note that of the 22 terminees who were working in a non-related first job, only five (22.7%) sought related employment beyond daily walking or driving distance of home before accepting his first job.

Table 33 illustrates the indications of the 1973-74 Masonry terminees as to where they looked for a job before taking their present job by how their present job is related to their vocational training.

TABLE 33

INDICATIONS OF 1973-74 MASONRY TERMINEES AS TO WHERE THEY LOOKED FOR A JOB BEFORE TAKING THEIR PRESENT JOB BY HOW THEIR PRESENT JOB RELATED TO THEIR TRAINING[A]

Where Terminees Looked for Job Before Taking Present Job	Total Reporting		Total Reporting by Relatedness of Present Job to Vocational Training					
			Directly Related		Somewhat Related		Not Related	
	No.	%	No.	%	No.	%	No.	%
Within daily walking or driving distance of home	22	71.0	3	75.0	4	80.0	15	68.2
Beyond daily walking or driving distance of home[B]	9	29.0	1	25.0	1	20.0	7	31.8
TOTAL	31	100.0	4	100.0	5	100.0	22	100.0

[A]Ten terminees reported they already had their present job while in high school. Of those ten terminees, three (30.0%) were in a directly related area, 4 (40.0) in a somewhat related area, while three (30.0%) were working in a non-related area.

[B]See listing, page 38 for reasons terminees gave for seeking their present job away from home.

Twenty-two (71.0%) of the presently employed 1973-74 Masonry terminees indicated they sought employment within daily walking or driving distance of home. Nine (29.0%) terminees indicated they sought employment beyond daily walking or driving distance of home.

Of the four terminees who were working in a directly related area, only one (25.0%) sought employment beyond daily walking or driving distance of home.

Of the 22 terminees who were presently working in a non-related area, only seven (31.8%) sought employment beyond daily walking or driving distance of his home.

Ten terminees reported they already had their present job while in high school. Of those ten terminees, three (30.0%) were in directly related areas, four (40.0%) in somewhat related areas, and three (30.0%) were in non-related areas.

The following is a list of reasons terminees gave for seeking a job beyond daily walking or driving distance of their home before accepting their present job. Of the nine terminees who indicated they sought a job beyond daily walking or driving distance of home before accepting their present job, several gave reasons why they sought that job.

Reasons for Seeking Job Beyond Daily Walking or Driving Distance Before Accepting Present Job	Number
None at home	1
Needed a job	2
Better job	1
Wanted to leave home	1

Table 34 reveals the indications of the 1973-74 Masonry terminees who were working in their present job not related to their training by whether or not they tried to get a job related to their training by where they looked for employment before accepting that present job.

Only eight (33.3%) of the 24 terminees who were working in a non-related area sought related employment beyond daily walking or driving distance of home before accepting his present job.

TABLE 34

INDICATIONS OF THE 1973-74 MASONRY TERMINEES WORKING IN PRESENT JOB NOT RELATED TO THEIR TRAINING BY WHETHER OR NOT THEY TRIED TO GET A JOB RELATED TO THEIR TRAINING BY WHERE THEY LOOKED FOR EMPLOYMENT BEFORE ACCEPTING PRESENT JOB[A]

			Yes		No[B]	
	No.	%	No.	%	No.	%
Sought employment within daily walking or driving distance of their home	16	66.7	5	38.5	11	100.0
Sought employment beyond daily walking or driving distance of their home	8	33.3	8	61.5	0	0.0
TOTAL	24	100.0	13	100.0	11	100.0

[A]Totals in this table may not correspond with totals of terminees for non-related categories in other tables for the following reasons: (1) some terminees had jobs when leaving programs and did not have to seek employment and (2) some terminees failed to respond to one or more of the related questions from which data was drawn.

[B]See page 23 for the listing of reasons terminees who were working in non-related jobs gave for not trying to secure a job that was related to their training.

APPENDIX

PRESENT JOB AND FIRST JOB TITLES OF THE 1973-74
MASONRY TERMINEES

PRESENT JOB AND FIRST JOB TITLES OF THE 1973-74 MASONRY TERMINEES

For those terminees who indicated present or first job occupations, this appendix lists the present job title and first job title. The job titles are listed as the terminees reported them. The number of full-time jobs held by these terminees since completing their high school vocational course is listed, current employment status is listed, and whether the student intended to get a job in the area while in the program.

The following code is used to identify the employment status of the terminees:

0. Unemployed, but seeking employment
1. Employed full time
2. Employed part time, seeking full-time job
3. Employed part time, not seeking full-time job
4. Employed full time and attending school
5. Employed part time and attending school
6. Unavailable for employment

The following code is used to identify whether the student intended to get a job in the area while in the program:

1. No
2. Was not sure
3. Yes

The number in parenthesis behind the job titles indicates the relatedness of the high school vocational training to these jobs. The terminees made the judgment as to the relatedness of their training to these jobs. The following code is used to identify this relatedness:

1. Directly related
2. Somewhat related
3. Not related

The total does not correspond to the total reporting, since some of the terminees failed to indicate the title of their present position. If the first job title was the same as the present job title, the first job title is included under the present job title.

OE Code 17.1004 - Masonry

No.	Employment Status	Full-Time Jobs Held Since High School Voc. Course	Intent of Employment in Area	Present Job	First Job

TITLE: DRAFTING FOLLOW-UP. FOLLOW-UP OF 1973-74 DRAFTING TERMINEES FROM THE SECONDARY SCHOOL VOCATIONAL PROGRAMS OF ALABAMA. RESEARCH AND DEVELOPMENT REPORT NO. 38.

PERSONAL AUTHOR: BURKS, BONNIE J.; DRAKE, JAMES BOB

DESCRIPTOR: *VOCATIONAL FOLLOWUP; *OCCUPATIONAL SURVEYS; *DRAFTING; *STATE SURVEYS; *SECONDARY EDUCATION; VOCATIONAL EDUCATION

IDENTIFIER: ALABAMA

EDRS PRICE: MF AND HC AVAILABILITY WILL BE ANNOUNCED IN VOL. 10, NO. 2.

DESCRIPTIVE NOTE: 57P.; RELATED DOCUMENTS VT 103 321 THROUGH VT 103 335 IN THIS ISSUE.

ABSTRACT: THIS REPORT RELATES THE FINDINGS OF A STATEWIDE FOLLOWUP SURVEY OF 1973-74 DRAFTING TERMINEES FROM THE SECONDARY SCHOOL VOCATIONAL PROGRAMS IN ALABAMA. QUESTIONNAIRES WERE MAILED TO 422 STUDENT TERMINEES APPROXIMATELY SEVEN TO EIGHT MONTHS AFTER LEAVING SCHOOL. RETURNS WERE RECEIVED FROM 149 (35.3 PERCENT) DRAFTING TERMINEES FROM THE INITIAL MAILING AND ONE FOLLOWUP. DATA ARE PRESENTED IN TABLES WITH ACCOMPANYING NARRATIVE SUMMARIES ORGANIZED ACCORDING TO THESE MAJOR SECTIONS: GENERAL INFORMATION ON THE TERMINEES; BASIC INFORMATION RELATED TO THE VOCATIONAL PROGRAM; BASIC EMPLOYMENT INFORMATION; CONTINUING EDUCATION INFORMATION; AND JOB PLACEMENT INFORMATION. PRESENT AND FIRST JOB TITLES OF THE 1973-74 DRAFTING TERMINEES ARE APPENDED. (NJ)

Dr. James Bob Drake, Director

Occupational Research and Development Unit
Department of Vocational and Adult Education
School of Education
Auburn University
Auburn, Alabama

In Cooperation with Division of
Vocational Education and Community Colleges
State Department of Education

March 1975

For their help in refining the survey instrument, special thanks are due the following state supervisors:

Mrs. Divine Bauer, Health Occupations Education
Miss Evelyn Cotney, Home Economics Education
Mr. H. W. Green, Agribusiness Education
Mr. J. C. Lindley, Trade & Industrial Education
Mrs. Anacile Kurth, Distributive Education
Mrs. Sandra Velverton, Business and Office Education

Appreciation is also extended to the following members of the Occupational Research and Development Unit for their contribution to the study:

Mr. Paul D. Davis, Research Associate
Mr. Gary Greenshields, Graduate Research Assistant
Mr. John Gross, Research Associate
Mr. James McMath, Graduate Research Assistant
Dr. Alice S. Morgan, Assistant Professor
Ms. Flossi Sergen, Secretary
Mr. Ed Williams, Duplicating Operator

FOLLOW-UP OF 1973-74 DRAFTING TERMINEES
FROM THE SECONDARY SCHOOL VOCATIONAL
PROGRAMS OF ALABAMA

Alabama continues to support one of the most progressive and comprehensive vocational education programs in the nation. In addition to serving youth and adults by training them for gainful and useful employment, the diversification of vocational courses meets a serious job need and contributes to the industrial development in the state.

With the millions of tax dollars being spent on vocational education, it is necessary to attempt to account to the taxpayer and decision-makers on the results of those expenditures. Terminee student follow-up studies constitute one of the most valuable techniques for assessing vocational education system outcomes.

The Alabama State Department of Education, Division of Vocational Education and Community Colleges, recognizing this important phase of accountability and evaluation, initiated the development of a statewide follow-up system for its vocational education program terminees at the secondary school level. The Division, under the direction of Dr. T. L. Faulkner, State Director, contracted with the Occupational Research and Development Unit at Auburn University to develop and implement the statewide follow-up system for all its secondary vocational terminees in all service areas.

This report relates the findings of the survey instrument mailed to the 1973-74 Drafting terminees from the secondary school vocational

programs of Alabama. When the terminees received the questionnaire, most had been out of school seven to eight months.

General Information

Student rosters with names and addresses of 1973-74 Drafting terminees were received from 49 secondary school vocational teachers in Alabama. Of the 49 teachers from which student rosters were received, 19 were in Secondary Area Vocational Centers (AVC) and 30 were in programs in schools of other settings. The total of 422 student terminees reported to the ORDU were mailed the follow-up forms. Returns were received from 149 (35.3%) of the Drafting terminees from the initial mailing and one follow-up. At least one student questionnaire was received from 42 of the 49 programs.

All terminees reported in this study were in programs administered only by the Trade and Industrial Section of the Division of Vocational Education and Community Colleges, State Department of Education.

Table 1 presents data relative to the total population of Drafting terminees and the number of returns categorized by type school and termination status as reported by teachers.

TABLE 1

DESCRIPTION OF TOTAL POPULATION AND RETURNS OF 1973-74 DRAFTING TERMINEES BY TYPE SCHOOL AND TERMINATION STATUS[A]

Type School and Termination Status	Total Number Reported	Number of Returns	Percent of Returns
Area Vocational Centers			
Total	224	85	37.9
Completers[B]	175	77	44.0
Dropouts[C]	49	8	16.3
Other Type Schools			
Total	198	64	32.3
Completers	138	58	42.0
Dropouts	60	6	10.0
Grand Total	422	149	35.3
Completers	313	135	43.1
Dropouts	109	14	12.8

[A]These Drafting terminees were in programs administered only under the service area of Trade and Industrial Education, State Department of Education.

[B]Any terminee who left the program by completing or by high school graduation.

[C]Any terminee the instructor reported as having dropped out of school.

Table 2 illustrates the sex characteristics of those 1973-74 Drafting terminees reported by the instructors and those who returned survey forms.

TABLE 2

SEX OF THE 1973-74 DRAFTING TERMINEES REPORTED AND BY WHO RETURNED QUESTIONNAIRES

Sex[A]	Reported		Returns	
	Number	Percent	Number	Percent
Male	361	85.5	128	85.9
Female	49	11.7	19	12.8
Not Known	12	2.8	2	1.3
TOTAL	422	100.0	149	100.0

[A]Sex as reported by teacher.

Table 3 presents the racial or ethnic characteristics of those 1973-74 Drafting terminees reported by instructors and who returned survey forms.

TABLE 3

RACIAL OR ETHNIC CHARACTERISTICS OF THE 1973-74 DRAFTING TERMINEES REPORTED AND BY WHO RETURNED QUESTIONNAIRES

Racial or Ethnic Group[A]	Reported		Returns	
	Number	Percent	Number	Percent
American Indian	0	0.0	0	0.0
Black	80	19.0	21	14.1
Oriental	0	0.0	0	0.0
Spanish Surnamed American	0	0.0	0	0.0
White	332	78.7	126	84.6
Other	0	0.0	0	0.0
Not Known	10	2.3	2	1.3
TOTAL	422	100.0	149	100.0

[A]Racial or Ethnic Group as reported by teacher.

Table 4 illustrates the number and grade level of the 1973-74 Drafting termienes reported who dropped out of school during the academic year and by who returned questionnaire.

TABLE 4

NUMBER OF THE 1973-74 DRAFTING TERMINEES REPORTED WHO DROPPED OUT OF SCHOOL DURING THE 1973-74 SCHOOL YEAR BY GRADE LEVEL

Grade Level Upon Dropping Out of School	Reported		Returns	
	Number	Percent[A]	Number	Percent[B]
Ninth	2	0.5	0	0.0
Tenth	26	6.2	0	0.0
Eleventh	46	10.9	6	13.0
Twelfth	19	4.5	3	15.8
Grade Level Not Indicated by Teacher	16	3.8	5	31.2
TOTAL	109	25.9	14	12.8

[A]Percentage is based on 422 total reported terminees.

[B]Percentage is based on returns by grade.

Table 5 shows the number of 1973-74 Drafting terminees who indicated whether they were in active full-time military service.

TABLE 5

ACTIVE FULL-TIME MILITARY STATUS OF 1973-74 DRAFTING TERMINEES WHO RETURNED QUESTIONNAIRES

Active Full-Time Military Status	Number	Percent
Yes	7	4.7
No	139	93.3
No Response	3	2.0
TOTAL	149	100.0

Basic Information Related to the Vocational Education Program

Table 6 points out the number of 1973-74 Drafting terminees who indicated whether this vocational program was a school requirement.

TABLE 6

1973-74 DRAFTING TERMINEES WHO INDICATED WHETHER THEIR VOCATIONAL PROGRAM WAS A SCHOOL REQUIREMENT

Vocational Courses Was A School Requirement	Number	Percent
Yes	0	0.0
No	147	98.7
No Response	2	1.3
TOTAL	149	100.0

Table 7 indicates, according to the 1973-74 Drafting terminees, the primary source of influence in selecting their vocational course.

TABLE 7

PRIMARY INFLUENCES ON THE 1973-74 DRAFTING TERMINEES IN SELECTING THEIR VOCATIONAL COURSE

Group or Individual Terminees Felt Influenced Them Most in Selecting Vocational Course	Number	Percent
Parent(s) or Guardian(s)	11	7.4
Guidance Counselor	6	4.0
Your Vocational Teacher	8	5.4
Another Teacher or Principal	4	2.7
Student in VED Program	9	6.0
A Friend or Relative	10	6.7
A Businessman	0	0.0
Made Choice Yourself	99	66.4
Other[A]	1	0.7
No Response	1	0.7
TOTAL	149	100.0

[A]See page 7 for listing of "Others" who influenced Drafting terminees in selecting their VED course.

Parents or Guardians appeared to be the greatest outside influence on those terminees enrolling in the Drafting program. Eleven (7.4%) of the terminees responding indicated that their Parent(s) or Guardian(s) influenced them most in selecting their Drafting course. However, 99 (66.4%) indicated that they selected their course of study on their own. Six terminees (4.0%) indicated that a guidance counselor influenced them most in selecting their program. Eight (5.4%) of the terminees indicated that their vocational teacher influenced them most in selecting their course in Drafting.

Below is the response given to the "Others" category indicated in Table 7 as to the primary source of influence in selecting the vocatonal course.

"Other" Persons or Groups Who Most Influenced Terminees in Selecting Their VED Course	Number
Course itself	1
Had to take second course	1

Table 8 indicates terminees' opinions as to whether they had adequate job or occupational information and school experiences to make a realistic career choice.

TABLE 8

OPINIONS OF 1973-74 DRAFTING TERMINEES AS TO WHETHER THEY HAD ADEQUATE JOB OR OCCUPATIONAL INFORMATION AND SCHOOL EXPERIENCES TO MAKE A REALISTIC CAREER CHOICE

	Number	Percent
Yes	117	78.5
No	30	20.1
No Response	2	1.4
TOTAL	149	100.0

Table 9 indicates whether, during the time they were taking their high school vocational program, the reporting 1973-74 terminees intended to get a job in Drafting.

TABLE 9

INDICATIONS OF 1973-74 DRAFTING TERMINEES AS TO WHETHER, DURING THE TIME THEY WERE TAKING THEIR HIGH SCHOOL VED PROGRAM, THEY PLANNED TO GET A JOB IN THEIR AREA OF STUDY

Intended To Get Job In Area of Study	Number	Percent
Yes	84	56.4
No	13	8.7
Was Not Sure	50	33.6
No Response	2	1.3
TOTAL	149	100.0

It is interesting to note that only 84 (56.4%) of the 1973-74 reporting Drafting terminees indicated that during the time they were taking their Drafting program, they intended to get a job in the area they were studying.

Table 10 indicates terminees' opinions on choosing the Drafting program if they had the selection to make again.

A noteworthy point was revealed by the data. Of the 1973-74 Drafting terminees, 120 (80.5%) indicated that they would select the same vocational program if they had the choice to make again. Only seven (4.7%) of the responding terminees indicated that they would not take a vocational program.

TABLE 10

OPINIONS OF 1973-74 DRAFTING TERMINEES
REGARDING THEIR VOCATIONAL PROGRAM

Question: If You Had It To Do Over Again, Would You...?	Number	Percent
Take the same vocational program	120	80.5
Not take a vocational program	7	4.7
Choose another vocational program offered in your school, such as _____ [A]	15	10.1
Choose another vocational program if it had been offered in your school, such as _____ [B]	4	2.7
No Response	3	2.0
TOTAL	149	100.0

[A]See listing I-A below for those other vocational programs offered in terminees' school that they would have taken instead of their Drafting programs.

[B]See listing I-B below for the vocational programs the terminee would have taken instead of their Drafting program if it had been offered in their school.

Listing I-A -- Courses offered in their school that Drafting terminees indicated they would have taken if they had it all to do over again.

Course	Number
Electronics	2
Auto Mechanics	2
Welding	2
Electrical trades	1
Machine shop	1
Accounting	1
Pipe design	1
Secretarial training	1
One you could get a job at	1

Listing I-B -- Courses Drafting terminees indicated they would have taken if they had it all to do over again and the course were offered in their school.

Course	Number
Machine shop	2
Welding	1
Commercial art	1
Cosmetology	1
Glazer	1
ROTC	1
Air conditioning/refrigeration	1

Table 11 indicates the extent to which the reporting 1973-74 Drafting terminees felt their high school vocational programs prepared them for their first job. This data was also broken down by how that first job related to their vocational program.

Terminees who were in full-time active military service or who had never been employed were not asked to respond to the questions from which this data was reported. Also, the terminees who failed to respond to the question items were not indicated in the table.

TABLE 11

PERCEPTIONS OF 1973-74 DRAFTING TERMINEES AS TO THE EXTENT THEIR HIGH SCHOOL VOCATIONAL PROGRAM PREPARED THEM FOR THEIR FIRST FULL-TIME JOB BY HOW FIRST FULL-TIME JOB RELATED TO TRAINING

Extent Vocational Course Prepared for First Full-Time Job	Total Reporting		Number Reporting by Relatedness of First Full-Time Job to Training Received					
			Directly Related		Somewhat Related		Not Related	
	No.	%	No.	%	No.	%	No.	%
Excellent	1	1.4	0	0.0	0	0.0	1	2.5
Well Prepared	20	28.6	9	69.2	8	47.1	3	7.5
Fair	18	25.7	4	30.8	9	52.9	5	12.5
Poorly Prepared	1	1.4	0	0.0	0	0.0	1	2.5
Preparation not related to job	30	42.9	0	0.0	0	0.0	30	75.0
TOTAL	70	100.0	13	100.0	17	100.0	40	100.0

In noting the extent to which the 1973-74 Drafting terminees felt their high school vocational course prepared them for their first full-time job by how their first full-time job related to the training they received in their high school Drafting program, some interesting points were revealed. Twenty-one (30.0%) of the 1973-74 Drafting terminees responding to this item indicated "Excellent" or "Well Prepared" for their first full-time job as a result of the training received in their high school vocational education program. Nine (69.2%) of the 13 terminees employed in their first full-time job related directly to their training felt they were excellent or well prepared for this first job. None of the terminees working in an area directly related to their vocational training felt that they were poorly prepared for their first jobs. No terminee who indicated that he was working in an area direclty related to his vocational course felt his preparation was unrelated to his job. Of all the responding terminees, only one (1.4%) felt that he was "Poorly Prepared" for his first full-time job. This terminee was working in an area unrelated to his vocational course.

Table 12 indicates the extent to which the reporting 1973-74 Drafting terminees felt their high school vocational course prepared them for their present job. Also shown in the table is a breakdown of the data by how their present job was related to their vocational program.

Terminees in active full-time military service, and students who were attending school full time and had not had a job, were not asked to respond to the question from which Table 12 was prepared. Also, those other students who failed to respond to the items were not shown on the table.

Of the 82 terminees responding to these items, 25 (30.5%) indicated "Excellent" or "Well Prepared" for their present job as a result of their

high school vocational program. No terminee reported feeling "Poorly Prepared" for his present job as a result of his training.

TABLE 12

PERCEPTIONS OF 1973-74 DRAFTING TERMINEES AS TO THE EXTENT THEIR HIGH SCHOOL VOCATIONAL COURSE PREPARED THEM FOR THEIR PRESENT JOB BY HOW THEIR PRESENT JOB RELATED TO TRAINING

Extent Vocational Course Prepared for Present Job	Total Reporting		Number Reporting by Relatedness of Present Job to Training Received					
			Directly Related		Somewhat Related		Not Related	
	No.	%	No.	%	No.	%	No.	%
Excellent	1	1.2	1	6.2	0	0.0	0	0.0
Well Prepared	24	29.3	10	62.5	10	47.6	4	8.9
Fair[A]	17	20.7	5	31.2	9	42.9	3	6.7
Poorly Prepared	0	0.0	0	0.0	0	0.0	0	0.0
Preparation not related to job	40	48.8	0	0.0	2	9.5	38	84.4
TOTAL	82	100.0	16	100.0	21	100.0	45	100.0

[A]See listing, page 13, for reasons terminees specified for only being trained "Fair" by their vocational course for their present job.

Eleven (68.7%) of the 16 responding terminees working in an area directly related to their high school vocational program indicated that they felt excellent or well prepared by their training.

Sixteen terminees who indicated "Fair" as the extent their vocational program prepared them for this present job indicated reasons for this. The following lists the reasons the 1973-74 Drafting terminees indicated for being trained only "Fair" by their vocational course for their present job.

Reason	Number
Only had book	1
Blueprint reading	1
Was one of the many areas covered	1
I get a chance to use lettering (occasionally)	1
I am a bricklayer	1
Not covered enough	1
In school I was drawing houses--now I'm drawing pipes	1
Only basics	1
Only had one year	1
Had only two years	1
Didn't need preparation	1
Needed more training	1
Only somewhat related	1
Needed more time	1
N. S. Voc. Program did not develop working speech required for office	1
Too general; not detailed enough	1

None of the terminees who indicated they were "Poorly Prepared" for their present job by their vocational program gave reasons why they felt that way.

Table 13 focuses on the Drafting student club. The researchers sought to determine the extent to which the 1973-74 Drafting terminees felt that their high school student club aided in preparing them for their present job. Data are also broken down by the relationship of the present job to the vocational training received.

Only respondents who had had a job since terminating their high school vocational Drafting program were asked to respond to the question reported in Table 13. Students in active full-time military service were excluded. Ten (10.8%) of the 93 terminees reported no related student club was available, while 41 (44.1%) were not members of a related student club.

Thirteen (30.2%) of the 43 terminees who participated in student club activities indicated they were "Excellent" or "Well Prepared" by

their related student club for their present job. Eleven (25.6%) indicated they were "Poorly Prepared" by their related student club for their present job. Of those 11, two (18.2%) were in related jobs, two (18.2%) in somewhat related jobs, while seven (63.6%) were in non-related jobs.

TABLE 13

PERCEPTIONS OF 1973-74 DRAFTING TERMINEES AS TO THE EXTENT THEIR HIGH SCHOOL VOCATIONAL STUDENT CLUB PREPARED THEM FOR THEIR PRESENT JOB BY HOW THEIR PRESENT JOB RELATED TO TRAINING[A]

Extent High School Vocational Student Club Helped Prepare for Present Job	Total Reporting		Total Reporting by Relatedness of Present Job to Vocational Training					
			Directly Related		Somewhat Related		Not Related	
	No.	%	No.	%	No.	%	No.	%
Excellent	5	11.6	2	20.0	2	15.4	1	5.0
Well Prepared	8	18.6	2	20.0	2	15.4	4	20.0
Fair	19	44.2	4	40.0	7	53.8	8	40.0
Poorly Prepared	11	25.6	2	20.0	2	15.4	7	35.0
TOTAL	43	100.0	10	100.0	13	100.0	20	100.0

[A]Of the 93 who responded, 10 (10.8%) had no related student club available, and 41 (44.1%) were not members of a related student club.

Of the 10 terminees who were working in an area directly related to the training they received in their high school vocational program, four (40.0%) revealed that they were "Excellent" or "Well Prepared" for their present job by their related student club. Only two (20.0%) of the ten terminees working in jobs directly related to the training they received indicated they were "Poorly Prepared" for their present jobs by their related student club.

Table 14 reports how the 1973-74 Drafting terminees rated the quality of teaching by their high school vocational instructors.

TABLE 14

1973-74 DRAFTING TERMINEES' RATINGS OF THE QUALITY OF TEACHING BY THEIR HIGH SCHOOL VOCATIONAL INSTRUCTORS

Rating	Number	Percent
Excellent	61	40.9
Good	57	38.3
Fair	24	16.1
Poor	4	2.7
Very Poor	2	1.3
No Response	1	0.7
TOTAL	149	100.0

Of the 149 reporting 1973-74 Drafting terminees, 118 (79.2%) rated the quality of teaching by their vocational instructor either "Good" or "Excellent." Only six (4.0%) rated the quality of teaching by their instructors "Poor" or "Very Poor."

Table 15 illustrates how the 1973-74 Drafting terminees rated their high school vocational instructor's interest in their class work.

TABLE 15

1973-74 DRAFTING TERMINEES' RATINGS OF THEIR HIGH SCHOOL VOCATIONAL INSTRUCTOR'S INTEREST IN THE STUDENT'S CLASS WORK

Rating	Number	Percent
Excellent	78	52.3
Good	48	32.3
Fair	15	10.1
Poor	4	2.7
Very Poor	2	1.3
No Response	2	1.3
TOTAL	149	100.0

Of the 149 reporting 1973-74 Drafting terminees, 126 (84.5%) rated the interest exhibited by their high school vocational instructor in their class work as "Good" or "Excellent." Only six (4.0%) of the terminees rated the interest their vocational instructors showed in their class work as "Poor" or "Very Poor."

Table 16 points out how the 1973-74 Drafting terminees subjectively rated the knowledge their vocational teachers possessed about their field of study. This rating is also shown in the table by a breakdown of how the terminees' present job related to the training they received in their high school vocational program. Terminees were asked to base their judgments on their current knowledge of their job and responsibilities.

TABLE 16

1973-74 DRAFTING TERMINEES' RATINGS OF THE KNOWLEDGE THEIR HIGH SCHOOL VOCATIONAL TEACHER POSSESSED ABOUT THEIR FIELD OF STUDY BY HOW THE TERMINEES' PRESENT JOB RELATED TO THE TRAINING THEY RECEIVED

Ratings[A]	Total Reporting		Number Reporting by Relatedness of Present Job to Training Received					
			Directly Related		Somewhat Related		Not Related	
	No.	%	No.	%	No.	%	No.	%
Excellent	36	42.4	7	43.8	8	38.1	21	43.8
Good	30	35.3	3	18.8	10	47.6	17	35.4
Fair	13	15.3	5	31.2	1	4.8	7	14.6
Poor	4	4.7	1	6.2	1	4.8	2	4.2
Very Poor	2	2.3	0	0.0	1	4.8	1	2.1
TOTAL	85	100.0	16	100.0	21	100.0	48	100.0

[A]Ratings were to be based on terminee's judgment of their current knowledge of their job and responsibilities.

Total responses to this item indicates that 66 (77.7%) of the 85 responding 1973-74 Drafting terminees rated the knowledge their vocational teachers possessed about their field of study either "Good" or "Excellent." For those 16 terminees working in an area directly related to the training they received, 10 (62.6%) rated the knowledge their teachers possessed about their field of study as "Good" or "Excellent." A favorable point was revealed in that only one of those terminees rated the knowledge their vocational teachers possessed about their field of study as "Poor" or "Very Poor."

If the respondent was working in an area related to his training, he was asked to compare the facilities and equipment in his high school vocational program with those on his present job. Table 17 illustrates how the 1973-74 Drafting terminees responded.

TABLE 17

HOW 1973-74 DRAFTING TERMINEES WORKING IN A RELATED AREA RATED THE FACILITIES AND EQUIPMENT IN THEIR HIGH SCHOOL VOCATIONAL PROGRAM[A]

Rating[B]	Number	Percent
Better than those on present job	9	27.3
Similar to those on present job	13	39.4
Not as good as those on present job	11	33.3
TOTAL	33	100.0

[A]Fifty-nine (64.1%) of the responding 92 terminees indicated that their present job was not related to their vocational training enough to compare facilities and equipment.

[B]Persons who had not had a job since leaving their vocational program, including those in military service and those who attended school, were asked not to respond to questions from which data was drawn. Returns were received from 149 terminees.

Nine (27.3%) of the 33 responding 1973-74 Drafting terminees working in an area related to their training rated the facilities and equipment in their high school vocational program as bettern than those on their present job. Thirteen (39.4%) rated the facilities and equipment in their high school vocational program as similar to those on their present job; however, 11 (33.3) rated the facilities and equipment not as good as those on their present job.

Table 18 shows how 1973-74 Drafting terminees, who were in a cooperative work program in school and were now working in an area related to their vocational training, rated the facilities and equipment used in their cooperative work station.

TABLE 18

HOW 1973-74 DRAFTING TERMINEES NOW WORKING IN A RELATED AREA, WHOSE VOCATIONAL PROGRAM INCLUDED COOPERATIVE WORK, RATED FACILITIES AND EQUIPMENT USED IN THEIR COOPERATIVE WORK STATION[A]

Rating[B]	Number	Percent
Better than those on present job	6	35.3
Similar to those on present job	4	23.5
Working at same place where cooperative training was done	3	17.6
Not as good as those on present job	4	23.5
TOTAL	17	100.0

[A]Thirty-one (35.2%) of the responding 88 Drafting terminees indicated their vocational program was not a cooperative program. Forty (45.4%) terminees indicated they were not working in an area related to their cooperative work; therefore, they did not complete this item on the questionnaire.

[B]Persons who had not had a job since leaving their vocational program, including those in military service and those attending school, were asked not to respond to questions from which data was drawn. Returns were received from 149 terminees.

Six (35.3%) of the 17 responding 1973-74 Drafting terminees whose vocational programs had included cooperative work and were now working in an area related to their vocational training, rated the facilities and equipment in their cooperative work station as better than those on their present job. Four (23.5%) rated the facilities and equipment in their cooperative training station as similar to those on their present job, and four (23.5%) rated the facilities and equipment in their cooperative work station not as good as those in their present job. Three (17.6%) indicated they were working at the same establishment where they did their cooperative training.

Basic Employment Information

The following section of this report offers information relative to employment and job characteristics of the 1973-74 secondary Drafting terminees.

Table 19 illustrates the number of full-time jobs the responding 1973-74 Drafting terminees have had since leaving their high school vocational course.

TABLE 19

NUMBER OF FULL-TIME JOBS HELD BY THE 1973-74 DRAFTING TERMINEES SINCE LEAVING THEIR HIGH SCHOOL VOCATIONAL COURSE

Number of Full-Time Jobs Held	Number	Percent[A]
One	58	38.9
Two	20	13.4
Three	4	2.7
Four	2	1.3
Five or more	1	0.7
TOTAL	85	57.0

[A]Percentage is based on the 149 terminees who returned the questionnaire.

There were 58 (38.9%) of the total 149 responding 1973-74 Drafting terminees who had been employed in just one job since leaving their high school vocational program. Twenty (13.4%) of the terminees reported having two full-time jobs since leaving their high school vocational course seven to eight months ago.

Table 20 reveals the first-job employment status of Drafting terminees who returned the survey by the relatedness of their vocational training to their first job.

TABLE 20

FIRST-JOB EMPLOYMENT STATUS OF DRAFTING TERMINEES (1973-74) BY RELATEDNESS OF VOCATIONAL TRAINING TO FIRST JOB[A]

First Job After Leaving High School Vocational Program	Total Reporting		Relatedness of Vocational Training to First Job[B]					
			Directly Related		Somewhat Related		Not Related	
	No.	%	No.	%	No.	%	No.	%
Full-Time	71	47.6	13	8.7	17	11.4	41	27.5
Part-Time	18	12.1	1	0.7	5	3.3	12	8.1
TOTAL	89	59.7	14	9.4	22	14.7	53	35.6

[A]All percentages were based on the 149 (35.3%) of 422 terminees who returned the survey form.

[B]The terminees made the judgment as to how their first job was related to the training received in their high school vocational program.

[C]See page 21 for reasons terminees who were working in first job unrelated to this vocational training gave for not seeking job that was related before accepting their first job.

Of the 149 responding 1973-74 Drafting terminees, 71 (47.6%) were employed full time in their first job after leaving their high school vocational program. Eighteen (12.1%) terminees' first jobs were on a part-time basis.

Fourteen (9.4%) of the 149 responding terminees' first jobs (full-time or part-time) were in an area directly related to the training they received in their high school vocational course. Twenty-two (14.7%) were employed in an area somewhat related, while 53 (35.6%) were employed in a first job not related to the training they received. The terminees made the judgment as to how their first job was related to the training they received in their high school vocational program.

Of the 25 terminees who indicated their jobs were not related to their vocational course, 14 (56.0%) terminees indicated that before they accepted their unrelated job, they tried to get a job that was related to their vocational training. However, 11 (44.0%) of the terminees did not.

The following is a list of reasons given by 15 of the 26 terminees who, before taking their first unrelated job indicated they did not seek a job that was related to their vocational training.

Reasons	Number
Because I was already working on a farm	1
My father had a job for me	1
Interested more in Architectural Drafting	1
Couldn't find	1
Summer job	1
The vocatinal training was for my major in college	1
I didn't feel I had enough experience	1
Not enough training	1
I got the job before school was out	1
Planned on continuing training	1
Not experienced	1
Just wanted a job	1
Needed money; had planned on attending college	1
Because there was little demand	1
Did not want one	1

Table 21 shows by type school and termination status the first job of the 1973-74 Drafting terminees and the relatedness of their training to this first job.

TABLE 21

NUMBER OF RETURNS BY TYPE SCHOOL AND TERMINATION STATUS FOR 1973-74 DRAFTING TERMINEES' FIRST JOB, AND RELATEDNESS OF TRAINING[A]

Type School and Termination Status	Number of Returns	Total Employed by Area Studied		Relatedness of Training to First Job[D]					
				Directly Related		Somewhat Related		Not Related	
		No.	%	No.	%	No.	%	No.	%
Area Voc. Centers									
Total	85	52	34.9	9	6.0	14	9.4	29	19.5
Completers[B]	77	47	31.5	9	6.0	13	8.7	25	16.8
Dropouts[C]	8	5	3.4	0	0.0	1	0.7	4	2.7

Dropouts	14	8	5.4	0	0.0	1	0.7	7	4.7

[A]All percentages are based on the 149 (35.3%) of the 422 terminees who returned the survey form.

[B]Any terminee who left the program by completing or by high school graduation.

[C]Any terminee who the instructor reported as having dropped out of school.

[D]The terminees made the judgment as to how their first job was related to the training received in their high school vocational program.

Table 22 illustrates the current employment status of the responding terminees by the relatedness of their vocational training to their present jobs. All percentages figured in the table were based on the 149 (35.3%) returns from the 422 Drafting terminees.

TABLE 22

CURRENT EMPLOYMENT STATUS OF DRAFTING TERMINEES (1973-74) BY RELATEDNESS OF TRAINING TO PRESENT JOB[A]

Employment Status	Total Respond-ing		Relatedness of Training to Present Job[B]							
			Directly Related		Somewhat Related		Not Related[E]		Employed No Response	
	No.	%	No.	%	No.	%	No.	%	No.	%
Employed full time and not attending school	46	30.9	10	6.7	10	6.7	26	17.4	0	0.0
Employed full time and attending school	16	10.7	3	2.0	5	3.3	8	5.4	0	0.0

Unavailable for employment[C&D]	5	3.3	N/A		N/A		N/A		N/A	
No Response	53	35.6	N/A		N/A		N/A		N/A	
TOTAL	149	100.0	15	10.1	20	13.4	46	30.9	0	0.0

[A]All percentages were based on the 149 (34.3%) respondents of the total 422 terminees. Terminees in active full-time military service or attending school full-time and had never been employed were included in the "No Response" category.

[B]The terminees made the judgment as to how their present job was related to the training received in their high school vocational program.

[C]The unemployed and unavailable for employment categories do not include persons in the military service and persons who were in school full time and never had a job.

[D]See page 31 for the listing of reasons Drafting terminees gave for being unavailable for employment.

[E]See page 32 for reasons terminees who were working in present job not related to vocational training gave for not seeking related job before accepting present job. Totals for unrelated columns may not correspond because terminees failed to respond to one of the two questions from which data was drawn.

Of the 149 responding 1973-74 secondary Drafting terminees, 62 (41.6%) were presently employed full time and not attending school or employed full time and attending school. Fifteen (10.1%) of the terminees were employed part time and attending school, while five (3.3%) were unavailable for employment (See page 24 for reasons terminees were unavailable for employment). Only 10 (6.7%) of the terminees were unemployed and actively seeking employment, while two (1.3%) were employed part time and seeking full-time employment.

The "No Response" category in Table 22 includes three groups: (1) terminees in active full-time military service; (2) terminees who were in school full time and had never had a job; and (3) terminees who failed to respond to the item on the questionnaire.

Of the 149 secondary Drafting respondees, 15 (10.1%) were presently employed full time or part time in an area directly related to the training received in their high school vocational course. Twenty (13.4%) were employed either part time or full time in an area somewhat related to their training, while 46 (30.9%) were employed in areas not related to training. The terminees made the judgment as to how their present employment was related to training received in their high school vocational course.

Below is a list of the reasons given by the terminees for being unavailable for employment.

Reason	Number
In school full time	10
Presently not working, not interested in a job	0
Homemaker	0
Pregnancy	0
Illness or disability	0
Other	0

Of the 21 terminees who indicated their present jobs were not related to their vocational course, 12 (57.1%) terminees indicated that before they accepted their unrelated job, they tried to get a job that was related to their vocational training. However, nine (42.9%) of the terminees did not.

The following is a list of reasons given by the terminees who, before taking their present unrelated job, indicated they did not seek a job that was related to their vocational training.

Reason	Number
Felt need for further training	7
Not interested	4
Nothing available	3
Needed a job	2
Already had job	2
Had to remain in area	1
Changed vocational study	1
Could not afford further study	1

Table 23 shows for the present job, the number of 1973-74 secondary Drafting terminees employed by the relatedness of their vocational training to their present job.

Of the 86 terminees presently employed that studied Drafting, 16 (10.7%) were employed in an area directly related to the training received in their high school vocational program. Forty-nine (32.9%) terminees who studied Drafting indicated their present job was not related to their high school vocational training. The terminees made the judgment as to how their present job related to the training received in their high school vocational program.

TABLE 23

NUMBER OF RETURNS BY TYPE SCHOOL AND TERMINATION STATUS FOR 1973-74 DRAFTING TERMINEES' PRESENT JOB, AND RELATEDNESS OF TRAINING[A]

Completers	135	78	52.3	16	10.7	20	13.4	42	28.2
Dropouts	14	8	5.4	0	0.0	1	0.7	7	4.7

[A]Percentages are based on the 149 (35.3%) of the 422 terminees who returned the survey form.

[B]Any terminee who left the program by completing or by high school graduation.

[C]Any terminee who the instructor reported as having dropped out of school.

[D]The terminees made the judgment as to how their first job was related to the training received in their high school vocational program.

Table 24 indicated the first-job salary ranges as compared to the present-job salary ranges for the 1973-74 Drafting terminees.

Of the 91 terminees reporting a salary range for their first job, 35 (38.5%) indicated a range of under $250 per month. No terminee reported a first salary of over $700 per month. The median salary

range for the first job fell in the range of $250 - $349 per month. The mean salary range for the first job also fell in the range of $250 - $349 per month.

TABLE 24

FIRST-JOB SALARY RANGES AND PRESENT-JOB SALARY RANGES FOR 1973-74 DRAFTING TERMINEES

Salary Ranges	First Job		Present Job	
	No.	%	No.	%
Under $250	35	38.5	19	24.4
$250 - $299	13	14.3	12	15.4
$300 - $349	14	15.4	9	11.5
$350 - $399	7	7.7	4	5.1
$400 - $449	11	12.1	14	17.9
$450 - $499	5	5.5	7	9.0
$500 - $599	4	4.4	7	9.0
$600 - $699	2	2.2	5	6.4
$700 or more	0	0.0	1	1.3
TOTAL	91	100.0	78	100.0

Of the 78 1973-74 Drafting terminees reporting a salary range for their present job, 19 (24.4%) indicated under $250 per month. This salary range was indicative of the mode of the reporting students. The median and mean salary ranges for the present job fell within the range of $300 - $399 per month. The median and mean salary ranges of present jobs over first jobs indicate an increase for the reporting Drafting terminees.

Table 24A indicates the first-job salary ranges by relatedness of training and sex of the Drafting terminees.

Thirty-one (37.3%) of the 83 responding terminees were employed at less than $250 per month. Of these 31 terminees, two (6.4%) males were employed in a job directly related to their training, six (19.4%) males and one (3.2%) female were employed in jobs somewhat related to their

training, while 19 (61.3%) males and three (9.7%) females were employed in jobs not related to their training.

TABLE 24A

FIRST-JOB SALARY RANGES BY RELATEDNESS OF TRAINING OF 1973-74 DRAFTING TERMINEES BY SEX

Salary Ranges	Sex of Terminees Responding		Relatedness of Training to First Job[B]					
			Directly Related		Somewhat Related		Not Related	
	Male	Female	Male	Female	Male	Female	Male	Female
Under $250	27	4	2	0	6	1	19	3
$250 - $299	12	0	1	0	3	0	8	0
$300 - $349	12	1	3	0	3	1	6	0
$350 - $399	5	2	1	0	2	1	2	1
$400 - $449	10	0	2	0	2	0	6	0
$450 - $499	4	0	2	0	1	0	1	0
$500 - $599	4	0	1	0	0	0	3	0
$600 - $699	2	0	0	0	1	0	1	0
$700 or more	0	0	0	0	0	0	0	0
TOTAL[A]	76	7	12	0	18	3	46	4

[A]Totals do not match those of Table 24 because some terminees did not respond to all questions.

[B]The terminees made the judgment as to how their first job was related to the training received in their high school vocational program.

Of the 83 responding terminees, 76 (91.6%) were males and seven (8.4%) were females. Twelve (14.5%) males were employed in jobs directly related to their vocational training, 18 (21.7%) males and three (3.6%) females were employed in jobs somewhat related to their training, while 46 (55.4%) males and four (4.8%) females were employed in jobs not related to their training.

Table 24B indicates the present-job salary ranges by relatedness of training and sex of the Drafting terminees.

TABLE 24B

PRESENT-JOB SALARY RANGES BY RELATEDNESS OF TRAINING OF 1973-74 DRAFTING TERMINEES BY SEX

Salary Ranges	Sex of Terminees Responding		Relatedness of Training to Present Job[B]					
			Directly Related		Somewhat Related		Not Related	
	Male	Female	Male	Female	Male	Female	Male	Female
Under $250	17	1	2	0	3	1	12	0
$250 - $299	11	1	0	0	3	0	8	1
$300 - $349	7	2	2	0	1	1	4	1
$350 - $399	3	0	0	0	1	0	2	0
$400 - $449	14	0	3	0	2	0	9	0
$450 - $499	6	1	2	1	2	0	2	0
$500 - $599	5	1	4	0	0	0	1	1
$600 - $699	5	0	1	0	3	0	1	0
$700 or more	1	0	0	0	1	0	0	0
TOTAL[A]	69	6	14	1	16	2	39	3

[A]Totals do not match those of Table 24 because some terminees did not respond to all questions.

[B]The terminees made the judgment as to how their present job was related to the training received in their high school vocational program.

Eighteen (24.0%) of the 75 responding terminees were employed at less than $250 per month. Of these 18 terminees, two (11.1%) males were employed in a job directly related to their training, three (16.7%) males and one (5.6%) female were employed in jobs somewhat related to their training, while 12 (66.7%) males were employed in jobs not related to their training.

Of the 75 responding terminees, 69 (92.0%) were males and six (8.0%) were females. Fourteen (18.7%) males and one (1.3%) female were employed in jobs directly related to their vocational training, 16 (21.3%) males and two (2.7%) females were employed in jobs somewhat related to their training, while 39 (52.0%) males and three (4.0%) females were employed in jobs not related to their training.

Continuing Education Information

The following section of this report presents information relative to the continuing education of the 1973-74 secondary Drafting terminees.

Table 25 shows the vocational educational training opportunities terminees have participated in since leaving their high school vocational program.

TABLE 25

ADDITIONAL VOCATIONAL EDUCATIONAL TRAINING 1973-74
DRAFTING TERMINEES PARTICIPATED IN SINCE
LEAVING THEIR HIGH SCHOOL
VOCATIONAL PROGRAM[A]

Type Training	Number	Percent[B]
On-the-job training (employer-sponsored program)	21	14.1
Public school adult vocational program	5	3.4
Private vocational school program	0	0.0
University or four year college	16	10.7
Junior college	23	15.4
Post-secondary vocational-technical institute (trade school)	14	9.4
Apprenticeship training program	3	2.0
Specialized occupational military training	3	2.0
Other[C]	6	4.0
TOTAL[D]	91	61.1

[A]Seventy-one (47.7%) of the 149 terminees gave no indication of being involved in additional vocational training. Of the 149 terminees, 75 (50.3%) took part in one additional vocational training opportunity since leaving their high school program. Ten (6.7%) took part in two and six (4.0%) terminees took part in the three additional training opportunities.

[B]Percentages are based on the 149 (35.3%) respondents of the total 422 terminees who returned questionnaires.

[C]See page 31 for the "Other" listing as specified by the terminees.

[D]The total indicated the number of different training programs in which terminees enrolled. As footnoted above, several terminees had enrolled in more than one training program.

Of the total terminees, the 23 (15.4%) enrolled in Junior Colleges represented the largest area where terminees had taken additional vocational training.

Of the 149 responding terminees, 75 (50.3%) had taken part in one additional vocational training program since leaving their high school program. Ten (6.7%) enrolled in two training programs, and six (4.0%) terminees had enrolled in three vocational training programs. Seventy-one (47.7%) indicated they had not enrolled in any additional vocational training.

The following is a listing of the "Other" (Table 25) vocational education training terminees indicated they had participated in:

"Other" Vocational Training	Number
Continued after graduation	1
Construction	1
Home study program	1
Electronics	1
Job corps	1
Machinist	1

Table 26 points out the additional programs the 1973-74 secondary Drafting terminees were presently attending beyond their high school training by whether these programs were related to their high school vocational program.

Of the 149 1973-74 secondary Drafting terminees who responded to the survey, two (1.3%) were attending an on-the-job training program (employer-sponsored), 18 (12.1%) were attending a vocational-technical institute, 26 (17.4%) were attending a junior college, 17 (11.4%) were attending a four year college or university, none were attending a public adult vocational program or apprenticeship program, one (0.7%) was attending private business or trade school, and six (4.0%) were attending some other type of school or educational program. (See

page 33 for the listing of the other types of schools or educational programs students were attending.)

TABLE 26

PROGRAMS PRESENTLY ATTENDED BY THE 1973-74 SECONDARY DRAFTING TERMINEES BY WHETHER THESE PROGRAMS WERE RELATED TO THEIR HIGH SCHOOL VOCATIONAL EDUCATION PROGRAM[A]

Programs Attended	Terminees		Program Related to High School VED Program			
			Yes		No	
	No.	%	No.	%	No.	%
On-the-job training (employer-sponsored)	2	1.3	1	0.7	1	0.7
Vocational-technical institute (Trade School)	18	12.1	16	10.7	2	1.3
Junior College	26	17.4	13	8.7	13	8.7
Four year college or university	17	11.4	7	4.7	10	6.7
Public school adult vocational program	0	0.0	0	0.0	0	0.0
Private business or trade school	1	0.7	1	0.7	0	0.0
Apprenticeship program	0	0.0	0	0.0	0	0.0
Other[B]	6	4.0	2	1.3	4	2.7
TOTAL	70	46.9	40	26.8	30	20.1

[A]All percentages were based on the 149 responding terminees.

[B]See page 33 for listing of "Other" schools or educational institutions terminees were attending.

Seventy (46.9%) of the 149 Drafting terminees were presently continuing their education. Forty (26.8%) of the terminees were continuing their education in a program related to their high school vocational program. Thirty (20.1%) were attending a program in an area not related to their high school vocational program.

The following is a listing of the "Other" category (Table 26) of additional programs the 1973-74 Drafting termineeS were attending:

"Other" School or Program	Number
High school	4
Business college	1
Cook	1
Drafting school	1
Carpenter's helper	1
Adult education program for graduation credit	1

Of the 149 responding termineeS, 95 (63.8%) indicated they were not attending a school or program but would like to do so. The following is a list of the areas in which these termineeS desired to study:

Area of Study	Number
Drafting	45
Engineering	10
Welding	4
Architecture	4
Architectural drafting	4
Mechanical drafting	3
Architecture	3
Mechanics	3
Electronics	3
Uncertain	3
Machinery	2
Mechanical engineering	1
Business	1
On job training	1
Pipe design	1
Woodwork	1
Secretarial training	1
Electricity	1
Air conditioning/refrigeration	1
Art	1

Thirty-five (23.5%) of the 149 responding termineeS indicated they were not attending a school or program and did not desire to do so. Nineteen (12.8%) termineeS did not respond to the question.

Job Placement Information

The following section of this report presents information concerning job placement of the 1973-74 Drafting terminees.

Table 27 points out whether the 1973-74 Drafting terminees were seeking full-time employment when they left their high school vocational program and if their vocational teacher attempted to help them get a job.

TABLE 27

WHETHER VOCATIONAL TEACHER ATTEMPTED TO HELP 1973-74 DRAFTING TERMINEES GET A JOB IF SEEKING FULL-TIME EMPLOYMENT UPON LEAVING THE HIGH SCHOOL VOCATIONAL PROGRAM[A]

Vocational Teacher Attempted To Get Terminee A Job	Number	Percent
Yes	37	48.1
No	40	51.9
TOTAL	77	100.0

[A]Sixty-six (44.3%) of the responding terminees indicated they were not seeking full-time employment when they left their high school vocational program. Six terminees did not respond to the question.

Of the 77 responding 1973-74 Drafting terminees indicating they were seeking full-time employment when they left their high school vocational program, 37 (48.1%) indicated that their vocational teacher attempted to help them get a job. However, 40 (51.9%) of the terminees seeking full-time employment indicated that their vocational teacher did not attempt to help them secure employment. It was interesting to note that 66 (44.3%) of the reporting 1973-74 Drafting terminees indicated they were

not seeking full-time employment when they left their high school vocational program.

Table 28 illustrates how long it took the 1973-74 Drafting terminees to get their first full-time job after they left their high school vocational program and began actively seeking full-time employment.

TABLE 28

LENGTH OF TIME IT TOOK THE 1973-74 DRAFTING TERMINEES TO SECURE FIRST FULL-TIME JOB AFTER LEAVING HIGH SCHOOL VOCATIONAL PROGRAM AND BEGINNING ACTIVELY SEEKING FULL-TIME EMPLOYMENT[A]

Time to Secure First Full-Time Job	Number	Percent
0 - 2 weeks	26	46.4
3 - 4 weeks	11	19.6
5 - 8 weeks	7	12.5
9 - 12 weeks	5	8.9
13 or more weeks	7	12.5
TOTAL	56	100.0

[A]Thirty-three terminees indicated they already had a job when they left their high school vocational program.

Twenty-six (46.4%) of the 56 Drafting terminees secured their first full-time job within two weeks after they left their high school vocational program and began actively seeking full-time employment. However, seven (12.5%) of the terminees took 13 or more weeks to secure their first full-time job. There were 33 terminees who indicated they already had a job when they left their high school vocational program.

Table 29 shows how the 1973-74 Drafting terminees indicated they got their first full-time job after leaving their high school vocational program.

Of the 62 1973-74 Drafting terminees who responded to the survey item, 21 (33.9%) indicated they got their first full-time job after leaving their

high school vocational program through applications to business and industry. Twenty-six (41.9%) of the terminees indicated they got their first full-time job through a friend or relative. These represented the two methods that the largest number of Drafting terminees utilized to secure their first full-time job. Only six (9.7%) of the terminees indicated they secured their first job through their vocational teacher. One (1.6%) student indicated that a counselor got him his first full-time job after leaving his vocational program. Those students who already had a job before leaving their high school vocational program were not shown in Table 29. (See Table 30, page 37)

TABLE 29

HOW THE 1973-74 DRAFTING TERMINEES INDICATED THEY GOT THEIR FIRST FULL-TIME JOB AFTER LEAVING THEIR HIGH SCHOOL VOCATIONAL PROGRAM

How Terminees Secured First Full-Time Job	Number	Percent
Through your vocational teacher	6	9.7
Through your counselor	1	1.6
Through other school teachers or administrators	0	0.0
Through a friend or relative	26	41.9
Through applications to business of industry	21	33.9
Through state (local) employment office	2	3.2
Through a private employment agency	2	3.2
Through radio, T.V., newspaper, or other news media	1	1.6
Other[A]	3	4.8
TOTAL	62	100.0

[A]See listing on page 37 for the "Other" ways terminees indicated they secured their first full-time job after leaving their high school vocational program.

Three terminees specified the means by how they secured their first full-time jobs after leaving their high school vocational program. The following list indicates the "Other" means the terminees indicated.

"Other" Means for Securing First Full-Time Job	Number
By asking for it	1
Father	1
Other vocational teacher	1

Table 30 shows how the 1973-74 Drafting terminees who were working while in high school taking their vocational program indicated they got that job.

TABLE 30

HOW THE 1973-74 DRAFTING TERMINEES WHO WERE WORKING WHILE IN HIGH SCHOOL TAKING THEIR VOCATIONAL PROGRAM INDICATED THEY GOT THAT JOB[A]

Who or What Helped Terminee Get Job	Number	Percent
Your vocational teacher	10	18.9
Your counselor	1	1.9
Other school teachers or administrators	3	5.7
Friend or relative	22	41.5
Applications to business or industry	8	15.1
State (local) employment office	0	0.0
Private employment agency	0	0.0
Radio, T.V., newspaper, or other news media	0	0.0
Other	9	17.0
TOTAL	53	100.0

[A]Ninety-four (63.1%) terminees indicated they had no job during the time they were in high school taking their vocational course, thus did not respond to the question.

Fifty-three (35.6%) of the 149 reporting 1973-74 Drafting terminees indicated they were working during the time they were in high school taking their vocational program. Of those terminees working while in high school, ten (18.9%) got their job through their vocational instructor, 22 (41.5%) through a friend or relative, and eight (15.1%) got jobs through applications to business or industry. These three means were the ways

most of the terminees secured a job while they were still in high school taking their vocational program.

Table 31 reveals the indications of the 1973-74 Drafting terminees as whether, before taking their first job, they looked for employment within daily walking or driving distance of home by how their first job related to their vocational training.

TABLE 31

INDICATIONS OF 1973-74 DRAFTING TERMINEES AS TO WHERE THEY LOOKED FOR THEIR FIRST JOB BEFORE TAKING ONE BY HOW THEIR FIRST JOB RELATED TO THEIR TRAINING[A]

Before Taking First Job, Where Terminees Looked for Job	Total Reporting		Total Reporting by Relatedness of First Job to Vocational Training					
			Directly Related		Somewhat Related		Not Related	
	No.	%	No.	%	No.	%	No.	%
Within daily walking or driving distance of home	58	87.9	10	83.3	13	81.2	35	92.1
Beyond daily walking or driving distance of home[B]	8	12.1	2	16.7	3	18.8	3	7.9
TOTAL	66	100.0	12	100.0	16	100.0	38	100.0

[A]Twenty terminees indicated they already had their first job while in high school. Of those 20 terminees, two (10.0%) were working in a directly related area, six (30.0%) in a somewhat related area, while 12 (60.0%) were working in a non-related area.

[B]See listing, page 39, for reasons terminees gave for seeking their first job away from home.

Fifty-eight (87.9%) of the 1973-74 Drafting terminees who were employed in their first job indicated they sough employment within daily walking or driving distance of home. Eight (12.1%) terminees indicated

before taking their first job, they looked for a job beyond daily walking or driving distance of home.

Of the 12 terminees working in a directly related area, only two (16.7%) sought employment beyond daily walking or driving distance of home.

It is interesting to note that of the 38 terminees whose first jobs did not relate to their training, only three of those terminees sought employment beyond daily walking or driving distance of home.

Twenty terminees indicated they had their first job while in high school. Of those 20 terminees, two (10.0%) were working in a directly related area, six (30.0%) in a somewhat related area, and 12 (60.0%) were working in a non-related area.

The following is a listing of reasons terminees gave for seeking a job beyond daily walking or driving distance of their home before accepting their first job. Of the eight terminees who indicated they sought a job beyond daily walking or driving distance of home before accepting their first job, five gave reasons why they sought that job.

Reasons for Seeking Job Beyond Daily Walking or Driving Distance Before Accepting First Job	Number
No jobs available	2
Father had a job for me	1
Birmingham	1
Everywhere	1

Table 32 reveals the indications of the 1973-74 Drafting terminees who were working in their first job not related to their training by whether or not they tried to get a job related to their training by where they looked for employment before accepting that first job.

It is important to note that of the 38 terminees who were working in a non-related first job, only one (2.6%) sought related employment

beyond daily walking or driving distance of home before accepting his first job.

TABLE 32

INDICATIONS OF THE 1973-74 DRAFTING TERMINEES WORKING IN FIRST JOB NOT RELATED TO THEIR TRAINING BY WHETHER OR NOT THEY TRIED TO GET A JOB RELATED TO THEIR TRAINING BY WHERE THEY LOOKED FOR EMPLOYMENT BEFORE ACCEPTING FIRST JOB[A]

Where Terminees Working in Non-Related Areas Looked for Employment Before Accepting First Job	Total Reporting		Before Accepting This First Job Unrelated to Training Whether Terminees Sought Job in Related Area			
			Yes		No[B]	
	No.	%	No.	%	No.	%
Sought employment within daily walking or driving distance of their home	35	92.1	22	95.7	13	86.7
Sought employment beyond daily walking or driving distance of their home	3	7.9	1	4.3	2	13.3
TOTAL	38	100.0	23	100.0	15	100.0

[A]Totals in this table may not correspond with totals of terminees for non-related categories in other tables for the following reasons: (1) some terminees had jobs when leaving program and did not have to seek employment and (2) some terminees failed to respond to one or more of the related questions from which data was drawn.

[B]See page 21 for the listing of reasons terminees who were working in non-related jobs gave for not trying to secure a job that was related to their training.

Table 33 illustrates the indications of the 1973-74 Drafting terminees as to where they looked for a job before taking their present job by how their present job is related to their vocational training.

Fifty-six (83.6%) of the presently employed 1973-74 Drafting terminees indicated they sought employment within daily walking or driving distance of home. Eleven (16.4%) terminees indicated they sought employment beyond daily walking or driving distance of home.

TABLE 33

INDICATIONS OF 1973-74 DRAFTING TERMINEES AS TO WHERE THEY LOOKED FOR A JOB BEFORE TAKING THEIR PRESENT JOB BY HOW THEIR PRESENT JOB RELATED TO THEIR TRAINING[A]

Where Terminees Looked for Job Before Taking Present Job	Total Reporting		Total Reporting by Relatedness of Present Job to Vocational Training					
			Directly Related		Somewhat Related		Not Related	
	No.	%	No.	%	No.	%	No.	%
Within daily walking or driving distance of home	56	83.6	11	78.6	14	93.3	31	81.6
Beyond daily walking or driving distance of home[B]	11	16.4	3	21.4	1	6.7	7	18.4
TOTAL	67	100.0	14	100.0	15	100.0	38	100.0

[A]Fifteen terminees reported they already had their present job while in high school. Of those 15 terminees, two (13.3%) were in a directly related area, five (33.3%) in a somewhat related area, while eight (53.3%) were working in a non-related area.

[B]See listing, page 42, for reasons terminees gave for seeking their present job away from home.

Of the 14 terminees who were working in a directly related area, only three (21.4%) sought employment beyond daily walking or driving distance of home.

Of the 38 terminees who were presently working in a non-related area, only seven (18.4%) sought employment beyond daily walking or driving distance of their home.

Fifteen terminees reported they already had their present job while in high school. Of those 15 terminees, two (13.3%) were in directly related areas, five (33.3%) in somewhat related areas, and eight (53.3%) were in non-related areas.

The following is a list of reasons terminees gave for seeking a job beyond daily walking or driving distance of their home before accepting their present job. All the terminees who indicated they sought a job beyond daily walking or driving distance of home before accepting their present job gave reasons why they sought that job.

Reasons for Seeking Job Beyond Daily Walking or Driving Distance Before Accepting Present Job	Number
No job openings	4
More opportunity in bigger towns	1
Needed employment desperately	1
Everywhere	1
More money	1
Birmingham	1
Went to New York	1
Was interested about getting in field	1

Table 34 reveals the indications of the 1973-74 Drafting terminees who were working in their present job not related to their training by whether or not they tried to get a job related to their training by where they looked for employment before accepting that present job.

Only four (10.3%) of the 39 terminees who were working in a non-related area sought related employment beyond daily walking or driving distance of home before accepting their present job.

TABLE 34

INDICATIONS OF THE 1973-74 DRAFTING TERMINEES WORKING IN PRESENT JOB NOT RELATED TO THEIR TRAINING BY WHETHER OR NOT THEY TRIED TO GET A JOB RELATED TO THEIR TRAINING BY WHERE THEY LOOKED FOR EMPLOYMENT BEFORE ACCEPTING PRESENT JOB[A]

Before Accepting Present Job Where Terminees Working in Non-Related Areas Looked for Employment	Total Reporting		Before Accepting This Present Job Unrelated to Training Whether or Not Terminees Sought Job in Related Area			
			Yes		No[B]	
	No.	%	No.	%	No.	%
Sought employment within daily walking or driving distance of their home	33	84.6	24	85.7	9	81.8
Sought employment beyond daily walking or driving distance of their home	6	15.4	4	14.3	2	18.2
TOTAL	39	100.0	28	100.0	11	100.0

[A]Totals in this table may not correspond with totals of terminees for non-related categories in other tables for the following reasons: (1) some terminees had jobs when leaving programs and did not have to seek employment and (2) some terminees failed to respond to one or more of the related questions from which data was drawn.

[B]See page 25 for the listing of reasons terminees who were working in non-related jobs gave for not trying to secure a job that was related to their training.

APPENDIX

PRESENT JOB AND FIRST JOB TITLES OF THE
1973-74 DRAFTING TERMINEES

PRESENT JOB AND FIRST JOB TITLES OF THE 1973-74 DRAFTING TERMINEES

For those terminees who indicated present or first job occupations, this appendix lists the present job title and first job title. The job titles are listed as the terminees reported them. The number of full-time jobs held by these terminees since completing their high school vocational course is listed, current employment status is listed, and whether the student intended to get a job in the area while in the program.

The following code is used to identify the employment status of the terminees:

0. Unemployed, but seeking employment
1. Employed full time
2. Employed part time, seeking full-time job
3. Employed part time, not seeking full-time job
4. Employed full time and attending school
5. Employed part time and attending school
6. Unavailable for employment

The following code is used to identify whether the student intended to get a job in the area while in the program:

1. No
2. Was not sure
3. Yes

The number in parenthesis behind the job titles indicates the relatedness of the high school vocational training to these jobs. The terminees

made the judgment as to the relatedness of their training to these jobs. The following is used to identify this relatedness:

1. Directly related
2. Somewhat related
3. Not related

The total does not correspond to the total reporting since some of the terminees failed to indicate the title of their present position. If the first job title was the same as the present job title, the first job title is included under the present job title.

TITLE: AUTOMOBILE MECHANICS FOLLOW-UP. FOLLOW-UP OF 1973-74 AUTOMOBILE MECHANICS TERMINEES FROM THE SECONDARY SCHOOL VOCATIONAL PROGRAMS OF ALABAMA. RESEARCH AND DEVELOPMENT REPORT NO. 39.

PERSONAL AUTHOR: BURKS, BONNIE J.; DRAKE, JAMES BOB

DESCRIPTOR: *AUTO MECHANICS; *VOCATIONAL FOLLOWUP; *OCCUPATIONAL SURVEYS; *STATE SURVEYS; *SECONDARY EDUCATION; VOCATIONAL EDUCATION

IDENTIFIER: ALABAMA

EDRS PRICE: MF AND HC AVAILABILITY WILL BE ANNOUNCED IN VOL. 10, NO. 2.

DESCRIPTIVE NOTE: 62P.; RELATED DOCUMENTS VT 103 321 THROUGH VT 103 335 IN THIS ISSUE.

ABSTRACT: THIS REPORT RELATES THE FINDINGS OF A STATEWIDE FOLLOWUP SURVEY OF 1973-74 AUTOMOBILE MECHANICS TERMINEES FROM THE SECONDARY SCHOOL VOCATIONAL PROGRAMS IN ALABAMA. QUESTIONNAIRES WERE MAILED TO 930 STUDENT TERMINEES APPROXIMATELY SEVEN TO EIGHT MONTHS AFTER LEAVING SCHOOL. RETURNS WERE RECEIVED FROM 221 (23.8 PERCENT) OF THE AUTO MECHANICS TERMINEES FROM THE INITIAL MAILING AND ONE FOLLOWUP. DATA ARE PRESENTED IN TABLES WITH ACCOMPANYING NARRATIVE SUMMARIES ORGANIZED ACCORDING TO THESE MAJOR SECTIONS: GENERAL INFORMATION ON THE TERMINEES; BASIC INFORMATION RELATED TO THE VOCATIONAL PROGRAM; BASIC EMPLOYMENT INFORMATION; CONTINUING EDUCATION INFORMATION; AND JOB PLACEMENT INFORMATION. PRESENT AND FIRST JOB TITLES OF THE 1973-74 AUTO MECHANICS TERMINEES ARE APPENDED. (NJ)

For their help in refining the survey instrument, special thanks are due the following state supervisors:

Mrs. Divine Bauer, Health Occupations Education
Miss Evelyn Cotney, Home Economics Education
Mr. H. W. Green, Agribusiness Education
Mr. J. C. Lindley, Trade & Industrial Education
Mrs. Anacile Kurth, Distributive Education
Mrs. Sandra Yelverton, Business and Office Education

Appreciation is also extended to the following members of the Occupational Research and Development Unit for their contribution to the study:

Mr. Paul Davis, Research Associate
Mr. Gary Greenshields, Graduate Research Assistant
Mr. John Gross, Research Associate
Mr. James McMath, Graduate Research Assistant
Dr. Alice S. Morgan, Assistant Professor
Miss Flossi Sergen, Secretary
Mr. Ed Williams, Duplicating Operator

FOLLOW-UP OF 1973-74 AUTOMOBILE MECHANICS
TERMINEES FROM THE SECONDARY SCHOOL
VOCATIONAL PROGRAMS OF ALABAMA

Alabama continues to support one of the most progressive and comprehensive vocational education programs in the nation. In addition to serving youth and adults by training them for gainful and useful employment, the diversification of vocational courses meets a serious job need and contributes to the industrial development in the state.

With the millions of tax dollars being spent on vocational education, it is necessary to attempt to account to the taxpayer and decision-makers on the results of those expenditures. Terminee student follow-up studies constitute one of the most valuable techniques for assessing vocational education system outcomes.

The Alabama State Department of Education, Division of Vocational Education and Community Colleges, recognizing this important phase of accountability and evaluation, initiated the development of a statewide follow-up system for its vocational education program terminees at the secondary school level. The Division, under the direction of Dr. T. L. Faulkner, State Director, contracted with the Occupational Research and Development Unit at Auburn University to develop and implement the statewide follow-up system for all its secondary vocational terminees in all service areas.

This report relates the findings of the survey instrument mailed to the 1973-74 Automobile Mechanics terminees from the secondary school

vocational programs of Alabama. When the terminees received the questionnaire, most had been out of school seven to eight months.

General Information

Student rosters with names and addresses of 1973-74 Automobile Mechanics terminees were received from 107 secondary school vocational teachers in Alabama. Of the 107 teachers from which student rosters were received, 36 were in Secondary Area Vocational Centers (AVC) and 72 were in programs in schools of other settings. (One teacher taught students in both settings.) The total of 930 student terminees reported to the ORDU were mailed the follow-up forms. Returns were received from 221 (23.8%) Automobile Mechanics terminees from the initial mailing and one follow-up. At least one student questionnaire was received from 73 of the 107 programs.

All terminees reported in this study were in programs administered only by the Trade and Industrial Section of the Division of Vocational Education and Community Colleges, State Department of Education.

Table 1 presents data relative to the total population of Automobile Mechanics terminees and the number of returns categorized by type school and termination status as reported by teachers.

TABLE 1

DESCRIPTION OF TOTAL POPULATION AND RETURNS OF 1973-74 AUTOMOBILE MECHANICS TERMINEES BY TYPE SCHOOL AND TERMINATION STATUS[A]

Type School and Termination Status	Total Number Reported	Number of Returns	Percent of Returns
Area Vocational Centers			
Total	482	127	26.3
Completers[B]	306	100	32.7
Dropouts[C]	176	27	
Other Type Schools			
Total	448	94	21.0
Completers	324	81	25.0
Dropouts	124	13	10.5
Grand Total	930	221	23.8
Completers	630	181	28.7
Dropouts	300	40	13.3

[A]These Automobile Mechanics terminees were terminees in programs administered only under the service area of Trade and Industrial Education, State Department of Education.

[B]Any terminee who left the program by completing or by high school graduation.

[C]Any terminee the instructor reported as having dropped out of school.

Table 2 illustrates the sex characteristics of those 1973-74 Automobile Mechanics terminees reported by the instructors and those who returned survey forms.

TABLE 2

SEX OF THE 1973-74 AUTOMOBILE MECHANICS TERMINEES REPORTED AND BY WHO RETURNED QUESTIONNAIRES

Sex[A]	Reported		Returns	
	Number	Percent	Number	Percent
Male	892	95.9	212	95.9
Female	6	0.6	4	1.8
Not Known	32	3.4	5	2.3
TOTAL	930	100.0	221	100.0

[A]Sex as reported by teacher.

Table 3 presents the racial or ethnic characteristics of those 1973-74 Automobile Mechanics terminees reported by instructors and who returned survey forms.

TABLE 3

RACIAL OR ETHNIC CHARACTERISTICS OF THE 1973-74 AUTOMOBILE MECHANICS TERMINEES REPORTED AND BY WHO RETURNED QUESTIONNAIRES

Racial or Ethnic Group[A]	Reported		Returns	
	Number	Percent	Number	Percent
American Indian	0	0.0	0	0.0
Black	230	24.7	42	19.0
Oriental	1	0.1	0	0.0

Eleventh	108	11.6	10	9.3
Twelfth	64	6.9	10	15.6
Grade Level Not Indicated by Teacher	17	1.8	1	5.9
TOTAL	300	32.3	40	13.3

[A]Percentage is based on 930 total reported terminees.

[B]Percentage is based on returns by grade.

Table 5 shows the number of 1973-74 Automobile Mechanics terminees who indicated whether they were in active full-time military service.

TABLE 5

ACTIVE FULL-TIME MILITARY STATUS OF 1973-74 AUTOMOBILE MECHANICS TERMINEES WHO RETURNED QUESTIONNAIRES

Active Full-Time Military Status	Number	Percent
Yes	7	3.2
No	205	92.8
No Response	9	4.1
TOTAL	221	100.0

Basic Information Related to the Vocational Education Program

Table 6 points out the number of 1973-74 Automobile Mechanics terminees who indicated whether this vocational program was a school requirement.

TABLE 6

1973-74 AUTOMOBILE MECHANICS TERMINEES WHO INDICATED WHETHER THEIR VOCATIONAL PROGRAM WAS A SCHOOL REQUIREMENT

Vocational Courses Was a School Requirement	Number	Percent
Yes	7	3.2
No	213	96.4
No Response	1	0.5
TOTAL	221	100.0

Table 7 indicates, according to the 1973-74 Automobile Mechanics terminees, the primary source of influence in selecting their vocational course.

TABLE 7

PRIMARY INFLUENCES ON THE 1973-74 AUTOMOBILE MECHANICS TERMINEES IN SELECTING THEIR VOCATIONAL COURSE

Group or Individual Terminees Felt Influenced Them Most in Selecting Vocational Course	Number	Percent
Parent(s) or Guardian(s)	7	3.2
Guidance Counselor	8	3.6
Your Vocational Teacher	10	4.5
Another Teacher or Principal	5	2.3
Student in VED Program	11	5.0
A Friend or Relative	9	4.1
A Businessman	3	1.4
Made Choice Yourself	166	75.1
Other	1	0.5
No Response	1	0.5
TOTAL	221	100.0

A student in the VED program appeared to be the greatest outside influence on those terminees enrolling in the Automobile Mechanics program. Eleven (5.0%) of the terminees responding indicated that a student in the VED program influenced them most in selecting their Automobile Mechanics course. However, 166 (75.1%) indicated that they selected their course of study on their own. Ten terminees (4.5%) indicated that a vocational teacher influenced them most in selecting their program. Nine (4.1%) of the terminees indicated that a friend or relative influenced them most in selecting their Automobile Mechancics course.

Below is the response given to the "Others" category indicated in Table 7 as to the primary source of influence in selecting the vocational course.

"Other" Persons or Groups Who Most Influenced Terminees in Selecting Their VED Course	Number
Because I wanted this to be my work	1
Body and fender didn't have room	1
Me	1

Table 8 indicates terminees opinions as to whether they had adequate job or occupational information and school experiences to make a realistic career choice.

TABLE 8

OPINIONS OF 1973-74 AUTOMOBILE MECHANICS TERMINEES AS TO WHETHER THEY HAD ADEQUATE JOB OR OCCUPATIONAL INFORMATION AND SCHOOL EXPERIENCES TO MAKE A REALISTIC CAREER CHOICE

Opinion	Number	Percent
Yes	167	75.6
No	50	22.6
No Response	4	1.8
TOTAL	221	100.0

Table 9 indicates whether, during the time they were taking their high school vocational program, the reporting 1973-74 terminees intended to get a job in Automobile Mechanics.

TABLE 9

INDICATIONS OF 1973-74 AUTOMOBILE MECHANICS TERMINEES AS TO WHETHER, DURING THE TIME THEY WERE TAKING THEIR HIGH SCHOOL VED PROGRAM, THEY PLANNED TO GET A JOB IN THEIR AREA OF STUDY

Intended To Get Job In Area of Study	Number	Percent
Yes	109	49.3
No	34	15.4
Was Not Sure	77	34.8
No Response	1	0.5
TOTAL	221	100.0

It is interesting to note that only 109 (49.3%) of the 1973-74 reporting Automobile Mechanics terminees indicated that during the time they were taking their Automobile Mechanics program, they intended to get a job in the area they were studying.

Table 10 indicates terminees' opinions on choosing the Automobile Mechanics program if they had the selection to make again.

A noteworthy point was revealed by the data. Of the 1973-74 Automobile Mechanics terminees, 175 (79.2%) indicated that they would select the same vocational program if they had the choice to make again. Only nine (4.1%) of the responding terminees indicated that they would not take a vocational program.

TABLE 10

OPINIONS OF 1973-74 AUTOMOBILE MECHANICS TERMINEES REGARDING THEIR VOCATIONAL PROGRAM

Question: If You Had It To Do Over Again, Would You...?	Number	Percent
Take the same vocational program	175	79.2
Not take a vocational program	9	4.1
Choose another vocational program offered in your school, such as _____ [A]	19	8.6
Choose another vocational program if it had been offered in your school, such as _____ [B]	10	4.5
No Response	8	3.6
TOTAL	221	100.0

[A] See listing IA below for those other vocational programs offered in terminees' school that they would have taken instead of their Automobile Mechanics program.

[B] See listing IB on page 10 for the vocational programs the terminees would have taken instead of their Automobile Mechanics program if it had been offered in their school.

Listing IA -- Courses offered in their school that Automobile Mechanics terminees indicated they would have taken if they had it all to do over again.

Course	Number
Welding	7

Table 11 indicates the extent to which the reporting 1973-74 Automobile Mechanics terminees felt their high school vocational programs prepared them for their first job. This data was also broken down by how that first job related to their vocational program.

Terminees who were in full-time active military service or who had never been employed were not asked to respond to the questions from which this data was reported. Also, the terminees who failed to respond to the question items were not indicated in the table.

In noting the extent to which the 1973-74 Automobile Mechanics terminees felt their high school vocational course prepared them for their first full-time job by how their first full-time job related to the training they received in their high school Automobile Mechanics program, some interesting points were revealed. Sixty-three (43.2%) of the 1973-74 Automobile Mechanics terminees responding to this item indicated "Excellent" or "Well Prepared" for their first full-time job as a result of the training

received in their high school vocational education program. Thirty-two (82.1%) of the 39 terminees employed in their first full-time job related directly to their training felt they were excellent or well prepared for this first job. No terminee working in an area directly related to his vocational training felt that he was poorly prepared for his first job. There was an additional terminee who indicated that he was working in an area directly related to his vocational course and felt that his preparation did not relate to his job. Of all the responding terminees, only three (2.0%) felt that they were poorly prepared for their first full-time job. Of these, no terminee was working in an area directly related to his vocational course.

TABLE 11

PERCEPTIONS OF 1973-74 AUTOMOBILE MECHANICS TERMINEES AS TO THE EXTENT THEIR HIGH SCHOOL VOCATIONAL PROGRAM PREPARED THEM FOR THEIR FIRST FULL-TIME JOB BY HOW FIRST FULL-TIME JOB RELATED TO TRAINING

Extent Vocational Course Prepared for First Full-Time Job	Total Reporting		Number Reporting by Relatedness of First Full-Time Job to Training Received					
			Directly Related		Somewhat Related		Not Related	
	No.	%	No.	%	No.	%	No.	%
Excellent	16	11.0	12	30.8	2	5.0	2	3.0

Fair[A]	23	14.8	5	12.8	11	25.6	7	9.6
Poorly Prepared	4	2.6	0	0.0	2	4.7	2	2.7
Preparation not related to job	58	37.4	2	5.1	4	9.3	52	71.3
TOTAL	155	100.0	39	100.0	43	100.0	73	100.0

[A]See listing on Page 13 for reasons terminees specified for only being trained "Fair" by their vocational course for their present job.

Terminees in active full-time military service, and students who were attending school full time and had not had a job, were not asked to respond to the question from which Table 12 was prepared. Also, those other students who failed to respond to the items were not shown on the table.

Of the 155 terminees responding to these items, 70 (45.2%) indicated "Excellent" or "Well Prepared" for their present job as a result of their high school vocational program. Only four (2.6%) terminees reported feeling poorly prepared for their present jobs as a result of their training.

Thirty-two (82.1%) of the 39 responding terminees working in an area directly related to their high school vocational program indicated that they felt excellent or well prepared by their training.

Twenty-two terminees who indicated "fair" as the extent their vocational program prepared them for this present job indicated reasons for this. The following lists the reasons the 1973-74 Automobile Mechanics terminees indicated for being trained only "fair" by their vocational course for their present job:

I did not want to learn
I did little welding
I was trained for auto mechanics. I'm a technician.
I stopped going
Only books to study from
Didn't have mechanics specialist
Work at a parts store
Bodywork only
Vocational school didn't cover type of work
Course not long enough
One year of course
I'm a lift truck mechanic
Mostly the same job
Moved after school
In school we didn't study electrical systems
Didn't go long enough
Distantly related
Type of job - horse trainer
Now work in parts department
Understanding it
Because of service station
Started late

The terminees who indicated they were "poorly prepared" for their present job by their vocational program gave reasons why they felt that way:

Didn't weld in auto shop that much
It didn't teach it
Not working on gas engines
Poor training

Table 13 focuses on the Automobile Mechanics student club. The researchers sought to determine the extent to which the 1973-74 Automobile Mechanics terminees felt that their high school student club aided in preparing them for their present job. Data are also broken down by the relationship of the present job to the vocational training received.

TABLE 13

PERCEPTIONS OF 1973-74 AUTOMOBILE MECHANICS TERMINEES AS TO THE EXTENT THEIR HIGH SCHOOL VOCATIONAL STUDENT CLUB PREPARED THEM FOR THEIR PRESENT JOB BY HOW THEIR PRESENT JOB RELATED TO TRAINING[A]

Extent High School Vocational Student Club Helped Prepare for Present Job	Total Reporting		Total Reporting by Relatedness of Present Job to Vocational Training					
			Directly Related		Somewhat Related		Not Related	
	No.	%	No.	%	No.	%	No.	%
Excellent	9	10.8	5	18.5	2	7.7	2	6.7
Well Prepared	38	45.8	12	44.4	14	53.8	12	40.0
Fair	22	26.5	5	18.5	9	34.6	8	26.7
Poorly Prepared	14	16.9	5	18.5	1	3.8	8	26.7
TOTAL	83	100.0	27	100.0	26	100.0	30	100.0

[A]Of the 155 who responded, 18 (11.6%) had no related student club available and 54 (34.8%) were not members of a related student club.

Only respondents who had had a job since terminating their high school vocational Automobile Mechanics program were asked to respond to the question reported in Table 13. Students in active full-time military service were excluded. Eighteen (11.6%) of the 155 terminees reported no related student club was available, while 54 (34.8%) were not members of a related student club.

Forty-seven (56.6%) of the 83 terminees who participated in student club activities indicated they were "Excellent" or "Well Prepared" by their related student club for their present job. Fourteen (16.9%) indicated they were "Poorly Prepared" by their related student club for their present job. Of those 14, six (42.6%) were in directly related or somewhat related jobs while eight (57.1%) were in non-related jobs.

Of those 27 terminees working in an area directly related to the training they received in their high school vocational program, 17 (62.9%) revealed that they were "Excellent" or "Well Prepared" for their present jobs by their related student clubs. Only five (18.5%) of the 27 terminees working in a job directly related to the training they received indicated they were "Poorly Prepared" for their present jobs by their related student clubs.

Table 14 reports how the 1973-74 Automobile Mechanics terminees rated the quality of teaching by their high school vocational instructors.

Of the 221 reporting 1973-74 Automobile Mechanics terminees, 195 (88.3%) rated the quality of teaching by their vocational instructor either "Good" or "Excellent". Only eight (3.7%) rated the quality of teaching by their instructors "Poor" or "Very Poor".

TABLE 14

1973-74 AUTOMOBILE MECHANICS TERMINEES' RATINGS OF THE QUALITY OF TEACHING BY THEIR HIGH SCHOOL VOCATIONAL INSTRUCTORS

Rating	Number	Percent
Excellent	110	49.8
Good	85	38.5
Fair	18	8.1
Poor	5	2.3
Very Poor	3	1.4
No Response	0	0.0
TOTAL	221	100.0

Table 15 illustrates how the 1973-74 Automobile Mechanics terminees rated their high school vocational instructor's interest in their class work.

TABLE 15

1973-74 AUTOMOBILE MECHANICS TERMINEES' RATINGS OF THEIR HIGH SCHOOL VOCATIONAL INSTRUCTOR'S INTEREST IN THE STUDENT'S CLASS WORK

Rating	Number	Percent
Excellent	89	40.3
Good	102	46.2
Fair	17	7.7
Poor	9	4.1
Very Poor	4	1.8
No Response	0	0.0
TOTAL	221	100.0

Of the 221 reporting 1973-74 Automobile Mechanics terminees, 191 (86.5%) rated the interest exhibited by their high school vocational instructor in their class work as "Good" or "Excellent". Only 13 (5.9%)

of the terminees rated the interest their vocational instructors showed in their class work as "Poor" or "Very Poor".

Table 16 points out how the 1973-74 Automobile Mechanics terminees subjectively rated the knowledge their vocational teachers possessed about their field of study. This rating is also shown in the table by a breakdown of how the terminees' present job related to the training they received in their high school vocational program. Terminees were asked to base their judgments on their current knowledge of their job and responsibilities.

TABLE 16

1973-74 AUTOMOBILE MECHANICS TERMINEES' RATINGS OF THE KNOWLEDGE THEIR HIGH SCHOOL VOCATIONAL TEACHER POSSESSED ABOUT THEIR FIELD OF STUDY BY HOW THE TERMINEES' PRESENT JOB RELATED TO THE TRAINING THEY RECEIVED

Ratings[A]	Total Reporting		Number Reporting by Relatedness of Present Job to Training Received					
			Directly Related		Somewhat Related		Not Related	
	No.	%	No.	%	No.	%	No.	%
Excellent	68	43.3	21	53.8	14	32.6	33	44.0
Good	65	41.4	13	33.3	21	48.8	31	41.3
Fair	20	12.7	4	10.3	7	16.3	9	12.0
Poor	3	1.9	0	0.0	1	2.3	2	2.7
Very Poor	1	0.6	1	2.6	0	0.0	0	0.0
TOTAL	157	100.0	39	100.0	43	100.0	75	100.0

[A]Ratings were to be based on terminee's judgment of their current knowledge of their job and responsibilities.

Total responses to this item indicates that 133 (84.7%) of the 157 responding 1973-74 Automobile Mechanics terminees rated the knowledge their vocational teachers possessed about their field of study either "Good" or "Excellent". For those 39 terminees working in an area directly related to the training they received 34 (87.1%) rated the knowledge their teachers possessed about their field of study as "Good" or "Excellent". A favorable point was revealed in that only one of those terminees rated the knowledge their vocational teachers possessed about their field of study as "Poor" or "Very Poor".

If the respondent was working in an area related to his training, he was asked to compare the facilities and equipment in his high school vocational program with those on his present job. Table 17 illustrates how the 1973-74 Automobile Mechanics terminees responded.

TABLE 17

HOW 1973-74 AUTOMOBILE MECHANICS TERMINEES WORKING IN A RELATED AREA RATED THE FACILITIES AND EQUIPMENT IN THEIR HIGH SCHOOL VOCATIONAL PROGRAM[A]

Rating[B]	Number	Percent
Better than those on present job	15	38.5
Similar to those on present job	18	46.2
Not as good as those on present job	6	15.4
TOTAL	39	100.0

[A]Sixty-three (61.8%) of the responding 102 terminees indicated that their present job was not related to their vocational training enough to compare facilities and equipment.

[B]Persons who had not had a job since leaving their vocational program, including those in military service and those who attended school, were not asked to respond to questions from which data was drawn. Returns were received from 221 terminees.

Fifteen (38.5%) of the 39 responding 1973-74 Automobile Mechanics terminees working in an area related to their training rated the facilities and equipment in their high school vocational program as better than those on their present job. Eighteen (46.2%) rated the facilities and equipment in their high school vocational program as similar to those on their present job; however, six (15.4%) rated the facilities and equipment not as good as those on their present job.

Table 18 shows how 1973-74 Automobile Mechanics terminees, who were in a cooperative work program in school and were now working in an area related to their vocational training, rated the facilities and equipment used in their cooperative work station.

TABLE 18

HOW 1973-74 AUTOMOBILE MECHANICS TERMINEES NOW WORKING IN A RELATED AREA, WHOSE VOCATIONAL PROGRAM INCLUDED COOPERATIVE WORK, RATED FACILITIES AND EQUIPMENT USED IN THEIR COOPERATIVE WORK STATION[A]

Rating[B]	Number	Percent
Better than those on present job	10	31.2
Similar to those on present job	16	50.0
Working at same place where cooperative training was done	4	12.5
Not as good as those on present job	2	6.2
TOTAL	32	100.0

[A]Fifteen (15.3%) of the responding 98 Automobile Mechanics terminees indicated their vocational program was not a cooperative program. Fifty-one (52.0%) terminees indicated they were not working in an area related to their cooperative work; therefore, they did not complete this item on the questionnaire.

[B]Persons who had not had a job since leaving their vocational program, including those in military service and those attending school, were asked not to respond to questions from which data was drawn. Returns were received from 221 terminees.

Ten (31.2%) of the 32 responding 1973-74 Automobile Mechanics terminees whose vocational programs had included cooperative work and were now working in an area related to their vocational training, rated the facilities and equipment in his cooperative work station as better than those on his present job. Sixteen (50.0%) rated the facilities and equipment in their cooperative training station as similar to those on their present job. Only two (6.2%) rated the facilities and equipment in their cooperative work station not as good as those in their present job. It was significant to note that four (12.5%) indicated they were working at the same establishment where they did their cooperative training.

Basic Employment Information

The following section of this report offers information relative to employment and job characteristics of the 1973-74 secondary Automobile Mechanics terminees.

Table 19 illustrates the number of full-time jobs the responding 1973-74 Automobile Mechanics terminees have had since leaving their high school vocational course.

There were 65 (29.4%) of the total 221 responding 1973-74 Automobile Mechanics terminees who had been employed in just one job since leaving their high school vocational program. Thirty-five (15.8%) of the terminees reported having two or more jobs since leaving their high school vocational course seven to eight months ago.

TABLE 19

NUMBER OF FULL-TIME JOBS HELD BY THE 1973-74 AUTOMOBILE MECHANICS TERMINEES SINCE LEAVING THEIR HIGH SCHOOL VOCATIONAL COURSE

Number of Full-Time Jobs Held	Number	Percent[A]
One	65	29.4
Two	22	10.0
Three	11	5.0
Four	1	0.4
Five or more	1	0.4
TOTAL	100	45.2

[A]Percentage is based on the 221 terminees who returned the questionnaire.

Table 20 reveals the first-job employment status of Automobile Mechanics terminees who returned the survey by the relatedness of their vocational training to their first job.

TABLE 20

FIRST-JOB EMPLOYMENT STATUS OF AUTOMOBILE MECHANICS TERMINEES (1973-74) BY RELATEDNESS OF VOCATIONAL TRAINING TO FIRST JOB[A]

First Job After Leaving High School Vocational Program	Total Reporting		Relatedness of Vocational Training to First Job[B]					
			Directly Related		Somewhat Related		Not Related[C]	
	No.	%	No.	%	No.	%	No.	%
Full-Time	147	66.6	39	17.6	40	18.1	68	30.8
Part-Time	20	9.0	3	1.4	4	1.8	13	5.9
TOTAL	167	75.6	42	19.0	44	19.9	81	36.7

[A]All percentages were based on the 221 (23.8%) of 930 terminees who returned the survey form.

[B]The terminees made the judgment as to how their first job was related to the training received in their high school vocational program.

[C]See page 22 for reasons terminees who were working in first job unrelated to this vocational training gave for not seeking job that was related before accepting their first job.

Of the 221 responding 1973-74 Automobile Mechanics terminees, 147 (66.6%) were employed full time in their first job after leaving their high school vocational program. Twenty (9.0%) terminees' first jobs were on a part-time basis.

Forty-two (19.0%) of the 221 responding terminees' first jobs (full-time or part-time) were in an area directly related to the training they received in their high school vocational course. Forty-four (19.9%) were employed in an area somewhat related while 81 (36.7) were employed in a first job not related to the training they received. The terminees made the judgment as to how their first job was related to the training they received in their high school vocational program.

Of the 84 terminees who indicated their jobs were not related to their vocational course, 41 (48.8%) terminees indicated that before they accepted their unrelated job, they tried to get a job that was related to their vocational training. However, 43 (51.2%) of the terminees did not.

The following is a list of reasons given by 21 of the terminees, who before taking their first unrelated job indicated they did not seek a job that was related to their vocational training.

Reasons	Number
Did not want one	2
Because I joined a union	1
Needed job	1
I was working in a hay field til school started	1
I wasn't old enough	1
That wasn't the field I wanted	1
Job started before school was out	1
Already had job when school was out	1

Reasons	Number
None available	1
It was different type of work	1
Didn't like service station work	1
Took whatever was available	1
Not enough training	1
Took course as hobby	1
Had the job	1
Tired of being dirty	1
No openings in immediate area	1
Had it before taking vocational training	1
Carpenter	1

Table 21 shows by type school and termination status for the first job of the 1973-74 Automobile Mechanics terminees the relatedness of their training to this first job.

TABLE 21

NUMBER OF RETURNS BY TYPE SCHOOL AND TERMINATION STATUS FOR 1973-74 AUTOMOBILE MECHANICS TERMINEES' FIRST JOB AND RELATEDNESS OF TRAINING[A]

Grand Total	221	171	77.4	43	19.5	44	19.9	84	38.0
Completers	181	143	64.7	37	16.8	35	15.8	71	32.1
Dropouts	40	28	12.7	6	2.7	9	4.1	13	5.9

[A]All percentages are based on the 221 (23.8%) of 930 terminees who returned the survey form.

[B]Any terminee who left the program by completing or by high school graduation.

[C]Any terminee who the instructor reported as having dropped out of school.

[D]The terminees made the judgment as to how their first job was related to the training received in their high school vocational program.

Table 22 illustrates the current employment status of the responding terminees by the relatedness of their vocational training to their present jobs. All percentages figured in the table were based on the 221 (23.8%) returns from the 930 Automobile Mechanics terminees.

Of the 221 responding 1973-74 secondary Automobile Mechanics terminees, 130 (58.8%) were presently employed full time and not attending school or employed full time and attending school. Ten (4.5%) of the terminees were employed part time and attending school, while six (2.7%) were unavailable for employment (See page 26 for reasons terminees were unavailable for employment). Only 18 (8.1%) of the terminees were unemployed and actively seeking employment, while eight (3.6%) were employed part time and seeking full-time employment.

The "No Response" category in Table 22 includes three groups: (1) terminees in active full-time military service; (2) terminees who were in school full time and had never had a job; and (3) terminees who failed to respond to the item on the questionnaire.

Of the 221 secondary Automobile Mechanics respondees, 36 (16.3%) were presently employed full time or part time in an area directly related to the training received in their high school vocational course. Forty-one (18.6%) were employed either part time or full time in an area somewhat related to their training, while 69 (31.2%) were employed in areas not related to training. The terminees made the judgment as to how their present employment was related to the training received in their high school vocational course.

TABLE 22

CURRENT EMPLOYMENT STATUS OF AUTOMOBILE MECHANICS TERMINEES (1973-74) BY RELATEDNESS OF TRAINING TO PRESENT JOB[A]

Employment Status	Total Responding		Relatedness of Training to Present Job[B]							
			Directly Related		Somewhat Related		Not Related[E]		Employed No Response	
	No.	%	No.	%	No.	%	No.	%	No.	%
Employed full time and not attend-school	111	50.2	26	11.8	35	15.8	49	22.2	1	0.5
Employed full time and attending school	19	8.6	8	3.6	5	2.3	6	2.7	0	0.0
Employed part time and seeking full-time job	8	3.6	2	0.9	0	0.0	6	2.7	0	0.0
Employed part time and not seeking full-time job	0	0.0	0	0.0	0	0.0	0	0.0	0	0.0
Employed part time and attending school	10	4.5	0	0.0	1	0.5	8	3.6	1	0.5
Unemployed (actively seeking a job)[C]	18	8.1	N/A		N/A		N/A		N/A	
Unavailable for employment[C&D]	6	2.7	N/A		N/A		N/A		N/A	
No Response	49	22.2	N/A		N/A		N/A		N/A	
TOTAL	221	100.0	36	16.3	41	18.6	69	31.2	2	1.0

[A]All percentages were based on the 221 (23.8%) respondents of the total 930 terminees. Terminees in active full-time military service or attending school full-time and had never been employed were included in the "No Response" category.

[B]The terminees made the judgment as to how their present job was related to the training received in their high school vocational program.

[C]The unemployed and unavailable for employment categories do not include persons in the military service and persons who were in school full time and never had a job.

[D]See page 26 for the listing of reasons Automobile Mechanics terminees gave for being unavailable for employment.

[E]See page 26 for reasons terminees who were working in present job not related to vocational training gave for not seeking related job before accepting present job. Totals for unrelated columns may not correspond because terminees failed to respond to one of the two questions from which data was drawn.

Below is a list of the reasons given by the terminees for being unavailable for employment.

Reason	Number
In school full time	10
Presently not working, not interested in a job	2
Homemaker	0
Pregnancy	0
Illness or disability	0
Other	2

Of the 79 terminees who indicated their present jobs were not related to their vocational course, 39 (49.4%) terminees indicated that before they accepted their unrelated job, they tried to get a job that was related to their vocational training. However, 40 (50.6%) of the terminees did not.

The following is a list of reasons given by 39 of the 40 terminees who, before taking their present unrelated job, indicated they did not seek a job that was related to their vocational training:

Reason	Number
In high school I worked on cars part time - I didn't want to make it a career	1
A friend said my present position was better	1
Going to school	1
Because I joined a union	1
I chose my vocational course for personal uses	1
More money	3
Because it was Gurney Man	1
I just needed a job	1
No one in the vocation tried to help me - I didn't know where to look	1
Don't have a job now	1
Because I did not try	1
I did feel I was qualified	1
None available	4
Father had found me a job with him before school was out	1
Because we haven't got any house to build	1
Already had a job waiting	1
No construction work	1
Didn't know enough	1
Did not have enough time to learn all I needed	1

Reason	Number
Not adequately experienced	1
Already had a job	1
Better job	1
Needed more training but couldn't afford it	1
I did not want to work on cars	1
Got the first job I was called to	1
No one will hire young mechanics	1
Not enough training	1
Took course as hobby	1
I got a job with the school	1
Tired of being dirty	1
Employed before taking trades	1
Different mechanics	1
Well paid in present job	1
Was offered manager training program	1

Table 23 shows for the present job, by type school and termination status, the number of 1973-74 secondary Automobile Mechanics terminees employed by the relatedness of their vocational training to their present job.

Of the 160 terminees presently employed that studied Automobile Mechanics, 39 (24.4%) were employed in an area directly related to the training received in their program. Seventy-eight (48.7%) terminees who studied Automobile Mechanics indicated their present job was not related to their vocational training. The terminees made the judgment as to how their present job related to the training received in their high school vocational program.

TABLE 23

NUMBER OF RETURNS BY TYPE SCHOOL AND TERMINATION STATUS FOR 1973-74 AUTOMOBILE MECHANICS TERMINEES PRESENT JOB AND RELATEDNESS OF TRAINING[A]

Completers	181	134	60.6	35	15.8	35	15.8	64	29.0
Dropouts	40	26	11.8	4	1.8	8	3.6	14	6.3

[A]Percentages are based on the 221 (23.8%) of the 930 terminees who returned the survey form.

[B]Any terminee who left the program by completing or by high school graduation

[C]Any terminee who the instructor reported as having dropped out of school

[D]The terminees made the judgment as to how their first job was related to the training received in their high school vocational program.

Table 24 indicates the first-job salary ranges as compared to the present-job salary ranges for the 1973-74 Automobile Mechanics terminees.

TABLE 24

FIRST-JOB SALARY RANGES AND PRESENT-JOB SALARY RANGES FOR 1973-74 AUTOMOBILE MECHANICS TERMINEES

Salary Ranges	First Job		Present Job	
	No.	%	No.	%
Under $250	55	33.1	26	18.7
$250 - $299	24	14.5	8	5.8
$300 - $349	31	18.7	21	15.1
$350 - $399	22	13.3	20	14.4
$400 - $449	12	7.2	25	18.0
$450 - $499	11	6.6	10	7.2
$500 - $599	8	4.8	17	12.2
$600 - $699	1	0.6	6	4.3
$700 or more	2	1.2	6	4.3
TOTAL	166	100.0	139	100.0

Of the 166 terminees reporting a salary range for their first job, 55 (33.1%) indicated a range of under $250 per month. Only three terminees reported a first salary of over $600 per month. The median salary range for the first job fell in the range of $250 - $349 per month. The mean salary range for the first job also fell in the same range of $250 - $349 per month.

Of the 139 1973-74 Automobile Mechanics terminees reporting a salary range for their present job, 26 (18.7%) indicated under $250 per month. This salary range was indicative of the mode of the reporting students. The median and mean salary ranges for the present job fell within the range of $350 - $449 per month. The median and mean salary ranges of present jobs over first jobs indicate a considerable increase for the reporting Automobile Mechanics terminees.

Table 24A indicates the first-job salary ranges by relatedness of training and sex of the Automobile Mechanics terminees.

TABLE 24A

FIRST-JOB SALARY RANGES BY RELATEDNESS OF TRAINING OF 1973-74 AUTOMOBILE MECHANICS TERMINEES

Salary Ranges	Sex of Terminees Responding		Relatedness of Training to First Job[B]					
			Directly Related		Somewhat Related		Not Related	
	Male	Female	Male	Female	Male	Female	Male	Female
Under $250	53	2	14	0	12	1	27	1
$250 - $299	24	0	3	0	8	0	13	0
$300 - $349	29	0	10	0	8	0	11	0
$350 - $399	17	0	3	0	8	0	6	0
$400 - $449	12	0	5	0	3	0	4	0
$450 - $499	11	0	2	0	1	0	8	0
$500 - $599	8	0	5	0	0	0	3	0
$600 - $699	1	0	0	0	0	0	1	0
$700 or more	2	0	0	0	0	0	2	0
TOTAL[A]	157	2	42	0	40	1	75	1

[A]Totals do not match those of Table 24 because some terminees did not respond to all questions.

[B]The terminees made the judgment as to how their first job was related to the training received in their high school vocational program.

Fifty-five (34.6%) of the 159 responding terminees were employed at less than $250 per month. Of these 55 terminees, 14 (25.5%) males were employed in jobs directly related to their training, 12 males (21.8%) and one (1.8%) female were employed in jobs somewhat related to their training, while 27 (49.1%) males and one (1.8%) female were employed in jobs not related to their training.

Of the 159 responding terminees, 157 (98.7%) were males and two (1.3%) were females. Forty-two (26.4%) males were employed in jobs directly related to their vocational training; 40 (25.2%) males and one (0.6%) female were

employed in jobs somewhat related to their training; while 75 (47.2%) males and one (0.6%) female were employed in jobs not related to their training.

Table 24B indicates the present-job salary ranges by relatedness of training and sex of the Automobile Mechanics terminees.

TABLE 24B

PRESENT-JOB SALARY RANGES BY RELATEDNESS OF TRAINING OF 1973-74 AUTOMOBILE MECHANICS TERMINEES

Salary Ranges	Sex of Terminees Responding		Relatedness of Training to Present Job[B]					
			Directly Related		Somewhat Related		Not Related	
	Male	Female	Male	Female	Male	Female	Male	Female
Under $250	23	2	7	0	7	0	9	2
$250 - $299	8	0	3	0	3	0	2	0
$300 - $349	20	0	5	0	8	0	7	0
$350 - $399	19	0	4	0	7	0	8	0
$400 - $449	21	1	6	0	7	0	8	1
$450 - $499	10	0	2	0	2	0	6	0
$500 - $599	17	0	7	0	3	0	7	0
$600 - $699	6	0	0	0	1	0	5	0
$700 or more	5	0	2	0	0	0	3	0
TOTAL[A]	129	3	36	0	38	0	55	3

[A]Totals do not match those of Table 24 because some terminees did not respond to all questions.

[B]The terminees made the judgment as to how their present job was related to the training received in their high school vocational program.

Twenty-five (18.8%) of the 132 responding terminees were employed at less than $250 per month. Of these 25 terminees, seven (28.0%) males were employed in a job directly related to their training, seven (28.0%) males were employed in jobs somewhat related to their training, while nine (36.0%) males and two (8.0%) females were employed in jobs not related to their training.

Of the 132 responding terminees, 129 (97.7%) were males and three (2.3%) were females. Thirty-six (27.3%) males were employed in jobs directly related to their vocational training; 38 (28.8%) males were employed in jobs somewhat related to their training; while 55 (41.7%) males and three (2.3%) females were employed in jobs not related to their training.

Continuing Education Information

The following section of this report presents information relative to the continuing education of the 1973-74 secondary Automobile Mechanics terminees.

Table 25 shows the vocational educational training opportunities terminees have participated in since leaving their high school vocational program.

Of the total terminees, the 43 (19.5%) who had on-the-job training represented the largest area in which terminees had additional vocational training.

Of the 221 responding terminees, 83 (37.6%) had taken part in one additional vocational training program since leaving their high school program. Seven (3.2%) enrolled in two training programs, and seven (3.2%) terminees had enrolled in three vocational training programs. One hundred thirty-two (59.7%) indicated they had not enrolled in any additional vocational training.

TABLE 25

ADDITIONAL VOCATIONAL EDUCATIONAL TRAINING 1973-74 AUTOMOBILE MECHANICS OCCUPATIONS TERMINEES PARTICIPATED IN SINCE LEAVING THEIR HIGH SCHOOL VOCATIONAL PROGRAM[A]

Type Training	Number	Percent[B]
On-the-job training (employer-sponsored program)	43	19.5
Public school adult vocational program	2	0.9
Private vocational school program	1	0.4
University or four year college	8	3.6
Junior college	8	3.6
Post-secondary vocational-technical institute (trade school)	14	6.3
Apprenticeship training program	7	3.2
Specialized occupational military training	1	0.4
Other[C]	13	5.9
TOTAL[D]	97	43.9

[A]Of the 221 terminees 132 (59.7%) gave no indication of being involved in additional vocational training. Of the 221 terminees, 83 (37.6%) took part in one additional vocational training opportunity since leaving their high school program. Seven (3.2%) took part in two and seven (3.2%) terminees took part in the three additional training opportunities.

[B]Percentages are based on the 211 (23.8%) respondents of the total 930 terminees who returned questionnaires.

[C]See below for the "Other" listing as specified by the terminees.

[D]The total indicated the number of different training programs in which terminees enrolled. As footnoted above, several terminees had enrolled in more than one training program.

The following is a listing of the "Other" (Table 25) vocational educational training terminees indicated they had participated in:

"Other" Vocational Training	Number
Welding	4
On the job	3
Construction	1
Electronics	1
Data Processing	1
Millwright	1
Saw filing and grinding	1
Heating/cooling	1
Small engine repair	1
Farming	1
Worked on own	1
Technical college	1

Table 26 points out the additional programs the 1973-74 secondary Automobile Mechanics terminees were presently attending beyond their high school training by whether these programs were related to their high school vocational program.

TABLE 26

PROGRAMS PRESENTLY ATTENDED BY THE 1973-74 SECONDARY AUTOMOBILE MECHANICS TERMINEES BY WHETHER THESE PROGRAMS WERE RELATED TO THEIR HIGH SCHOOL VOCATIONAL EDUCATION PROGRAM[A]

Programs Attended	Terminees		Program Related to High School VED Program			
			Yes		No	
	No.	%	No.	%	No.	%
On-the-job training (employer-sponsored)	4	1.8	2	0.9	2	0.9
Vocational-technical institute (trade school)	15	6.8	10	4.5	5	2.3
Junior college	10	4.5	1	0.4	9	4.1
Four year college or university	13	5.9	1	0.4	12	5.4
Public school adult vocational program	2	0.9	0	0.0	2	0.9
Private business or trade school	2	0.9	0	0.0	2	0.9
Apprenticeship program	1	0.4	1	0.4	0	0.0
Other[B]	7	3.2	4	1.8	3	1.4
TOTAL	54	24.4	19	8.6	35	15.8

[A]All percentages were based on the 221 responding terminees.

[B]See page 35 for listing of "Other" schools or educational institutions terminees were attending.

Of the 221 1973-74 secondary Automobile Mechanics terminees who responded to the survey, four (1.8%) were attending an on-the-job training

program (employer-sponsored), 15 (6.8%) were attending a vocational-technical institute, 10 (4.5%) were attending a junior college, 13 (5.9%) were attending a four year college or university, two (0.9%) were attending a public adult vocational program, two (0.9%) were attending private business or trade school, one (0.4%) was attending an apprenticeship program, and seven (3.2%) were attending some other type of school or educational program. (See below for the listing of the other types of schools or educational programs students were attending.)

Fifty-four (24.4%) of the 221 Automobile Mechanics terminees were presently continuing their education. Nineteen (8.6%) of the terminees were continuing their education in a program related to their high school vocational program. Thirty-five (15.8%) were attending a program in an area not related to their high school vocational program.

The following is a listing of the "Other" category (Table 26) of additional programs the 1973-74 Automobile Mechanics terminees were attending:

"Other" School or Program	Number
High school	3
Private school	1
Night vocational program at high school	1
State junior college	1
Military junior college	1
Lutheran college	1
Auto diesel school	1
Electronics	1

Of the 221 responding terminees, 88 (39.8%) indicated they would take further vocational training. The following is a list of the areas in which these terminees desired to study: (Some terminees indicated more than one area of desired study.)

Area of Study	Number
Auto Mechanics	73
Welding	7
Autobody and Fender	7
Electronics	7
Diesel Mechanics	5
Air Conditioning/Refrigeration	5
Construction	4
Business	3
Data Processing	2
Forestry	2
Machinist	2
Drafting	2
Sheet Metal	1
Butchering	1
Painter	1
Wildlife Conservation	1
Printing	1
Motorcycle Mechanics	1
Aircraft Maintenance	1
Medicine	1
Truck Driver	1
Transmission	1
Maintenance	1
Brick Mason	1
Machine Shop	1
Military Service	1
Police Operations	1
Later in life	1
Uncertain	3

Twenty-nine (13.2%) of the 221 responding terminees indicated they did not desire further vocational training.

Job Placement Information

The following section of this report presents information concerning job placement of the 1973-74 secondary Automobile Mechanics terminees.

Table 27 points out whether the 1973-74 Automobile Mechanics terminees were seeking full-time employment when they left their high school vocational program and if their vocational teacher attempted to help them get a job.

TABLE 27

WHETHER VOCATIONAL TEACHER ATTEMPTED TO HELP 1973-74 AUTOMOBILE MECHANICS TERMINEES GET A JOB IF SEEKING FULL-TIME EMPLOYMENT UPON LEAVING THE HIGH SCHOOL VOCATIONAL PROGRAM[A]

Vocational Teacher Attempted To Get Terminee A Job	Number	Percent
Yes	44	58.7
No	31	41.3
TOTAL	75	100.0

[A]Forty-seven (37.0%) of the responding terminees indicated they were not seeking full-time employment when they left their high school vocational program. Five (3.9%) of the terminees did not respond to the question.

Of the 75 responding 1973-74 Automobile Mechanics terminees indicating they were seeking full-time employment when they left their high school vocational program, 44 (58.7%) indicated that their vocational teacher attempted to help them get a job. However, 31 (41.3%) of the terminees seeking full-time employment indicated that their vocational teacher did not attempt to help them secure employment. It was interesting to note that 47 (37.0%) of the reporting 1973-74 Automobile Mechanics terminees indicated they were not seeking full-time employment when they left their high school vocational program.

Table 28 illustrates how long it took the 1973-74 Automobile Mechanics terminees to get their first full-time job after they left their high school vocational program and began actively seeking full-time employment.

Thirty (50.0%) of the 60 secondary Automobile Mechanics terminees secured their first full-time job within two weeks after they left their high school vocational program and began actively seeking full-time employment. However, seven (11.7%) of the terminees took 13 or more

weeks to secure their first full-time job. There were 12 terminees who indicated they already had a job when they left their high school vocational program.

TABLE 28

LENGTH OF TIME IT TOOK THE 1973-74 AUTOMOBILE MECHANICS TERMINEES TO SECURE FIRST FULL-TIME JOB AFTER LEAVING HIGH SCHOOL VOCATIONAL PROGRAM AND BEGINNING ACTIVELY SEEKING FULL-TIME EMPLOYMENT[A]

Time to Secure First Full-Time Job	Number	Percent
0 - 2 weeks	30	50.0
3 - 4 weeks	12	20.0
5 - 8 weeks	5	8.3
9 - 12 weeks	6	10.0
13 or more weeks	7	11.7
TOTAL	60	100.0

[A]Twelve terminees indicated they already had a job when they left their high school vocational program.

Table 29 shows how the 1973-74 secondary Automobile Mechanics terminees indicated they got their first full-time job after leaving their high school vocational program.

Of the 68 1973-74 Automobile Mechanics terminees who responded to the survey item, 12 (17.6%) indicated they got their first full-time job after leaving their high school vocational program through applications to business and industry. Forty-one (60.3%) of the terminees also indicated they got their first full-time job through a friend or relative. These represented the two methods that the largest number of Automobile Mechanics terminees utilized to secure their first full-time job. Only five (7.4%) of the terminees indicated they secured their first job through their vocational teacher. One student indicated that a counselor got him his first full-time job after leaving his vocational

program. Those students who already had a job before leaving their high school vocational program were not shown in Table 29. (See Table 30, page 40)

TABLE 29

HOW THE 1973-74 AUTOMOBILE MECHANICS TERMINEES INDICATED THEY GOT THEIR FIRST FULL-TIME JOB AFTER LEAVING THEIR HIGH SCHOOL VOCATIONAL PROGRAM

How Terminees Secured First Full-Time Job	Number	Percent
Through your vocational teacher	5	7.4
Through your counselor	1	1.5
Through other school teachers or administrators	0	0.0
Through a friend or relative	41	60.3
Through applications to business or industry	12	17.6
Through state (local) employment office	3	4.4
Through a private employment agency	0	0.0
Through radio, T.V., newspaper, or other news media	0	0.0
Other[A]	6	8.8
TOTAL	68	100.0

[A]See listing below for the "Other" ways terminees indicated they secured their first full-time job after leaving their high school vocational program.

The six terminees who checked the "Other" category specified the means by how they secured their first full time jobs after leaving their high school vocational program. The following list indicates the "Other" means the terminees indicated.

"Other" Means for Securing First Full-Time Job	Number
Went and asked for it	1
Look for a job--no help from teacher	1
Husband worked here	1
Through Plymouth trouble shooting contest	1
I joined service, but got discharged Aug. 30, 1974	1
Looked myself	1

Table 30 shows how the 1973-74 Automobile Mechanics terminees, who were working while in high school, taking their vocational program indicated they got that job.

TABLE 30

HOW THE 1973-74 AUTOMOBILE MECHANICS TERMINEES WHO WERE WORKING WHILE IN HIGH SCHOOL TAKING THEIR VOCATIONAL PROGRAM INDICATED THEY GOT THAT JOB[A]

Who or What Helped Terminee Get Job	Number	Percent
Your vocational teacher	7	11.5
Your counselor	2	3.2
Other school teachers or administrators	3	4.9
Friend or relative	25	41.0
Applications to business or industry	9	14.8
State (local) employment office	0	0.0
Private employment agency	0	0.0
Radio, T.V., newspaper, or other news media	1	1.6
Other	14	23.0
TOTAL	61	100.0

[A]Sixty-four (50.4%) terminees indicated they had no job during the time they were in high school taking their vocational course.

Sixty-one (27.6%) of the 221 reporting 1973-74 Automobile Mechanics terminees indicated they were working during the time they were in high school taking their vocational program. Of those terminees working while in high school, seven (11.5%) got their job through their vocational instructor, 25 (41.0%) through a friend or relative, and nine (14.8%) got jobs through applications to business or industry. These three means were the ways most of the terminees secured a job while they were still in high school taking their vocational program.

Table 31 reveals the indications of the 1973-74 Automobile Mechanics terminees as whether, before taking their first job, they looked for

employment within daily walking or driving distance of home by how their first job related to their vocational training.

TABLE 31

INDICATIONS OF 1973-74 AUTOMOBILE MECHANICS TERMINEES AS TO WHERE THEY LOOKED FOR THEIR FIRST JOB BEFORE TAKING ONE BY HOW THEIR FIRST JOB RELATED TO THEIR TRAINING[A]

Before Taking First Job, Where Terminees Looked for Job	Total Reporting		Total Reporting by Relatedness of First Job to Vocational Training

Within daily walking or driving distance of home	76	76.0	14	73.7	19	82.6	43	74.1
Beyond daily walking or driving distance of home[B]	24	24.0	5	26.3	4	17.4	15	25.9
TOTAL	100	100.0	19	100.0	23	100.0	58	100.0

[A]Fifty-nine terminees indicated they already had their first job while in high school. Of those 59 terminees, 22 (37.3%) were working in a directly related area, 17 (28.8%) in a somewhat related area, while 20 (33.9%) were working in a non-related area.

[B]See listing, page 42, for reasons terminees gave for seeking their first job away from home.

Seventy-six (76.0%) of the 1973-74 Automobile Mechanics terminees who were employed in their first job indicated they sought employment within daily walking or driving distance of home. Twenty-four (24.0%) terminees indicated before taking their first job, they looked for a job beyond daily walking or driving distance of home.

Of the 19 terminees who were working in a directly related area, only five (26.3%) sought employment beyond daily walking or driving distance of home.

It is interesting to note that of the 58 terminees whose first jobs did not relate to their training, 15 of those terminees sought employment beyond daily walking or driving distance of home.

Fifty-nine terminees indicated they had their first job while in high school. Of those 59 terminees, 22 (37.3%) were working in a directly related area, 17 (28.8%) in a somewhat related area, and 20 (33.9%) were working in a non-related area.

The following is a listing of reasons terminees gave for seeking a job beyond daily walking or driving distance of their home before accepting their first job. Of the 24 terminees who indicated they sought a job beyond daily walking or driving distance of home before accepting their first job, 11 gave reasons why they sought that job.

Reasons for Seeking Job Beyond Daily Walking or Driving Distance Before Accepting First Job	Number
No jobs available	3
Wanted to move from Alabama	1
Since 12 miles from town	1
Had job for three years	1
Fun work	1
Decatur plants	1
Work with school board	1
They came and asked me	1
The use of my talents	1

Table 32 reveals the indications of the 1973-74 Automobile Mechanics terminees who were working in their first job not related to their training by whether or not they tried to get a job related to their training by where they looked for employment before accepting that first job.

It is important to note that of the 57 terminees who were working in a non-related first job, only eight (14.0%) sought related employment beyond daily walking or driving distance of home before accepting his first job.

TABLE 32

INDICATIONS OF THE 1973-74 AUTOMOBILE MECHANICS TERMINEES WORKING IN FIRST JOB NOT RELATED TO THEIR TRAINING BY WHETHER OR NOT THEY TRIED TO GET A JOB RELATED TO THEIR TRAINING BY WHERE THEY LOOKED FOR EMPLOYMENT BEFORE ACCEPTING FIRST JOB[A]

Where Terminees Working in Non-Related Areas Looked for Employment Before Accepting First Job	Total Reporting		Before Accepting This First Job Unrelated to Training Whether Terminees Sought Job in Related Area			
			Yes		No[B]	
	No.	%	No.	%	No.	%
Sought employment within daily walking or driving distance of their home	42	73.7	22	73.3	20	74.1
Sought employment beyond daily walking or driving distance of their home	15	26.3	8	26.7	7	25.9
TOTAL	57	100.0	30	100.0	27	100.0

[A]Totals in this table may not correspond with totals of terminees for non-related categories in other tables for the following reasons: (1) some terminees had jobs when leaving program and did not have to seek employment and (2) some terminees failed to respond to one or more of the related questions from which data was drawn.

[B]See page 22 for the listing of reasons terminees who were working in non-related jobs gave for not trying to secure a job that was related to their training.

Table 33 illustrates the indications of the 1973-74 Automobile Mechanics terminees as to where they looked for a job before taking their present job by how their present job is related to their vocational training.

Seventy-two (75.8%) of the presently employed 1973-74 Automobile Mechanics terminees indicated they sought employment within daily walking or driving distance of home. Twenty-three (24.2%) terminees indicated they sought employment beyond daily walking or driving distance of home.

TABLE 33

INDICATIONS OF 1973-74 AUTOMOBILE MECHANICS TERMINEES AS TO WHERE THEY LOOKED FOR A JOB BEFORE TAKING THEIR PRESENT JOB BY HOW THEIR PRESENT JOB RELATED TO THEIR TRAINING[A]

Where Terminees Looked for Job Before Taking Present Job	Total Reporting		Total Reporting by Relatedness of Present Job to Vocational Training					
			Directly Related		Somewhat Related		Not Related	
	No.	%	No.	%	No.	%	No.	%
Within daily walking or driving distance of home	72	75.8	15	83.3	19	82.6	38	70.4
Beyond daily walking or driving distance of home[B]	23	24.2	3	16.7	4	17.4	16	29.6
TOTAL	95	100.0	18	100.0	23	100.0	54	100.0

[A]Fifty-six terminees reported they already had their present job while in high school. Of those 56 terminees, 20 (35.7%) were in a directly related area, 18 (32.1%) in a somewhat related area, while 18 (32.1%) were working in a non-related area.

[B]See listing, page 45, for reasons terminees gave for seeking their present job away from home.

Of the 18 terminees who were working in a directly related area, 15 (83.3%) sought employment beyond daily walking or driving distance of home.

Of the 54 terminees who were presently working in a non-related area, 16 (29.6%) sought employment beyond daily walking or driving distance of their home.

Fifty-six terminees reported they already had their present job while in high school. Of those 56 terminees, 20 (35.7%) were in directly related areas, 18 (32.1%) in somewhat related areas, and 18 (32.1%) were in non-related areas.

The following is a list of reasons terminees gave for seeking a job beyond daily walking or driving distance of their home before accepting their present job. Of the 23 terminees who indicated they sought a job beyond daily walking or driving distance of home before accepting their present job, 21 gave reasons why they sought that job.

Reasons for Seeking Job Beyond Daily Walking or Driving Distance Before Accepting Present Job	Number
None available	6
More money	4
Wanted something I liked	2
Only one available	1
Needed a job	1
Looked everywhere	1
Just looked	1
Wanted to travel	1
Didn't have job	1
I lived out of twon - no place to work	1
Father worked there	1
Joined service, but got medical discharge	1

Table 34 reveals the indications of the 1973-74 Automobile Mechanics terminees who were working in their present job not related to their training by whether or not they tried to get a job related to their training by where they looked for employment before accepting that present job.

TABLE 34

INDICATIONS OF THE 1973-74 AUTOMOBILE MECHANICS TERMINEES WORKING IN PRESENT JOB NOT RELATED TO THEIR TRAINING BY WHETHER OR NOT THEY TRIED TO GET A JOB RELATED TO THEIR TRAINING BY WHERE THEY LOOKED FOR EMPLOYMENT BEFORE ACCEPTING PRESENT JOB[A]

Where Terminees Working in Non-Related Areas Looked for Employment Before Accepting Present Job	Total Reporting		Before Accepting This Present Job Unrelated to Training Whether or Not Terminees Sought Job in Related Area			
			Yes		No[B]	
	No.	%	No.	%	No.	%
Sought employment within daily walking or driving distance of their home	38	70.4	24	70.6	14	70.0
Sought employment beyond daily walking or driving distance of their home	16	29.6	10	29.4	6	30.0
TOTAL	54	100.0	34	100.0	20	100.0

[A]Totals in this table may not correspond with totals of terminees for non-related categories in other tables for the following reasons: (1) some terminees had jobs when leaving programs and did not have to seek employment and (2) some terminees failed to respond to one or more of the related questions from which data was drawn.

[B]See page 26 for listing of reasons terminees who were working in non-related jobs gave for not trying to secure a job that was related to their training.

Ten (18.5%) of the 54 terminees who were working in a non-related area sought related employment beyond daily walking or driving distance of home before accepting their present job.

APPENDIX

PRESENT JOB AND FIRST JOB TITLES OF THE 1973-74
AUTOMOBILE MECHANICS TERMINEES

PRESENT JOB AND FIRST JOB TITLES OF THE 1973-74 AUTOMOBILE MECHANICS TERMINEES

For those terminees who indicated present or first job occupations, this appendix lists the present job title and first job title. The job titles are listed as the terminees reported them. The number of full-time jobs held by these terminees since completing their high school vocational course is listed, current employment status is listed, and whether the student intended to get a job in the area while in the program.

The following code is used to identify the employment status of the terminees:

0. Unemployed, but seeking employment
1. Employed full time
2. Employed part time, seeking full-time job
3. Employed part time, not seeking full-time job
4. Employed full time and attending school
5. Employed part time and attending school
6. Unavailable for employment

The following code is used to identify whether the student intended to get a job in the area while in the program:

1. No
2. Was not sure
3. Yes

The number in parenthesis behind the job title indicates the relatedness of the high school vocational training to these jobs. The terminees

made the judgment as to the relatedness of their training to these jobs. The following is used to identify this relatedness:

1. Directly related
2. Somewhat related
3. Not related

The total does not correspond to the total reporting since some of the terminees failed to indicate the title of their present position. If the first job title was the same as the present job title, the first job title is included under the present job title.

TITLE: AUTOBODY FOLLOW-UP. FOLLOW-UP OF 1973-74 AUTOBODY TERMINEES FROM THE SECONDARY SCHOOL VOCATIONAL PROGRAMS OF ALABAMA. RESEARCH AND DEVELOPMENT REPORT NO. 40.

PERSONAL AUTHOR: BURKS, BONNIE J.; DRAKE, JAMES BOB

DESCRIPTOR: *AUTO BODY REPAIRMEN; *VOCATIONAL FOLLOWUP; *OCCUPATIONAL SURVEYS; *STATE SURVEYS; *SECONDARY EDUCATION; VOCATIONAL EDUCATION

IDENTIFIER: ALABAMA

EDRS PRICE: MF AND HC AVAILABILITY WILL BE ANNOUNCED IN VOL. 10, NO. 2.

DESCRIPTIVE NOTE: 55P.; RELATED DOCUMENTS VT 103 321 THROUGH VT 103 335 IN THIS ISSUE.

ABSTRACT: THIS REPORT RELATES THE FINDINGS OF A STATEWIDE FOLLOWUP SURVEY OF 1973-74 AUTO BODY TERMINEES FROM THE SECONDARY SCHOOL VOCATIONAL PROGRAMS IN ALABAMA. QUESTIONNAIRES WERE MAILED TO 295 STUDENT TERMINEES APPROXIMATELY SEVEN TO EIGHT MONTHS AFTER LEAVING SCHOOL. RETURNS WERE RECEIVED FROM 99 (25.1 PERCENT) OF THE AUTO BODY REPAIR TERMINEES FROM THE INITIAL MAILING AND ONE FOLLOWUP. DATA ARE PRESENTED IN TABLES WITH ACCOMPANYING NARRATIVE SUMMARIES ORGANIZED ACCORDING TO THESE MAJOR SECTIONS: GENERAL INFORMATION ON THE TERMINEES; BASIC INFORMATION RELATED TO THE VOCATIONAL PROGRAM; BASIC EMPLOYMENT INFORMATION; CONTINUING EDUCATION INFORMATION; AND JOB PLACEMENT INFORMATION. PRESENT AND FIRST JOB TITLES OF THE 1973-74 AUTO BODY REPAIR TERMINEES ARE APPENDED. (NJ)

For their help in refining the survey instrument, special thanks are due the following state supervisors:

Mrs. Divine Bauer, Health Occupations Education
Miss Evelyn Cotney, Home Economics Education
Mr. H. W. Green, Agribusiness Education
Mr. J. C. Lindley, Trade and Industrial Education
Mrs. Anacile Kurth, Distributive Education
Mrs. Sandra Yelverton, Business and Office Education

Appreciation is also extended to the following members of the Occupational Research and Development Unit for their contribution to the study:

Mr. Paul Davis, Research Associate
Mr. Gary Greenshields, Graduate Research Assistant
Mr. John Gross, Research Associate
Mr. James McMath, Graduate Research Assistant
Dr. Alice S. Morgan, Assistant Professor
Ms. Flossi Sergen, Secretary
Mr. Ed Williams, Duplicating Operator

FOLLOW-UP OF 1973-74 AUTOBODY TERMINEES FROM
THE SECONDARY SCHOOL OF VOCATIONAL
PROGRAMS OF ALABAMA

Alabama continues to support one of the most progressive and comprehensive vocational education programs in the nation. In addition to serving youth and adults by training them for gainful and useful employment, the diversification of vocational courses meets a serious job need and contributes to the industrial development in the state.

With the millions of tax dollars being spent on vocational education, it is necessary to attempt to account to the taxpayer and decision-makers on the results of those expenditures. Terminee student follow-up studies constitute one of the most valuable techniques for assessing vocational education system outcomes.

The Alabama State Department of Education, Division of Vocational Education and Community Colleges, recognizing this important phase of accountability and evaluation, initiated the development of a statewide follow-up system for its vocational education program terminees at the secondary school level. The Division, under the direction of Dr. T. L. Faulkner, State Director, contracted with the Occupational Research and Development Unit at Auburn University to develop and implement the statewide follow-up system for all its secondary vocational terminees in all service areas.

This report relates the findings of the survey instrument mailed to the 1973-74 Autobody terminees from the secondary school vocational

programs of Alabama. When the terminees received the questionnaire, most had been out of school seven to eight months.

General Information

Student rosters with names and addresses of 1973-74 Autobody terminees were received from 58 secondary school vocational teachers in Alabama. Of the 58 teachers from which student rosters were received, 37 were in Secondary Area Vocational Centers (AVC) and 21 were in programs in schools of other settings. The total of 295 student terminees reported to the ORDU were mailed the follow-up forms. Returns were received from 99 (25.1%) of the Autobody terminees from the initial mailing and one follow-up. At least one student questionnaire was received from 33 programs.

All terminees reported in this study were in programs administered only by the Trade and Industrial Section of the Division of Vocational Education and Community Colleges, State Department of Education.

Table 1 presents data relative to the total population of Autobody terminees and the number of returns categorized by type school and termination status as reported by teachers.

TABLE 1

DESCRIPTION OF TOTAL POPULATION AND RETURNS OF 1973-74 AUTOBODY TERMINEES BY TYPE SCHOOL AND TERMINATION STATUS[A]

Type School and Termination Status	Total Number Reported	Number of Returns	Percent of Returns
Area Voc. Center			
Total	278	71	25.5
Completers[B]	167	56	33.5
Dropouts[C]	111	15	13.5
Other Type Schools			
Total	117	28	23.9
Completers	96	25	26.0
Dropouts	21	3	14.3
Grand Total	395	99	25.1
Completers	263	81	30.8
Dropouts	132	18	13.6

[A]These Autobody terminees were terminees in programs administered only under the service area of Trade and Industrial Education, State Department of Education.

[B]Any terminee who left the program by completing it or by high school graduation.

[C]Any terminee the instructor reported as having dropped out of school.

Table 2 illustrates the sex characteristics of those 1973-74 Autobody terminees reported by the instructors and those who returned survey forms.

TABLE 2

SEX OF THE 1973-74 AUTOBODY TERMINEES REPORTED AND BY WHO RETURNED QUESTIONNAIRES

Sex[A]	Reported		Returns	
	Number	Percent	Number	Percent
Male	376	95.2	93	93.9
Female	1	4.6	1	1.0
Not Known	18	0.3	5	5.1
TOTAL	395	100.0	99	100.0

[A]Sex as reported by teacher.

Table 3 presents the racial or ethnic characteristics of those 1973-74 Autobody terminees reported by instructors and who returned survey forms.

TABLE 3

RACIAL OR ETHNIC CHARACTERISTICS OF THE 1973-74 AUTOBODY TERMINEES REPORTED AND BY WHO RETURNED QUESTIONNAIRES

Racial or Ethnic Group[A]	Reported		Returns	
	Number	Percent	Number	Percent
American Indian	0	0.0	0	0.0
Black	107	27.1	15	15.2
Oriental	0	0.0	0	0.0
Spanish Surnamed American	0	0.0	0	0.0
White	281	71.1	82	82.8

Not Known	7	1.8	2	2.0
TOTAL	395	100.0	99	100.0

[A]Racial or Ethnic Group as reported by teacher.

Table 4 illustrates the number and grade level of the 1973-74 Autobody terminees reported who dropped out of school during the academic year and by who returned the questionnaire.

TABLE 4

NUMBER OF THE 1973-74 AUTOBODY TERMINEES REPORTED
WHO DROPPED OUT OF SCHOOL DURING
THE 1973-74 SCHOOL YEAR BY
GRADE LEVEL

Grade Level Upon Dropping Out of School	Reported		Returns	
	Number	Percent[A]	Number	Percent[B]
Ninth	6	1.5	1	16.7
Tenth	45	11.4	6	13.3
Eleventh	53	13.4	9	17.0
Twelfth	14	3.5	0	0.0
Grade Level Not Indicated by Teacher	14	3.5	2	14.3
TOTAL	132	33.4	18	13.6

[A]Percentage is based on 395 total reported terminees.
[B]Percentage is based on returns by grade.

Table 5 shows the number of 1973-74 Autobody terminees who indicated whether they were in active full-time military service.

TABLE 5

ACTIVE FULL-TIME MILITARY STATUS OF 1973-74
AUTOBODY TERMINEES WHO RETURNED
QUESTIONNAIRES

Active Full-Time Military Status	Number	Percent
Yes	3	3.0
No	93	93.9
No Response	3	3.0
TOTAL	99	100.0

Basic Information Related to the Vocational Education Program

Table 6 points out the number of 1973-74 Autobody terminees who indicated whether this vocational program was a school requirement.

TABLE 6

1973-74 AUTOBODY TERMINEES WHO INDICATED WHETHER THEIR VOCATIONAL PROGRAM WAS A SCHOOL REQUIREMENT

Vocational Courses Was a School Requirement	Number	Percent
Yes	8	8.1
No	90	90.9
No Response	1	1.0
Total	99	100.0

Table 7 indicates, according to the 1973-74 Autobody terminees, the primary source of influence in selecting their vocational course.

TABLE 7

PRIMARY INFLUENCES ON THE 1973-74 AUTOBODY TERMINEES IN SELECTING THEIR VOCATIONAL COURSE

Group or Individual Terminees Felt Influenced Them Most in Selecting Vocational Course	Number	Percent
Parent(s) or Guardian(s)	2	2.0
Guidance Counselor	1	1.0
Your Vocational Teacher	5	5.1
Another Teacher or Principal	1	1.0
Student in VED Program	7	7.1
A Friend or Relative	8	8.1
A Businessman	2	2.0
Made Choice Yourself	73	73.7
Other	0	0.0
TOTAL	99	100.0

A friend or relative appeared to be the greatest outside influence on those terminees enrolling in the Autobody program. Eight (8.1%) of the terminees responding indicated that a friend or relative influenced them most in selecting their Autobody course. However, 73 (73.7%) indicated that they selected their course of study on their own. Seven terminees (7.1%) indicated that a student in the VED program influenced them most in selecting their program. Five (5.1%) of the terminees indicated that their vocational teacher influenced them most in selecting their course in Autobody.

Table 8 indicated terminees' opinions as to whether they had adequate job or occupational information and school experiences to make a realistic career choice.

TABLE 8

OPINIONS OF 1973-74 AUTOBODY TERMINEES AS TO WHETHER THEY HAD ADEQUATE JOB OR OCCUPATIONAL INFORMATION AND SCHOOL EXPERIENCES TO MAKE A REALISTIC CAREER CHOICE

	Number	Percent
Yes	75	75.8
No	23	23.2
No Response	1	1.0
TOTAL	99	100.0

Table 9 indicates whether, during the time they were taking their high school vocational program, the reporting 1973-74 terminees intended to get a job in Autobody.

TABLE 9

INDICATIONS OF 1973-74 AUTOBODY TERMINEES AS TO WHETHER, DURING THE TIME THEY WERE TAKING THEIR HIGH SCHOOL VED PROGRAM, THEY PLANNED TO GET A JOB IN THEIR AREA OF STUDY

Intended To Get Job In Area of Study	Number	Percent
Yes	52	52.5
No	4	4.0
Was Not Sure	42	42.4
No Response	1	1.0
TOTAL	99	100.0

It is interesting to note that only 52 (52.5%) of the 1973-74 reporting Autobody terminees indicated that during the time they were taking their Autobody program, they intended to get a job in the area they were studying.

Table 10 indicates terminees' opinions on choosing the Autobody program if they had the selection to make again.

A noteworthy point was revealed by the data. Of the 1973-74 Autobody terminees, 68 (68.7%) indicated that they would select the same vocational program if they had the choice to make again. Only five (5.1%) of the responding terminees indicated that they would not take a vocational program.

TABLE 10

OPINIONS OF 1973-74 AUTOBODY TERMINEES REGARDING THEIR VOCATIONAL PROGRAM

Question: If You Had It To Do Over Again, Would You...?		Number	Percent
Take the same vocational program		68	68.7
Not take a vocational program		5	5.1
Choose another vocational program offered in your school, such as _____	A	16	16.2
Choose another vocational program if it had been offered in your school; such as _____	B	6	6.1
No Response		4	4.0
TOTAL		99	100.0

[A]See listing IA below for those other vocational programs offered in terminees' school that they would have taken instead of their programs. All responses are reported.

[B]See listing IB, page 10 for the vocational programs the terminee would have taken instead of their Autobody program if it had been offered in their school. All responses are reported.

Listing I-A -- Courses offered in their school that Autobody terminees indicated they would have taken if they had it all to do over again.

Course	Number

Welding	2
Radio/TV Repair	2
Mechanics	1
Drafting	1
Computer	1

Table 11 indicates the extent to which the reporting 1973-74 Autobody terminees felt their high school vocational programs prepared them for their first job. This data was also broken down by how that first job related to their vocational program.

Terminees who were in full-time active military service or who had never been employed were not asked to respond to the questions from which this data was reported. Also, the terminees who failed to respond to the question items were not indicated in the table.

TABLE 11

PERCEPTIONS OF 1973-74 AUTOBODY TERMINEES AS TO THE EXTENT THEIR HIGH SCHOOL VOCATIONAL PROGRAM PREPARED THEM FOR THEIR FIRST FULL-TIME JOB BY HOW FIRST FULL-TIME JOB RELATED TO TRAINING

Extent Vocational Course Prepared for First Full-Time Job	Total Reporting		Number Reporting by Relatedness of First Full-Time Job to Training Received					
			Directly Related		Somewhat Related		Not Related	
	No.	%	No.	%	No.	%	No.	%
Excellent	8	11.9	6	25.0	0	0.0	2	5.0
Well Prepared	12	17.9	8	33.3	1	33.3	3	7.5
Fair	8	11.9	8	33.3	0	0.0	0	0.0
Poorly Prepared	1	1.5	1	4.2	0	0.0	0	0.0
Preparation not related to job	38	56.7	1	4.2	2	66.7	35	87.5
TOTAL	67	100.0	24	100.0	3	100.0	40	100.0

In noting the extent to which the 1973-74 Autobody terminees felt their high school vocational course prepared them for their first full-time job by how their first full-time job related to the training they received in their high school Autobody program, some interesting points were revealed. Twenty (29.8%) of the 1973-74 Autobody terminees responding to this item indicated "Excellent" or "Well Prepared" for their first full-time job as a result of the training received in their high school vocational education program. Fourteen (58.3%) of the 24 terminees employed in their first full-time job related directly to their training felt they were excellent or well prepared for this first job. Only one terminee who was working in an area directly related to his vocational training felt that he was poorly prepared for his first job. There was an additional terminee who indicated that he was working in an area directly related to his vocational course and felt that his preparation did not relate to his job. Of all the responding terminees, only one (1.5%) felt that he was poorly prepared for his first full-time job. He was working in an area directly related to his vocational course.

Table 12 indicates the extent to which the reporting 1973-74 Autobody terminees felt their high school vocational course prepared them for their present job. Also shown in the table is a breakdown of the data by how their present job was related to their vocational program.

Terminees in active full-time military service, and students who were attending school full time and had not had a job, were not asked to respond to the question from which Table 12 was prepared. Also, those other students who failed to respond to the items were not shown on the table.

Of the 71 terminees responding to these items, 23 (32.4%) indicated "Excellent" or "Well Prepared" for their present job as a result of their

high school vocational program. Only one terminee reported feeling poorly prepared for his present job as a result of his training.

TABLE 12

PERCEPTIONS OF 1973-74 AUTOBODY TERMINEES AS TO THE EXTENT THEIR HIGH SCHOOL VOCATIONAL COURSE PREPARED THEM FOR THEIR PRESENT JOB BY HOW THEIR PRESENT JOB RELATED TO TRAINING

Extent Vocational Course Prepared for Present Job	Total Reporting		Number Reporting by Relatedness of Present Job to Training Received					
			Directly Related		Somewhat Related		Not Related	
	No.	%	No.	%	No.	%	No.	%
Excellent	10	14.1	4	20.0	1	33.3	5	10.4
Well Prepared	13	18.3	9	45.0	1	33.3	3	6.2
Fair[A]	7	9.9	5	25.0	0	0.0	2	4.2
Poorly Prepared	1	1.4	1	5.0	0	0.0	0	0.0
Preparation not related to job	40	56.4	1	5.0	1	33.3	38	79.2
TOTAL	71	100.0	20	100.0	3	100.0	48	100.0

[A]See listing below for reasons terminees specified for only being trained "Fair" by their vocational course for their present job.

Thirteen (65.0%) of the 20 responding terminees working in an area directly related to their high school vocational program indicated that they felt excellent or well prepared by their training.

Eight terminees who indicated "fair" as the extent their vocational program prepared them for this present job indicated reasons for this. The following lists the reasons the 1973-74 Autobody terminees indicated for being trained only "fair" by their vocational course for their present job.

Reason	Number
No equipment	2
Wanted better training	11
Course not thorough enough	1

(continued)

Reasons	Number
Everything wasn't covered	1
It would be well prepared but I need a refresher course	1
Didn't do enough work	1
Made me aware of responsibilities ahead of me.	1

The terminee who indicated "poorly prepared" for his present job by his vocational program stated "lack of teaching" as the reason he felt that way.

Table 13 focuses on the Autobody student club. The researchers sought to determine the extent to which the 1973-74 Autobody terminees felt that their high school student club aided in preparing them for their present job. Data are also broken down by the relationship of the present job to the vocational training received.

TABLE 13

PERCEPTIONS OF 1973-74 AUTOBODY TERMINEES AS TO THE EXTENT THEIR HIGH SCHOOL VOCATIONAL STUDENT CLUB PREPARED THEM FOR THEIR PRESENT JOB BY HOW THEIR PRESENT JOB RELATED TO TRAINING[A]

Extent High School Vocational Student Club Helped Prepare for Present Job	Total Reporting		Total Reporting by Relatedness of Present Job to Vocational Training					
			Directly Related		Somewhat Related		Not Related	
	No.	%	No.	%	No.	%	No.	%
Excellent	6	20.7	1	9.1	0	0.0	5	29.4
Well Prepared	8	27.6	5	45.4	1	100.0	2	11.7
Fair	13	44.8	5	45.4	0	0.0	8	47.1
Poorly Prepared	2	6.9	0	0.0	0	0.0	2	11.7
TOTAL	29	100.0	11	100.0	1	100.0	17	100.0

[A]Of the 76 who responded, seven (9.2%) had no related student club available, and 40 (52.6%) were not members of a related student club.

Only respondents who had had a job since terminating their high school vocational Autobody program were asked to respond to the question reported

in Table 13. Students in active full-time military service were excluded. Seven (9.2%) of the 76 terminees reported no related student club was available, while 40 (52.6%) were not members of a related student club.

Fourteen (48.3%) of the 29 terminees who participated in student club activities indicated they were "Excellent" or "Well Prepared" by their related student club for their present job. Two (6.9%) indicated they were "Poorly Prepared" by their related student club for their present job. Of those two, both were in a non-related job.

Of those terminees who were working in an area directly related to the training they received in their high school vocational program, six (54.5%) revealed that they were "Excellent" or "Well Prepared" for their present job by their related student club. None of the 11 terminees working in a job directly related to the training they received indicated they were "Poorly Prepared" for their present jobs by their related student clubs.

Table 14 reports how the 1973-74 Autobody terminees rated the quality of teaching by their high school vocational instructors.

TABLE 14

1973-74 AUTOBODY TERMINEES' RATINGS OF THE QUALITY OF TEACHING BY THEIR HIGH SCHOOL VOCATIONAL INSTRUCTORS

Rating	Number	Percent
Excellent	54	54.5
Good	31	31.3
Fair	11	11.1
Poor	2	2.0
Very Poor	1	1.0
TOTAL	99	100.0

Of the 99 reporting 1973-74 Autobody terminees 85 (85.8%) rated the quality of teaching by their vocational instructor either "Good" or "Excellent."

Only three (3.0%) rated the quality of teaching by their instructors "Poor" or "Very Poor."

Table 15 illustrates how the 1973-74 Autobody terminees rated their high school vocational instructor's interest in their class work.

TABLE 15

1973-74 AUTOBODY TERMINEES' RATINGS OF THEIR HIGH SCHOOL VOCATIONAL INSTRUCTOR'S INTEREST IN THE STUDENT'S CLASS WORK

Rating	Number	Percent
Excellent	53	53.5
Good	31	31.3
Fair	8	8.1
Poor	6	6.1
Very Poor	1	1.0
TOTAL	99	100.0

Eighty-four (84.8%) of the 99 reporting 1973-74 Autobody terminees rated the interest exhibited by their high school vocational instructor in their class work as "Good" or "Excellent." Only seven (7.1%) of the terminees rated the interest their vocational instructors showed in their class work as "Poor" or "Very Poor."

Table 16 points out how the 1973-74 Autobody terminees subjectively rated the knowledge their vocational teachers possessed about their field of study. This rating is also shown in the table by a breakdown of how the terminees' present job related to the training they received in their high school vocational program. Terminees were asked to base their judgments on their current knowledge of their job and responsibilities.

Total responses to this item indicates that 62 (86.1%) of the 72 responding 1973-74 Autobody terminees rated the knowledge their vocational teachers possessed about their field of study either "Good" or "Excellent."

For those twenty terminees working in an area directly related to the training they received, 16 (80.0%) rated the knowledge their teachers possessed about their field of study as "Good" or "Excellent." A favorable point was revealed in that only one of those terminees rated the knowledge their vocational teachers possessed about their field of study as "Poor" or "Very Poor."

TABLE 16

1973-74 AUTOBODY TERMINEES' RATINGS OF THE KNOWLEDGE THEIR HIGH SCHOOL VOCATIONAL TEACHER POSSESSED ABOUT THEIR FIELD OF STUDY BY HOW THE TERMINEES' PRESENT JOB RELATED TO THE TRAINING THEY RECEIVED

Ratings[A]	Total Reporting		Number Reporting by Relatedness of Present Job to Training Received					
			Directly Related		Somewhat Related		Not Related	
	No.	%	No.	%	No.	%	No.	%
Excellent	35	48.6	5	25.0	3	100.0	27	55.1
Good	27	37.5	11	55.0	0	0.0	16	32.7
Fair	9	12.5	3	15.0	0	0.0	6	12.2
Poor	1	1.4	1	5.0	0	0.0	0	0.0
Very Poor	0	0.0	0	0.0	0	0.0	0	0.0
TOTAL	72	100.0	20	100.0	3	100.0	49	100.0

[A]Ratings were to be based on terminee's judgment of their current knowledge of their job and responsibilities.

If the respondent was working in an area related to his training, he was asked to compare the facilities and equipment in his high school vocational program with those on his present job. Table 17 illustrates h how the 1973-74 Autobody terminees responded.

Ten (32.3%) of the 31 responding 1973-74 Autobody terminees working in an area related to their training rated the facilities and equipment

in their high school vocational program as better than those on their present job. Eleven (35.4%) rated the facilities and equipment in their high school vocational program as similar to those on their present job; however, ten (32.3%) rated the facilities and equipment not as good as those on their present job.

TABLE 17

HOW 1973-74 AUTOBODY TERMINEES WORKING IN A RELATED AREA RATED THE FACILITIES AND EQUIPMENT IN THEIR HIGH SCHOOL VOCATIONAL PROGRAM[A]

Rating[B]	Number	Percent
Better than those on present job	10	32.3
Similar to those on present job	11	35.4
Not as good as those on present job	10	32.3
TOTAL	31	100.0

[A]Forty-four (58.7%) of the responding 75 terminees indicated that their present job was not related to their vocational training enough to compare facilities and equipment.

[B]Persons who had not had a job since leaving their vocational program, including those in military service and those who attended school, were asked not to respond to questions from which data was drawn. Returns were received from 99 terminees.

Table 18 shows how 1973-74 Autobody terminees, who were in a cooperative work program in school and were now working in an area related to their vocational training, rated the facilities and equipment used in their cooperative work station.

Only six (24.0%) of the 25 responding 1973-74 Autobody terminees whose vocational programs had included cooperative work and were now working in an area related to their vocational training, rated the facilities and equipment in their cooperative work station as better than those on their present job. Ten (40.0%) rated the facilities and equipment in their cooperative

training station as similar to those on their present job. Only three (12.0%) rated the facilities and equipment in their cooperative work station not as good as those in their present job. It was significant to note that six (24.0%) indicated they were working at the same establishment where they did their cooperative training.

TABLE 18

HOW 1973-74 AUTOBODY TERMINEES NOW WORKING IN A RELATED AREA, WHOSE VOCATIONAL PROGRAM INCLUDED COOPERATIVE WORK, RATED FACILITIES AND EQUIPMENT USED IN THEIR COOPERATIVE WORK STATION[A]

Rating[B]	Number	Percent
Better than those on present job	6	24.0
Similar to those on present job	10	40.0
Working at same place where cooperative training was done	6	24.0
Not as good as those on present job	3	12.0
TOTAL	25	100.0

[A]Fourteen (19.4%) of the responding 72 Autobody terminees indicated their vocational program was not a cooperative program. Thirty-three (45.8%) terminees indicated they were not working in an area related to their cooperative work; therefore, they did not complete this item on the questionnaire.

[B]Persons who had not had a job since leaving their vocational program, including those in military service and those attending school, were asked not to respond to questions from which data were drawn. Returns were received from 99 terminees.

Basic Employment Information

The following section of this report offers information relative to employment and job characteristics of the 1973-74 secondary Autobody terminees.

Table 19 illustrates the number of full-time jobs the responding 1973-74 Autobody terminees have had since leaving their high school vocational course.

TABLE 19

NUMBER OF FULL-TIME JOBS HELD BY THE 1973-74 AUTOBODY TERMINEES SINCE LEAVING THEIR HIGH SCHOOL VOCATIONAL COURSE

Number of Full-Time Jobs Held	Number	Percent[A]
One	46	46.5
Two	22	22.2
Three	8	8.1
Four	2	2.0
Five or more	2	2.0
TOTAL	80	80.8

[A]Percentage is based on the 99 terminees who returned the questionnaire.

There were 46 (46.5%) of the total 99 responding 1973-74 Autobody terminees who had been employed in just one job since leaving their high school vocational program. Twenty-two (22.2%) of the terminees reported having two jobs since leaving their high school vocational course seven to eight months ago.

Table 20 reveals the first-job employment status of Autobody terminees who returned the survey by the relatedness of their vocational training to their first job.

Of the 99 responding 1973-74 Autobody terminees, 68 (68.7%) were employed full time in their first job after leaving their high school vocational program. Twelve (12.1%) terminees' first jobs were on a part-time basis.

Twenty-six (26.2%) of the 99 responding terminees' first jobs (full-time or part-time) were in an area directly related to the training they received in their high school vocational course. Four (4.0%) were employed in an area somewhat related while 50 (50.5%) were employed in a first job not related to the training they received. The terminees made the judgment as to how their first job was related to the training they received in their high school vocational program.

Of the 52 terminees who indicated their jobs were not related to their vocational course, 21 (40.4%) terminees indicated that before they accepted their unrelated job, they tried to get a job that was related to their vocational training. However, 31 (59.6%) of the terminees did not.

TABLE 20

FIRST-JOB EMPLOYMENT STATUS OF AUTOBODY TERMINEES (1973-74) BY RELATEDNESS OF VOCATIONAL TRAINING TO FIRST JOB[A]

First Job After Leaving High School Vocational Program	Total Reporting		Relatedness of Vocational Training to First Job[B]					
			Directly Related		Somewhat Related		Not Related[C]	
	No.	%	No.	%	No.	%	No.	%
Full-Time	68	68.7	24	24.2	3	3.0	41	41.4
Part-Time	12	12.1	2	2.0	1	1.0	9	9.1
TOTAL	80	80.8	26	26.2	4	4.0	50	50.5

[A]All percentages were based on the 99 (25.1%) of 395 terminees who returned the survey form.

[B]The terminees made the judgment as to how their first job was related to the training received in their high school vocational program.

[C]See below for reasons terminees who were working in first job unrelated to their vocational training gave for not seeking job that was related before accepting their first job.

The following is a list of reasons given by 12 of the 15 terminees who, before taking their first unrelated job indicated they did not seek a job related to their vocational training.

Reasons	Number
It was not what I wanted to do	1
Couldn't find that kind of job	1
None near by	1
Type of work auto body required didn't interest me	1

(continued)

Reasons	Number
Not well trained	1
I hate Autobody	1
Didn't have enough training; Didn't like that kind of work	1
Because of pay	1
Gas Station	1
I just needed some money	1
I already had a job waiting	1
Were none around	1

Table 21 shows number of returns by type school and termination status for the first job of the 1973-74 Autobody terminees and the relatedness of their training to this first job.

TABLE 21

NUMBER OF RETURNS BY SCHOOL AND TERMINATION STATUS FOR 1973-74 AUTOBODY TERMINEES' FIRST JOB AND RELATEDNESS OF TRAINING[A]

Type School and Termination Status	Number Returns	Total Employed by Area Studied		Relatedness of Training to First Job[D]					
				Directly Related		Somewhat Related		Not Related	
		No.	%	No.	%	No.	%	No.	%

Dropouts[C]	15	11	11.1	2	2.0	1	1.0	8	8.1
Other Type Schools									
Total	28	27	27.2	11	11.1	3	3.0	13	13.1
Completers	25	24	24.2	10	10.1	2	2.0	12	12.1
Dropouts	3	3	3.0	1	1.0	1	1.0	1	1.0
Grand Total	99	84	84.8	28	28.2	5	5.0	51	51.5
Completers	81	70	70.7	25	25.2	3	3.0	42	42.4
Dropouts	18	14	14.1	3	3.0	2	2.0	9	9.1

[A]All percentages are based on the 99 (25.1%) of 395 terminees who returned the survey form.
[B]Any terminee who left the program by completing or by high school graduation.
[C]Any terminee who the instructor reported as having dropped out of school.
[D]The terminees made the judgment as to how their first job was related to the training received in their high school vocational program.

Table 22 illustrates the current employment status of the responding terminees by the relatedness of their vocational training to their present jobs. All percentages figured in the table were based on the 99 (25.1%) returns from the 395 Autobody terminees.

Of the 99 responding 1973-74 secondary Autobody terminees, 63 (63.6%) were presently employed full time and not attending school or employed full time and attending school. Five (5.0%) of the terminees were employed part time and attending school, while seven (7.1%) were unavailable for employment (See below for reasons terminees were unavailable for employment). Only ten (10.1%) of the terminees were unemployed and actively seeking employment, while one (1.0%) was employed part time and seeking full-time employment.

The "No Response" category in Table 22 includes three groups: (1) terminees in active full-time military service; (2) terminees who were in school full time and had never had a job; and (3) terminees who failed to respond to the item on the questionnaire.

Of the 99 secondary Autobody respondees, 20 (20.2%) were presently employed full time or part time in an area directly related to the training received in their high school vocational course. Three (3.0%) were employed either part time or full time in an area somewhat related to their training, while 45 (45.4%) were employed in areas not related to training. The terminees made the judgment as to how their present employment was related to the training received in their high school vocational course.

Of the 51 terminees who indicated their present jobs were not related to their vocational course, 19 (37.3%) terminees indicated that before they accepted their unrelated job, they tried to get a job that was related to their vocational training. However, 32 (62.7%) of the terminees did not.

TABLE 22

CURRENT EMPLOYMENT STATUS OF AUTOBODY TERMINEES (1973-74)
BY RELATEDNESS OF TRAINING TO PRESENT JOB[A]

Employment Status	Total Respond-ing		Relatedness of Training to Present Job[B]							
			Directly Related		Somewhat Related		Not Related[E]		Employed No Response

Unavailable for employment[C&D]	7	7.1	N/A		N/A		N/A		N/A	
No Response	13	13.1	N/A		N/A		N/A		N/A	
TOTAL	99	100.0	20	20.2	3	3.0	45	45.4	1	1.0

[A]All percentages were based on the 99 (25.1%) respondents of the total 395 terminees. Terminees in active full-time military service or attending school full-time and had never been employed were included in the "No Response" category.

[B]The terminees made the judgment as to how their present job was related to the training received in their high school vocational program.

[C]The unemployed and unavailable for employment categories do not include persons in the military service and persons who were in school full time and never had a job.

[D]See page 24 for the listing of reasons Autobody terminees gave for being unavailable for employment.

[E]See page 24 for reasons terminees who were working in present job not related to vocational training gave for not seeking related job before accepting present job. Totals for unrelated columns may not correspond because terminees failed to respond to one of the two questions from which data were drawn.

Below is a list of the reasons given by the terminees for being unavailable for employment.

Reasons	Number
In school full time	7
Presently not working, not interested in a job	1
Homemaker	0
Pregnancy	0
Illness or disability	1
Other	1

The following is a list of reasons given by 30 of the 32 terminees who, before taking their present unrelated job, indicated they did not seek a job that was related to their vocational training.

Reasons	Number
Not interested	5
Had better job offer	2
Not what I wanted to do	1
Couldn't find that kind of job	5
In School	1
Already had a job	2
Had money	1
While going to school I tried to find a job in Autobody	1
Lay off	1
Hate Autobody	1
Didn't have enough training	1
Planning on Jr. College	1
Cut in pay	1
Didn't finish school that year	1
Took first job offer	1
Have own paint shop	1
Grocery business	1
Do not know the trade	1
I do body work at home on the side	1

Table 23 shows for the present job, the number of 1973-74 secondary Autobody terminees employed by the relatedness of their vocational training to their present job.

Of the 71 terminees presently employed that studied Autobody 20 (27.8%) were employed in an area directly related to the training received in their

high school vocational program. Forty-nine (68.1%) terminees who studied Autobody indicated their present job was somewhat related to their high school vocational training. The terminees made the judgment as to how their present job related to the training received in their high school vocational program.

TABLE 23

NUMBER OF RETURNS BY TYPE SCHOOL AND TERMINATION STATUS FOR 1973-74 AUTOBODY TERMINEES PRESENT JOB, AND RELATEDNESS OF TRAINING TO PRESENT JOB[A]

Dropouts	18	9	9.1	1	1.0	0	0.0	8	8.1

[A]Percentage is based on the 99 (25.1%) of the 395 terminees who returned the survey form.

[B]Any terminee who left the program by completing or by high school graduation.

[C]Any terminee who the instructor reported as having dropped out of school.

[D]The terminees made the judgment as to how their first job was related to the training received in their high school vocational program.

Table 24 indicates the first job salary ranges as compared to the present job salary ranges for the 1973-74 Autobody terminees.

TABLE 24

FIRST-JOB SALARY RANGES AND PRESENT-JOB SALARY RANGES FOR 1973-74 AUTOBODY TERMINEES

Salary Ranges	First Job		Present Job	
	No.	%	No.	%
Under $250	34	41.5	9	13.4
$250 - $299	11	13.4	6	9.0
$300 - $349	15	18.3	9	13.4
$350 - $399	7	8.5	11	16.4
$400 - $449	4	4.9	9	13.4
$450 - $499	6	7.3	4	6.0
$500 - $599	2	2.4	14	20.9
$600 - $699	1	1.2	3	4.5
$700 or more	2	2.4	2	3.0
TOTAL	82	100.0	67	100.0

Of the 82 terminees reporting a salary range for their first job, 34 (41.5%) indicated a range of under $250 per month. Three terminees reported a first salary of over $600 per month. The median salary range for the first job fell in the range of $250 - $349 per month. The mean salary range for the first job also fell in the same range of $250 - $349 per month.

Of the 67 1973-74 Autobody terminees reporting a salary range for their present job, nine (13.4%) indicated under $250 per month. The median and mean salary ranges for the present job fell within the range of $350 - $449 per month. The median and mean salary ranges of present jobs over first jobs indicate a considerable increase for the reporting Autobody terminees.

Table 24A indicates the first-job salary ranges by relatedness of training of the Autobody terminees.

Twenty-nine (40.8%) of the 71 responding terminees were employed at less than $250 per month. Of these 29 terminees, nine (12.7%) males

were employed in a job directly related to their training, three (4.2%) were employed in jobs somewhat related to their training, while 17 (23.9%) were employed in jobs not related to their training.

TABLE 24A

FIRST-JOB SALARY RANGES BY RELATEDNESS OF TRAINING OF 1973-74 AUTOBODY TERMINEES

Salary Range	Sex of Terminees Responding	Relatedness of Training to First Job[B]		
		Directly Related	Somewhat Related	Not Related
	Male	Male	Male	Male
Under $250	29	9	3	17
$250 - $299	8	4	0	4
$300 - $349	13	4	0	9
$350 - $399	7	2	0	5
$400 - $449	4	0	0	4
$450 - $499	5	1	1	3
$500 - $599	2	1	0	1
$600 - $699	1	0	0	1
$700 or more	2	2	0	0
TOTAL[A]	71	23	4	44

[A]Totals do not match those of Table 24 because some terminees did not respond to all questions.

[B]The terminees made the judgment as to how their first job was related to the training received in their high school vocational program.

Of the 71 responding terminees, all were males. Twenty-three (32.4%) were employed in jobs directly related to their vocational training, four (5.6%) were employed in jobs somewhat related to their training, while 44 (62.0%) were employed in jobs not related to their training.

Table 24B indicates the present-job salary ranges by relatedness of training of the Autobody terminees.

TABLE 24B

PRESENT-JOB SALARY RANGES BY RELATEDNESS OF TRAINING OF 1973-74 AUTOBODY TERMINEES

Salary Ranges	Sex of Terminees Responding	Relatedness of Training to Present Job[B]		
		Directly Related	Somewhat Related	Not Related
	Male	Male	Male	Male
Under $250	8	3	0	5
$250 - $299	6	1	0	5
$300 - $349	9	2	0	7
$350 - $399	9	4	0	5
$400 - $449	7	3	0	4
$450 - $499	2	0	0	2
$500 - $599	13	4	1	8
$600 - $699	3	0	1	2
$700 or more	2	2	0	0
TOTAL[A]	59	19	2	38

[A]Totals do not match those of Table 24 because some terminees did not respond to all questions.

[B]The terminees made the judgment as to how their present job was related to the training received in their high school vocational program.

Eight (13.5%) of the 59 responding terminees were employed at less than $250 per month. Of these eight terminees, three (5.1%) were employed in a job directly related to their training, while five (8.5%) were employed in jobs not related to their training.

Of the 59 responding terminees, all were males. Nineteen (32.2%) were employed in jobs directly related to their vocational training, two (3.4%) were employed in jobs somewhat related to their training, while 38 (64.4%) were employed in jobs not related to their training.

Continuing Education Information

The following section of this report presents information relative to the continuing education of the 1973-74 secondary Autobody terminees.

Table 25 shows the vocational educational training opportunities terminees have participated in since leaving their high school vocational program.

TABLE 25

ADDITIONAL VOCATIONAL EDUCATIONAL TRAINING 1973-74
SECONDARY AUTOBODY TERMINEES PARTICIPATED
IN SINCE LEAVING THEIR HIGH SCHOOL
VOCATIONAL PROGRAM[A]

Type Training	Number	Percent[B]
On-the-job training (employer-sponsored program)	13	13.1
Public school adult vocational program	1	1.0
Private vocational school program	0	0.0
University or four year college	2	2.0
Junior college	8	8.1
Post-secondary vocational-technical institute (trade school)	5	5.0
Apprenticeship training program	1	1.0
Specialized occupational military training	1	1.0
Other[C]	9	9.1
TOTAL[D]	40	40.4

[A]Sixty-two (62.6%) of the 99 terminees gave no indication of being involved in additional vocational training. Of the 99 terminees 36 (36.3%) took part in one additional vocational training opportunity since leaving their high school program. Two (2.0%) took part in two and two (2.0%) terminees took part in the three additional training opportunities.

[B]Percentages are based on the 99 (25.1%) respondents of the total 395 terminees who returned questionnaires.

[C]See page 30 for the "Other" listing as specified by the terminees.

[D]The total indicated the number of different training programs in which terminees enrolled. As footnoted above, several terminees had enrolled in more than one training program.

Of the total terminees, the 13 (13.1%) who had on-the-job training represented the largest area where terminees had taken additional vocational training.

Of the 99 responding terminees, 36 (36.3%) had taken part in on additional vocational training program since leaving their high school

program. Two (2.0%) enrolled in two training programs, and two (2.0%) terminees had enrolled in three vocational training programs. Sixty-two (62.6%) indicated they had not enrolled in any additional vocational training.

The following is a listing of the "Other" (Table 25) vocational education training terminees indicated they had participated in:

"Other" Vocational Training	Number
Stayed on as a body man	1
High school	1
Mental retardation	1
R.E.T.S. electronics	1
Meat cutting	1
Own my car here	1

Table 26 points out the additional programs the 1973-74 secondary Autobody terminees were presently attending beyond their high school vocational program.

Of the 99 1973-74 secondary Autobody terminees who responded to the survey, two (2.0%) were attending an on-the-job training program (employer-sponsored), six (6.1%) were attending a vocational technical institute, six (6.1%) were attending a junior college, two (2.0%) were attending a four year college or university, none were attending a public adult vocational program, private business or trade school, or an apprenticeship program. Five (5.0%) were attending some other type of school or educational program. (See page 31 for the listing of the other types of schools or educational programs students were attending.)

Twenty-one (21.2%) of the 99 Autobody terminees were presently continuing their education. Seven (7.1%) of the terminees were continuing their education in a program related to their high school vocational program. Fourteen (14.1%) were attending a program in an area not related to their high school vocational program.

TABLE 26

PROGRAMS PRESENTLY ATTENDED BY THE 1973-74 SECONDARY AUTOBODY TERMINEES BY WHETHER THESE PROGRAMS WERE RELATED TO THEIR HIGH SCHOOL VOCATIONAL EDUCATION PROGRAM[A]

Programs Attended	Terminees		Program Related to High School VED Program			
			Yes		No	
	No.	%	No.	%	No.	%
On-the-job training (employer-sponsored)	2	2.0	1	1.0	1	1.0
Vocational-technical institute (Trade School)	6	6.1	5	5.0	1	1.0
Junior college	6	6.1	0	0.0	6	6.1
Four year college or university	2	2.0	0	0.0	2	2.0
Public school adult vocational program	0	0.0	0	0.0	0	0.0
Private business or trade school	0	0.0	0	0.0	0	0.0
Apprenticeship program	0	0.0	0	0.0	0	0.0
Other[B]	5	5.0	1	1.0	4	4.0
TOTAL	21	21.2	7	7.1	14	14.1

[A]All percentages were based on the 99 responding terminees.

[B]See below for listing of "Other" schools or educational institutions terminees were attending.

The following is a listing of the "Other" category (Table 26) of additional programs the 1973-74 Autobody terminees were attending:

"Other" School or Program	Number
High School	3
Night School	1
Trade School	1

Of the 99 responding terminees, 70 (70.7%) indicated they would like further vocational training. The following is a list of the areas in which these terminees desired to study:

Area of Study	Number
Autobody	21
Body & fender	9
Auto Mechanics	4
Computer training	2
Air Conditioning Refrigeration	3
Jet Mechanic	1
Water & Pollution Control	1
Machinist apprentice	1
Automotive Painting	1
Radio/TV Repair	1
Welding	5
Industrial Electricity	1
Business	1
Electronics	1
Machinist	1
Drafting	2
Maintenance	1
College	1
Uncertain	2

Twenty (20.2%) of the 99 responding terminees indicated they did not desire further training. Nine (9.1%) terminees did not respond to the question.

Job Placement Information

The following section of this report presents information concerning job placement of the 1973-74 secondary Autobody terminees.

Table 27 points out whether the 1973-74 Autobody terminees were seeking full-time employment when they left their high school vocational program and if their vocational teacher attempted to help them get a job.

Of the 60 responding 1973-74 Autobody terminees indicating they were seeking full-time employment when they left their high school vocational

program, 28 (46.7%) indicated that their vocational teacher attempted to help them get a job. However, 32 (53.3%) of the terminees seeking full-time employment indicated that their vocational teacher did not attempt to help them secure employment. It was interesting to note that 34 (34.3%) of the reporting 1973-74 Autobody terminees indicated that they were not seeking full-time employment when they left their high school vocational program.

TABLE 27

WHETHER VOCATIONAL TEACHER ATTEMPTED TO HELP 1973-74 AUTOBODY TERMINEES GET A JOB IF SEEKING FULL-TIME EMPLOYMENT UPON LEAVING THE HIGH SCHOOL VOCATIONAL PROGRAM[A]

Vocational Teacher Attempted To Get Terminee A Job	Number	Percent
Yes	28	46.7
No	32	53.3
TOTAL	60	100.0

[A]Thirty-four (34.3%) of the responding terminees indicated they were not seeking full-time employment when they left their high school vocational program. Two (2.0%) of the terminees did not respond to the question.

Table 28 illustrates how long it took the 1973-74 Autobody terminees to get their first full-time job after they left their high school vocational program and began actively seeking full-time employment.

Twenty-five (55.6%) of the 45 secondary Autobody terminees secured their first full-time job within two weeks after they left their high school vocational program and began actively seeking full-time employment. However, five (11.1%) of the terminees took 13 or more weeks to secure their first full-time job. There were 39 terminees who indicated they already had a job when they left their high school vocational program.

TABLE 28

LENGTH OF TIME IT TOOK THE 1973-74 AUTOBODY TERMINEES TO SECURE FIRST FULL-TIME JOB AFTER LEAVING HIGH SCHOOL VOCATIONAL PROGRAM AND BEGINNING ACTIVELY SEEKING FULL-TIME EMPLOYMENT[A]

Time to Secure First Full-Time Job	Number	Percent
0 - 2 weeks	25	55.6
3 - 4 weeks	10	22.2
5 - 8 weeks	5	11.1
9 - 12 weeks	0	0.0
13 or more weeks	5	11.1
TOTAL	45	100.0

[A]Thirty-nine terminees indicated they already had a job when they left their high school vocational program.

Table 29 shows how the 1973-74 secondary Autobody terminees indicated they got their first full-time job after leaving their high school vocational program.

Of the 52 Autobody terminees who responded to the survey item, thirty-two (61.5%) of the terminees indicated they got their first full-time job through a friend or relative. Eight (15.4%) indicated they got their first full-time job after leaving their high school vocational program through applications to business and industry. These represented the two methods that the largest number of Autobody terminees utilized to secure their first full-time job. Only three (5.8%) of the terminees indicated they secured their first job through their vocational teacher. One student indicated that a counselor got him his first full-time job after leaving his vocational program. Those students who already had a job before leaving their high school vocational program were not shown in Table 29. (See Table 30, page 36).

TABLE 29

HOW THE 1973-74 AUTOBODY TERMINEES INDICATED THEY GOT THEIR FIRST FULL-TIME JOB AFTER LEAVING THEIR HIGH SCHOOL VOCATIONAL PROGRAM

How Terminees Secured First Full-Time Job	Number	Percent
Through your vocational teacher	3	5.8
Through your counselor	1	1.9
Through other school teachers or administrators	0	0.0
Through a friend or relative	32	61.5
Through applications to business or industry	8	15.4
Through state (local) employment office	2	3.8
Through a private employment agency	1	1.9
Through radio, T.V., newspaper, or other news media	0	0.0
Other[A]	5	9.6
TOTAL	52	100.0

[A]See listing below for the "Other" ways terminees indicated they secured their first full-time job after leaving their high school vocational program.

The five terminees who checked the "Other" category specified the means by how they secured their first full-time jobs after leaving their high school vocational programs. The following list indicates the "Other" means the terminees indicated.

"Other" Means for Securing First Full-Time Job	Number
Looked myself	1
Military	1
Put in application	1
Principal of school	1
Brother-in-school	1

Table 30 shows how the 1973-74 Autobody terminees who were working while in high school taking their vocational program indicated they got that job.

Forty-five (45.5%) of the 99 reporting 1973-74 Autobody terminees indicated they were working during the time they were in high school taking their vocational program. Of those terminees working while in high school, 19 (42.2%) got their job through a friend or relative, 10 (22.2%) through their vocational instructor, and seven (15.6%) got jobs through applications to business or industry. These three means were the ways most of the terminees secured a job while they were still in high school taking their vocational program.

TABLE 30

HOW THE 1973-74 AUTOBODY TERMINEES WHO WERE WORKING WHILE IN HIGH SCHOOL TAKING THEIR VOCATIONAL PROGRAM INDICATED THEY GOT THAT JOB[A]

Who or What Helped Terminee Get Job	Number	Percent
Your vocational teacher	10	22.2
Your counselor	1	2.2
Other school teachers or administrators	0	0.0
Friend or relative	19	42.2
Applications to business or industry	7	15.6
State (local) employment office	0	0.0
Private employment agency	1	2.2
Radio, T.V., newspaper, or other news media	0	0.0
Other	7	15.6
TOTAL	45	100.0

[A]Fifty-five (55.6%) terminees indicated they had no job during the time they were in high school taking their vocational course.

Table 31 reveals the indications of the 1973-74 Autobody terminees as whether, before taking their first job, they looked for employment within daily walking or driving distance of home by how their first job related to their vocational training.

Forty-two (82.4%) of the 1973-74 Autobody terminees who were employed in their first job indicated they sought employment within daily walking

or driving distance of home. Nine (17.6%) terminees indicated before taking their first job, they looked for a job beyond daily walking or driving distance of home.

Of the 16 terminees who were working in a directly related area, none sought employment beyond daily walking or driving distance of home.

TABLE 31

INDICATIONS OF 1973-74 AUTOBODY TERMINEES AS TO WHERE THEY LOOKED FOR THEIR FIRST JOB BEFORE TAKING ONE BY HOW THEIR FIRST JOB RELATED TO THEIR TRAINING[A]

Before Taking First Job, Where Terminees Looked For Job	Total Reporting		Total Reporting by Relatedness of First Job to Vocational Training					
			Directly Related		Somewhat Related		Not Related	
	No.	%	No.	%	No.	%	No.	%
Within daily walking or driving distance of home	42	82.4	16	100.0	2	100.0	24	72.7
Beyond daily walking or driving distance of home[B]	9	17.6	0	0.0	0	0.0	9	27.3
TOTAL	51	100.0	16	100.0	2	100.0	33	100.0

[A]Twenty-five indicated they already had their first job while in high school. Of those 25 terminees, eight (32.0%) were working in a directly related area, one (4.0%) in a somewhat related area, while 14 (56.0%) were working in a non-related area. Two (8.0%) did not indicate the relatedness of their training.

[B]See listing, page 37, for reasons terminees gave for seeking their first job away from home.

It is interesting to note that of the 33 terminees whose first jobs did not relate to their training, nine of those terminees sought employment beyond daily walking or driving distance of home.

Twenty-five indicated they had their first job while in high school. Of those 25 terminees, eight (32.0%) were working in a directly related area, one (4.0%) in a somewhat related area, and 14 (56.0%) were working in a non-related area.

The following is a listing of reasons terminees gave for seeking a job beyond daily walking or driving distance of their home before accepting their first job. Of the nine terminees who indicated they sought a job beyond daily walking or driving distance of home before accepting their first job, two gave reasons why they sought that job.

Reasons for Seeking Job Beyond Daily Walking or Driving Distance Before Accepting First Job	Number
To make more money	1
Army	1

Table 32 reveals the indications of the 1973-74 Autobody terminees who were working in their first job not related to their training by whether or not they tried to get a job related to their training by where they looked for employment before accepting that first job.

TABLE 32

INDICATIONS OF THE 1973-74 AUTOBODY TERMINEES WORKING IN FIRST JOB NOT RELATED TO THEIR TRAINING BY WHETHER OR NOT THEY TRIED TO GET A JOB RELATED TO THEIR TRAINING BY WHERE THEY LOOKED FOR EMPLOYMENT BEFORE ACCEPTING FIRST JOB[A]

Where Terminees Working in Non-Related Areas Looked for Employment Before Accepting First Job	Total Reporting		Before Accepting This First Job Unrelated to Training Whether Terminees Sought Job in Related Area			
			Yes		No[B]	
	No.	%	No.	%	No.	%
Sought employment within daily walking or driving distance of their home	23	71.9	10	66.7	13	76.5
Sought employment beyond daily walking or driving distance of their home	9	28.1	5	33.3	4	23.5
TOTAL	32	100.0	15	100.0	17	100.0

[A]Totals in this table may not correspond with totals of terminees for non-related categories in other tables for the following reasons: (1) some terminees had jobs when leaving program and did not have to seek employment and (2) some terminees failed to respond to one or more of the related questions from which data was drawn.

[B]See page 20 for the listing of reasons terminees who were working in non-related jobs gave for not trying to secure a job that was related to their training.

It is important to note that of the 32 terminees who were working in a non-related first job, only five (15.6%) sought related employment beyond daily walking or driving distance of home before accepting his first job.

Table 33 illustrates the indications of the 1973-74 Autobody terminees as to where they looked for a job before taking their present job by how their present job is related to their vocational training.

TABLE 33

INDICATIONS OF 1973-74 AUTOBODY TERMINEES AS TO WHERE THEY LOOKED FOR A JOB BEFORE TAKING THEIR PRESENT JOB BY HOW THEIR PRESENT JOB RELATED TO THEIR TRAINING[A]

Where Terminees Looked for Job Before Taking Present Job	Total Reporting		Total Reporting by Relatedness of Present Job to Vocational Training					
			Directly Related		Somewhat Related		Not Related	
	No.	%	No.	%	No.	%	No.	%
Within daily walking or driving distance of home	35	74.5	11	100.0	2	100.0	22	64.7
Beyond daily walking or driving distance of home[B]	12	25.5	0	0.0	0	0.0	12	35.3
TOTAL	47	100.0	11	100.0	2	100.0	34	100.0

[A]Twenty-two reported they already had their present job while in high school. Of those 22 terminees, eight (26.4%) were in a directly related area, one (4.5%) in a somewhat related area, while eleven (55.0%) were working in a non-related area. Two (9.0%) did not indicate the relatedness of their training.

[B]See listing, page 39, for reasons terminees gave for seeking their present job away from home.

Thirty-five (74.5%) of the presently employed 1973-74 Autobody terminees indicated they sought employment within daily walking or driving distance of home. Twelve (25.5%) terminees indicated they sought employment beyond daily walking or driving distance of home.

All eleven terminees who were working in a directly related area,

sought employment within daily walking or driving distance of home.

Of the 34 terminees who were presently working in a non-related area, twelve (35.3%) sought employment beyond daily walking or driving distance of his home.

Twenty-two terminees reported they already had their present job while in high school. Of those 22 terminees, eight (36.4%) were in directly related areas, one (4.5%) in somewhat related area, and 11 (50.0%) were in non-related areas.

The following is a list of reasons terminees gave for seeking a job beyond daily walking or driving distance of their home before accepting their present job. Of the 12 terminees who indicated they sought a job beyond daily walking or driving distance of home before accepting their present job, ten gave reasons why they sought that job.

Reasons for Seeking Job Beyond Daily Walking or Driving Distance Before Accepting Present Job	Number
No jobs close	3
Apprenticeship program	1
To find work	1
Make more money	1
To find out life for myself	1
Quit too early	1
U. S. Army, one body shop	1
So it would be close to school	1

Table 34 reveals the indications of the 1973-74 Autobody terminees who were working in their present job not related to their training by whether or not they tried to get a job related to their training by where they looked for employment before accepting that present job.

Six (18.2%) of the 33 terminees who were working in a non-related area sought related employment beyond daily walking or driving distance of home before accepting their present job.

TABLE 34

INDICATIONS OF THE 1973-74 AUTOBODY TERMINEES WORKING IN PRESENT JOB NOT RELATED TO THEIR TRAINING BY WHETHER OR NOT THEY TRIED TO GET A JOB RELATED TO THEIR TRAINING BY WHERE THEY LOOKED FOR EMPLOYMENT BEFORE ACCEPTING PRESENT JOB[A]

			Yes		No[B]	
	No.	%	No.	%	No.	%
Sought employment within daily walking or driving distance of their home	21	63.6	9	60.0	12	66.7
Sought employment beyond daily walking or driving distance of their home	12	36.4	6	40.0	6	33.3
TOTAL	33	100.0	15	100.0	18	100.0

[A]Totals in this table may not correspond with totals of terminees for non-related categories in other tables for the following reasons: (1) some terminees had jobs when leaving programs and did not have to seek employment and (2) some terminees failed to respond to one or more of the related questions from which data were drawn.

[B]See page 24 for the listing of reasons terminees who were working in non-related jobs gave for not trying to secure a job that was related to their training.

APPENDIX

PRESENT JOB AND FIRST JOB TITLES OF THE
1973-74 AUTOBODY TERMINEES

PRESENT JOB AND FIRST JOB TITLES OF THE
1973-74 AUTOBODY TERMINEES

For those terminees who indicated present or first job occupations, this appendix lists the present job title and first job title. The job titles are listed as the terminees reported them. The number of full-time jobs held by these terminees since completing their high school vocational course is listed, current employment status is listed, and whether the student intended to get a job in the area while in the program.

The following code is used to identify the employment status of the terminees:

0. Unemployed, but seeking employment
1. Employed full time
2. Employed part time, seeking full-time job
3. Employed part time, not seeking full-time job
4. Employed full time and attending school'
5. Employed part time and attending school
6. Unavailable for employment

The following code is used to identify whether the student intended to get a job in the area while in the program.

1. No
2. Was not sure
3. Yes

The number in parenthesis behind the job titles indicates the relatedness of the high school vocational training to these jobs. The terminees

made the judgment as to the relatedness of their training to these jobs. The following is used to identify this relatedness:

1. Directly related
2. Somewhat related
3. Not related

The total does not correspond to the total reporting since some of the terminees failed to indicate the title of their present position. If the first job title was the same as the present job title, the first job title is included under the present job title.

DESCRIPTIVE NOTE: 201P.; RELATED DOCUMENTS VT 103 321 THROUGH VT 103 335 IN THIS ISSUE.

ABSTRACT: THIS REPORT RELATES THE FINDINGS OF A STATEWIDE FOLLOWUP SURVEY OF 1973-74 TRADE AND INDUSTRIAL OCCUPATIONS COOPERATIVE TERMINEES FROM THE SECONDARY SCHOOL VOCATIONAL PROGRAMS IN ALABAMA. QUESTIONNAIRES WERE MAILED TO 2,410 STUDENT TERMINEES APPROXIMATELY SEVEN TO EIGHT MONTHS AFTER LEAVING SCHOOL. RETURNS WERE RECEIVED FROM 753 (31.2 PERCENT) OF THE TRADE AND INDUSTRIAL OCCUPATIONS COOPERATIVE TERMINEES FROM THE INITIAL MAILING AND ONE FOLLOWUP. DATA ARE PRESENTED IN TABLES WITH ACCOMPANYING NARRATIVE SUMMARIES ORGANIZED ACCORDING TO THESE MAJOR SECTIONS: GENERAL INFORMATION ON THE TERMINEES; BASIC INFORMATION RELATED TO THE VOCATIONAL PROGRAM; BASIC EMPLOYMENT INFORMATION; CONTINUING EDUCATION INFORMATION; AND JOB PLACEMENT INFORMATION. PRESENT AND FIRST JOB TITLES OF THE 1973-74 TRADE AND INDUSTRIAL OCCUPATIONS COOPERATIVE TERMINEES ARE APPENDED. (NJ)

For their help in refining the survey instrument, special thanks are due the following state supervisors:

Mrs. Divine Bauer, Health Occupations Education
Miss Evelyn Cotney, Home Economics Education
Mr. H. W. Green, Agribusiness Education
Mr. J. C. Lindley, Trade and Industrial Education
Mrs. Anacile Kurth, Distributive Education
Mrs. Sandra Yelverton, Business and Office Education

Appreciation is also extended to the following members of the Occupational Research and Development Unit for their contribution to the study:

Mrs. Bonnie J. Burks, Research Associate
Mr. Paul Davis, Research Associate
Mr. Garry Greenshields, Graduate Research Assistant
Mr. John Gross, Research Associate
Mr. James McMath, Graduate Research Assistant
Ms. Flossi Sergen, Secretary
Mr. Ed Williams, Duplicating Operator

FOLLOW-UP OF 1973-74 TRADE AND INDUSTRIAL OCCUPATIONS
CO-OPERATIVE TERMINEES FROM THE SECONDARY
SCHOOL VOCATIONAL PROGRAMS OF ALABAMA

Alabama continues to support one of the most progressive and comprehensive vocational education programs in the nation. In addition to serving youth and adults by training them for gainful and useful employment, the diversification of vocational courses meets a serious job need and contributes to the industrial development in the state.

With the millions of tax dollars being spent on vocational education, it is necessary to attempt to account to the taxpayer and decision-makers on the results of those expenditures. Terminee student follow-up studies constitute one of the most valuable techniques for assessing vocational education system outcomes.

The Alabama State Department of Education, Division of Vocational Education and Community Colleges, recognizing this important phase of accountability and evaluation, initiated the development of a statewide follow-up system for its vocational education program terminees at the secondary school level. The Division, under the direction of Dr. T. L. Faulkner, State Director, contracted with the Occupational Research and Development Unit at Auburn University to develop and implement the statewide follow-up system for all its secondary vocational terminees in all service areas.

This report relates the findings of the survey instrument mailed to the 1973-74 Trade and Industrial Occupations Co-operative terminees

from the secondary school vocational programs of Alabama. When the co-operative terminees received the questionnaire, most had been out of school seven to eight months.

General Information

Student rosters with names and addresses of 1973-74 Trade and Industrial Occupations Co-operative terminees were received from 91 secondary school vocational teachers in Alabama. Of the 91 teachers from which co-operative student rosters were received, seven were in Secondary Area Vocational Centers (AVC) and 84 were in co-operative programs in schools of other settings. The total of 2,410 co-operative student terminees reported to the ORDU were mailed the follow-up forms. Returns were received from 753 (31.2%) of the Trade and Industrial Occupations Co-operative terminees from the initial mailing and one follow-up. At least one student questionnaire was received from each of the 91 teachers.

All terminees reported in this study were in co-operative programs administered only by the Trade and Industrial Section of the Division of Vocational Education and Community Colleges, State Department of Education.

Table 1 presents data relative to the total population of Trade and Industrial Occupations Co-operative terminees and the number of returns categorized by OE codes as reported by the co-operative teachers.

TABLE 1

DESCRIPTION OF TOTAL POPULATION AND RETURNS BY OE CODE OF
1973-74 TRADE AND INDUSTRIAL OCCUPATIONS
CO-OPERATIVE TERMINEES[A]

OE Code[B]	Occupational Title	Total Number of Students	Percent of Trade and Industrial Co-operative Students by OE Code	Number of Returns	Percent of Returns for OE Code Area

[A]These Trade and Industrial Occupations Co-operative terminees were terminees in co-operative programs administered only under the Trade and Industrial Section of the Division of Vocational Education and Community Colleges, State Department of Education.

[B]OE Codes as reported by teachers.

Of the 1973-74 Trade and Industrial Occupations Co-operative terminees reported by the teachers, the largest number in any OE code was in the occupational title area of Trade and Industrial, Other. This 166 represented 6.9 percent of the reported Trade and Industrial Occupations Co-operative terminees. There were 304 (12.6%) co-operative terminees listed as studying Automotive clusters. The combined enrollment of the top eight Trade and Industrial Occupations Co-operative groups was 967 (Trade and Industrial, Other, 166; Cook/Chef, 157; Auto Mechanics, 148; Textile Production, Other, 145; Construction, Other, 110; Custodial Services, 88; Auto Specialization, Other, 79; Carpentry, 74). This 967 represents 40.1 percent of the total co-operative enrollment in the Trade and Industrial Occupations area.

Table 1A is a description of the total population and returns by OE Code area, type school, and termination status of the 1973-74 Trade and Industrial Occupations Co-operative terminees.

[A]Racial or Ethnic Group as reported by teacher.

Table 4 illustrates the number and grade level of the 1973-74 Trade and Industrial Occupations Co-operative terminees reported who dropped out of school during the academic year and by who returned the questionnaire.

TABLE 4

NUMBER OF THE 1973-74 TRADE AND INDUSTRIAL OCCUPATIONS CO-OPERATIVE TERMINEES REPORTED WHO DROPPED OUT OF SCHOOL DURING THE 1973-74 SCHOOL YEAR BY GRADE LEVEL

Grade Level Upon Dropping Out of School	Reported		Returns	
	Number	Percent[A]	Number	Percent[B]
Tenth	10	0.4	2	20.0
Eleventh	147	6.1	11	7.5
Twelfth	149	6.2	24	16.1
Grade Level Not Indicated by Teacher	43	1.8	12	27.9
TOTAL	349	14.5	49	14.0

[A]Percentage is based on 2,410 total reported co-operative terminees.

[B]Percentage is based on returns by grade.

Table 5 shows the number of 1973-74 Trade and Industrial Occupations Co-operative terminees who indicated whether they were in active full-time military service.

TABLE 5

ACTIVE FULL-TIME MILITARY STATUS OF 1973-74 TRADE AND INDUSTRIAL OCCUPATIONS CO-OPERATIVE TERMINEES WHO RETURNED QUESTIONNAIRES

Active Full-Time Military Status	Number	Percent
Yes	42	5.6
No	680	90.3
No Response	31	4.1
TOTAL	753	100.0

Basic Information Related to the Vocational Education Co-operative Program

Table 6 points out the number of 1973-74 Trade and Industrial Occupations Co-operative terminees who indicated whether this vocational program was a school requirement.

TABLE 6

1973-74 TRADE AND INDUSTRIAL OCCUPATIONS CO-OPERATIVE TERMINEES WHO INDICATED WHETHER THEIR VOCATIONAL PROGRAM WAS A SCHOOL REQUIREMENT

Vocational Courses Was A School Requirement	Number	Percent
Yes	30	4.0
No	719	95.5
No Response	4	0.5
TOTAL	753	100.0

Table 7 indicates, according to the 1973-74 Trade and Industrial Occupations Co-operative terminees, the primary source of influence in selecting their vocational course.

TABLE 7

PRIMARY INFLUENCES ON THE 1973-74 TRADE AND INDUSTRIAL OCCUPATIONS CO-OPERATIVE TERMINEES IN SELECTING THEIR VOCATIONAL COURSE

Group or Individual Terminees Felt Influenced Them Most in Selecting Vocational Course	Number	Percent
Parent(s) or Guardian(s)	42	5.6
Guidance Counselor	24	3.2
Your Vocational Teacher	78	10.4
Another Teacher or Principal	8	1.1
Student in VED Program	71	9.4
A Friend or Relative	38	5.0
A Businessman	13	1.7
Made Choice Yourself	467	62.0
Other[A]	9	1.2
No Response	3	0.4
TOTAL	753	100.0

[A]See page 42 for listing of "Others" who influenced Trade and Industrial Co-operative terminees in selecting their VED course.

Teachers in VED Programs appeared to be the greatest outside influence on those terminees enrolling in the Trade and Industrial Occupations Co-operative program. Seventy-eight (10.4%) of the terminees reponding indicated that teachers in VED Programs influenced them most in selecting their Trade and Industrial Occupations Co-operative course. However, 467 (62.0%) indicated that they selected their course of study on their own. Forty-two (5.6%) terminees indicated that a guidance counselor influenced them most in selecting their program. Seventy-one (9.4%) of the terminees indicated that students in VED Programs influenced them most in selecting their course in Trade and Industrial Occupations.

Below are the responses given to the "Others" category indicated in Table 7 as to the primary source of influence in selecting their vocational course.

"Other" Persons or Groups Who Most Influenced Terminees in Selecting Their VED Course	Number
Required by school	1
Available jobs in field	1
To have more time on job	1
My husband	1
Employer	1

Table 8 indicates co-operative terminees' opinions as to whether they had adequate job or occupational information and school experiences to make a realistic career choice.

TABLE 8

OPINIONS OF 1973-74 TRADE AND INDUSTRIAL OCCUPATIONS CO-OPERATIVE TERMINEES AS TO WHETHER THEY HAD ADEQUATE JOB OR OCCUPATIONAL INFORMATION AND SCHOOL EXPERIENCES TO MAKE A REALISTIC CAREER CHOICE

	Number	Percent
Yes	573	76.1
No	171	22.7
No Response	9	1.2
TOTAL	753	100.0

Table 9 indicates whether, during the time they were taking their high school vocational program, the reporting 1973-74 co-operative terminees intended to get a job in Trade and Industrial Occupations.

TABLE 9

INDICATIONS OF 1973-74 TRADE AND INDUSTRIAL OCCUPATIONS CO-OPERATIVE TERMINEES AS TO WHETHER, DURING THE TIME THEY WERE TAKING THEIR HIGH SCHOOL VED PROGRAM, THEY PLANNED TO GET A JOB IN THEIR AREA OF STUDY

Intended To Get Job In Area of Study	Number	Percent
Yes	436	57.9
No	115	15.3
Was Not Sure	193	25.6
No Response	9	1.2
TOTAL	753	100.0

It is interesting to note that only 436 (57.9%) of the 1973-74 reporting Trade and Industrial Occupations Co-operative terminees indicated that during the time they were taking their Trade and Industrial Occupations

co-operative program, they intended to get a job in the area they were studying.

Table 10 indicates terminees's opinions on choosing the Trade and Industrial Occupations co-operative program if they had the selection to make again.

A noteworthy point was revealed by the data. Of the 1973-74 Trade and Industrial Occupations co-operative terminees, 576 (76.5%) indicated that they would select the same vocational program if they had the choice to make again. Forty-nine (6.5%) of the responding co-operative terminees indicated that they would not take a vocational program.

TABLE 10

OPINIONS OF 1973-74 TRADE AND INDUSTRIAL OCCUPATIONS CO-OPERATIVE TERMINEES REGARDING THEIR VOCATIONAL PROGRAM

Question: If You Had It To Do Over Again, Would You...?	Number	Percent
Take the same vocational program	576	76.5
Not take a vocational program	49	6.5
Choose another vocational program offered in your school, such as _____ [A]	75	10.0
Choose another vocational program if it had been offered in your school, such as _____ [B]	34	4.5
No Response	19	2.5
TOTAL	753	100.0

[A] See listing I-A, page 45, for those other vocational programs offered in terminees' school that they would have taken instead of their Trade and Industrial programs.

[B] See listing I-B, page 45, for the vocational programs the terminees would have taken instead of their Trade and Industrial program if it had been offered in their school.

Listing I-A -- Courses offered in their school that Trade and Industrial Occupations Co-operative terminees indicated they would have taken if they had it all to do over again.

Table 11 indicates the extent to which the reporting 1973-74 Trade and Industrial Occupations Co-operative terminees felt their high school vocational programs prepared them for their first job. This data was also broken down by how that first job related to their vocational program.

TABLE 11

PERCEPTIONS OF 1973-74 TRADE AND INDUSTRIAL OCCUPATIONS CO-OPERATIVE TERMINEES AS TO THE EXTENT THEIR HIGH SCHOOL VOCATIONAL PROGRAM PREPARED THEM FOR THEIR FIRST FULL-TIME JOB BY HOW FIRST FULL-TIME JOB RELATED TO TRAINING

Extent Vocational Course Prepared for First Full-Time Job	Total Reporting		Number Reporting by Relatedness of First Full-Time Job to Training Received					
			Directly Related		Somewhat Related		Not Related	
	No.	%	No.	%	No.	%	No.	%

Co-operative terminees who were in full-time active military service or who had never been employed were not asked to respond to the questions from which this data was reported. Also, co-operative terminees who failed to respond to the question items were not indicated in the table.

In noting the extent to which the 1973-74 Trade and Industrial Occupations Co-operative terminees felt their high school vocational course prepared them for their first full-time job by how their first full-time job related to the training they received in their high school Trade and Industrial Co-operative program, some interesting points were revealed. Two hundred sixty-three (56.8%) of the 1973-74 Trade and Industrial Occupations Co-operative terminees responding to this item indicated "Excellent" or "Well Prepared" for their first full-time job as a result of the training received in their high school vocational education program. One hundred sixty-five (82.1%) of the 201 terminees employed in their first full-time job related directly to their training felt they were excellent or well prepared for this first job. Only six co-operative terminees who were working in an area directly related to their vocational training felt they were poorly prepared for their first job. There were three additional co-operative terminees who indicated they were working in an area directly related to their vocational course and felt their preparation was not related to their jobs. Of all the responding co-operative terminees, 22 (4.8%) felt that they were poorly prepared for their first full-time job. Of these, six were working in an area directly related to his vocational course.

Table 12 indicates the extent to which the reporting 1973-74 Trade and Industrial Occupations Co-operative terminees felt their high school vocational course prepared them for their present job. Also shown in the table is a breakdown of the data by how their present job was related to their vocational program.

TABLE 12

PERCEPTIONS OF 1973-74 TRADE AND INDUSTRIAL OCCUPATIONS CO-OPERATIVE TERMINEES AS TO THE EXTENT THEIR HIGH SCHOOL VOCATIONAL COURSE PREPARED THEM FOR THEIR PRESENT JOB BY HOW THEIR PRESENT JOB RELATED TO TRAINING

Extent Vocational Course Prepared for Present Job	Total Reporting		Number Reporting by Relatedness of Present Job to Training Received					
			Directly Related		Somewhat Related		Not Related	
	No.	%	No.	%	No.	%	No.	%
Excellent	78	15.3	52	24.6	13	9.6	13	8.1

Preparation not related to job	137	27.0	6	2.8	21	15.4	110	68.3
TOTAL	508	100.0	211	100.0	136	100.0	161	100.0

[A]See listings on page 49 for reasons co-operative terminees specified for being trained "Fair" or "Poorly Prepared" by their vocational course for their present job.

Co-operative terminees in active full-time military service, and students who were attending school full time and had not had a job, were not asked to respond to the question from which Table 12 was prepared. Also, those other students who failed to respond to the items were not shown on the table.

Of the 508 co-operative terminees responding to these items, 284 (55.8%) indicated "Excellent" or "Well Prepared" for their present job as a result of their high school vocational program. Twenty co-operative terminees reported feeling poorly prepared for their present job as a result of their training.

One hundred seventy-one (81.0%) of the 211 responding co-operative terminees working in an area directly related to their high school vocational program indicated that they felt excellent or well prepared by their training.

The following lists the reasons the 1973-74 Trade and Industrial Occupations Co-operative terminees indicated for being trained only "Fair" by their vocational course for their present job.

Reasons	Number
Training different from that needed in job	27
Not enough time to train	6
Need for equipment and machines	4
Not enough supplies and material in classes	4
The class work was only general	3
Books not up to date	3
Experience required for most jobs	3
Instructor didn't have any interest in course	3
Program was short of books	2
Need for better training	1
Instructor didn't know policies of job	1
Programs used only study guides	1
Program was contradictory	1
Needed training on different types of tools and machines	1

The co-operative terminees who indicated they were "Poorly Prepared" for their present job by their vocational program gave reasons why they felt that way.

Reasons	Number
Teaching not related to job	6
Lack of teaching	3
Materials outdated	2
Text outdated	2
No books	2
No instruction at school	1
Only had books--no supplies or equipment	1
Study guide outdated	1
Books generalized	1
Wrong field for me	1

Table 13 focuses on the Trade and Industrial Occupations student club. The researchers sought to determine the extent to which the 1973-74 Trade

and Industrial Occupations Co-operative terminees felt that their high school student club aided in preparing them for their present job. Data are also broken down by the relationship of the present job to the vocational training received.

TABLE 13

PERCEPTIONS OF 1973-74 TRADE AND INDUSTRIAL OCCUPATIONS CO-OPERATIVE TERMINEES AS TO THE EXTENT THEIR HIGH SCHOOL VOCATIONAL STUDENT CLUB PREPARED THEM FOR THEIR PRESENT JOB BY HOW THEIR PRESENT JOB RELATED TO TRAINING[A]

Extent High School Vocational Student Club Helped Prepare for Present Job	Total Reporting		Total Reporting by Relatedness of Present Job to Vocational Training					
			Directly Related		Somewhat Related		Not Related	
	No.	%	No.	%	No.	%	No.	%
Excellent	68	17.1	31	18.0	16	14.5	21	18.1
Well Prepared	142	35.7	80	46.5	31	28.2	31	26.7
Fair	128	32.1	43	25.0	45	40.9	40	34.5
Poorly Prepared	60	15.1	18	10.5	18	16.4	24	20.7
TOTAL	398	100.0	172	100.0	110	100.0	116	100.0

[A]Of the 552 who responded, 28 (5.1%) had no related student club available, and 88 (15.9%) were not members of a related student club.

Only respondents who had had a job since terminating their high school vocational Trade and Industrial Co-operative program were asked to respond to the question reported in Table 13. Students in active full-time military service were excluded. Twenty-eight (5.1%) of the 552 co-operative terminees reported no related student club was available, while 88 (15.9%) were not members of a related student club.

Of the 398 co-operative terminees who participated in student club activities, 210 (52.9%) indicated they were "Excellent" or "Well Prepared"

by their related student club for their present job. Sixty (15.1%) indicated they were "Poorly Prepared" by their related student club for their present job. Of those 60, 36 (60.0%) were in related or somewhat related jobs, while 24 (40.0%) were in non-related jobs.

Of those co-operative terminees who were working in an area directly related to the training they received in their high school vocational program, 111 (64.5%) revealed that they were "Excellent" or "Well Prepared" for their present job by their related student club. Eighteen (10.5%) of the 172 co-operative terminees who were working in a job directly related to the training they received indicated they were "Poorly Prepared" for their present job by their related student club.

Table 14 reports how the 1973-74 Trade and Industrial Occupations Co-operative terminees rated the quality of teaching by their high school vocational instructors.

TABLE 14

1973-74 TRADE AND INDUSTRIAL OCCUPATIONS CO-OPERATIVE TERMINEES' RATINGS OF THE QUALITY OF TEACHING BY THEIR HIGH SCHOOL VOCATIONAL INSTRUCTORS

Rating	Number	Percent
Excellent	328	43.6
Good	254	33.7
Fair	115	15.3
Poor	26	3.4
Very Poor	25	3.3
No Response	5	0.7
TOTAL	753	100.0

Of the 753 reporting 1973-74 Trade and Industrial Occupations Co-operative terminees, 582 (77.3%) rated the quality of teaching by their

vocational instructor either "Good" or "Excellent." Fifty-one (6.7%) rated the quality of teaching by their instructors "Poor" or "Very Poor."

Table 15 illustrates how the 1973-74 Trade and Industrial Occupations Co-operative terminees rated their high school vocational instructor's interest in their class work.

TABLE 15

1973-74 TRADE AND INDUSTRIAL OCCUPATIONS CO-OPERATIVE TERMINEES' RATINGS OF THEIR HIGH SCHOOL VOCATIONAL INSTRUCTOR'S INTEREST IN THE STUDENT'S CLASS WORK

Rating	Number	Percent
Excellent	335	44.5
Good	259	34.4
Fair	97	12.8
Poor	29	3.9
Very Poor	29	3.9
No Response	4	0.5
Total	753	100.0

Five hundred ninty-four (78.9%) of the 753 reporting 1973-74 Trade and Industrial Occupations Co-operative terminees rated the interest exhibitedby their high school vocational instructor in their class work as "Good" or "Excellent." Fifty-eight (7.8%) of the co-operative terminees rated the interest their vocational instructors showed in their class work as "Poor" or "Very Poor."

Table 16 points out how the 1973-74 Trade and Industrial Occupations Co-operative terminees subjectively rated the knowledge their vocational teachers possessed about their field of study. This rating is also shown in the table by a breakdown of how the co-operative terminees' present job related to the training they received in their high school vocational

program. Terminees were asked to base their judgments on their current knowledge of their job and responsibilities.

TABLE 16

1973-74 TRADE AND INDUSTRIAL OCCUPATIONS CO-OPERATIVE TERMINEES' RATINGS OF THE KNOWLEDGE THEIR HIGH SCHOOL VOCATIONAL TEACHER POSSESSED ABOUT THEIR FIELD OF STUDY BY HOW THE TERMINEES' PRESENT JOB RELATED TO THE TRAINING THEY RECEIVED

Rating[A]	Total Reporting		Number Reporting by Relatedness of Present Job to Training Received					
			Directly Related		Somewhat Related		Not Related	
	No.	%	No.	%	No.	%	No.	%
Excellent	129	25.0	58	27.4	27	19.7	44	26.3
Good	217	42.0	86	40.6	67	48.9	64	38.3
Fair	114	22.1	46	21.7	30	21.9	38	22.8
Poor	39	7.6	16	7.5	10	7.3	13	7.8
Very Poor	17	3.3	6	2.8	3	2.2	8	4.8
TOTAL	516	100.0	212	100.0	137	100.0	167	100.0

[A]Ratings were to be based on co-operative terminee's judgment of their current knowledge of their job and responsibilities.

Total responses to this item indicates that 346 (67.0%) of the 516 responding 1973-74 Trade and Industrial Occupations Co-operative terminees rated the knowledge their vocational teachers possessed about their field of study either "Good" or "Excellent." For those 212 co-operative terminees working in an area directly related to the training they received, 144 (68.0%) rated the knowledge their teachers possessed about their field of study as "Good" or "Excellent." Thirty-five (19.8%) of those who

considered their job related or somewhat related rated the knowledge their vocational teachers possessed about their field of study as "Poor" or "Very Poor."

If the co-operative respondent was working in an area related to his training, he was asked to compare the facilities and equipment in his high school vocational porgram with those on his present job. Table 17 illustrates how the 1973-74 Trade and Industrial Occupations Co-operative terminees responded.

TABLE 17

HOW 1973-74 TRADE AND INDUSTRIAL OCCUPATIONS CO-OPERATIVE TERMINEES WORKING IN A RELATED AREA RATED THE FACILITIES AND EQUIPMENT IN THEIR HIGH SCHOOL VOCATIONAL PROGRAM[A]

Rating[B]	Number	Percent
Better than those on present job	33	11.9
Similar to those on present job	110	39.7
Not as good as those on present job	134	48.4
TOTAL	277	100.0

[A]Two hundred sixty-four (48.8%) of the responding 541 terminees indicated that their present job was not related to their vocational training enough to compare facilities and equipment.

[B]Persons who had not had a job since leaving their vocational program, including those in military service and those who attended school, were asked not to respond to questions from which data was drawn. Returns were received from 753 terminees.

Thirty-three (11.9%) of the 277 responding 1973-74 Trade and Industrial Occupations Co-operative terminees working in an area related to their training rated the facilities and equipment in their high school vocational program as better than those on their present job. One hundred ten (39.7%) rated the facilities and equipment in their high school vocational program as similar to those on their present job; however, 134 (48.4%) rated the facilities and equipment not as good as those on their present job.

Table 18 shows how 1973-74 Trade and Industrial Occupations Co-operative terminees, who were in a cooperative work program in school and were now working in an area related to their vocational training, rated the facilities and equipment used in their cooperative work station.

TABLE 18

HOW 1973-74 TRADE AND INDUSTRIAL OCCUPATIONS CO-OPERATIVE TERMINEES NOW WORKING IN A RELATED AREA, WHOSE VOCATIONAL PROGRAM INCLUDED COOPERATIVE WORK, RATED FACILITIES AND EQUIPMENT USED IN THEIR COOPERATIVE WORK STATION[A]

Rating[B]	Number	Percent
Better than those on present job	26	10.1
Similar to those on present job	71	27.6
Working at same place where cooperative training was done	107	41.7
Not as good as those on present job	53	20.6
TOTAL	257	100.0

[A]Seventy (9.3%) of the responding 753 Trade and Industrial Occupations Co-operative terminees indicated their vocational program was not a cooperative program. One hundred ninety-three (25.6%) terminees indicated they were not working in an area related to their cooperative work; therefore, they did not complete this item on the questionnaire.

[B]Persons who had not had a job since leaving their vocational program, including those in military service and those attending school, were asked not to respond to questions from which data was drawn. Returns were received from 753 terminees.

Twenty-six (10.1%) of the 257 responding 1973-74 Trade and Industrial Occupations Co-operative terminees who were now working in an area related to their vocational training, rated the facilities and equipment in their cooperative work station as better than those on their present job. Seventy-one (27.6%) rated the facilities and equipment in their cooperative training station as similar to those on their present job. Fifty-three (20.6%)

rated the facilities and equipment in their cooperative work station not as good as those in their present job. It was significant to note that 107 (41.7%) indicated they were working at the same establishment where they did their cooperative training. Also to be noted was the fact that 70 (9.3%) terminees of co-operative programs, as reported by teachers, indicated they were not in a co-operative program.

Basic Employment Information

The following section of this report offers information relative to employment and job characteristics of the 1973-74 secondary Trade and Industrial Occupations Co-operative terminees.

Table 19 illustrates the number of full-time jobs the responding 1973-74 Trade and Industrial Occupations Co-operative terminees have had since leaving their high school vocational course.

TABLE 19

NUMBER OF FULL-TIME JOBS HELD BY THE 1973-74 TRADE AND INDUSTRIAL OCCUPATIONS CO-OPERATIVE TERMINEES SINCE LEAVING THEIR HIGH SCHOOL VOCATIONAL COURSE

Number of Full-Time Jobs Held	Number	Percent[A]
One	405	53.8
Two	114	15.1
Three	17	2.3
Four	2	0.3
Five or more	3	0.4
TOTAL	541	71.9

[A]Percentage is based on the 753 terminees who returned the questionnaire.

There were 405 (53.8%) of the total 753 responding 1973-74 Trade and Industrial Occupations Co-operative terminees who had been employed in just

one job since leaving their high school vocational program. One hundred fourteen (15.1%) of the co-operative terminees reported having two jobs since leaving their high school vocational course seven to eight months ago, and 22 (3.0%) reported three or more jobs since leaving their vocational course.

Table 20 reveals the first-job employment status of Trade and Industrial Occupations Co-operative terminees who returned the survey by the relatedness of their vocational training to their first job.

TABLE 20

FIRST-JOB EMPLOYMENT STATUS OF TRADE AND INDUSTRIAL OCCUPATIONS CO-OPERATIVE TERMINEES (1973-74) BY RELATEDNESS OF VOCATIONAL TRAINING TO FIRST JOB[A]

First Job After Leaving High School Vocational Program	Total Reporting		Relatedness of Vocational Training to First Job[B]					
			Directly Related		Somewhat Related		Not Related[C]	
	No.	%	No.	%	No.	%	No.	%
Full-Time	466	61.9	202	26.8	116	15.4	148	19.7
Part-Time	71	9.4	32	4.2	20	2.7	19	2.5
TOTAL	537	71.3	234	31.0	136	18.1	167	22.2

[A]All percentages were based on the 753 (31.2%) of 2,410 co-operative terminees who returned the survey form.

[B]The terminees made the judgment as to how their first job was related to the training received in their high school co-operative vocational program.

[C]See page 58 for reasons co-operative terminees who were working in first job unrelated to this vocational training gave for not seeking job that was related before accepting their first job.

Of the 753 responding 1973-74 Trade and Industrial Occupations Co-operative terminees, 466 (61.9%) were employed full time in their first job after leaving their high school vocational program. Seventy-one (9.4%) co-operative terminees' first jobs were on a part-time basis.

Two hundred thirty-four of the 753 responding co-operative terminees' first jobs (full-time or part-time) were in an area directly related to the training they received in their high school vocational course. One hundred thirty-six (18.1%) were employed in an area somewhat related while 167 (22.2%) were employed in a first job not related to the training they received. The co-operative terminees made the judgment as to how their first job was related to the training they received in their high school vocational program.

Of the 167 co-operative terminees who indicated their jobs were not related to their vocational course, 63 (37.7%) terminees indicated that before they accepted their unrelated job, they tried to get a job that was related to their vocational training. However, 104 (62.3%) of the terminees did not.

The following is a list of reasons given by some of the 104 co-operative terminees who, before taking their first unrelated job, indicated they did not seek a job that was related to their vocational training.

Reason	Number
Not interested in work in that vocational area	21
Not enough training and experience for a job	8
Nothing available in area	6
Already had a job	3
Pay not high enough	3
Joined armed services	2
Only interested in a job--any job	1
Didn't know where to look for a job	1
Planned to go to college	1
Not sure	1
Didn't have the time	1
Tired of being dirty	1
Instructor turned me totally against that type of job	1

Table 21 shows by OE Code for the first job of the 1973-74 Trade and Industrial Occupations co-operative terminees the relatedness of their training to this first job.

TABLE 21

[A]Of 2,410 Trade and Industrial Occupations Co-operative terminees, 753 (31.2%) returned the questionnaire.

[B]The co-operative terminees made the judgment as to how their first job was related to the training received in their high school vocational program.

Of the 553 responding 1973-74 Trade and Industrial Occupations Co-operative terminees who indicated how their first job related to the training they received in their high school vocational program, 245 (44.3%) were employed in directly related areas. One hundred thirty-seven (24.8%) were employed in somewhat related areas, while 171 (30.9%) were employed in areas not related to their training. The co-operative terminees made the judgment as to how their first job was related to the training received in their high school vocational program.

More responding co-operative terminees who studied in Trade and Industrial, Other (OE Code 17.9900) indicated first job employment. This was to be expected since more co-operative terminees studied in this occupational objective area (See Table 1). Of the 41 employed 1973-74 co-operative terminees who studied in the Occupational area of Trade and Industrial, Other and indicated relatedness of training, 15 (36.6%) were employed in an area directly related to that training. Fifteen (36.6%) were employed in their first job in an area somewhat related to their training. However, 11 (26.8%) of these responding co-operative terminees indicated that their first job was not related to the training they received in their Trade and Industrial program.

Table 21A is a description of 1973-74 Trade and Industrial Occupations Co-operative terminees' first job by OE code area studied, number of returns, type school, termination status, and relatedness of training.

[A]OE Code areas as reported by teachers.

[B]Area Vocational Centers.

[C]Any co-operative terminee who left the program by completing or by high school graduation.

[D]Any co-operative terminee who the instructor reported as having dropped out of school.

[E]The co-operative terminees made the judgment as to how their first job was related to the training received in their high school vocational program.

Table 22 illustrates the current employment status of the responding co-operative terminees by the relatedness of their vocational training to their present jobs. All percentages figured in the table were based on the 753 (31.2%) returns from the 2,410 Trade and Industrial Occupations Co-operative terminees.

Of the 753 responding 1973-74 secondary Trade and Industrial Occupations Co-operative terminees, 393 (52.2%) were presently employed full time and not attending school or employed full time and attending school. Seventy (9.3%) of the co-operative terminees were employed part time and attending school, while 26 (3.5%) were unavailable for employment (See page 96 for reasons terminees were unavailable for employment). Fifty-five (7.3%) of the co-operative terminees were unemployed and actively seeking employment, while 18 (2.4%) were employed part time and seeking full-time employment.

The "No Response" category in Table 22 includes three groups: (1) co-operative terminees in active full-time military service; (2) co-operative terminees who were in school full time and had never had a job; and (3) co-operative terminees who failed to respond to the item on the questionnaire.

Of the 753 secondary Trade and Industrial Occupations co-operative respondees, 205 (27.2%) were presently employed full time or part time in an area directly related to the training received in their high school vocational course. One hundred thirty-one (17.4%) were employed either part time or full time in an area somewhat related to their training, while 149 (19.8%) were employed in areas not related to training. The co-operative terminees made the judgment as to how their present employment was related to the training received in their high school vocational course.

TABLE 22

CURRENT EMPLOYMENT STATUS OF TRADE AND INDUSTRIAL OCCUPATIONS CO-OPERATIVE TERMINEES (1973-74) BY RELATEDNESS OF TRAINING TO PRESENT JOB[A]

Employment Status	Total Responding		Relatedness of Training to Present Job[B]							
			Directly Related		Somewhat Related		Not Related[E]		Employed No Repsonse	
	No.	%	No.	%	No.	%	No.	%	No.	%
Employed full time and not attending school	332	44.1	128	17.0	91	12.1	110	14.6	3	0.4

Employed part time and attending school	70	9.3	38	5.0	14	1.9	15	2.0	3	0.4
Unemployed (actively seeking a job)[C]	55	7.3	N/A		N/A		N/A		N/A	
Unavailable for employment[C&D]	26	3.5	N/A		N/A		N/A		N/A	
No Response	181	24.0	N/A		N/A		N/A		N/A	
TOTAL	753	100.0	205	27.2	131	17.4	149	19.8	6	0.8

[A]All percentages were based on the 753 (31.2%) respondents of the total 2,410 co-operative terminees. Terminees in active full-time military service or attending school full-time and had never been employed were included in the "No Response" category.

[B]The co-operative terminees made the judgment as to how their present job was related to the training received in their high school vocational program.

[C]The unemployed and unavailable for employment categories do not include persons in the military service and persons who were in school full time and never had a job.

[D]See page 96 for the listing of reasons Trade and Industrial Occupations Co-operative terminees gave for being unavailable for employment.

[E]See page 96 for reasons co-operative terminees who were working in present job related to vocational training gave for not seeking related job before accepting present job. Totals for unrelated columns may not correspond because terminees failed to respond to one of the two questions from which data was drawn.

Below is a list of the reasons given by the terminees for being unavailable for employment.

Reason	Number
In school full time	33
Presently not working, not interested in a job	3
Homemaker	5
Pregnancy	4
Illness or disability	3
Other	8

Of the 168 co-operative terminees who indicated their present jobs were not related to their vocational course, 69 (41.1%) co-operative terminees indicated that before they accepted their unrelated job, they tried to get a job that was related to their vocational training. However, 99 (58.9%) of the terminees did not.

The following is a list of reasons given by the co-operative terminees who, before taking their present unrelated job, indicated they did not seek a job that was related to their vocational training.

Reason	Number
Interested in a different vocation	10
Need for more training	10
Lost interest	9
Pay not enough	9
Could not find one	6
Nothing available	5
Already had a job	5
Going to college	2
Joined armed services	2
Took first available job	1
Don't know	1
Dislike it	1
Had no time to look	1
Impatient	1
Because of poor weather	1

Table 23 shows for the present job, by OE code, the number of 1973-74 secondary Trade and Industrial Occupations Co-operative terminees employed by the relatedness of their vocational training to their present job.

Of the 517 secondary Trade and Industrial Occupations Co-operative terminees who indicated present employment, 37 (4.9%) who studied in the area of Trade and Industrial, Other, OE Code 17.9900, were employed. This represented the largest number of employed co-operative terminees that studied in any OE Code area.

Of the 37 co-operative terminees presently employed that studied Trade and Industrial, Other, 12 (32.4%) were employed in an area directly related to the training received in their high school vocational program. Eleven (30.0%) co-operative terminees who studied in Trade and Industrial, Other indicated their present job was not related to their high school vocational training. The co-operative terminees made the judgment as to how their present job related to the training received in their high school vocational program.

[A]OE Code areas as reported by teachers.

[B]Area Vocational Centers

[C]Any terminee who left the program by completing or by high school graduation.

[D]Any terminee who the instructor reported as having dropped out of school.

[E]The terminees made the judgment as to how their first job was related to the training received in their high school vocational program.

Table 24 indicates the first job salary ranges as compared to the present job salary ranges for the 1973-74 Trade and Industrial Occupations Co-operative terminees.

Of the 529 co-operative terminees reporting a salary range for their first job, 242 (45.8%) indicated a range of under $250 per month. Thirteen (2.4%) of the co-operative terminees reported a first salary of more than $600 per month. The median salary range for the first job fell in the range of $250 - $299 per month. The mean salary range for the first job fell in the range of $300 - $349 per month.

Of the 460 1973-74 Trade and Industrial Occupations Co-operative terminees reporting a salary range for their present job, 105 (22.8%) indicated under $250 per month. The median and mean salary ranges for the present job fell within

the range of $350 - $399 per month. The median and mean salary ranges of present jobs over first jobs indicate an increase for the reporting Trade and Industrial Occupations Co-operative terminees.

TABLE 24

FIRST-JOB SALARY RANGES AND PRESENT-JOB SALARY RANGES FOR THE 1973-74 TRADE AND INDUSTRIAL OCCUPATIONS CO-OPERATIVE TERMINEES

Salary Ranges	First Job		Present Job	
	No.	%	No.	%
Under $250	242	45.8	105	22.8
$250 - $299	82	15.5	54	11.7
$300 - $349	68	12.9	60	13.1
$350 - $399	44	8.3	53	11.5
$400 - $449	45	8.5	70	15.2
$450 - $499	15	2.8	35	7.6
$500 - $599	20	3.8	43	9.4
$600 - $699	7	1.3	19	4.1
$700 or more	6	1.1	21	4.6
TOTAL	529	100.0	460	100.0

Table 24A indicates the first-job salary ranges by relatedness of training and sex of the Trade and Industrial Occupations Co-operative terminees.

Two hundred twenty-nine (46.0%) of the 499 responding co-operative terminees were employed at less than $250 per month. Of these 229 terminees, 53 (23.2%) males and 47 (20.5%) females were employed in a job directly related to their training, 39 (17.0%) males and 20 (8.7%) females were employed in jobs somewhat related to their training, while 45 (19.7%) males and 25 (10.9%) females were employed in jobs not related to their training.

TABLE 24A

FIRST-JOB SALARY RANGES BY RELATEDNESS OF TRAINING
OF 1973-74 TRADE AND INDUSTRIAL OCCUPATIONS
CO-OPERATIVE TERMINEES BY SEX

Salary Ranges	Sex of Terminees Responding		Relatedness of Training to First Job[B]					
			Directly Related		Somewhat Related		Not Related	
	Male	Female	Male	Female	Male	Female	Male	Female
Under $250	137	92	53	47	39	20	45	25
$250 - $299	54	23	21	13	10	4	23	6
$300 - $349	41	22	22	11	11	1	8	10
$350 - $399	34	7	12	1	10	4	12	2
$400 - $449	40	2	20	1	7	0	13	1
$450 - $499	15	0	7	0	3	0	5	0
$500 - $599	18	1	11	0	4	1	3	0
$600 - $699	7	0	3	0	2	0	2	0
$700 or more	6	0	2	0	1	0	3	0
TOTAL[A]	352	147	151	73	87	30	114	44

[A]Totals do not match those of Table 7 because some terminees did not respond to all questions.

[B]The terminees made the judgment as to how their first job was related to the training received in their high school vocational program.

Of the 499 responding terminees, 352 (70.5%) were males and 147 (29.5%) were females. One hundred fifty-one (30.3%) males and 73 (14.6%) females were employed in jobs directly related to their vocational training, 87 (17.4%) males and 30 (6.0%) females were employed in jobs somewhat related to their training, while 114 (22.9%) males and 44 (8.8%) females were employed in jobs not related to their training.

Table 24B indicates the present-job salary ranges by relatedness of training and sex of the Trade and Industrial Occupations Co-operative terminees.

TABLE 24B

PRESENT-JOB SALARY RANGES BY RELATEDNESS OF TRAINING
OF 1973-74 TRADE AND INDUSTRIAL OCCUPATIONS
CO-OPERATIVE TERMINEES BY SEX

Salary Ranges	Sex of Terminees Responding		Relatedness of Training to First Job[B]					
			Directly Related		Somewhat Related		Not Related	
	Male	Female	Male	Female	Male	Female	Male	Female
Under $250	46	54	14	34	17	10	15	10
$250 - $299	34	18	14	9	11	4	9	5
$300 - $349	36	21	12	10	15	7	9	4
$350 - $399	37	15	14	9	9	5	14	2
$400 - $449	58	10	23	4	10	3	25	3
$450 - $499	29	5	10	3	5	2	14	0
$500 - $599	33	5	15	1	5	3	13	1
$600 - $699	19	0	9	0	6	0	4	0
$700 or more	18	2	5	0	3	1	10	1
TOTAL[A]	310	130	116	69	81	35	113	26

[A]Totals do not match those of Table 24 because some terminees did not respond to all questions.

[B]The terminees made the judgment as to how their present job was related to the training received in their high school vocational program.

One hundred (23.3%) of the 440 responding co-operative terminees were employed at less than $250 per month. Of these 100 terminees, 14 (14.0%) males and 34 (34.0%) females were employed in a job directly related to their training, 17 (17.0%) males and 10 (10.0%) females were employed in jobs somewhat related to their training, while 15 (15.0%) males and 10 (10.0%) females were employed in jobs not related to their training.

Of the 440 responding co-operative terminees, 310 (70.5%) were males and 130 (29.5%) were females. One hundred sixteen (26.4%) males and 69 (15.7%) females were employed in jobs directly related to their vocational training,

81 (18.4%) males and 35 (7.9%) females were employed in jobs somewhat related to their training, while 113 (25.7%) males and 26 (5.9%) females were employed in jobs not related to their training.

Continuing Education Information

The following section of this report presents information relative to the continuing education of the 1973-74 secondary Trade and Industrial Occupations Co-operative terminees.

Table 25 shows the vocational educational training opportunities co-operative terminees have participated in since leaving their high school vocational program.

Of the total co-operative terminees, the 81 (10.7%) who were enrolled in Junior Colleges represented next to the largest area where terminees had taken additional vocational training: On-the-job training with 178 (23.6%) was the largest area.

Of the 753 responding terminees, 408 (54.2%) had taken part in one additional vocational training program since leaving their high school program. Fifty (6.6%) enrolled in two training programs, and 37 (4.9%) terminees had enrolled in three vocational training programs. Three hundred forty-five (45.8%) indicated they had not enrolled in any additional vocational training.

TABLE 25

ADDITIONAL VOCATIONAL EDUCATIONAL TRAINING 1973-74 SECONDARY TRADE AND INDUSTRIAL OCCUPATIONS CO-OPERATIVE TERMINEES PARTICIPATED IN SINCE LEAVING THEIR HIGH SCHOOL VOCATIONAL PROGRAM[A]

Type Training	Number	Percent[B]
On-the-job training (employer-sponsored program)	178	23.6
Public school adult vocational program	11	1.5
Private vocational school program	8	1.1
University or four year college	61	8.1
Junior college	81	10.7
Post-secondary vocational-technical institute (Trade School)	47	6.2
Apprenticeship training program	33	4.4
Specialized occupational military training	27	3.6
Other[C]	49	6.5
TOTAL[D]	495	65.7

[A]Three hundred forty-five (45.8%) of the responding 753 co-operative terminees gave no indication of being involved in additional vocational training. Of the 753 terminees, 408 (54.2%) took part in one or more vocational training opportunities since leaving their high school program. Fifty (6.6%) took part in two and 37 (4.9%) terminees took part in three additional training opportunities.

[B]Percentages are based on the 753 (31.2%) respondents of the total 2,410 co-operative terminees who returned questionnaires.

[C]See below for the "Other" listing as specified by the co-operative terminees.

[D]The total indicated the number of different training programs in which co-operative terminees enrolled. As footnoted above, several terminees had enrolled in more than one training program.

The following is a listing of the "Other" (Table 25) vocational education training terminees indicated they had participated in:

"Other" Vocational Training	Number
On-the-job training	10
Specialized occupational training	7
Private vocational school program	5
Correspondence course	3
Post-secondary vocational institute (Trade School)	2

(continued)

"Other" Vocational Training	Number
Apprenticeship training program	2
University or four-year college	1

Table 26 points out the additional programs the 1973-74 secondary Trade and Industrial Occupations Co-operative terminees were presently attending beyond their high school training by whether these programs were related to their high school vocational program.

TABLE 26

PROGRAMS PRESENTLY ATTENDED BY THE 1973-74 SECONDARY TRADE AND INDUSTRIAL OCCUPATIONS CO-OPERATIVE TERMINEES BY WHETHER THESE PROGRAMS WERE RELATED TO THEIR HIGH SCHOOL VOCATIONAL EDUCATION PROGRAM[A]

Programs Attended	Terminees		Program Related to High School VED Program					
			Yes		No		No Response	
	No.	%	No.	%	No.	%	No.	%
On-the-job training (employer-sponsored)	80	10.6	7	0.9	6	0.7	67	9.0
Vocational-technical institute (Trade School)	52	6.9	30	4.0	20	2.6	2	0.3
Junior college	94	12.5	17	2.3	66	8.8	11	1.4
Four year college or university	87	11.6	26	3.5	54	7.2	7	0.9
Public school adult vocational program	2	0.2	1	0.1	0	0.0	1	0.1
Private business or trade school	10	1.3	2	0.3	6	0.7	2	0.3
Apprenticeship program	13	1.7	4	0.5	3	0.5	6	0.7
Other[B]	26	3.5	3	0.4	11	1.5	12	1.6
TOTAL	364	48.3	90	12.0	166	22.0	108	14.3

[A]All percentages were based on the 753 responding terminees.

[B]See page 138 for listing of "Other" schools or educational institutions terminees were attending.

Of the 753 1973-74 secondary Trade and Industrial Occupations Co-operative terminees who responded to the survey, 80 (10.6%) were attending an on-the-job training program (employer-sponsored), 52 (6.9%) were attending a vocational-technical institute, 94 (12.5%) were attending a junior college, 87 (11.6%) were attending a four year college or university, two (0.2%) were attending a public adult vocational program, 10 (1.3%) were attending private business or trade school, 13 (1.7%) were attending an apprenticeship program, and 26 (3.5%) were attending some other type of school or educational program. (See below for the listing of the other types of schools or educational programs students were attending.)

Of the 753 Trade and Industrial Occupations Co-operative terminees, 364 (48.3%) were presently continuing their education. Ninety (12.0%) of the terminees were continuing their education in a program related to their high school vocational program. One hundred sixty-six (22.0%) were attending a program in an area not related to their high school vocational program.

The following is a listing of the "Other" category (Table 26) of additional programs the 1973-74 Trade and Industrial Occupations Co-operative terminees were attending:

"Other" School or Program	Number
Still in high school	5
Armed services	4
Junior college	3
Technical trade school	2
College	1
Junior college--military	1
X-ray technician school	1
Nursing	1
Licensed practical nurse	1
Correspondence course	1
On-the-job training--motor school (A.P.C.)	1
On-the-job training	
On-the-job training--fertilizer [illegible]	1
Apprentice program--operating engine[illegible]	1
Skill center	1

Of the 753 responding co-operative terminees, 412 (54.7%) indicated they were not attending a school or program but would like to do so. The following is a list of the areas in which these terminees desired to study:

Area of Study	Number
Nursing	26
Electronics	23
Welding	20
Don't know	20
Auto	16
Mechanics	14
Secretarial work	11
Medical technology	11
Plumbing	10
Electrical	10

Two hundred sixty-six (35.3%) of the 753 responding co-operative terminees indicated they did not desire further training. Seventy-five (10.0%) terminees did not respond to the question.

Table 27 illustrates the programs presently attended by the co-operative terminees by OE Code area studied by whether it related to their high school vocational program. No attempt was made to show the no response to the data items; therefore, many of the totals do not correspond.

TABLE 27

PROGRAMS PRESENTLY ATTENDED BY THE 1973-74 SECONDARY TRADE AND INDUSTRIAL OCCUPATIONS CO-OPERATIVE TERMINEES BY OE CODE AREA STUDIED BY WHETHER IT RELATED TO THEIR HIGH SCHOOL VOCATIONAL PROGRAM

Job Placement Information

The following section of this report presents information concerning job placement of 1973-74 secondary Trade and Industrial Occupations Co-operative terminees.

Table 28 points out whether the 1973-74 Trade and Industrial Occupations Co-operative terminees were seeking full-time employment when they left their high school vocational program and if their vocational teacher attempted to help them get a job.

TABLE 28

WHETHER VOCATIONAL TEACHER ATTEMPTED TO HELP 1973-74 TRADE AND INDUSTRIAL OCCUPATIONS CO-OPERATIVE TERMINEES GET A JOB IF SEEKING FULL-TIME EMPLOYMENT UPON LEAVING THE HIGH SCHOOL VOCATIONAL PROGRAM[A]

Vocational Teacher Attempted To Get Terminee A Job	Number	Percent
Yes	166	45.9
No	196	54.1
TOTAL	362	100.0

[A]Three hundred sixty-eight (48.9%) of the responding co-operative terminees indicated they were not seeking full-time employment when they left their high school vocational program. Twenty-three (3.1%) of the co-operative terminees did not respond to the question.

Of the 362 responding 1973-74 Trade and Industrial Occupations Co-operative terminees indicating they were seeking full-time employment when they left their high school vocational program, 166 (45.9%) indicated that their vocational teacher attempted to help them get a job. However, 196 (54.1%) of the co-operative terminees seeking full-time

employment indicated that their vocational teacher did not attempt to help them secure employment. It was interesting to note that 368 (48.9%) of the reporting 1973-74 Trade and Industrial Occupations Co-operative terminees indicated that they were not seeking full-time employment when they left their high school vocational program.

Table 29 illustrates how long it took the 1973-74 Trade and Industrial Occupations Co-operative terminees to get their first full-time job after they left their high school vocational program and began actively seeking full-time employment.

TABLE 29

LENGTH OF TIME IT TOOK THE 1973-74 TRADE AND INDUSTRIAL OCCUPATIONS CO-OPERATIVE TERMINEES TO SECURE FIRST FULL-TIME JOB AFTER LEAVING HIGH SCHOOL VOCATIONAL PROGRAM AND BEGINNING ACTIVELY SEEKING FULL-TIME EMPLOYMENT[A]

Time to Secure First Full-Time Job	Number	Percent
0 - 2 weeks	89	47.9
3 - 4 weeks	30	16.1
5 - 8 weeks	30	16.1
9 - 12 weeks	11	5.9
13 or more weeks	26	14.0
TOTAL	186	100.0

[A]Three hundred seventy-seven (50.1%) co-operative terminees indicated they already had a job when they left their high school vocational program.

Eighty-nine (47.9%) of 186 of the secondary Trade and Industrial Occupations Co-operative terminees secured their first full-time job within two weeks after they left their high school vocational program and began actively seeking full-time employment. However, 26 (14.0%) of the terminees took 13 or more weeks to secure their first full-time job. There were 377 (50.1%) co-operative terminees who indicated they already had a job when they left their high school vocational program.

Table 30 shows how the 1973-74 secondary Trade and Industrial Occupations Co-operative terminees indicated they got their first full-time job after leaving their high school vocational program.

TABLE 30

HOW THE 1973-74 TRADE AND INDUSTRIAL OCCUPATIONS CO-OPERATIVE TERMINEES INDICATED THEY GOT THEIR FIRST FULL-TIME JOB AFTER LEAVING THEIR HIGH SCHOOL VOCATIONAL PROGRAM

How Terminees Secured First Full-Time Job	Number	Percent
Through your vocational teacher	15	6.6
Through your counselor	1	0.4
Through other school teachers or administrators	6	2.7
Through a friend or relative	90	39.5
Through applications to business or industry	73	32.0
Through state (local) employment office	11	4.8
Through a private employment agency	3	1.3
Through radio, T.V., newspaper, or other news media	5	2.2
Other[A]	24	10.5
TOTAL	228	100.0

[A]See listing on page 153 for the "Other" ways co-operative terminees indicated they secured their first full-time job after leaving their high school vocational program.

Of the 228 1973-74 Trade and Industrial Occupations Co-operative terminees who responded to the survey item, 73 (32.0%) indicated they got their first full-time job after leaving their high school vocational program through applications to business and industry. Ninety (39.5%) of the co-operative terminees also indicated they got their first full-time job through a friend or relative. These represented the two methods that the largest number of Trade and Industrial Occupations Co-operative terminees utilized to secure their first full-time job. Fifteen (6.6%) of the co-operative terminees indicated they secured their first job

through their vocational teacher. Only one (0.4%) co-operative terminee indicated that a counselor got him his first full-time job after leaving his vocational program. Those students who already had a job before leaving their high school vocational program were not shown in Table 30. (See Table 31, page 154)

Of the 24 terminees who checked the "Other" category, several specified the means by how they secured their first full-time job after leaving their high school vocational program. The following list indicates the "Other" means the terminees indicated.

"Other" Means for Securing First Full-Time Job	Number
Own initiative	7
Didn't get a full-time job	3
Previous employer	2
Joined armed services	1
Through other school personnel	1
R.O.R. Personnel	1
N.Y.C.	1

Table 31 shows how the 1973-74 Trade and Industrial Occupations Co-operative terminees who were working while in high school taking their vocational program indicated they got that job.

Five hundred eighty-one (77.2%) of the 753 reporting 1973-74 Trade and Industrial Occupations Co-operative terminees indicated they were working during the time they were in high school taking their vocational program. Of those co-operative terminees working while in high school, 163 (21.6%) got their job through their vocational instructor, 213 (28.3%) through a friend or relative, and 94 (12.5%) got jobs through applications to business or industry. These three means were the ways most of the co-operative terminees secured a job while they were still in high school taking their vocational program.

TABLE 31

HOW THE 1973-74 TRADE AND INDUSTRIAL OCCUPATIONS CO-OPERATIVE TERMINEES WHO WERE WORKING WHILE IN HIGH SCHOOL TAKING THEIR VOCATIONAL PROGRAM INDICATED THEY GOT THAT JOB[A]

Who or What Helped Terminee Get Job	Number	Percent
Your vocational teacher	163	21.6
Your counselor	9	1.2
Other school teachers or administrators	9	1.1
Friend or relative	213	28.3
Applications to business or industry	94	12.5
State (local) employment office	2	0.3
Private employment agency	3	0.4
Radio, T.V., newspaper, or other news media	2	0.3
Other	87	11.5
TOTAL	581	100.0

[A]One hundred seventy-two (22.8%) co-operative terminees indicated they had no job during the time they were in high school taking their vocational course.

Table 32 reveals the indications of the 1973-74 Trade and Industrial Occuaptions Co-operative terminees as whether, before taking their first job, they looked for employment within daily walking or driving distance of home by how their first job related to their vocational training.

Two hundred thirty-four (83.6%) of the 1973-74 Trade and Industrial Occupations Co-operative terminees who were employed in their first job indicated they sought employment within daily walking or driving distance of home. Forty-six (16.4%) co-operative terminees indicated before taking their first job, they looked for a job beyond daily walking or driving distance of home.

Of the 87 co-operative terminees who were working in a directly related area, 11 (12.6%) sought employment beyond daily walking or driving distance of home.

TABLE 32

INDICATIONS OF 1973-74 TRADE AND INDUSTRIAL OCCUPATIONS CO-OPERATIVE TERMINEES AS TO WHERE THEY LOOKED FOR THEIR FIRST JOB BEFORE TAKING ONE BY HOW THEIR FIRST JOB RELATED TO THEIR TRAINING[A]

Before Taking First Job, Where Terminees Looked for Job	Total Reporting		Total Reporting by Relatedness of First Job to Vocational Training

Within daily walking or driving distance of home	234	83.6	76	87.4	49	79.0	109	83.2
Beyond daily walking or driving distance of home[B]	46	16.4	11	12.6	13	21.0	22	16.8
TOTAL	280	100.0	87	100.0	62	100.0	131	100.0

[A]Two hundred forty-two (32.1%) co-operative terminees indicated they already had their first job while in high school. Of those 242 terminees, 146 (60.3%) were working in a directly related area, 68 (28.1%) in a somewhat related area, while 28 (11.6%) were working in a non-related area.

[B]See listing, page 156, for reasons terminees gave for seeking their first job away from home.

Of the 87 co-operative terminees who were working in a directly related area, 11 (12.6%) sought employment beyond daily walking or driving distance of home.

Of the 131 co-operative terminees whose first jobs did not relate to their training, 22 (16.8%) sought employment beyond daily walking or driving distance of home.

Two hundred forty-two co-operative terminees indicated they had their first job while in high school. Of those 242 terminees, 146 (60.3%) were working in a directly related area, 68 (28.1%) in a somewhat related area, and 28 (11.6%) in a non-related area.

The following is a listing of reasons co-operative terminees gave for seeking a job beyond daily walking or driving distance of their home before accepting their first job. Of the 46 co-operative terminees who indicated they sought a job beyond daily walking or driving distance of home before accepting their first job, here are some of the reasons given why they sought that job.

Reasons for Seeking Job Beyond Daily Walking or Driving Distance Before Accepting First Job	Number
No local employment	2
Better pay	2
Needed a job badly	1
Better opportunity elsewhere	1
Looked everywhere	1
Going to school	1
Went into armed services	1
Had to look elsewhere for job in field of study	1

Table 33 reveals the indications of the 1973-74 Trade and Industrial Occupations Co-operative terminees who were working in their first job not related to their training by whether or not they tried to get a job related to their training by where they looked for employment before accepting that first job.

It is important to note that of the 126 terminees who were working in a non-related first job, 11 (8.7%) sought related employment beyond daily walking or driving distance of home before accepting their first job.

TABLE 33

INDICATIONS OF THE 1973-74 TRADE AND INDUSTRIAL OCCUPATIONS CO-OPERATIVE TERMINEES WORKING IN FIRST JOB NOT RELATED TO THEIR TRAINING BY WHETHER OR NOT THEY TRIED TO GET A JOB RELATED TO THEIR TRAINING BY WHERE THEY LOOKED FOR EMPLOYMENT BEFORE ACCEPTING FIRST JOB[A]

Sought employment within daily walking or driving distance of their home	97	75.8	43	72.9	54	78.3
Sought employment beyond daily walking or driving distance of their home	31	24.2	16	27.1	15	21.7
TOTAL	128	100.0	59	100.0	69	100.0

[A]Totals in this table may not correspond with totals of co-operative terminees for non-related categories in other tables for the following reasons: (1) some terminees had jobs when leaving programs and did not have to seek employment and (2) some terminees failed to respond to one or more of the related questions from which data was drawn.

[B]See page for the listing of reasons co-operative terminees who were working in non-related jobs gave for not trying to secure a job that was related to their training.

APPENDIX

PRESENT JOB AND FIRST JOB TITLES OF THE 1973-74 TRADE AND INDUSTRIAL OCCUPATIONS CO-OPERATIVE TERMINEES

PRESENT JOB AND FIRST JOB TITLES OF THE 1973-74 TRADE AND INDUSTRIAL OCCUPATIONS CO-OPERATIVE TERMINEES

For those co-operative terminees who indicated present or first job occupations, this appendix lists the present job title and first job title by their high school vocational training area (OE Codes). The job titles are listed as the co-operative terminees reported them. The number of full-time jobs held by these terminees since completing their high school vocational course is listed, current employment status is listed, and whether the student intended to get a job in the area while in the program.

The following code is used to identify the employment status of the co-operative terminees:

0. Unemployed, but seeking employment
1. Employed full time
2. Employed part time, seeking full-time job
3. Employed part time, not seeking full-time job
4. Employed full time and attending school
5. Employed part time and attending school
6. Unavailable for employment

The following code is used to identify whether the student intended to get a job in the area while in the program:

1. No
2. Was not sure
3. Yes

The number in parenthesis behind the job titles indicates the relatedness of the high school vocational training to these jobs. The co-operative terminees made the judgment as to the relatedness of their training to these jobs. The following is used to identify this relatedness.

1. Directly related
2. Somewhat related
3. Not related

The total in each occupational title area may not correspond to the total in each OE Code as listed in Table 23. Some of the co-operative terminees failed to indicate the title of their present position. If the first job title was the same as the present job title, the first job title is included under the present job title.

DESCRIPTIVE NOTE: 94P.

ABSTRACT: THIS STUDY SOUGHT TO DETERMINE WHETHER EXISTING WORK TESTS AFFECTED THE PROBABILITY OF WELFARE RECIPIENTS RETURNING TO WORK. THE STUDY IS BASED ON A SURVEY OF 1,660 WELFARE RECIPIENTS, REPRESENTATIVE SAMPLES OF GROUPS RECEIVING BENEFITS AND FOOD STAMPS IN FORT WORTH, MEMPHIS, OMAHA, ROCHESTER, AND SAN DIEGO. THREE PRINCIPAL CONCERNS WERE: (1) DIFFERENTIAL APPLICATION OF WORK TESTS AMONG CITIES AND AMONG TYPES OF INDIVIDUALS, (2) THE INFLUENCE OF THE DIFFERENT WORK TESTS ON JOB SEARCH PATTERNS, AND (3) THE INFLUENCE OF WORK TESTS ON EMPLOYMENT BEHAVIOR. INTER-CITY DIFFERENCES WERE FOUND IN THE APPLICATION OF WORK TESTS. MEN EXPERIENCED MORE PRESSURE THAN WOMEN, AND THOSE WHO LOOKED FOR WORK EXPERIENCED MORE PRESSURE THAN THOSE WHO NEVER LOOKED. FOR FEMALES, NO SIGNIFICANT EFFECT OF THE WORK TEST WAS FOUND IN ANY CITY. FOR MALES, A WEAK TENDENCY TO INCREASE THE PROBABILITY OF RETURNING TO WORK WAS FOUND IN SAN DIEGO WHERE THE WORK TEST WAS ENFORCED MORE STRINGENTLY. HOWEVER, THE EFFECTS WERE NOT STATISTICALLY SIGNIFICANT. THE RESULTS OF THE STUDY PROVIDE A PESSIMISTIC PICTURE OF THE USEFULNESS OF EXISTING WORK TESTS IN ENCOURAGING WELFARE REGISTRANTS TO RETURN TO WORK. (AUTHOR/NJ)

ACKNOWLEDGEMENTS

We want to thank several persons for their assistance. First is Miss Rosa Yanni, whose administrative assistance and typing have been so important throughout the project. Mr. David Reed spent long (and late) hours doing our computer programming, for which we are grateful. Mr. Robert Learmonth and Mr. San Annan of the Westat, Corporation worked hard at the difficult task of the field survey. Persons employed by the Employment Service in the cities we studied were particularly helpful to us. These are Mr. Gene Clements in Fort Worth, Ms. Mary Johnson in Omaha, Ms. Beth Walker in Memphis, Ms. Mary Driscoll in Rochester, and Ms. Ann Brown in San Diego. To these persons, we extend our thanks.

The project was initiated by Mr. Jack Newman and Dr. Howard Rosen of the U.S. Department of Labor. Also, Ms. Josephine Gomez and Mr. Frank Slobig of the Department gave us important assistance.

None of the above are responsible for any faults with the study.

The material in this project was prepared under Grant No. 53-25-73-03 from the Manpower Administration, U.S. Department of Labor, under the authority of the Social Security Act, as amended. Researchers undertaking such projects under Government sponsorship are encouraged to express freely their professional judgment. Therefore, points of view or opinions stated in this document do not necessarily represent the official position or policy of the Department of Labor.

CHAPTER I

Summary and Conclusions

I. OBJECTIVES

This study was launched in late 1973, when the U.S. Department of Labor and Agriculture were considering proposals to "strengthen" the Food Stamp (FS) work registration program. While work registration requirements incorporate both coercion and assistance, the major concern lay with strengthening the former: what forms could greater pressures on registrants take and what would be their consequences? Similar questions recently have occupied those responsible for the work test in the Aid to Families with Dependent Children and Aid to Families with Dependent Children of Unemployed Fathers (AFDC/AFDC-UF) programs.

Interest in increasing the stringency of the FS and AFDC/AFDC-UF work tests stems from rising program coverage and cost, which has been particularly dramatic in recent years in the FS program. Public and Congressional pressures for more elaborate, and presumably tougher, work test procedures implicitly must rest on the hypotheses that such procedures will encourage persons to search the labor market more assiduously, lessen the duration of their unemployment spells, and result in their accepting jobs and wage rates that they otherwise would reject, given the availability of FS and AFDC/AFDC-UF (both can be called "welfare")benefits. The sooner recipients return to work, obviously, the lower will be program costs. The purpose of this study, then, was to determine whether existing work tests affected the timing and quality of jobs found after a period during which a person both received welfare

benefits and had to register with the Employment Service (ES) in connection with their receipt. In accomplishing this purpose, an additonal desire was to develop some data on the employment experience over time of registrants, thereby casting light on their employability. Equipped with this knowledge, administrators could propose what, if any, adjustments in present operating procedures are advised.

II. DATA SOURCES

The study is based on a survey of 1666 FS and AFDC/AFDC-UF recipients who were registered with the ES as a consequence of work registration requirements. The respondents came from five cities, in three of which the nationally uniform FS work test was in effect and in two of which local variants of the AFDC/AFDC-UF work test applied. The three cities in which the FS work test applied, Fort Worth, Memphis and Omaha, were chosen on the assumption that they differentially enforced the identical set of work test rules. The two AFDC/AFDC-UF cities, Rochester, N.Y. and San Diego, California, were selected because they were implementing work test features which have attracted great interest. Rochester required registrants to appear frequently at the ES to review job listings while picking up their welfare checks. San Diego placed on registrants the responsibility to search for job openings and to report to the ES frequently for review of such research efforts. Thus, the study was designed to analyze whether differences in enforcement of a work test as well as differences in the procedural nature of work tests influence employment behavior.

At each site, samples were chosen to be representative of the pool of ES registrants in that locale. Alternative populations, like that of all adult recipients under a given welfare program, were possibilities. The population of registrants is the one directly affected by the work test, and is most economically studied. A questionnaire then was designed to capture employment experience following a stretch of unemployment or part-time employment during which they recieved FS or AFDC/AFDC-UF benefits, depending on the city.

III. FINDINGS

Three principal concerns were (1) how the application of the work tests varied by city and within cities by type of individual; (2) how the different work tests influenced job search patterns; (3) how the work tests influenced employment behavior. Findings on these and related matters are discussed in turn.

A. The Application of the Work Tests

Six measurable aspects of a work test which could be applied to an individual were identified. Individuals could be (1) called into the ES office; (2) called in frequently; (3) questioned about job search activities; (4) asked for proof of job search activities; (5) referred to a job; (6) pressured to accept a job. Comparing the extent these treatments were applied in the three FS cities, Fort Worth appeared lenient, Omaha moderate, and Memphis relatively tough in enforcement of the identical work test rules. As between the three FS and the two AFDC/AFDC-UF cities, differences in ES pressure on registrants also were detected. As expected, frequent calls into the ES and the questioning of registrants about their search characterized the work test programs in the two AFDC/AFDC-UF cities.

Besides the inter-city differences in work test application, two other important differences emerged. Men experienced far more pressure than women in every city. Similarly, those who looked for work when unemployed experienced much more pressure than those who never looked. Those not looking for work could be distinguished in terms of personal characteristics by a very high incidence of work limiting health problems. Many of them may have been registered with the ES mistakenly.

B. The Impact of Work Tests on Job Search Patterns

Job search is a difficult subject to study, since only limited aspects of the process can be observed. Measures like the sources of job information used or the number of visits to employers reveal little about the quality of search. A critical question, virtually impossible to answer, is whether an individual behaves during his visits to employers in a way most likely to lead to an offer. Especially in the presence of a work test, a person may go through the formalities of searching, but in a way unlikely to result in a job offer.

A comparison of the search patterns of those in this sample with those of persons in other studies, however, can fruitfully be made. Generally, job search efforts in this sample, even in the presence of the work test, were somewhat less extensive than in other groups that have been studied. The ES did not greatly assist search, making referrals at rates somewhat below those found for the general pool of ES applicants. Except for making job referrals, moreover, the only other manpower service generally offered to registrants was the opportunity to review job listings.

C. The Impact of Work Tests on Employment

The main task of the work test is to get registrants back to work. To the extent that it is not successful in getting them into jobs, it still has the task of maintaining pressure on the registrants, and recommending punitive actions should the registrants not cooperate. Clear evidence was found that the ES concentrates pressure on registrants who remain unemployed, particularly males in Omaha but also in Rochester. On the other hand, evidence of success in getting registrants back to work appears only for males in San Diego, and even there the effect seems to be weak.

Two aspects of work behavior were studied: the probability of returning to work within the year studied and, for those who did get jobs, the duration of their spell of unemployment. For females, no significant effect of the work test was found on either of these variables in any city. For males a weak tendency to increase the probability of returning to work and a slightly stronger effect in reducing the duration of unemployment were found in San Diego. Being questioned about job search activities seemed to be the work test treatment with the most important effect. However, these effects were not statistically significant in San Diego. In Omaha, the evidence was significant that pressure was concentrated on those who remained unemployed. The same type of evidence appeared in Rochester, but it was not statistically significant. For Fort Worth and Memphis no work test effect was found on either work behavior variable.

Since the work test seemed to be enforced more stringently in San Diego than in the other cities studied, greater success in getting

registrants back to work should have been expected. That does indeed seem to be the case, but the success seems so small that its significance is questionable. Moreover, the survey was conducted at a time when the labor market was relatively tight. Although the work test can maintain pressure on those who do not work, we have been unable to find evidence that it has much of an effect on work behavior.

IV. POLICY IMPLICATIONS

The results of this study provide a pessimistic picture of the usefulness of existing work tests in encouraging registrants to return to work. These work tests can be successful primarily in maintaining pressure on unemployed FS or AFDC/AFDC-UF recipients, but the consequence of this pressure may be small. However, even though existing work tests achieved relatively little success, it is possible that expanded or redesigned work tests could get more registrants back to work. One possibility is more frequent and more intensive monitoring of the job search efforts of registrants. Such an approach could become costly, and there is no assurance of success. A second possibility would involve joining a public employment program to the work test. The public employment program could create as many jobs as needed. Work test registrants could then be assigned to jobs and required to accept them, or lose their benefits. The probability of success would be much higher, but such a public employment program would require a major new political initiative. In general reforms that are likely to make the work test successful are also likely to require large extra expenses and may push the government into areas of uncertain political acceptability.

CHAPTER 2

Nature of the Sample

I. INTRODUCTION

This study attempted to select sites which differed in the type of work test being applied to determine how the different tests influenced employment behavior. This chapter reviews the procedures followed in the selection of sites and samples as well as in the design of the questionnaire used in the survey. Attention also is devoted here to a discussion of the validity and generalizability of the findings.

II. SITE SELECTION

Work tests are part of a number of existing transfer programs, including Aid to Families With Dependent Children (AFDC), its component program, Aid to Families With Dependent Children of Unemployed Fathers (AFDC-UF), and Food Stamps (FS). Work test procedures differ between these programs. In addition it is likely that different jurisdictions enforce the same procedures differently. The purpose of this study is to examine the effects of both differences in rules and differences in enforcement on labor market behavior. The original mandate for the study was to examine the effects of the work test in the FS program. Since the work test procedures provided for by law and regulations are identical in all jurisdictions operating the FS program, variation in treatment in it could arise only in the degree of enforcement. Thus, an attempt was made to select three cities with similar labor market conditions but differing in the stringency of enforcement of the work test procedures. Since other transfer programs have different work test

procedures, two cities were included in which low income persons are covered by the work registration requirements prescribed for the AFDC/AFDC-UF program. The registration procedures in the latter welfare program are more demanding of recipients than are those in the FS program, although they vary somewhat among states.[1] In all, five cities were selected, Fort Worth, Memphis, and Omaha for the study of the FS work test, and Rochester and San Diego for the AFDC/AFDC-UF work test.

In order to choose the three FS sites, cities were sought that varied in the "toughness" of their administrative practice. The only measure of stringency available was the rate of FS benefit denials that resulted from recipient non-compliance with the work registration procedures. As Table 2-1 shows, this rate differs substantially among the 28 states that do not have sizable AFDC-UF programs. (In view of the dominance of the AFDC/AFDC-UF work test for a recipient simultaneously receiving FS and AFDC/AFDC-UF, there was a need to avoid states where large numbers of low income males could be eligible for AFDC-UF if the effects of the FS work test were to be identified.) Note that states vary in the proportions of registrants terminated for non-compliance from a low of .004 in Louisiana to a high of .217 in Nebraska. Later in the selection process, similar data for the first three quarters of FY 1974 were made available. Although there are changes in the termination rate for most states based on the 1974 data, the ranking among states broadly conforms with those yielded by the 1973 data.[2]

TABLE 2-1

Termination of Benefits Among Food Stamp Households
(For Fiscal Year 1973[a])

State[b]	Number of Persons Registered With ES	Proportion of Households Terminated For Failure To Comply[c]	Rank By Proportion Terminated For Failure To Comply

a. Food and Nutrition Services, U.S. Department of Agriculture, "Summary of Work Registration Activity - Food Stamp Program," unpublished, preliminary data for FY 1973.

b. The States selected are those without sizable AFDC-UF programs according to: National Center for Social Statistics, U.S. Department of Health, Education, and Welfare, Public Assistance Statistics, January 1974, Table 5.

c. Since there may be more than one registrant in a FS household, the numbers in column 1 are not the best base by which to divide the numbers in column 2.

Unfortunately, the benefit denial rates provided by the state welfare agencies are statewide rates. Data were also obtained from the Department of Agriculture on benefit terminations for non-compliance by city and county in selected states. Luckily, these revealed that major cities are similar to their respective states in benefit termination rates, especially in the smaller states.

The effects of a work test depend not only on how it is administered, but also on labor market conditions, like how easily a person can be placed in a job. To check the comparability between labor markets, information was obtained on population size and composition, unemployment, and composition of the demand for labor for cities in each of the 28 states considered. These data appear in Table 2-2 solely for the states from which the five cities actually were selected. The principal aim was to choose major labor areas whose labor markets were tight as measured both by low unemployment rates and growing employment. This was done on the assumption that a loose labor market may discourage enforcement of the work test by an ES office. Lower priority concerns were that the cities have populations of roughly similar size and roughly similar composition of labor demand.

Two other criteria influenced the selections. Cities were desirable if their work tests had been in effect for an extended period of time. Essentially, locations were to be avoided where start-up problems were affecting Employment Service (ES) behavior. Also, cities were avoided if the Department of Labor (DOL) recently had financed another study of the low income population.

[e]U.S. Bureau of the Census, County and City Data Book: A Statistical Abstract Supplement, 1962, pp. 476-575.

On the basis of the factors just discussed, the FS cities chosen were: Fort Worth, Texas (presumably lenient in enforcement), Memphis, Tennessee (presumably moderate in enforcement), and Omaha, Nebraska (presumably tough in enforcement).

Since California and New York follow unique AFDC/AFDC-UF registration procedures, the remaining two sites were chosen from these states. The California program places the burden of job search on the registered recipient, requiring him to commence search even before he becomes eligible for cash benefits. Also, the recipient is required to report bi-weekly to the ES to be questioned about the search efforts. Further, in the first thirty days of registrant status, a recipient is subject to a state adjudication process that is more stringent than the federal process if he violates the registration procedures. The special feature of the procedure in New York is that the covered recipient must report frequently to the ES office, both to pick up his welfare check and to review job listings. An attempt was made to select labor market areas within California and New York comparable to the FS sites. San Diego, California and Rochester, New York were the cities chosen.

III. SAMPLE SELECTION

The population studied in each of the five cities is the set of welfare recipients (FS or AFDC-UF, depending on the city) actually registered at the ES as part of the work test procedures. This is the population directly affected by the work test. Larger populations also might have been studied, but only at substantially higher cost. For example, one could consider the population of all welfare recipients. Many of these are exempted from the work test

and thus not registered at the ES. One could attempt to study the extent to which exemptions depend on behavioral responses of the recipients. However, the overall sample drawn would have to be very large to ensure adequate representation of those actually registered at the ES. A population larger yet would be the set of all potentially eligible low income families. Although only those registered at the ES may be directly affected, a work test generally known to be stringent could have indirect effects even on those currently employed. To the extent that people dislike having their job-search monitored by the ES, they may try to keep their old jobs or even refuse transfer benefits to avoid the test procedures. Such effects would be difficult to detect empirically. In addition the sample size would have to be much larger, making the study much more costly. Finally, a work test is likely to have indirect effects only if its direct application to ES registrants is known to be stringent. It is thus appropriate at the first stage to consider only whether the work test affects the behavior of those directly affected. In view of these arguments, it was decided to study only the actual registrants at the ES.

In sampling from this population, the basic objective was to interview persons who had completed a spell of unemployment during which they had been work tested. To avoid problems of respondent memory failure, it was desirable to select individuals whose spell of unemployment had been recent. Filing systems in the several ES offices were not organized in a manner that was convenient to our

sampling objective, and filing systems varied substantially among the five sites. The details of the sampling procedures by city are presented in the appendix to this chapter. Generally speaking, the sampling procedures yielded registrants whom we interviewed within a year following the time at which they become registered with the ES.

IV. QUESTIONNAIRE DESIGN

By directing respondents to consider their most recent period of unemployment or part-time employment during which they received welfare benefits and thus were covered by a work registration requirement, the questionnaire was designed to observe spells where labor market behavior could have been influenced by the work requirement. Persons currently employed on a full-time basis were asked to consider the most recent period of less than full-time employment when they also received welfare benefits. Persons currently working part-time or not at all were asked to go back to an earlier stretch of part-time work or non-employment when, again, they were receiving AFDC/AFDC-UF or FS benefits.

Questions in the interview schedule, which was identical for all five cities, were designed to yield data for the construction of dependent, treatment, and control variables. Dependent variables include measures of job search, its nature and intensity; the duration of unemployment during the period that the person was being work tested; success in finding a new job; and various measures of the desirability of that job.

Treatment variables in this study reflect the degree to which the work registration procedure was applied to the registrants.

Alternative measures of the treatment that the questionnaire attempts to capture include the extent and frequency of calls into the ES office, the extent of job referrals, and the extent to which registrants were pressured by the ES to accept jobs that they otherwise would have declined.

Control variables on which information was gathered include age, education, ethnic-racial identity, health, household status, labor force commitment, and motivation.

V. GENERALIZABILITY OF FINDINGS

Unfortunately, serious difficulties arose in locating and interviewing some members of the selected samples. In general, only about half of all potential respondents were found and completed questionnaires. It should be noted that this outcome is consistent with an important general trend in survey research and polling. A recent article in the New York Times emphasized the growing public resistance to being interviewed. Surveys of samples representative even of all income groups are having difficulty in completing interviews with more than 60 percent of selected persons.[3] The difficulties are likely to be greater with a sample of low income people. It is necessary to consider whether the low completion rate produces an unrepresentative sample and, if it does, whether the results of the study will be distorted or biased.

Even though many individuals in the intended sample in each city could not be reached for interviews, some information on the representativeness of the sample actually interviewed was obtained. Table 2-3 presents three kinds of information. The first column

TABLE 2-3

Footnotes

a. The data on registrants in the FS program come from ESARS Table 23 for each of the counties in which the three FS sites are located. The data are for fiscal year 1974. The data on AFDC/AFDC-UF registrants come from an ESARS Table 30, for Rochester and San Diego, also for fiscal year 1974. The data on the respondents come from our survey. The data on the non-respondents come from the FS-284 records of the non-respondents in their respective files. The non-respondents for whom demographic data was drawn were selected randomly from among the group of all non-respondents.

b. Except for data on household status, the number of respondents included in this table matches the number interviewed in our survey.. For some respondents, information on household status inadvertently was not obtained by a direct question.

c. Information on this characteristic is not available in the ESARS tables.

d. Information on this characteristic could not be obtained from the interview. Respondents generally would not know whether a negative referral ever had been made with respect to them by the ES to the welfare agency.

for each city gives the published demographic data on the entire registrant pool at the ES in that city. The second column gives the demographic characteristics of those interviewed. The third gives the same information, obtained directly from the ES files, on non-respondents in the original sample.[4]

The data in the second and third column for each city suggest a definite pattern in the failure to locate respondents. In all of the cities, there was a tendency to have special difficulty in finding males, persons between the ages of 22 and 37, and those with 8-11 years of education. There was no pattern in the racial-ethnic characteristics or household statuses of the non-respondents. When comparing respondents with those in the total registrant pools, one again finds an imperfect match. In three of the five cities, there was a higher incidence of negative referrals (recommendations from the ES to the welfare agency that benefits be terminated for non-compliance) among non-respondents than among all registrants. In two of the five cities, there was a lower incidence of negative referrals. In terms of the other characteristics appearing in Table 2-3, our samples seem largely representative of the total registrant pools. The only problem, then, appears to be that the non-compliant have been missed to some extent in three of the five cities.

To the extent that the sample interviewed is not perfectly representative, are the results of the study biased? One question to be considered is whether a work test encourages work effort. If some encouragement effect can be found, the result follows that the work test

in that city affects behavior whether the sample is representative or not. (If no effect is found, it is conceivable that the missing part of the sample would have been affected. Thus a finding of no effect is not fully conclusive.) The representativeness of the sample becomes more important when evaluating quantitatively the impact of the work test. In general, effects will be studied by means of regression analysis in which the differing characteristics of individuals will be used as control variables in trying to isolate the effects of the work test on behavior. Thus, even if a particular sample is not representative, controlling for the characteristics of the sample in regression analysis can produce generalizable results. Only if some types of individuals are seriously under-represented in the sample will the results be distorted. The information in Table 2-3, indicating that the non-compliant have been missed to some extent, suggests that these issues will have to be seriously considered in evaluating and interpreting the results.

A final matter in considering the generalizability of the findings involves a comparison between the respondents and the low income population. The data in Table 2-4 compare only heads of households, who comprise 55 percent of the sample, in the low income and respondent groups on several characteristics. Since the work registration requirements exempt persons 65 and over, it is not surprising that the low income population contains more household heads who are older. Female heads in the youngest age group, however, also are not relatively heavily represented in the sample. By comparison with

a. U.S. Department of Commerce, Bureau of the Census, Consumer Income: Characteristics of the Low-Income Population, 1973, Current Population Reports, Series P-60, No. 98, Washington, D.C., 1975, Tables 1, 4, 31, and 36.

the low income population, the sample also has a low percentage of white heads. Given the relative age distributions, it is not surprising that the sample has a higher proportion of high school graduates. Of major interest, of course, are the employment data in Table 2-4. Among both male and female heads, the employment/population rates are identical as between the respondents and the broader population of poor persons. The fact that such a high proportion of male heads among the respondents worked during the year reflects their relative youth, whereas the similarly high rate for female heads in the sample reflects, undoubtedly, their concentration in the middle age group, i.e., not where they are most likely to be limited by child-rearing responsibilities. For a group of persons who entered the sample as a consequence of their receipt of welfare benefits, the important finding in Table 2-4 is their evidently high degree of employability. This is not too surprising in view of the fact that the respondents were more or less screened for their employability by the work registration procedures. Adjusted for age and race, then, the sample would appear to be not too dissimilar from their counterparts in the general low income population.

FOOTNOTES

1. Persons simultaneously receiving AFDC/AFDC-UF and FS are required to conform only to the procedures of the former.

2. Two types of supplementary information confirmed these rankings. One type, made available by Employment Service (ES) offices, is on their rate of "negative referrals." These are ES recommendations to welfare agencies that FS benefits be terminated because of alleged registrant non-compliance with the work test. A second type was on terminations for non-compliance in the UI program. These were utilized on the suspicion that if the ES offices are tough in adminstering the UI program they will act similarly in the FS program. Examination of these two sets of data suggest that the differences among states in ES administration of the FS and UI programs broadly are comparable and are well represented by the welfare agency termination data.

3. Robert Reinhold, "Polling Encounters Public Resistance; Decision-Making Process Is Threatened," New York Times, November 9, 1975, p. 1. Three factors probably explain most of the problems in locating respondents in this study. One is the noted general trend toward lower completion rates in survey research. Organizations other than the Bureau of Census have faced increasing difficulty in finding and obtaining the cooperation of respondents. Completion rates in surveys of the general population recently have been in the range of 60 percent. ["Report on the ASA Conference on Surveys of Human Populations," The American Statistician, February 1974, Vol. 28, No. 1.] With low income populations, completion rates, one suspects, are likely to be lower. A second factor in this study was the large number of obsolete or incorrect addresses. Especially in Omaha, where transients living in residential hotels for short periods comprised a sizable part of the sample; and in Rochester, where many respondents initially lived in an area demolished for urban renewal purposes, it is not surprising that a large number of bad addresses lead to a low completion rate. A third factor, probably not as important as the first two, is that respondents were selected for their involvement in a monitoring procedure. It would not be difficult to understand that some may have feared disclosing information to unknown interviewers if the consequences could have been costly.

   Strenuous efforts, within tight cost constraints, were made to pursue those who could not be found. Some like going to the welfare agency for more recent addresses, did yield results. Nothing that was tried could raise completion rates above the following levels:

FOOTNOTES

	No. in Sample	Percent Completed
Fort Worth	619	49.6
Memphis	897	55.9
Omaha	712	36.0
Rochester	612	36.4
San Diego	779	48.7

4. The data on the registrant pool were obtained from the ESARS reporting system operated by the U.S. Department of Labor.

APPENDIX

FORT WORTH

Our intention was to obtain a sample representative of persons who become registrants at roughly the same time. This time should have been early enough to allow spells of unemployment for most registrants to lapse before the interview was administered. If the spell of unemployment preceded the date of their interview by too many months, however, registrants may have suffered failures of memory, lessening the accuracy of their responses.

FS registrants in Fort Worth are in the "active files" for up to 6 months following registration. They are removed from the active files either if they become employed or leave welfare for any reason, including non-compliance with the FS registration process. They remain in the inactive file until one year after registration. Random selection among the older cases in the inactive file would yield a representative but somewhat dated sample. Thus a random selection was made from among the combination of all active cases and cases in the inactive file 6 months or less. The sample thus included persons who registered in the first half of 1974 and these persons were interviewed within 6 to 12 months following their registration.[a]

---

[a] Fort Worth was substituted for Richmond early in the study because of difficulties encountered in locating respondents combined with an inability to replace them with others, given the small registrant caseload.

OMAHA

The dilemma posed by the Omaha filing system arose from the techniques used for separating "active" from "inactive" cases. Persons become "active" registrants when their names appear on the "daily list of new registrants" supplied to the ES by the welfare agency. Persons become "inactive" either when they leave the FS program or when the ES is notified of their re-employment. Thus, neither the active nor the inactive files themselves would contain samples representative of all FS registrants entering the FS program at a point in time. Neither could the two together be utilized, because "inactive" cases are dispersed among the very large number of all persons once listing their names with the ES for reasons unrelated to the FS program. Fortunately, therefore, the ES office retains among its records for a substantial period the "daily list of new registrants." To be able to observe persons after a stretch of unemployment, all persons appearing on the daily lists from December 1, 1973 through March 20, 1974 were selected, with the exception of those whose registrations were on a "short-term applicant basis." Persons thus were interviewed six to twelve months after they registered.

MEMPHIS

In the overwhelming proportion of cases, active and inactive cases are distinguished solely on the basis of time passed. Once a person is registered with the ES by the welfare office, he stays in the active FS file for a certain period of time, after which he

moves to the inactive FS file for another period. At the end of the second period, his file is placed in the general inactive ES files. Very frequently, a person is moved from the active FS to the inactive file when the ES is notified of their re-employment. Initially, therefore, the sample was selected by taking all cases in the inactive file who registered in December 1973 and all cases in the active file who registered between January 1974 and the end of March 1974. The interviews of these persons followed their registration by six to twelve months.

ROCHESTER

Active and inactive cases are distinguished on the basis both of their employment and welfare experience. Persons move from the active to the inactive file when they leave welfare; and move from an active to a special file for ninety days when employed. Thus, neither the active nor the inactive files separately would yield a sample representative of persons registering for the work test. A further complication is that some persons are in the file of AFDC/AFDC-UF registrants purely on a voluntary basis. Such persons are exempted from the registration procedure by law but seek the assistance of the ES. There being no possible penalty for "non-compliance," they cannot be said to be subjected to any work test. They were excluded from the sample.. Recognising that some long term welfare cases where re-employment is very slow may have been excluded, a sample roughly representative of those registering at a point in time was obtained by selecting all cases which had become

inactive between July 1, 1973 and June 30, 1974. Interviews, therefore, followed de-activation by from six to eighteen months; and followed registration by some longer but indeterminate period of time.

SAN DIEGO

Files of employed and non-employed active registrants as well as of inactive cases are kept separately. Cases become inactive by leaving welfare, not as a result of the passing of time. Unlike in Rochester, employed cases are not transfered to the inactive file even after 90 days. They simply are kept in an employed file until they leave welfare, whereupon they enter the inactive file just mentioned. Unlike under the FS program, employed persons receiving AFDC/AFDC-UF in California and New York must register with the ES. To obtain a representative sample of registrants as well as one including persons for whom a spell of unemployment was likely to have elapsed, some mix of inactive and active employed cases had to be obtained. The latter were chosen less than in proportion to their number at registration since some of them enter the inactive file. In the first quarter of 1974, the ratio of those entering the active employed file to all AFDC/AFDC-UF recipients registering with the ES was roughly 2:7. The sample thus consists of persons in the active-employed file in June 1974 and of persons entering the inactive file between February 1 and April 30 of 1974, in the ratio of 2:7. Voluntary registrants as well as those cases becoming inactive because their cases were moved to a different San Diego ES office again were deleted. Interviews followed registration by an indeterminate period, but one that should have allowed for the elapse of a spell of unemployment.

Chapter 3

The Nature and Application of the Work Tests

During legislative debates on work tests in income maintenance programs, great attention is paid to subtleties in procedure: Should applicants have to establish an involuntary basis for leaving their last job? Once on a program, should recipients be required to conduct their own search of the labor market? Upon being offered a job, should they be required to accept only "suitable"work; and how, in fact, should suitable be defined with regard to the skill level required and the wage offered? This chapter details the formal work registration procedures nominally in effect in the welfare programs of five cities and how they differed. Then it investigates the extent to which the various registration procedures and their attendant threat of benefit cancellation actually are applied. Chapter 4 considers differences in the service features offered in conjunction with the work test procedures. In Chapter 5, the interest is in how effective these differences in coercion and service are in making the job search process more effective.

I. THE NATURE OF THE FS AND AFDC/AFDC-UF WORK TESTS

Often called "work tests," work registration requirements in income maintenance programs in fact typically are tests which monitor recipient availability and search for work. Were the payment of an income transfer conditional upon actual employment, the program disbursing benefits could be said to contain a work test *per se*. Such

programs do exist. In Great Britain, for example, The Family Income Supplement program offers benefits solely to those poor families whose heads work and earn wages above some weekly minimum. Wage rate subsidy programs provide benefits only to the working poor, giving more benefits the more hours per unit of time that a recipient works. Public employment programs, which can be viewed as income transfers offering a complete subsidy to a public employer for a worker's wage bill, also contain implicitly a work test per se. Programs like FS and AFDC/AFDC-UF, by contrast, do not condition benefits upon employment, but require merely that a recipient register with the ES and, possibly, search more or less assidiously for a job. In the absence of a program making government an employer of last resort, transfer benefits could not easily be conditional upon work: unemployment frequently is involuntary. Thus, other than when a person must prove that his separation from a job was involuntary, work tests in American income transfer programs become procedures wherein a government agency monitors availability for work and job search to determine the person's eligibility for benefits.

A. Coverage

Work registration requirements, or work tests, vary in their coverage, number of conditions to satisfy to maintain eilibility, and degree of enforcement.. These several aspects can be seen by examining the registration requirements studied in this project. In the FS program,the work registration requirement covers those not fully

employed who are not exempted. Exemptions are granted for certain objective personal characteristics or as a result of the welfare agency declaring the person to be not able-bodied. As indicated in Figure 3-1, those not having to register under the FS program fall into three categories. Entry into two of the categories is a function of objective personal characteristics, whereas entry into the third results from the exercise of administrative discretion. In Figure 3-2 coverage of the California AFDC/AFDC-UF registration requirement is depicted. In this instance, the employed are not necessarily exempt from coverage and must, along with the non-employed, establish that they cannot earn an income sufficient to make them ineligible for welfare before they can receive benefits. Thus, in contrast to the FS procedure, both initial and continuing eligibility for AFDC/AFDC-UF in California are conditional upon the monitoring of availability and search effort. The New York AFDC/AFDC-UF work registration procedure also covers both the employed and the non-employed who are not exempt by objective characteristics or administrative discretion; in contrast with California, initial eligibility for AFDC/AFDC-UF in New York is not based on job search efforts. As opposed to the UI program, in neither the FS nor the AFDC/AFDC-UF cases is initial eligibility based on the condition that separation from the last job be involuntary. To establish initial eligibility in AFDC-UF, though, the male head must show substantial prior labor force attachment, that consisting of at least 6 quarters of work in any 13 calendar quarter period ending within one year prior to application for AFDC-UF.

B. Formal Procedure

As shown in Figures 3-1 and 3-2, aspects of procedure also vary among work registration requirements. Simplest among the three procedures investigated here is that in the FS program.[1] FS recipients are registered with the ES when the local welfare office submits a form in their behalf to the ES. The ES office calls in the FS registrant only when it has a specific service to offer the particular client. It is possible, therefore, for many registrants never to visit the ES office in connection with the registration requirement. Pressure on registrants to intensify their job search may result from the call-in, encouragement to review job listings at the ES, questioning by ES officials into whether the registrant is searching for a job, requests for proof of such search, actual job referrals, and ES inquiries into client responses to job offers made by employers.

Somewhat more complicated than the FS registration procedure is that in the Work Incentive Program (WIN Program) component of the New York AFDC/AFDC-UF program.[2] In addition to containing all the opportunities for pressure on registrants in the FS process, the procedure in the New York variant of the WIN program involves personal registration by recipients and the likelihood of periodic calls-in, the latter resulting from a mandatory check pick-up provision. Family heads who neither are enrolled in school nor are fully employed and have whatever social services they require to work must pick up their welfare

FIGURE 3-1

The Food Stamp Work Test Process

FIGURE 3-2

The California AFDC/AFDC-UF Work Test Process

check at the ES on a bi-weekly basis -- and simultaneously review ES job listings.[3] The work registration procedure offering the widest range of opportunities to impose more intensive search is that in the WIN Program related to the California AFDC/AFDC-UF program. Registrants there frequently are required to conduct their own job search and report on that search to the ES, the report potentially being subject to verification. As in New York, California registrants also are required to appear frequently at the ES office to report on their search, review job listings, and possibly receive referrals.

Lastly, FS registrants are not expected to accept employment outside their "major or general field of experience" until 3 months after they register.[4] There are, however, several restrictions on the type of work to which AFDC/AFDC-UF registrants may be referred. It must be work within the registrants "capability" and reasonable commuting distance of his residence; it must be above a certain wage minimum; and it must be free of conditions that would violate a variety of Federal employment laws. This particular protection is not offered AFDC/AFDC-UF registrants.

C. Enforcement of Procedures

Lastly, enforcement also varies among work registration requirements. Enforcement, in turn, has several aspects. First, it relates to the proportion of registrants experiencing coercion in any of the previously indicated ways. So enforcement varies as the proportion called-in or referred differs among programs and jurisdictions. Secondly, particular registrants may experience a given type of pressure with varying frequency. Referrals, for example, may come bi-weekly or bi-monthly. Thirdly, enforcement varies with the provisions in a registration requirement for punishments for non-compliance as well as with provisions for appeal in the event that a registrant feels aggrieved.

Thus, in FS an entire household may lose its benefits if a member is found to be non-compliant. In AFDC/AFDC-UF, the household loses only that fraction of its benefits attributable to the non-compliant individual.

D. Coercion vs. Service

Before concluding this section, it is important to note that work registration requirements, while basically coercive in origin, also often contain the prospect of services to assist job search. Registration with the ES by the employment eligible recipient allows the resources of the ES to be utilized to assist the individual to obtain a job. Whereas the coercive features of work search tests are studied in this chapter, the assistance features are a consideration in the next chapter.

II. THE APPLICATION OF THE WORK TESTS

A. A General View

Differences among the five cities in the application of the various work tests can be measured. Six means by which the ES can pressure registrants to intensify their search are considered in this study. The first measure of pressure or the application of the work registration requirements is the extent to which registrants actually are called into the ES office. Especially in the FS program, where registrants bear no responsibility to conduct self-initiated search, no pressure to intensify search can be felt in the absence of a call-in. Thus, one way to examine differences among the cities in degree of pressure applied to registrants is to compare the proportions of registrants receiving a call-in from the ES.

A second type of pressure applied to registrants is the frequency with which they are called-in. Repeated contact with ES officials may increase both the probability that a registrant receives ES services

and has his search behavior monitored. Among those called in, various overlapping subsets of registrants were subject to further means of pressure to intensify search. Thus, some registrants were pressured by being questioned about their search, although how strenuously this was done is unknown. Of those questioned, some registrants were further requested for proof of their search effort. Yet a different, possibly overlapping subset of those called-in was referred to jobs. Lastly, some registrants actually reported that they were pressured to take jobs other than ones they would have chosen in the absence of ES pressures. Consequently, comparisons among the five cities as to differences in the proportions of registrants called in frequently, questioned about their search, asked for proof of their search efforts, and pressured into taking otherwise unacceptable jobs offer alternative ways of measuring differences in the application of work tests.

A last indicator of the degree of pressure applied by the ES is the rate at which benefits are denied to registants because of their non-compliance with some aspect of the registration requirement. Respondents were asked during the interview whether they responded, for example, to an ES call-in or job referral. "Potential non-compliance" reflected a failure to respond to some such ES request, where the respondent's failure is explained by something other than his having found a job at the time of the ES request. Clearly, no direct measure of actual non-compliance was available. Note also that a benefit denial rate is not an unambiguous measure of the degree of ES pressure on registrants: it

could be low, for example, either because the ES chooses not to enforce the registration requirement or because it has so stringently enforced the requirement in earlier periods that registrants have been intimidated into compliance. Additionally, a summary measure of such pressure also was developed for each individual by summing the number of different pressures he faced. This summary measure thus could take on values between zero and six. Means of this summary measure, then, also could be compared for different groups of individuals among the five cities.

There being several aspects of the registration procedures, it remains to be determined whether implementation varied by city and demographic group. Also of remaining interest is the question of which registrants, those looking for work or those not looking, experienced the more demanding pressures applied by the ES.

B. Variations in Application of Work Test

1. By City

Contrasts are apparent when comparing among cities the degree of ES pressure applied to registrants. Initial call-in rates vary among the three FS cities, Ft. Worth, Memphis, and Omaha; they also differ on the average between FS and AFDC/AFDC-UF cities.[5] Fort Worth calls in far fewer FS registrants than do the other FS sites. The two AFDC/AFDC-UF cities call in higher proportions of registrants than have to appear in two of the three FS cities, and the San Diego call-in rate exceeds that of all three FS sites.

It is expected that for a given procedure differences in enforcement will arise among ES agencies. Further, it is anticipated that different

procedures will result in differences in the extent of pressure applied to registrants. The data in Table 3-1 on the measure of ES pressure discussed above are consistent with these expectations. They reflect greater pressure in Memphis than in Fort Worth and Omaha and even greater pressure in the two AFDC/AFDC-UF sites. Thus, Memphis is more likely to call in registrants frequently, questions more registrants about their search, demands proof of such search with greater frequency, and refers a higher proportion of registrants to jobs than do the FS programs in Fort Worth and Omaha. Rochester and San Diego generally score higher in each of these areas than do the three FS sites. An overall index of ES pressure is presented in line 11 of Table 3-1, where mean scores are provided for each city-sex grouping. For males, the cities in ascending order of ES pressure are Fort Worth, Omaha, Memphis, Rochester, and San Diego.

Apparently, the frequent calls-in in Rochester and San Diego result in relatively high rates of questioning and proof of search. A substantial difference appears between San Diego and the other four cities on the extent of questioning of registrants about their search efforts. Recall that a distinctive aspect of the work test in the state of California is that registrants are required to initiate their own search efforts. Although only two-fifths of the eligible[6] registrants in San Diego were questioned, and, of these, only three-fourths had to produce evidence supporting their claims about search efforts, these percentages are substantially higher than those in the other cities. Interestingly, though, with the exception of males in Rochester, referral rates do not differ makedly among cities. Differential enforcement and more demanding procedures also are apparent in the variation among cities

TABLE 3-1

Footnotes

a. Persons "eligible for work test" are those in the sample for whom a period of unemployment or part-time employment could be found in the twelve months preceding their interview when they also were receiving Food Stamps (in Fort Worth, Memphis, or Omaha) or AFDC/ AFDC-UF (in Rochester and San Diego).

b. Persons "called-in" are those who actually were requested to report to the ES in connection with the work registration requirement.

c. Persons called-in "frequently" had to report to the ES either every week, two weeks, three weeks, or month in connection with the work test. Reporting "infrequently" means coming in one time or either every three, six, or twelve months, or more irregularly but not frequently.

d. Those "questioned for search" were asked by the ES at some time during their period of registration whether they had looked for employment.

e. Among those "questioned on search," some persons were asked to document the fact that they had been seeking work. Such persons are those for whom there was "proof of search demanded."

f. Persons "referred to jobs" are those who during their period of registration were sent by the ES to an employer at least once.

g. Persons "pressured to take job" responded affirmatively to a question about whether they had taken a job other than one that they normally would have taken because of ES pressure during their period of registration.

h. Persons "potentially non-compliant" are those who at some time during their period of registration either did not report when called in to the ES, or failed to make use of a service offered by the ES, or did not furnish proof of search when asked for it by the ES -- and explained any of these difficulties with a reason other than that they had found a new job. No way of getting at non-compliance per se in interviews with registrants was available.

i. Persons "denied benfits" are those whose benefits were denied because of their non-compliance with some aspect of the work test and who also were unable to get the denied benefits restored as a consequennce of their negotiations either with the ES or the welfare department.

j. The summary index of ES pressure is constructed for each individual by summing values of one for each type of ES pressure to which a registrant was subjected. The types of pressure are representated in lines 3-8. Thus, for any individual the index can take on a value between zero and six.

in potential non-compliance and benefit denial rates.[7] Among males, benefit denials are more common in the two AFDC/AFDC-UF sites than in the other three cities -- and might have registered as being higher had the non-compliant not been missed so much in the interviewing process in those two cities. In sum, then, ES offices apparently can vary markedly in the extent to which they apply pressure, both by being stringent in implementing given procedures as well as by implementing a broader array of procedures.

2. By Demographic Group

In addition to examining differences between cities, an attempt was made to determine whether pressure is applied differentially to registrants based on personal characteristics. Separating the registrants by sex in Table 3-1, one notes a very clear pattern within each city of greater pressure placed on males as opposed to females. Except for initial call-in rates, every means of pressure is applied substantially more frequently to men. Even job referral rates uniformly are higher for men. In the AFDC/AFDC-UF program this pattern is consistent with USDOL regulations calling for priority treatment for unemployed fathers. No such priorities are specified, however, for the FS program. The greater attention given to males in the FS program as well as in the AFDC/AFDC-UF program may result either from the existence of jobs in the various labor markets that more frequently are given to men and/or from an attitude of ES personnel that men have a greater responsibility to work and not to rely on welfare.

Efforts were made to determine whether other labor market related characteristics of registrants were associated with the degree of pressure applied by the ES. In a regression analysis, the index of ES pressure (defined in footnote j of Table 3-1) was regressed on race, age, education, health status, household status, and family income as well as on four indicators of a registrant's interest in finding a job. One indicator was whether the registrant typically looked for work when out of a job. A second was whether job search was begun while still employed. The third was an index of motivation. The last indicator was the number of techniques used by the registrant in searching for work. For females, this regression yielded no significant results. For males, the results are weak, but it does appear that the ES selects for work-testing those who are most highly motivated to work. In Table 3-2, one notes that in Fort Worth, Omaha, and Rochester those who typically looked for work when unemployed and who started their search before they left their last job were work tested more intensively by the ES. Also in Fort Worth, Rochester, and Memphis, heads of household were tested more heavily than were non-heads. This apparent selectivity, involving the choice of men over women, heads of households over non-heads, and the more highly motivated over the less in some locations conforms with recent findings in another study by Stevens.[8] In two Missouri ES offices, Stevens found that veterans, low income, and more highly educated persons all received more referrals than their counterparts.

Of additional interest may be the data in Table 3-3, which show, without controlling for other variables, that racial groups did not differentially experience any form of pressure in any of the five cities.

TABLE 3-2

Footnotes

Numbers in parentheses are standard deviations of estimated coefficients. Blank spaces in table result from variables being clearly insignificant, not from their being omitted. Sample is limited to those who are "eligible" for the work test, as eligibility was defined in Table 3-1. The dependent variable is an index number, constructed for each individual by summing values of one for each type of ES pressure listed in Table 3-1 to which a registrant was subjected. The index number can take on values between zero and six.
Regressions were run stepwise with variables added as long as they contributed significantly to R^2.

LFCOMMIT: equals 1 if person ususally looked for work when unemployed, zero otherwise.

STRTSRCH: equals 1 if person began to look for work before leaving old job, zero otherwise.

MOTVINDX: an index of motivation, based upon answers to questions used by H. Sheppard and H. Belitsky in their book, The Job Hunt, p. 113. In short, the more the individual perceived himself able to command his destiny, the higher his score; the more the respondent felt at the mercy of exterior forces, the lower his score.

TCHNIQS: a measure of the number of ways an individual looked for work, which takes on values between zero and seven for any one person.

NHEAD: equals one if not head of household, zero otherwise.

UHEALTH: equals one if person has health problem limiting amount or kind of work he can do, zero otherwise.

BLACK: equals one if person is Black, zero otherwise.

FAMINC: income of the family excluding earnings of the person interviewed.

AGE: equals the age of the individual in single years.

EDUC: number of years of school completed.

Footnotes for this table are the same as those for Table 3-1.

One would expect differences by racial group only if there was racial discrimination. None can be detected in these data.

3. By Whether Registrants Seek Work

A substantial number of interviewers claimed they were not seeking work at all. It was found that at least half of these suffered from poor health that limited their ability to work. In Fort Worth and Rochester over 80 percent of those not looking for work reported bad health. Furthermore, proportions suffering from bad health were far greater among those not looking than among those looking. Apparently, a sizable fraction of those who did not seek work probably were inappropriately registered with the ES.

To obtain more information on those not looking for work, their treatment by the ES is examined in Table 3-4 where the numbers experiencing each form of ES pressure are compared for those looking and not looking for work. Although many of those not looking for work are called in, few of them go on to more stringent stages of the work test in most cities. Thus it appears that the ES in many cases finds that these individuals should not be subjected to the work test.

It was decided to eliminate the individuals not looking for work from further analyses of the effects of the work test on the assumption that most of them should not have been subjected to it in the first place. In any case, those not looking for work will not find it. Thus, no effect of the work test will be observable among these individuals.

TABLE 3-4

Number of Registrants Experiencing Differences in Application of Work Test By Whether or Not They Sought Work, By City and Sex

	b. Not Looking for Work	.36	1.25	.27	.25	1.27	.18	1.23	.40	.87	1.20

a. The six work test measures are defined in the footnotes to Table 3-1.

b. The test index score is developed for each individual by summing values of one for the number of work test measures to which he was subjected. Thus, it can vary between zero and six for any one person.

53

III. CONCLUSION

Work tests in American income transfer programs typically are tests monitoring the availability and search for work. Benefits are conditional upon satisfactory search efforts, not upon work *per se*. Such work tests vary potentially in their coverage, conditions, and enforcement. Among the three cities distributing only Food Stamps to respondents, Fort Worth was found to be lenient, Omaha moderate, and Memphis tough in their enforcement of the standard FS work test. Differences in enforcement were measured by comparing among cities the proportion of registrants experiencing several different forms of ES pressure on them to intensify their search efforts. Between the two cities administering their own AFDC/AFDC-UF work tests and the three administering the (formally identical) FS work test, differences in ES pressure on registrants also were detected.

Besides the inter-city differences in the application of work tests, disparities also were found among demographic groups. Thus, men experienced far more pressure than women; heads of households more than non-heads; those looking for work more than those not looking. The question that remains is whether the differences found in the application of the work tests are of any consequence for search process, the probability of registrant re-employment, and the quality of jobs obtained by registrants. These matters are considered in Chapter 5.

FOOTNOTES

1. The procedures described for the FS and AFDC/AFDC-UF programs are those that were in effect in fiscal year 1974. Some modifications in the FS procedure were supposed to go into effect on July 15, 1974.

2. The procedures described for the New York and California AFDC/AFDC-UF programs were different from those in effect elsewhere in the country.

3. A report, submitted to Governor Hugh Carey shortly after he assumed office, recommended termination of the check pick-up program. (Peter Kihss, "Panel Urges Suspension of Work-Relief Project," New York Times, March 26, 1975.)

4. As of July 15, 1974, FS registrants may be expected to accept such employment one month after registration.

5. This finding is consistent with a similar one reported in: U.S..Department of Labor, Manpower Administration, Office of Manpower Program Evaluation, Division of Special Studies, "Pilot Evaluation of the Work Registration Activity Under the Food Stamp Program," Washington, D.C., July 1974, p. 34.

6. Sample members are defined as eligible for purposes of this study if they were at some point simultaneously receiving welfare benefits and either unemployed or employed part-time. This period had to come in the year preceding their interview, which was the period of the study.

7. These benefit denial rates cannot compared with those appearing in Table 2-1. First, they are computed on the base of "eligibles" as defined for this study, not the base of total registrants as in Table 2-1. Secondly, these are denials that have not been reversed in the appeals procedure. Denials in Table 2-1 are sometimes reversed. Lastly, having missed disproportionately the non-compliant, one suspects that we must have also missed those whose benefits were denied because of their non-compliance.

CHAPTER 4

Patterns of Job Search

The work registration requirement under FS and AFDC/AFDC-UF programs has two goals, one helping and one coercive. Registration with the Public Employment Service (ES) by the recipient eligible for employment allows the resources, training, and knowledge of the ES to be utilized to assist the individual to obtain a job. At the same time, by making the continuation of an individual's welfare benefits dependent upon his effectively seeking suitable employment, Congress hoped to encourage rapid re-employment of eligible individuals. In this chapter interest lies in the degree to which a) the ES assisted individuals in the sample to obtain employment, and b) the extent to which registration and its attendant threat of benefit cancellation served to speed up or make more effective the search process.

The chapter divides into three parts. The first describes the job seeking patterns of the overall sample and compares them with the patterns found in other studies. The second considers the manpower services provided by the ES as distinct from its coercive measures. A third contains an analysis of the determinants of job seeking patterns. An analytical assessment of success in obtaining a new job is contained in Chapter 5, while implications for policy and procedures are discussed in Chapter 6.

I. Job Seeking Patterns

This section discusses some general characteristics of the work search patterns in our sample. The following sections then examine the ways the ES can influence job search. Two aspects of job seeking patterns are of interest here: the channels of information which are used by the individuals looking for new jobs, and the intensity with which they seek work.

A. Channels of Information

Individuals were asked three questions concerning the channels through which they sought jobs. The first question was how they looked for work, with the interviewers putting down a yes answer for each of eight channels which they might have named. These eight were Public Employment Service; Private Employment Agencies; Company Personnel Office; Union; Community Organizations; Friends and Relatives with a Company from Which Employment was Sought; Friends and Relatives with Other Companies; and Newspaper Ads. Approximately 28 percent of all "eligible"[1] respondents named either no or just a single source of information. Among males, Fort Worth had the largest proportion of such replies, 38 percent, while San Diego had the lowest proportion, 16 percent. Among females, Fort Worth again had the largest proportion of such replies, 54 percent, while San Diego had the smallest, 29 percent. These numbers are interesting in view of the finding in Chapter 3 that Fort Worth had the most lenient work test enforcement and San Diego the most stringent.

Individuals who indicated more than one job channel were then asked which was the one they used most. Newspapers were cited as being used most often by female registrants in each of the five cities. For males, newspapers were cited in two of the five cities, Omaha and San Diego, while direct application to employers were used most often in two other cities. At its peak, in Omaha, better than one-half of the females and two-fifths of the males responding said they used newspapers the most.

The third question involved ranking the channels on the basis of which was the most useful in finding employment. Newspapers and the ES, two formal channels of information, generally were considered the most useful. In four of the five cities, newspapers were cited by roughly one-third of the female registrants as the most useful information source. In three of the five cities, roughly three of every ten male registrants held a similar view of newspaper job ads. Moreover, among two of the three city-sex groups in which another source was thought to be most valuable by the largest number of registrants, newspapers were considered the most valuable by the second largest group of registrants.[2] Among earlier studies, only the Kenakee survey of secondary workers by Richard Wilcock and Walter Franke produced comparable results. There, in an expanding labor market, 19 percent reported that they obtained their jobs through the use of newspapers.[3] The closest comparable figures, 40 percent, was reported for unskilled workers seeking employment in Glasgow, Scotland.[4]

Next to newspapers, the ES held a strong position as a "most useful source." Among both females and males, it was considered the most useful source by the largest proportion of registrants in one of the five cities, Memphis in each case. Recall in the previous chapter that the ES enforced the FS work test the most in Memphis among the three FS cities. Apparently, it also was providing a service in the process. Among females in the other four cities, the ES was just behind newspaper ads in the proportion of citations as the most useful source. Among males, this was the case in Rochester and San Diego, but not in Fort Worth and Omaha. Again, recall that the two former cities had active registration enforcement whereas in the two latter cities enforcement was less extensive. Among nine of the ten city-sex groups, the lowest proportion, 18.5 percent, citing the ES as the most useful source exceeds the rate to be found in all but three other groups of employees covered in 14 previous studies covering some 26 occupational or geographical labor markets.[5] The two city-sex groups with the highest percentages, both around 42 percent in Memphis, exceeds that reported everywhere else.

Direct applications to the employer and the utilization of friends and relatives, the latter a more informal method of search, which were extensively used by workers in other surveys of job seeking channels, were little used by persons in this sample. Friends and relatives were seen as the most useful channel by but 15 percent of persons in each of the ten city-sex groups. The results are similar for all groups

except the Spanish-surnamed, among whom more than one-fifth gave friends and relatives as the most useful source. These percentages are substantially lower than those reported in other studies. The closest comparable figures was the 16 percent reported in The Job Hunt[6] and the 17 percent obtained in a study of older managers, 37 percent of whom got their new jobs through the use of 40 plus clubs.[7]

The importance of direct application to an employer also was low. The two highest figures for males, 38.7 percent in Rochester and 25.5 percent in Fort Worth, are in the low range reported for other studies, while the lowest figure of roughly 15 percent in Memphis is below that reported in any other study. Again, the Spanish-surnamed often were an exception, with one-third of them typically saying that calling at the employer's office was the most useful. Certain occupations in the recent study of the Chicago labor market had lower values, though it must be recalled that close to 50 percent of the sources of jobs in the Chicago data were classified as unknown.

B. Intensity of Search

The only measures available on intensity of search are the degree to which alternative channels of information were used, and how often particular channels were used. Consider first the use of alternative channels of information. In every city males more frequently used more than one source than did females. The greatest use of multiple sources was in San Diego, where 84 percent of the male registrants used more than one. The least use of multiple sources was in Fort Worth,

where 62 percent of the males and 46 percent of the females used more than one channel. It should be noted that in the cities with tougher work tests use of more than one channel was more common. Comparatively, in a national survey of job search in 1973, 80.2 percent of those interviewed indicated that they used more than one channel.[8] The least use of multiple sources in that sample was by women, but even here 79.9 percent used more than one, considerably in excess of the 56 percent of women in this sample who used multiple channels.

Other measures of intensity of search are the numbers of visits to a public or private employment agency and the numbers of calls on employers. Again, men more frequently made visits to employment agencies and to employers than did women. Generally, over 60 percent of the men visited an employment agency one or more times per week. Forty percent, therefore, typically made no contacts with an employment agency while unemployed. Further, roughly 70 percent in each city visited one or more employers per week. Interestingly, again, in San Diego 84 percent of the males visited one or more employers per week and 83 percent visited two or more per week. In each of the other four cities, roughly 60 percent of the males visited two or more employers per week. This greater degree of activity in San Diego reflects, most likely, the California requirement for job search initiated by the registrant. Among "eligible" female registrants, roughly half in each city visited an employment agency one or more times per week; thus, roughly half made no visits in the typical week. And from one-third to two-thirds of the women, depending upon the city,visited one or more employers per week. Again, though, in

San Diego the intensity of job search seemed the greatest. While in the four other cities between 28 percent and 44 percent of the women reported calling on two or more employers per week, in San Diego 64 percent of the eligible female registrants did so.

A study of individuals who had exhausted their unemployment insurance (UI) benefits, conducted in different states about the same time as the present survey, found that the average number of in-person contacts with employers ranged from 1.1 per week for white females to a high of 1.7 per week for non-white males.[9] Overall the survey average was 1.35 in person contacts per week. The methods of counting are not directly comparable, but it would appear that among those exhausting UI benefits the differences between men and women with respect to employers contacted per week are consistent with what was found with this group of FS and AFDC/AFDC-UF recipients. Moreover, the levels of search are comparable in this and in the UI study.

In the 1973 survey of job seeking, 65 percent of those interviewed indicated that they usually spent five hours a week or less looking for work. This would seem to imply a limited number of employers or employment agency contacts, and seemingly would be consistent with the results here. In an experimental study investigating the value of supplementary job information to UI beneficiaries, employer contacts over an eight week period in the control group were similar to those for persons in this study.[10]

II. MANPOWER SERVICES PROVIDED BY THE ES

The requirement of registration at the ES was intended to provide assistance as well as to monitor the applicants efforts in finding a new job. The degree of assistance given was measured by questions concerning job referrals and other manpower services offered by the ES and what happened as a result of these activities. Table 4-1 presents the number of individuals receiving each manpower service. Aside from job referrals, the only additional manpower service offered to any substantial number of registrants was the opportunity to review lists of jobs. Only in the two AFDC/AFDC-UF cities were very small numbers of persons given services other than these two.

At first blush, it appears that the eligible registrants in this sample received minimal service from the ES. As can be seen in Table 4-2, only 51 of 1310 registrants received jobs as a result of ES referrals. In general, the ES was more successful in placing men than women; and the percentage of eligible registrants placed in jobs was higher in the two AFDC/AFDC-UF sites than in the three FS sites (Line 5a of Table 4-2). Typically, though, fewer than 5 percent of the registrants were placed in jobs by the ES.

A second approach to evaluating the level of service offered by the ES involves determining the proportion of total jobs found by persons in the group that were found for them by the ES. Whereas 51 of 1310 registrants found jobs via the ES, only 544 of the 1310 found any job during the survey period. Among the 544, as the data in

L5

line 5b of Table 4-2 indicate, with the exception of Rochester, roughly 7 or 8 percent of total job placements were placements made by the ES. These figures can be compared with one from a study in Illinois in 1965, where the director of the ES reported that 11.8 percent of all job placements were ones made by the ES.[11]

A third way of evaluating the level of service is to look at the proportion of ES referrals that resulted in placements. In all, 199 of the 1310 eligible registrants received one or more ES referrals and, again, 51 of the 199 found jobs as a consequence of the referrals. Though the numbers involved are very small for each city-sex group, one point to be noted is that the placement/referral rates in line 5c of Table 4-2 are higher for both men and women in the AFDC/AFDC-UF cities than in the FS cities. Generally, the rates vary between 20 to 40 percent. These placement/referral rates may be compared with the ratio of placements to referrals for the ES as a whole. During the late 1960's, 44.9 percent of total ES referrals resulted in a placement, and in fiscal year 1974 it was 52.3 percent.[12] In the special New York study, 40.4 percent of referrals resulted in placements.[13] Finally, the percentage of referrals resulting in placements for the national caseload of FS registrants in fiscal year 1974 was 50.1.[14] Now it is less clear that the level of service received in this sample was below that of the normal ES applicant.

A last comparative view of the ES service can be gained by comparing our findings with those of other studies. A 27-week study of

unemployed workers in New York found that only 20.4 percent of a test group and 13.1 percent of a control group received a job referral from the ES. The record on placement was 8.8 percent for the test group and 4.9 percent for the control group.[14] In a very recent study of two local ES offices in Missouri, the referral rate among UI beneficiaries was 16 percent.[15] Lastly, an internal USDOL study of the ES registration program produced data on a national basis for fiscal year 1974, the year during which this study was done. It showed that while 32.7 percent of all ES applicants received referrals and 17.1 percent were placed, only 15.9 percent of FS registrants received referrals and 8.0 percent were placed.[16] These indicators of ES service activity suggest that FS and AFDC/AFDC-UF recipients in this study received less extensive service than the usual ES applicant, although treatment comparable to the national pool of FS registrants.

It is not unreasonable to infer from our data that the lower referral rates for FS and AFDC/AFDC-UF registrants reflected relatively careful selectivity on the part of the ES. In chapter 3, it was evident that the ES does interact with a high fraction of registrants, especially in some cities,but has a relatively uniform low level of referrals. In places like Memphis and San Diego, the interactions between the ES and clients seem quite extensive. Referrals, however, are not. We suspect that ES officials make a judgment that there is little payoff to referring some clients and adjust their behavior accordingly.[17] In this connection,

it should be noted that a relatively large number of eligible registrants -- 33 percent for all five cities combined -- claimed that they were not seeking work altogether during their period of unemployment. Many of these suffered from health problems and probably were in our sample by accident. (Those with evidence of a disabiling medical problem are exempt from the work test, but their problem is sometimes not discovered until they are first called in to the ES.) There is thus a high probability that many in this group were ineligible for the work test for health or other reasons. In later statistical tests, this group is excluded. It is included, however, in the sample used for calculating the numbers in this chapter, which therefore should be viewed with great caution.

Consider finally an additional aspect of the job referral process: job offers were not often refused. For the sample as a whole, three-fourths of the registrants accepted those jobs which they were offered either through referrals by the ES or by contacting an employer. For ES jobs separately, the acceptance rate was 69 percent compared to 80 percent for self-found offers. These percentages are consistent with national data from the 1973 survey which indicated that 68 percent had not turned down a job offer if they were white and 77.8 percent if they were non-white.[18] The unemployed in The Job Hunt accepted a somewhat higher proportion, 83 percent.[19]

III. CONCLUSION

Job search is a difficult subject to study, since only limited aspects of the process can be observed. Measures like the sources of job information used or the number of visits to employers reveal little about the quality of search. A critical question, virtually impossible to answer, is whether an individual behaves during his visits to employers in a way most likely to lead to an offer. Especially in the presence of a work test, a person may go through the formalities of searching, but in a way unlikely to result in a job offer.

A comparison of the search patterns of those in this sample with those of persons in other studies, however, can fruitfully be made. Generally, job search efforts in this sample, even in the presence of the work test, were somewhat less extensive than in other groups that have been studied. The ES did not greatly assist search, making referrals at rates somewhat below those found for the general pool of ES applicants. Except for making job referrals, moreover, the only other manpower service generally offered to registrants was the opportunity to review job listings.

Chapter 5

The Impact of Work Tests on Employment

This chapter will investigate the impact of the work test on two aspects of work effort. The first question considered is whether the work test succeeded in getting FS or AFDC/AFDC-UF recipients back to work. Then, among those who did get jobs, the effects of the work test on the duration of a spell of unemployment is considered.

I. METHODS OF STUDY

The problem is to determine whether any of the work test procedures affect work behavior variables -- the probability of finding work and the duration of unemployment. The study was conducted in cities with light labor markets where the work test should have the best chance of success. Respondents were asked about the following five aspects of the work test: 1) whether they were called in to the ES office, 2) whether they were called in frequently, 3) whether they were questioned about their job search efforts, 4) whether they were asked for proof of their job search efforts, 5) whether they were referred to a job by the ES. Unfortunately, these treatments are not independent of each other since, for example, a person cannot be called in frequently or questioned unless he has first simply been called in. The effect of being called in is thus likely to vary depending on what other treatments the individual receives. In order to separate the effects of these treatments, individuals were grouped together on the basis of the combination of treatments they received. Dummy variables were constructed for five of the combinations. Each of the following dummy variables equals unity

for an individual under the indicated situation, zero otherwise.

1) CALLED: called into the ES office, but not called in frequently, not questioned, not asked for proof, not given a referral.

2) CALLED FREQUENTLY: called into the ES office frequently, but not questioned, not asked for proof, not given referral.

3) QUESTIONED: questioned about job search efforts, but not asked for proof, nor given a referral.

4) PROOF: asked for proof of job search efforts.

5) REFERRED: referred by the ES to a job.

Very few individuals were both referred and asked for proof so no attempt was made to separate variables (4) and (5). Otherwise, the categories are mutually exclusive. An individual receiving some ES treatment will have zeros for four of these variables and a value of unity for only one variable. Those receiving no ES treatments have zeros for all five variables.

Since individual characteristics besides the work test treatment received are likely to affect each of the dependent variables, it is necessary to control for these other characteristics if the work test effects are to be isolated. The questionnaire provided information on a variety of demographic and economic characteristics of each individual from which the following control variables were constructed.

1) NHEAD: equals one if the individual is not a head of the household, zero otherwise. (Not available for females.)

2) UHEALTH: equals one if the person has a health problem limiting the amount or kind of work he can do, zero otherwise.

3) BLACK: equals one if the person is Black, zero otherwise.

4) FAMINC: income of the family, excluding the earnings of the person interviewed.

5) AGE

6) EDUC: number of years of school completed.

7) SEARCH: index of job search, which equals the number of weekly calls on employers + number of weekly visits to employment agencies + number of different channels of job information used + (5, if the person claimed he was always looking for work, or 0, if he was only looking some of the time).

The five work test variables and the control variables are included as independent variables in the regressions presented in this chapter. An additional control variable that might be important is sex. Since differences by sex might be large, it was decided to run separate regressions for males and females. Similarly, differences by city could be substantial especially in work test treatment. It was decided to run the regressions separately by city. Thus, for each dependent variable, there are separate regressions for each sex in each city. Although our intention was to include the full set of independent variables in each regression, in some cases the computer was unable to include a variable due to an insufficient F-level or tolerance level.

A complication arises in interpreting the results. If the ES is selective in who it treats under the work test, the effects of the work test on work behavior will be clouded. Two types of ES selectivity are conceivable. One involves applying the work test to those with the highest probability of returning to work anyway -- the cream of the crop -- and sometimes is called "creaming." The other involves concentrating ES pressure on those with the greatest reluctance or difficulty in returning to work and may be called "pressuring." In Chapter 3, except for the differences in treatment between males and females, no evidence was found that the ES is selective in whom it treats. However, the evidence depended completely on individual characteristics that we could measure. When the welfare office sends the name of a new

registrant to the ES, it also sends information on the work history of the person, data which we did not have. Since such information might be useful in predicting future success in returning to work, the ES may be able to use it for either creaming or pressuring.

The work test, if it is successful, will tend to increase the probability of returning to work (or to reduce the duration of unemployment). In the presence of creaming, it will appear successful, but the success may result from the creaming rather than from the work itself. If creaming takes place, those work tested will be the ones with the highest probability of returning to work so that there will be an association between being work tested and returning to work. The regression coefficients of work test variables may reflect only this association, not a causal relationship of the work test on returning to work. In the presence of pressuring, the distortion will work in the opposite direction. Those work tested will tend to be those least likely to return to work. If then the regression coefficients show a negative effect of the work test on the probability of returning to work, it is not the result of a perverse causal relationship, but rather a consequence of pressuring. There is thus an indeterminancy in our regression results on the work test. Success of the work test in getting people back to work may be only apparent -- a result of creaming. Lack of success, too, may be misleading since pressuring tends to hide success. If it were possible to control for all individual characteristics by including the relevant variables in the regression, neither creaming nor pressuring would create statistical problems.[1]

It should be noted that the regression samples exclude those who claimed not to be seeking work at all. As indicated in Chapter 3, it is believed that many of these were really not subject to the work test.

II. THE PROBABILITY OF FINDING A JOB

Success in find a job is measured by a dummy variable equal to unity if the person found a job after a spell of unemployment in which he was work tested, zero if he did not. This dummy variable is used as the dependent variable in regressions for males reported in Table 5-1 and for females in Table 5-2. Predictions based on these regressions will generally lie between zero and unity, and can be interpreted as the probability of finding a job, conditional on the specified values of the independent variables.

Actually, predictions based on regressions with such a dummy as dependent variable can easily lie outside the 0, 1, range, a problem overcome by logit analysis. In addition it is known that such regressions suffer from heteroscedasticity, a problem that reduces the reliability of estimates, but does not bias them. Although these problems could be serious, they are not necessarily so. Therefore, ordinary regression is used.

In evaluating the regression results, it should be remembered that the list of independent variables included is long, increasing the risk that some of them will be highly correlated and thus will appear insignificant. Therefore, coefficients should be checked first for significance, but even if they do not pass that test, they should be judged by whether their signs are appropriate. In general the values of R^2 are low, indicating that the probability of finding work remains largely unexplained even after accounting for the effects of the work test and the measured control variables.

A. Males

If the work test is successful, it should increase the probability of returning to work, so that the work test variables should have positive coefficients. It is striking to note that all work test coefficients for Omaha and Rochester are negative, a result explainable only by pressuring. Indeed, CALLED, QUESTIONED, AND REFERRED are significant in Omaha. It may be that pressuring does succeed in getting some people back to work that otherwise would not have done so, but this cannot be deduced from the results. Whether there is success or not, however, the pressuring may be consistent with the intentions of the work test program. In particular, in Omaha the results indicate that the ES concentrates its efforts on those least likely to go back to work on their own.

In contrast to Omaha and Rochester, all coefficients of work test variables are positive in San Diego except for PROOF. None are significant. The positive coefficients may result from creaming, but if so it is a very weak process. These results may also indicate a very weak success for the work test in San Diego. Indeed, if the work test is to succeed anywhere, it should be in San Diego where it is most stringently enforced. The results are even weaker in Memphis and Fort Worth where the signs of the coefficients are mixed. The possibility remains that in these cities a genuine work test success is combined with pressuring in a way that the effects of the two just cancel each other, but it is not a likely coincidence. It thus appears that except for San Diego, where the evidence is weak, there is little indication of work test success in getting people back to work.

To see further the implications of the coefficient estimates, Table 5-3 presents predictions of the probability of returning to work. The base for comparison is a person who is head of his family, healthy, white, age 30, with 12 years of education, and with a score of 10 on the index of search. The probability of returning to work is predicted for such a person based on the regression coefficients in four situations: first that he is subjected to no work test and then to three different combinations of work test treatments indicated by the variables CALLED, QUESTIONED, AND PROOF. It should be remembered that many of the indicated differences in probability are not significant. The predicted probabilities exceeding unity illustrate the hazards of regression as opposed to logit analysis.

Considering now the other regression coefficients, SEARCH has the expected positive sign everywhere except in Memphis, although it is never significant. Non-heads have a lower probability of retruning to work everywhere except in Fort Worth, and the difference is significant in Memphis, Omaha, and Rochester. The unhealthy have a lower probability outside of Rochester, but is is not significant. Although there are few significant coefficients among these variables, there is at least some consistency in signs across cities.

B. Females

For females no work test coefficient is significant. The only pattern in coefficients emerges in Rochester where all work test coefficients are negative except for REFERRED. This pattern can be explained by pressuring and is consistent with the findings for males

TABLE 5-3

Predicted Probability of Returning to Work, Males

	Ft. Worth	Memphis	Omaha	Rochester	San Diego
1. Not Work Tested	.7307	.8804	.9918	1.0542	1.0755
2. CALLED = 1	.6115	.9121	.7127	.5582	1.2233
3. QUESTIONED = 1	.9103	.8804	.5436	1.0542	1.3096
4. PROOF = 1	.8438	.7876	.7547	..7826	1.0552

For each indicated work test treatment the predicted probablity is calculated for a person who is head of his family, healthy, white, age 30, with 12 years of education, and with a score of 10 on the index of search. Calculations are based on the coefficients in Table 5-1.

in Rochester. Otherwise, the results for females give no clear indication of success, creaming, or pressuring. Of course, Chapter 3 indicated that the work test is applied much less extensively to females than to males.

As for other coefficients, very few are signficant. While there is some consistency in signs across cities, it is weaker than in the case of the male regressions. In short, the results are not very strong.

III. THE DURATION OF A SPELL OF UNEMPLOYMENT

Additional evidence on the effects of the work test is provided by introducing the number of weeks unemployment as the dependent variable. The number of weeks in a spell of unemployment can be measured only for those who did go back to work during the year. The sample size for these regressions is thus smaller than for the previous regressions which included also those who did not find jobs. Indeed, the remaining sample is too small to obtain meaningful results for males in Rochester or for females in Fort Worth, Omaha, and Rochester. Results for males appear in Table 5-4 and for females in Table 5-5.

A. Males

In addition to getting a person back to work in the first place, another indicator of work test success is getting him back sooner than he otherwise would have gone. Work test success in this respect should be indicated by negative coefficients for the work test variables in the duration-of-unemployment regressions. Indeed for San Diego all work test variables except REFERRED have negative coefficients. The coefficients of QUESTIONED is now almost significant at the 5 percent level. These results further support the conclusion of weak success in San Diego, although the apparent success could again result from creaming.

In Omaha, all work test coefficients are positive except for QUESTIONED. Pressuring in this case would mean that the ES concentrated its efforts on those with the longest spells of unemployment and would show up in the forms of positive coefficients of the work test variables. The coefficients for Omaha tend to be consistent with the existence of pressuring. However, the only significant coefficient is that of REFERRED, while three work test coefficients were significant in the equations for the probability of finding work. It thus appears that in Omaha pressuring carries over to those who are out of work for longer periods of time, but the main pressure is applied to those who do not go back to work at all.

In Fort Worth and Memphis, there is no evidence of an effect of the work test on the duration of unemployment.

As for other coefficients, the most interesting result is that FAMINC has a positive coefficient in every city, significant in Fort Worth and Memphis. This indicates that males with more income available in their families tend to delay their return to work.

B. Females

Sample sizes were adequate to run this regression only in Memphis and San Diego. In San Diego all work test variables have positive coefficients, significant for CALLED and QUESTIONED. Although positive coefficients in the duration of unemployment equations are consistent with pressuring, that seems to be an unlikely interpretation since no evidence was found in the probability-of-finding work equation for females in San Diego. Instead, the positive coefficients probably indicate that the ES in San Diego did not get around to questioning females until

they had already been out of work for a long time. For females in Memphis, there is no evidence of effect of the work test.

IV. CONCLUSION

Two aspects of work behavior were studied: the probability of returning to work within the year studied and, for those who did get jobs, the duration of their spell of unemployment. For females, no significant effect of the work test was found on either of these variables. in any city. For males a weak tendency to increase the probability of returning to work and a slightly stronger effect in reducing the duration of unemployment were found in San Diego. Being questioned about job search activities seemed to be the work test treatment with the most important effect. However, these effects were not statistically significant. In Omaha, it seemed to be the case that pressure was concentrated on those who reamined unemployed. The same type of evidence appeared in Rochester, but it was not statistically significant. For Fort Worth and Memphis no work test effects were found on either work behavior variable.

Since the work test seemed to be enforced more stringently in San Diego than in the other cities studied, greater success should be expected in getting registrants back to work. That does indeed seem to be the case, but the success seems to be so small that its significance is questionable. Moreover, the survey was conducted at a time when the labor market was relatively tight. Although the work test can maintain pressure on those who do not work, we have been unable to find evidence that it has much of an effect on work behavior.

FOOTNOTES

[1] If either creaming or pressuring take place, the work test variables will depend on a variable x, representing relevant individual characteristics. If the variable x is included in the regression for the probability of returning to work, it controls for either the creaming or the pressuring, allowing unbiased estimates of the work test effects (provided the correlation between the work test variables and x is not perfect or nearly so). However, if x is omitted from the regression, it becomes part of the error term. Since the work test variables are correlated with x, they are correlated with the error term when x is an omitted variable. It is this correlation of the work test variables with the error term that produces the biases discussed in the text.

CHAPTER 6

Conclusions and Recommendations

I. CONCLUSIONS

The work tests studied in this project are intended to get unemployed (or part-time employed) FS or AFDC/AFDC-UF recipients back to work. It was found in Chapter 3 that among the three food stamp cities studied, ES monitoring of work test registrants was most extensive in Memphis, least in Fort Worth. The AFDC/AFDC-UF work test in San Diego engaged in even more extensive monitoring. In these cities, as well as in the other three, ES monitoring was far more extensive for men than for women.

However, in Chapter 5 no evidence was found that the work test had a significant effect in encouraging the return to work. In every city some registrants in our sample were called in by the ES and subjected to work test procedures while others were not. The question studied was whether being work tested made any difference in the probability of returning to work or in the duration of unemployment, after controlling for a variety of individual characteristics. No significant work encouragement effect of the work test was detected, although the possibility of a weak effect emerged in San Diego. In Omaha, and to an extent also in Rochester, the ES was clearly exerting pressure on those not returning to work. It is possible that some of those who did get jobs would not have done so without the ES pressure, but our techniques could not detect this possibility.

Our results then do not prove that there was absolutely no effect of the work test in getting registrants back to work. However, with the possible exception of San Diego, our methods of study were unable to discern any such effect. It is probably safe to conclude that if the work test does have a work encouragement effect, it is small.

It should be emphasized that many in the sample did return to work. What our findings show is that the return to work would have happened anyway: the work test does not appear to influence the process significantly. On the other hand, there were many in the sample who did not return to work within the period of study, in spite of work test pressure. It is conceivable that some of these individuals might be unemployable. Although information on employability is hard to obtain, some indirect evidence can be deduced by looking at those who never worked during the year. Table 6-1 gives the percentages of males and females in each city who did not work at all during the last year. It is reasonable to expect that even some of these persons worked in the past and are thus really employable.[1] On the other hand, some who worked previously may have acquired disabilities during the year and may not be able to work again. On balance it is likely that the figures in Table 6-1 considerably overstate the proportions of unemployables in the sample. Thus, it would appear that, especially for males, only a small fraction of the difficult cases are unemployable. Many of the unemployed could work, but in spite of ES effort, they do not get jobs. In the case of females, it would appear that the difficulties are greater.

Table 6-1

Percent of Total Sample Always Unemployed During the Last Year

	Ft. Worth	Memphis	Omaha	Rochester	San Diego
Males	19	27	5	23	16
Females	51	55	39	67	32

In evaluating the results, the apparent lack of success of the work test cannot be blamed fully on the ES. First, there may have been some undetected success in getting people back to work, but this effect must be relatively small. Second, some of those who did not return to work may have been unemployable, but their numbers again are probably small. Third, there may not have been jobs available that fit the qualifications of those in the sample who remained out of work. Even though the overall unemployment rates in the cities studied were low, some types of jobs may have been more plentiful than others. Nevertheless, our results must raise doubts as to whether a work test is worth the expense of operating it.

II. POLICY ALTERNATIVES

Even though the results are not fully conclusive, they do suggest that a work test is not a powerful tool in encouraging work effort. It can be used to maintain pressure on unemployed FS or AFDC/AFDC-UF recipients, but there is little assurance that the pressure can be translated into success in obtaining a job. In considering whether the work test can be made more effective, two lines of approach are possible. First, it could be argued that the work accomplishes little

because it does not apply enough pressure to registrants. Second, the work test might falter because not enough jobs are available or because long term registrants appear unattractive to employers.

As for the possibility that current work tests are not forceful enough, the five cities studied did vary considerably in the stringency of their work tests. Indeed, the work test was most stringently enforced in San Diego, which was the only city where the evidence indicated some possibility of work test success. Even in San Diego, informal discussions with ES officials indicated a belief that resources were insufficient to do a fully adequate job. In other words more frequent and more intensive monitoring of registrants than was observed even in San Diego may lead to greater success in getting registrants back to work. More monitoring requires larger staff (although there may be possibilities for economizing) and greater expense. From the evidence of this study, one cannot deduce whether such expanded efforts will succeed. They might, but there is also a risk that they might not. It is necessary to judge whether the extra cost of this approach is worth the chance of extra success plus the extra harrassment that may be imposed on registrants.

The fact that the ES cannot place registrants directly into jobs is a barrier to its success. First, suitable jobs may not be available. Second, even if they are, the ES cannot be sure that the registrants will be hired. The ES can refer a person to a job and require the person to go to an interview. But it cannot control what happens in the interview. The person still has the option of behaving

in a manner that will discourage his being offered the job. These difficulties could be overcome by a public employment program. Such a program could create enough jobs to employ all registrants. In addition, the ES could require a registrant to accept employment in the program. Thus, a public employment program joined to the work test could overcome the barriers the ES now faces in actually getting registrants into jobs. However, such a public employment program would require a major new political initiative.

To conclude, little evidence was found that existing work tests encourage the return of registrants to work. This does not mean that the work test could not be expanded or redesigned or linked to a public employment program in a way to increase its success. However, successful changes are likely to require large extra expenses and may push the government into areas of uncertain political acceptability.

FOOTNOTES

1 Data on how employment rates among females in the low income population change with the length of the period of time being considered are available in: Barry L. Friedman and Leonard J. Hausman, Work and Welfare Patterns in Low Income Families, a report submitted to the U.S. Department of Labor, June 1975, Chapter II.

APPENDIX A

Registrants' Views of the Work Test

Opinions of respondents concerning the work requirement and of the welfare program from which they were receiving benefits were solicited as part of the survey.

In general, the registrants did not seem to find the work requirement especially onerous or improper. To the question "what do you think of the requirement that you register at the Employment Office as part of the Food Stamp (or AFDC) program," nearly half to two thirds of the registrants in each city gave a positive response.

	Percent Offering A Response That Was:		
	Positive	Negative	Unclear or Don't Know
Fort Worth	46	8	46
Memphis	64	6	30
Omaha	67	9	24
Rochester	43	14	43
San Diego	49	11	40

Only a very small proportion in each city gave a negative response. The large proportion of unclear or "don't know" answers may reflect the respondents' fear to respond candidly. Furthermore, among those respondents who elaborated their views, very few spelled out negative views. Between one third and one-half of the respondents in each city elaborated on their attitudes towards the work requirement in an open-ended question.

Among those who elaborated, the proportions detailing a positive response were 62 percent in Fort Worth, 73 percent in Omaha, 76 percent in Memphis, 55 percent in Rochester, and 57 percent in San Diego. Notice that positive responses were least common in the two AFDC/AFDC-UF sites, the places where calls-in and frequency of calls-in were the highest. Lastly, when there were negative criticisms, they related overwhelmingly to the ineffectiveness of the ES in finding jobs for people.

Views of respondents about the Food Stamp and AFDC/AFDC-UF programs in general also were quite positive. Again, though, there was a difference between the Food Stamp and AFDC/AFDC-UF sites. In Fort Worth, Memphis, and Omaha, positive responses about the Food Stamp program came, respectively, from 55, 66, and 65 percent of the respondents. In Rochester and San Diego, positive responses concerning AFDC/AFDC-UF were elicited from but 32 and 39 percent of the respondents. This difference is especially interesting in view of the fact that for most families receiving benefits, the AFDC/AFDC-UF program is much more generous than is the Food Stamp program.

EDRS PRICE: MF AND HC AVAILABILITY WILL BE ANNOUNCED IN VOL. 10, NO. 2.

DESCRIPTIVE NOTE: 41P.; RELATED DOCUMENT VT 103 349 IN THIS ISSUE.

ABSTRACT: DESCRIBED IN THE REPORT IS THE CONDUCT OF A WORKSHOP FOR SELECTED VOCATIONAL EDUCATORS TO PROMOTE THE DEVELOPMENT OF MATERIALS THAT WILL HAVE A POSITIVE IMPACT ON COLORADO'S VOCATIONAL EDUCATION PROGRAMS. A TOTAL OF 38 PARTICIPANTS, MOST OF WHOM WERE VOCATIONAL EDUCATION TEACHERS, WERE PROVIDED THE OPPORTUNITY TO BECOME FAMILIAR WITH SEVERAL VARIATIONS OF A SYSTEMS APPROACH TO VOCATIONAL EDUCATION CURRICULUM MATERIALS DEVELOPMENT THROUGH PRESENTATIONS BY FACILITATORS AND ATTENDANCE AT MINISESSIONS FOR SMALL GROUPS. IN AN EIGHT MONTH PERIOD FOLLOWING THE WORKSHOP, PARTICIPANTS WERE TO IMPLEMENT CURRICULUM MATERIALS DEVELOPMENT ACTIVITIES. RESULTS OF A WORKSHOP EVALUATION INDICATED THAT THE REACTION OF THE PARTICIPANTS WAS FAVORABLE. APPENDED ARE THE WORKSHOP BROCHURE, A LIST OF FACILITATORS, A LIST OF PARTICIPANTS, AN AGENDA, AND A SUMMARY OF MINISESSION RESPONSES TO QUESTIONS. (RG)

INTRODUCTION

Colorado vocational educators have recognized the value of quality curriculum materials for many years. However, it was only during the past year that a concentrated effort was initiated to ensure that quality materials are available for use in Colorado vocational education programs.

PROBLEM

Because quality curriculum materials were recognized as being important to the success of Colorado vocational education programs, it was believed that greater consideration should be given to their development. It was proposed that an attempt be made to encourage, coordinate, and implement activities which would help develop, as efficiently and effectively as possible, the desired types of curriculum materials for use in Colorado vocational education programs. This facilitation of efforts was to be accomplished through the conduct of a Colorado Vocational Education Curriculum Materials Institute for selected vocational educators to promote the development of materials which will have a positive impact on Colorado programs.

OBJECTIVES

Specific objectives considered necessary for promoting educators' contributions to vocational education curriculum materials development are listed below in terms of participant behavior. It was proposed that the participants would:

1. Critique current State plans and activities designed for supporting vocational education curriculum materials development.

2. Plan and implement a systematic procedure for developing vocational education curriculum materials; or, one or more of the steps involved in such a procedure.

3. Perform the functions of a change agent in a conceptualized utilization system to serve as a communications link between two or more entities relative to vocational education curriculum materials development.

PROCEDURES

To facilitate the participants in reaching the above objectives, it was determined that the identified activities would be implemented in three phases. These phases were identified as: (a) the Planning Phase; (b) the Demonstration Phase; and, (c) the Practicum Phase. At this time, phases one and two have been completed and phase three has been initiated. Activities which have been completed or initiated in each of the phases are described in the following sections of this report.

PLANNING PHASE

Initiated on July 1, 1975, this phase terminated on November 16, 1975. During this time period, the following activities were completed on the specified dates.

Activities	Dates
Project initiated	July 1975
Assistant director employed	September 1975
Potential facilitators identified	October 1975
Agenda completed	October 1975
Plans were reviewed with the Colorado Vocational Education Curriculum Materials Development Advisory Committee	October 1975
Participant brochures disseminated	October 1975
Facility and equipment arrangements completed through Conferences and Convention Center	October 1975
Contracts with facilitators concluded	October 1975
Participant applications received	October 1975
Forty participants notified of acceptance	November 1975
Participants confirmed intent to attend	November 1975
Alternate participants notified of acceptance	November 1975
Alternate participants confirmed intent to attend	November 1975
Arrangements were completed	November 1975

A copy of the brochure sent to potential participants is included in Appendix A. Names and addresses of the facilitators identified to

take part in the second phase are shown in Appendix B along with a blank contract form.

Applications from potential participants were evaluated by the Institute planners on the basis of training, experience, potentiality for implementing concepts discussed during the Institute, and commitment to implementation. Participants were selected on the basis of an application evaluation. Also, special attention was given to identifying individuals from: each of the job categories specified in Table 1; each of the vocational programmatic areas; each of the educational levels (secondary, post-secondary, and adult); and, each of Colorado's four planning regions (as specified by the State Board for Community Colleges and Occupational Education). The selected participants were notified of their eligibility and invited to attend the Institute. The participants' travel, lodging, and meal expenses were to be reimbursed at current Colorado State University rates. When a selected participant could not attend, an appropriate alternate was substituted.

TABLE 1

PROPOSED PARTICIPANTS AND ACTUAL PARTICIPANTS

Job Category	Number of Proposed Participants	Number of Actual Participants
State Supervisory Personnel	2	1
Vocational Administrators	3	5
Teacher Educators	2	3
Secondary Teachers	21	16
Post-secondary Teachers	10	13
Counselors	2	0
TOTAL	40	38

DEMONSTRATION PHASE

The Demonstration Phase consisted of the Curriculum Materials Development Workshop which was held during the week of November 17 through November 21, 1975 on the campus of the Colorado State University in Fort Collins, Colorado. Thirty-eight vocational educators from Colorado representing the job catagories specified in Table 1 attended the Workshop. A listing of the participants and the agencies they represented is included in Appendix C.

This phase was initiated on November 17, 1975 and terminated on November 21, 1975. During this time period, the following activities were completed on the specified dates.

Activities	Dates
Participant registration Beginning Workshop session Evaluation instrument completed	November 17, 1975
Workshop sessions continued Evaluation instruments completed	November 18-20, 1975
Final Workshop session Evaluation instrument completed	November 21, 1975

A copy of the Workshop agenda in which specific activities and times are identified may be found in Appendix D.

At the initial session of the Workshop, Dr. Wiley B. Lewis, Project Director, presented the objectives of the Workshop. He indicated that when the Workshop terminated, the participants should be able to:

1. Develop and implement a systems approach for vocational education curriculum materials development;

2. Relate to others what is currently occuring regarding curriculum materials development in Colorado and at least two other states;

3. Exhibit a consciousness of copyright concerns in the development of any vocational education curriculum materials;

4. Participate in a communications network designed to facilitate the dissemination of information relative to vocational education curriculum materials development activities in Colorado;

5. Contribute to the planning efforts for an emphasis on vocational education curriculum materials development in Colorado; and

6. Plan and/or implement a vocational education curriculum materials development activity which will contribute to specific program quality or improvement.

To achieve these objectives, the facilitators identified in Appendix B and on the agenda in Appendix C (or in one case, the facilitator's designated representative) presented relevant material to the participants. Copies of the facilitators' papers are not included in this report but may be found in a companion document entitled "Selected Papers and Synopses of Remarks Presented at the Curriculum Materials Development Workshop."

During registration, the participants were assigned to one of four small groups. The small group assignments were used to implement discussion during designated mini-sessions following selected presentations. At each mini-session, members of the groups were presented questions designed to elicit group responses about directions for the creation of a suggested systems approach for curriculum materials development to be implemented in Colorado. Copies of the questions provided to each mini-session group along with summaries of their responses are included in Appendix E.

The following is a summary of key points as synthesized from the groups' responses for the week.

1. Increased emphasis, both philosophical and financial, should be placed on vocational education curriculum materials development.

2. In conjunction with the emphasis, there must be a commitment at all levels to curriculum materials development.

3. Local needs and local input are necessary considerations in any efforts for curriculum materials development.

4. All vocational education curriculum materials development should utilize performance objective techniques.

5. Colorado must develop and adopt a systems approach for vocational education curriculum materials development.

6. The Colorado vocational education curriculum materials development guidelines should contain the following components:
   (a) feasibility study
   (b) task analysis
   (c) performance objectives
   (d) criterion tests
   (e) learning sequence
   (f) learning modules
   (g) pilot testing
   (h) revision
   (i) field testing
   (j) dissemination
   (k) inservice component
   (l) feedback loop

7. The concept of the existing Curriculum Materials Service in Colorado should be expanded to one of a curriculum laboratory. The curriculum laboratory would have the responsibility for inservice training related to curriculum materials, for field testing, for validating, for cataloging documents, for preparing new materials, and for updating and reviewing prepared curriculum materials.

8. The length of time allotted for development of specific materials should be determined by the scope of the material to be developed.

9. Colorado should adopt a basic format for curriculum materials; one that would allow for modification to serve local needs.

10. The emphasis on development should be directed toward student needs, not institutional convenience.

At various points during the Workshop, the participants were asked to evaluate the Workshop activities. This was accomplished by using daily evaluation forms. From the daily evaluation ratings shown in Figures 1 through 4, and the overall Workshop ratings shown in Figure 5, one should note that the various activities were generally received positively. The Workshop activities of Wednesday, November 18, 1975 (Figure 3) and Thursday, November 19, 1975 (Figure 4) received the most positive reactions from the participants. It was discovered that the major problem encountered during the Workshop was gauging the amount of information presented to the amount of information perceived as "just enough" by the participants.

PRACTICUM PHASE

This phase of the project was designed to extend from November 22, 1975 through June 30, 1976. During this period, the Workshop participants were to implement curriculum materials development activities which grew out of the Demonstration Phase. At this time, activities of the Practicum Phase have been initiated but none have been completed.

SUMMARY

Activities during phases one and two of the project have resulted in a favorable reaction from the vocational educators who participated in the Workshop. At this point, each of the participants have been provided the opportunity to become familiar with several variations of

a systems approach to vocational education curriculum materials development. They have also been afforded the opportunity to critique current state plans and activities designed for supporting such developmental activities. Specific participant recommendations relative to Colorado's efforts were presented earlier in this report.

At least twenty-two of the thirty eight participants have planned and initiated a systematic procedure for developing vocational education curriculum materials; or, one or more of the steps involved in such a procedure at their respective organizational levels. Complete details relative to the procedures planned and implemented by the various participants will be included as part of the final report to this project.

None of the participants has, at this time, indicated that his ability to function as a link in a conceptualized utilization system has been greatly enhanced as a result of project activities. During the personal visits to be made as part of the Practicum Phase, data relevant to this function will be solicited and then reported in the final report of this project.

BROCHURE

COLORADO STATE UNIVERSITY DEPARTMENT OF VOCATIONAL EDUCATION

A CURRICULUM MATERIALS DEVELOPMENT WORKSHOP FOR VOCATIONAL TEACHERS, ADMINISTRATORS, STATE SUPERVISORS, AND TEACHER EDUCATORS

WHAT: Colorado State University's Vocational Education Department is presenting a week-long workshop on designing a systems approach for curriculum materials development. This workshop will include models and plans for comprehensive curriculum development from a state and local level. In order to insure a variety of input for the sessions, a quota has been established so participants will reflect secondary and post secondary teachers, administrators, state supervisors, and teacher education.

Facilitators from various states will present representative methods of systematic curriculum materials development. From this national overview and systems methodology, participants will suggest items to be considered in developing guidelines for vocational education curriculum materials development and identify the roles of several involved groups.

WHERE: The workshop will be presented on the Colorado State University campus in Fort Collins, Colorado.

WHEN: 1:00 p.m., November 17 through noon, the 21st, 1975

TOPICS: Some of the sessions will include:

1. Curriculum Materials Development Systems
2. Curriculum Materials Labs
3. Copyright in Curriculum Materials Development
4. Instructional Methodology
5. Program Feasibility and Analysis of an Occupation

CREDIT: Two semester hours will be arranged for those who desire it. The cost will be $20. Credit will be granted at the end of Spring Semester upon completion of a special project.

PROVIDED: Individuals participating in the workshop will receive lodging and food plus a travel allowance.

Participants will be selected to meet the quota. If you wish to be considered for participation, complete the form below and mail:

TO: Dr. Wiley B. Lewis
Vocational Education Department
Colorado State University
Fort Collins, CO 80523

Name: _____

Position: _____

School: _____

Home Address: _____

CURRICULUM MATERIALS DEVELOPMENT WORKSHOP

Dr. Wiley B. Lewis, Coordinator

Room 226

Program

Monday, November 17, 1975

10:00 a.m.- 1:00 p.m.	Registration	
12:00 p.m.	Lunch	
1:00 p.m.	Welcome to Workshop	Dr. William H. Johnson, Dean College of Professional Studies Colorado State University
1:15 p.m.	Departmental Commitment	Dr. B. Harold Anderson, Head Department of Vocational Education Colorado State University
1:30 p.m.	State Board's Perception of Workshop	Dr. William D. Woolf, Director Occupational Education Division State Board for Community Colleges and Occupational Education
2:00 p.m.	Presentation: "Systems Approaches to Curriculum Development in Vocational Education"	Dr. James E. Wall Assistant Dean for Research and Development College of Education Mississippi State University
3:45 p.m.	Mini-sessions	Rooms as Assigned
5:00 p.m.	Dinner	

Tuesday, November, 18, 1975

7:00 a.m.-8:00 a.m.	Breakfast	
8:00 a.m.	Presentation: "Instructional Materials Laboratory"	Mr. Amon Ward, Director Instructional Materials Lab University of Missouri
9:30 a.m.	Presentation: "Implementation of Curriculum Materials Development in a State Vocational Education Program"	Mr. Arch Alexander Deputy Director Oklahoma State Department of Vocational Technical Education
11:00 a.m.	Mini-sessions	
12:00 p.m.	Lunch	
1:00 p.m.	Presentation: "Mid-America Vocational Curriculum Consortium"	Ms. Ann Benson, Executive Mid-America Vocational Curriculum Consortium Oklahoma State University
2:30 p.m.	Presentation: "North Dakota Curriculum Development Plan for Vocational Programs"	Dr. Don Eshelby RCU Director North Dakota State Board for Vocational and Technical Education
4:00 p.m.	Mini-sessions	
5:00 p.m.	Dinner	

Wednesday, November 19, 1975

7:00 a.m.- 8:00 a.m.	Breakfast	
8:00 a.m.	Presentation: "Colorado Efforts For Vocational Education Curriculum Materials Development"	Dr. Wiley B. Lewis, Director Curriculum Materials Development Colorado State University
9:30 a.m.	Presentation: "Instructional System Design--A Workshop Sampler"	Dr. Darrell Parks, Assistant Director Vocational Education Professional Staff and Curriculum Development State of Ohio Mr. Tom Hindes Instructional Materials Laboratory Trade and Industrial Education Ohio State University
12:00 p.m.	Lunch	
1:00 p.m.	"Instructional System Design" (continued)	
3:30 p.m.	Mini-sessions	
5:00 p.m.	Dinner	
6:30 p.m.	Discussion of Project Assignment for Those Registering for Credit	Dr. Wiley B. Lewis, Director Curriculum Materials Development Colorado State University

Thursday, November 20, 1975

7:00 a.m.- 8:00 a.m.	Breakfast	
8:00 a.m.	Presentation: "Implications of Copyright Laws for Education"	Mr. Edwin L. Spangler, Jr. Attorney-at-Law
9:30 a.m.	Panel: "Roles in Curriculum Materials Development--A Perception"	Dr. Milton Larson, Professor Technical Education Colorado State University Dr. Joe Nichols, Professor Curriculum and Instruction University of Northern Colorado Dr. Harold Wallace Coordinator of Research Colorado State University
11:00 a.m.	Mini-sessions	
12:00 p.m.	Lunch	
1:00 p.m.	Mini-sessions	
3:00 p.m.	Media Display	
5:00 p.m.	Adjournment	
6:30 p.m.	Banquet, Room 106 Presentation: "Vocational Curriculum"	Senator Hank Brown Assistant Majority Leader Colorado State Legislature

Friday, November 21, 1975

7:00 a.m.- 8:00 a.m.	Breakfast	
8:00 a.m.	Presentation: "National Overview-- Curriculum Material Development"	Mr. William Berndt Curriculum Specialist Vocational and Technical Education U.S. Office of Education
9:30 a.m.	Workshop Overview	
11:30 a.m.	Workshop Conclusion	
12:00 p.m.	Lunch	

APPENDIX E

MINI-SESSION QUESTIONS

AND SUMMARIZED RESPONSES

MINI-SESSION

3:45 p.m., Monday
November 17, 1975

Consider the following in terms of your current perception of the vocational education needs in Colorado. Your responses at this time should be thought of as tentative in nature and subject to being altered as the workshop continues.

1. Should we have an (increased/decreased) emphasis on curriculum materials development in Colorado?

   We should have an increased philosophical and financial emphasis on curriculum.

2. With the mobility of our society, should we be aware of nation-wide curriculum content?

   We should be aware of national trends. We should seek state coordination with emphasis on local needs for implementation.

3. Do you feel that the development of curriculum materials should be based on performance objectives? Should we direct our efforts in such a way to become accountable for our curriculum?

   Yes. Yes.

4. What is the commitment to curriculum materials development of: (a) your peers; (b) your administration? Should this commitment change? If so, how might such change be best initiated?

   Commitment (a) and (b) not strong. Commitment should be stronger. Not sure--maybe systems design

5. Should a systems approach for curriculum materials development be adopted for use in Colorado? At what level(s), state, regional, local, or combination, should such an approach, if adopted, be utilized?

   Yes; state level

6. What do you envision as the components of a curriculum materials development system which might be implemented at any level in an effort to ensure the availability of quality materials.

   Not sure; emphasize dissemination

MINI-SESSION

11:00 a.m., Tuesday
November 18, 1975

Consider the following in terms of your current perception of the vocational education needs in Colorado. Your responses at this time should be thought of as tentative in nature and subject to being altered as the workshop continues.

1. Should Colorado financially and philosophically support the concept of a curriculum materials laboratory? Why? If the response and reasoning is positive, outline what functions a curriculum materials laboratory should provide.

   Yes, to provide a focal point
   - *(a) Review of existing materials*
   - *(b) Development and diffusion of new materials*
   - *(c) Improvement and diffusion of existing materials*
   - *(d) Coordination of developmental activities*

2. What should be the standard policy for dissemination of curriculum materials to ensure their effectiveness?

   1. *Inservice education of administrators and teachers*
   2. *Evaluation*
   3. *Philosophical commitment*
   4. *Financial commitment*
   5. *Audio visuals and release time*

3. How can we avoid duplication of developmental efforts and achieve articulation? Cite specific examples as appropriate.

   Implement a systems approach; control via a curriculum laboratory to coordinate research and development

4. How do you perceive state-level support (good, or bad)? How might it be improved? Local-level support? How might it be improved?

   State and local support can be expanded. Improvements would be the development of a "base" philosophy, a comprehensive systems plan for curriculum development and involvement of curriculum center in curriculum diffusion process.

MINI-SESSION

4:00 p.m., Tuesday
November 18, 1975

Consider the following in terms of your current perception of the vocational education needs in Colorado. Your responses at this time should be thought of as tentative in nature and subject to being altered as the workshop continues.

1. Who should be responsible for the pilot testing of curriculum materials to establish initial validity? Cite minimum standards.

   Agency developing materials
   (a) *Performance objectives*
   (b) *No copyright problems*
   (c) *Criterion reference tests*

2. Who should be responsible for field testing of curriculum materials to establish external validity? Cite minimum standards.

   Curriculum laboratory
   (a) *Validity on pilot test established*
   (b) *Format*
   (c) *Performance objectives*

3. Should the developer utilize criterion reference testing on materials?

   Yes, and provide information to others using the material

4. How much time should we realistically allocate for the developmental sequence?

   1-2 years depending on the scope of the endeavor

5. Do you feel that Colorado should utilize a basic format for curriculum materials development? Explain.

   Yes. This would be of assistance when developing or modifying materials.

6. If our priority is on curriculum materials development, what audience should we develop our materials for--student oriented, teacher oriented, or a combination. Why this specific effort?

   Student oriented materials

MINI-SESSION

3:30 p.m., Wednesday
November 19, 1975

Consider the following in terms of your current perception of the vocational education needs in Colorado. Your responses at this time should be thought of as tentative in nature and subject to being altered as the workshop continues.

1. How do you perceive the Curriculum Materials Service as it is operated?

   Only vaguely aware of its existance

2. What changes could the Curriculum Materials Service make to serve you better?

   Publish lists, serve as clearinghouse, conduct field tests, and coordinate efforts in-state

3. What services should the Curriculum Materials Service offer?

   Services similar to Oklahoma Curriculum Laboratory

4. At what level should development take place--state, regional, local, or combination?

   At local-state levels

5. Who should prepare curriculum materials--teachers, technical writers, or others? Explain.

   Teacher, in conjunction with technical writing assistance

6. To what audience (student, teacher, or combination) should curriculum materials be directed?

   Student

7. What components should make up an effective curriculum materials service?

   Catalogue, preservice and inservice, coordinate effort in system design

MINI-SESSION

11:00 a.m.-3:00 p.m.
Thursday
November 20, 1975

In this session, we are requesting that you help us suggest a systems approach for curriculum materials development in Colorado which might be used profitably at either the state, regional, or local levels.

In this development, consider these questions:

1. Define:
   (a) curriculum--*general plan of content a school offers*
   (b) curriculum materials--*all the teaching-learning materials used*
   (c) curriculum materials development--*systematic procedure for developing materials*
   (d) field testing--*testing in a specific school to determine validity*
   (e) pilot testing--*testing of small units during development*
   (f) dissemination--*passing out to teachers or sending out materials*
   (g) diffusion--*assisting teachers to use new materials*

2. Describe a systems approach to curriculum materials development as you perceive one should function.

   Establish need; review materials; performance analysis; criterion reference; performance objectives

3. In curriculum materials development, what should be the role of the:
   (a) state--*coordinate, facilitation, occupational analysis, finance*
   (b) teacher-educator institutions--*philosophy, inservice*
   (c) local administration--*finances, facilitation, need assessment*
   (d) teacher--*design materials, testing*

4. What are the elements to be considered in establishing developmental priorities?

   Need--length of time; commitment of funding

5. Who should be responsible for insuring that curriculum materials developed for state-wide distribution are free of copyright violations or for providing copyright releases?

   The developer(s)

TITLE: COMPETENCY-BASED WORK EXPERIENCE/EXPLORATION CONTRACT PROGRAM. FINAL REPORT.

DESCRIPTOR: *WORK EXPERIENCE PROGRAMS; *RESEARCH PROJECTS; SECONDARY EDUCATION; JOB DESCRIPTIONS; *PROGRAM EVALUATION; QUESTIONNAIRES; SCHOOL DISTRICTS; SCHOOL SURVEYS; *JOB SKILLS; *SCHOOL COMMUNITY RELATIONSHIP

EDRS PRICE: MF AND HC AVAILABILITY WILL BE ANNOUNCED IN VOL. 10, NO. 2.

DESCRIPTIVE NOTE: 362P.; THE APPENDIX SECTION OF THIS DOCUME[illegible] IF OF MARGINAL REPRODUCIBILITY. BEST COPY AVAILABLE.

ABSTRACT: DETAILED IN THIS REPORT IS A RESEARCH STUDY TO DEVELOP AND PILOT TEST 60 COMPETENCY-BASED WORK EXPERIENCE/EXPLORATION CONTRACT MODELS APPROPRIATE FOR SECONDARY SCHOOL STUDENTS. OBJECTIVES WERE TO: (1) DESIGN A VARIETY OF WORK EXPERIENCES IN CONCERT WITH BUSINESS, INDUSTRY, GOVERNMENT AGENCIES, AND CIVIC ORGANIZATIONS; (2) DETERMINE WHICH FACTORS LEAD TO THE SATISFACTION OF STUDENTS, EMPLOYERS, AND SCHOOL PERSONNEL; (3) DETERMINE THE COST OF IMPLEMENTING THE MODEL; AND (4) SUGGEST PROCEDURES FOR LARGE-SCALE IMPLEMENTATION OF CAREER TRAINING. FIFTY-EIGHT STUDENTS FROM FIVE HIGH SCHOOLS WERE PLACED IN 52 DIFFERENT POSITIONS WITH 33 PARTICIPATING EMPLOYERS. THE MAJORITY WERE TRAINED ON A SCHEDULE OF TWO OR THREE DAYS A WEEK FOR TWO TO THREE HOURS AND RECEIVED HIGH SCHOOL CREDIT. PRETEST AND POSTTEST QUESTIONNAIRE SURVEYS OF STUDENTS, THEIR IMMEDIATE TRAINING SUPERVISORS, AND THE SCHOOL COORDINATOR PROVIDE INFORMATION FOR EVALUATION OF THE PROGRAM, AND THIS DATA CONSTITUTES THE MAJOR PORTION OF THE DOCUMENT. ALL STUDENT RESPONDENTS EVALUATED THE PROGRAM AS BEING "VERY SATISFACTORY" OR "SATISFACTORY." EMPLOYERS GENERALLY FELT THAT A LONGER PLACEMENT, BETTER COUNSELING, AND BETTER SCREENING PROCEDURES WOULD BE HELPFUL. THE DOCUMENT INCLUDES A LISTING OF 32 JOB DESCRIPTIONS FOR THE TRAINING POSITIONS, SURVEY INSTRUMENTS AND RESPONSES, NAMES OF THE PARTICIPATING EMPLOYERS, AND AN EVALUATION SUMMARY REPORT. (RG)

BACKGROUND

In 1973 the Board of Education for the Los Angeles Unified School District established new graduation requirements. One addition was that each student must demonstrate minimum standards of skill performance for gainful employment in a specific field or fields to graduate from high school. This meant that the District's 63 high schools would need to provide options whereby approximately 129,000 secondary students could obtain entry-level job training and acquire a Demonstrated Performance Skill (DPS).

Implementation of the new requirements has been delayed due to funding problems. Alternative ways the DPS can be delivered by the schools are currently being investigated.

Several excellent programs are designed to teach students vocational skills including: 1) work experience; 2) Regional Occupational Programs; 3) Regional Occupational Centers; 4) projects specific to a particular company or industry in Los Angeles, such as the Hughes, Northrop, North American Rockwell Programs; and projects specific to a particular high school. In total, these programs account for the training of approximately 51,500 students in Demonstrated Performance Skills.

The question the schools must answer is how they can provide a wider variety of challenging career experiences (including post-entry level) as part of the total high school program. Additional issues are: 1) what are the skills related to specific job titles; 2) which skills can students learn on a part-time basis; 3) how much can career training be integrated with and supported by the on-campus academic program; and 4) what procedures need to be implemented at the local school level to make the option of extended campus career training feasible.

PURPOSE OF STUDY

The purpose of this study was to develop and pilot test 60 competency-based work experience/exploration contract models appropriate for secondary school students. Four contract models were to be developed within each of the following 15 career clusters:

- Agriculture
- Arts and Humanities
- Communication
- Construction
- Education
- Entertainment
- Government
- Health and Welfare
- Manufacturing
- Natural Resources
- Personal Services
- Product Services
- Recreation
- Trade and Finance
- Transportation

Each contract model was to specify:

- Demonstrated Performance Skill(s) to be attained by the student upon completion of training in an occupational area appropriate for employment.
- Performance objectives for sponsoring companies and agencies.
- Performance objectives for coordinating agencies.
- Instructional methods and management procedures which facilitate successful attainment of performance objectives.

OBJECTIVES OF THE STUDY

The objectives of this present study were as follows:

1.0 - To design a variety of work experiences for secondary students in concert with business, industry, labor,

governmental agencies, as well as community and civic organizations.

2.0 - To determine which factors lead to the satisfaction of students, employers, and school personnel with an extended campus career training experience.

3.0 - To determine the approximate cost of implementing contract models.

4.0 - To suggest procedures for large-scale implementation of career training including:

4.1 - Methods of granting course credit and certification for graduation.

4.2 - Designs which consider legal constraints and proper insurance coverage.

4.3 - Ways of providing incentives for all participants.

4.4 - Estimations of the number and types of training positions which can be created and the time constraints of each.

4.5 - Alternatives for scheduling.

4.6 - Ways to integrate career training with the student's instructional program.

DESCRIPTION OF PARTICIPANTS

Thirty-seven companies and community agencies were originally recruited to participate in the project offering to train students for 69 positions and 62 different skill areas. Three chose to drop out prior to training and for one agency students were not recruited. Thirty-three employers actually provided training. (The job skills and employers are listed in Attachment A.)

Sixty students were placed in 52 different positions. The number of student placements are identified by career cluster in the bar graph on the next page.

The distribution of students by school is presented in the graph on page 5 which shows the number and percentage of students recruited and completing assignments. Of the original sample, 56% (33 S's) were White and 44% (27 S's) were Black, Asian or Mexican-American. At the end of the project, 63% of the students (27 S's) were White and only 37% (16 S's) were from other ethnic groups.

PROCEDURES

Planning Procedures

The basic sequence of planning activities were as follows:

1) Create project advisory steering committee composed of representatives from school, business, labor, community and governmental agencies.
2) Conduct pilot study with one student.
3) Develop Permit/Agreement forms, employer questionnaires, and student permit forms.
4) Develop Operations Guide for participants.
5) Formulate evaluation strategy.
6) Develop 60 contract models specifying demonstrated performance skills.
7) Develop training site recruitment procedure
8) Recruit sites.
9) Select school cooordinators. Initiate teacher participation.
10) Contact schools; match and schedule students.

NUMBER OF STUDENT PLACEMENTS BY CLUSTERS

NUMBER AND PERCENTAGE OF STUDENTS INITIALLY PLACED IN CAREER EXPER
AND COMPLETING ASSIGNMENTS

PERCENTAGE OF STUDENTS INITIALLY PLACED IN CAREER EXPERIENCES AND COMPLETING ASSIGNMENTS

MENTS

11) Conduct training.

12) Revise procedures and materials.

13) Complete evaluation study and reports.

Pilot Test

A small pilot test of one student was conducted in the Fall of 1974. A senior at Manual Arts High School was trained in nine sessions with Beneficial Standard Life Insurance Company as a Personnel Interviewer. Several decisions were made during this pilot. One decision was to attempt to integrate the career experience with the academic program of the students by having teachers develop lessons relevant to the student's work experiences. Evaluation forms were revised and procedures for participants were outlined during this pilot phase.

Site Recruitment

Three different procedures were used in this study to recruit career experience sites in the community. In one case, a community agency which is independent of the school district assisted in site recruitement. In a second model, a community person hired as a school coordinator solicited companies. Third, district-level personnel with the assistance of project advisory committee members generated new locations. These models are presented visually on the next page.

Approximately 11 percent of the sites were recruited using Model I, 32 percent were made available through Model II and 57 percent via Model III. These figures do not represent the potential effectiveness of each model; they only show what occurred under the conditions of this study. The Industry-Education Alliance of Los Angeles County (Project 70's) went through reorganization since this project began and their recruitment strength was temporarily lessened.

Site recruiters served as a linkage between employers in work environments and staff of the schools. They performed the following tasks:

- Established initial contact with business and agency representatives representing the 15 career clusters.
- Provided employers with a written description of the program, answered questions and solicited participation of that company or agency.
- Completed an Employer Questionnaire with the contact person at the work site.
- Requested that employers sign Permit/Agreement forms.
- Return Employer Questionnaires to school coordinators so that student recruitment could begin.

All sites were approved by the Safety Section of the School District and all Permit/Agreement forms were approved by the Board as a condition of student placement.

Student Recruitment

Procedures for recruiting students varied by school. At Granada Hills High School, the coordinator spoke to classes about the program and available positions. Students were asked to notify the coordinator if they were interested in participating. At Manual Arts, participants were drafted into the program. Belmont High has computer printouts on the career and educational aspirations of the students. The coordinator offered training to those students who had indicated interest in the available career position.

The criteria for student selection were as follows:

- The student had an interest in the career area available.
- The student had the necessary pre-requisites if these were required.

- The student could provide or arrange transportation.
- Parent approval could be obtained.
- An adequate schedule could be arranged.
- The student was enrolled in an academic class with a cooperating teacher.

School Coordination

School coordinators were selected by administrators at participating schools. Three coordinators were Career Advisers at the school, one was a parent hired to assist gifted students and one was a Work Experience Coordinator. They were asked to perform the following tasks:

- Recruit teachers based upon subject area and responsiveness to the project goals.
- Recruit and select students. Brief them on the job, responsibilities, etc.
- Adjust schedules so that each student is in school 4 hours per day and can attend the extension site the specified hours.
- Obtain parent approval and complete all permit forms. File until the end of the program, when forms will be collected for evaluation.
- Establish with the Principal the credit to be granted the student.
- Notify district coordinator that approvals have been obtained and the student can be placed.
- Begin placement and visit site at least once.
- Arrange make-up sessions with the employer if those become necessary. Obtain parent approval again if this is necessary.
- Brief teachers and collect their curriculum models.

- Request certification by the employer at the end of placement (use page 4 of permit).
- Assist with program evaluation.

Assigning Course Credit

The method of assigning credit for the students training was determined by the school. Options suggested were:

- Give course credit, certify the DPS, but give no DPS credit.
- Course credit, certification, plus 15 or 25 credits for the DPS based upon the tentative guidelines established by the Division of Instruction, Educational Goals.
- Course Credit, certification, plus a sliding scale of DPS credits (5 to 25) based upon number of hours in training (current standard one unit credit for 12 clock hours).

Seventy-five percent of the schools preferred the third option.

Skill Training

The majority of students were trained by employers on a schedule of two or three days a week for two to three hours. Total hours varied widely depending upon the career area and enthusiasm of the student. The approximate number of total hours for each demonstrated performance skill is listed below:

Career Skill	Hours
Scientific Helper	24
Inventory Control Clerk	48
Animal Caretaker	48
Veterinarian Aide	60
Advertising Copywriter	12[illegible]
Advertising Copywriter	54
Architectural Drafter	30
Engineering Department Assistant	60
Editorial Assistant	20
Sealer, Sander, Cabinet Assembler	60
Computer Programmer	60
Biology Lab Assistant	60

Career Skill	Hours
Electronics Lab Assistant	60
Photo Lab Assistant	40
Graphic Arts Lab Assistant	40
Elementary Special Education Aide	60
Preschool Special Education Aide	60
High School Special Education Aide	60
Personnel Clerk	24
Survey Worker	36
Editing Clerk	36
Budget Analyst/Training Research Assistant	36
Architectural Drafting Assistant	30
Human Resources Management Trainee	32
Library Assistant	32
Mental Health Aides	No data
Dental Assistant	60
Electron Microscopic Aide	100
Micro Biological Aide	100
Electro Cardiograph Technician	100
Physical Therapy Aide	72
Data Processing Assistant	36
Credit and Collection Trainee	48
Careers in Engineering	No data
Purchasing Clerk	60
Junior Accountant	60
Controller's Assistant	54
Professional Resume Assistant	54
Personnel Interviewer	18
Cash Receipts Clerk	60
Accounting Clerk	60
Advertising Copywriter/Commercial Artist	60
Vending Machine Maintenance	40
Travel Agent	120
Teller Trainee	28
Personnel Clerk	44
Computer Programmer	100
Statement Clerk	40
Inventory Clerk	36
Cashier & General Office Worker	40

EVALUATION PLAN

Two separate evaluations were planned for this study. Both were conducted by consultants outside of the School District. One evaluation was to focus on the relationships of employer and student, and the satisfaction of participants. A second evaluation examined the total program

with particular emphasis on the feasibility of procedures employed and suggestions for revisions. Details of the evaluation plans are presented in the enclosed reports.

RESULTS

Objective 1.0

The purpose of this study was to identify and field test 60 career contract models. While 62 skills were identified by participating employers, delays in site recruitment resulted in only 60 students being placed in 52 different training positions. In addition, jobs were not evenly distributed over the 15 career clusters.

The demonstrated performance skills and participating employers are listed in Attachment A. The contract models, including the standardized permit forms and individual skill descriptions, are presented in Attachment B. The skills which were fully field tested have been revised based upon performance of the students in the jobs.

Objective 2.0

Factors which contribute to the satisfaction of students, employers and schools personnel with off-campus career training are described in detail in the enclosed evaluation reports. A summary of factors identified by employers as beneficial to the company or agency follows:

- Students helped release regular employers from basic work tasks.
- Contact with the schools.
- Helping to update school curriculum.
- Helping to refine and validate training methods.
- Project is a source of temporary or part-time labor.

- Providing service to community and students.

Suggestions offered by students on ways to improve the program are listed below:

- Assignments should be more challenging (17 S's).
- Tasks should be more varied (14 S's).
- Have an opportunity to observe a wide-range of vocations (14 S's).
- More social communication with workers (10 S's).
- Receive pay (9 S's).
- Have more time at work (8 S's).
- More social communication with supervisor (5 S's).

Objective 3.0

Because of the diversity of skill training positions, it was impossible to estimate the cost to the employer implementing this project. Employers donated approximately 2 hours per week of one person's working time for planning, training and evaluation of students. The average contract extended for a six week period making a total of 12 hours per company or agency. Fixed charges for space and materials could be added to the cost of the trainer's time in order to estimate training costs within each skill area. Costs will differ for every company and job.

Cost estimates are available for school coordination. To recruit new sites for one school schedule and match 30 students, visit each site once and collect evaluation data requires approximately 200 hours of a school coordinator's time. At $10.00 per hour (includes fixed charges) the minimum total is $2,000 per school to initiate the program for a class of 30 students, each of whom receives training in a unique skill. Transportation costs of the coordinator and students should be provided which would add another $250 or more.

Objective 4.0

This field test of a wide variety of off-campus career training experiences has provided sufficient data to describe procedures necessary for large-scale implementation of similar programs throughout the District.

Methods of Granting Credit and Certification (Objective 4.1)

Career Experiences which are developed as an experiential component of courses in the high school, students should be granted course credit and Demonstrated Performance Skill Credit based upon the number of hours in training. The institution of a sliding scale of DPS credit is important for several reasons. First, students and employers were most satisfied when training revolved around practicing tasks which significantly contributed to the output of the company or agency. When students performed tasks which would otherwise be assigned to regular employees, they were viewed as responsible contributors to the company. Yet, students should not be expected to enthusiastically take on responsible work without pay unless DPS credit can be granted for their efforts. Second, the amount of time required to train students to competency varies for each job, and to some extent it varies by work environment. For example, careers related to Health and Welfare required approximately 100 hours of training time. Training for careers in other fields required half as much time. Third, almost all of the students who completed their assignments missed no class time at school. This means that they received training during the hours they would be taking electives or on their own time. While few complained about this situation, remuneration should be given for the extra time spent. This is particularly important if the training experiences were to be lengthened as suggested by virtually all of the participants.

Certification that students have in fact acquired specific job skills will be best accomplished by employer evaluation or examination. Even with

a sample of 58 students it was impossible for school coordinators to visit the training sites often enough or to simulate the variety of job performance situations so that students could be certified on their career competency.

Legal and Insurance Considerations (Objective 4.2)

The student permit and campus extension site contract forms were drafted by the advisory subcommittee into a Permit/Agreement. The Los Angeles County Counsel, district legal advisor and Contract Section of the School District were consulted for legal advice.

A statement on Worker's Compensation was purposefully written into the agreement as an incentive to employers. Under California State Law (AB 2937) Worker's Compensation is automatically provided for all District students participating in non-paid work activities coordinated with the school program. Liability rests with the negligible party. Statements regarding liability are inserted to encourage all participants to consider risks and responsibilities.

A second statement was added on the advice of the Advisory Committee member representing labor. This statement assured that students would not replace any employees.

Agreements are designed to permit local school coordinators to request approval of the extension site from Safety and Real Estate Sections of the School District. At the same time, approval from a central office for a number of individual placement is burdensome paperwork and unnecessary in modern office situations. Where approval from these departments is perfunctory, site evaluation for safety could be handled by school coordinators and forms could be filed in school and/or area offices. Approval by the Board of Education is required for work sites to be used by students.

Incentives for Participants (Objective 4.3)

For employers, the significant incentives for participation were 1) that students helped to accomplish tasks which regular employees could not complete; and (2) public relations which improve contact with the schools. To support continuous participation by employers, site recruiters should identify organizations where staff are overworked and students could make a significant contribution to their efforts. In addition, a continuous media campaign should be waged in the local school community to inform the public about the participation of companies and agencies in career training programs. To adequately provide off-campus training on a large scale, additional incentives would need to be provided. Lease agreements could be arranged with employers for long-term training; however, costs for such a plan on a district-wide basis would be relatively high. Tax credit could be authorized by the State of California for those businesses, agencies or organizations which perform according to predetermined criteria for career development experiences for secondary students. Recommended procedures are as follows:

1) School districts shall identify the criteria for acceptable DPS's. The announcement may be via a RFP procedure and/or normal contractual bidding procedures.
2) Participating entities shall submit a summary of their DPS opportunities to participating school districts.
3) Business entities shall participate with those school districts in which they operate.
4) School district must provide written authority for any participation by neighboring school districts.
5) School districts shall be required to provide written authority to confirm performance by any participating entities. This

written confirmation shall be required for any participating entity to receive a tax credit.

6) Disputes concerning successful performance should be ajudicated by an Ad Hoc jury of business/industry and educational representatives as established by the County Superintendent's Office in which the dispute exist.

For students, the opportunities for personal development and learning a specific job skill were important incentives for participation. Most students felt that pay was not necessary, but it would be desirable. Providing an opportunity to advance to summer work or part-time work was something which interested almost all students.

Training Positions and Time Constraints (Objective 4.4)

Descriptions of the types of training positions which can be made available for students are presented in Attachment A. The estimated hours required for training are presented in the procedures data. Employer responses suggest that all of the estimates are slightly low and training schedules should be extended.

Alternative Schedules (Objective 4.5)

Almost all of the employers indicated that they would like to have students spend more time than two hours in any one day of training. Half-day and full day training schedules were preferred; therefore, schools with flexible schedules provide the most suitable environment for implementation. Students should be able to receive credit for evening and Saturday training since a few jobs require participation at these times.

Integrating Career Training with the Instructional Program (Objective 4.6)

This objective was not successfully accomplished. School coordinators suggested that (1) career training be started at the beginning of the school year; and (2) department chairpersons and guidance counselors be responsible

for planning the integration of courses with academic classes. It was suggested that special courses within each department be developed. Students would spend at least one day on-campus discussing the career area and receiving guidance from teachers.

ATTACHMENT B

CAREER CLUSTER: Agriculture and Animal Husbandry*

CAREER TITLE: Animal Caretaker

DOT NO: 419.884

DPS(s):

Feeds, waters, and cleans quarters of domestic animals at science center:

- Observes and reports sick animals.
- Assists in treating minor injuries or ailments.
- Prepares food, and may order necessary supplies.
- Transfers animals from one pen to another; may exercise animals.
- May answer questions of visitors and students concerning animals.
- May assist with maintenance of animals and instructional supplies of zoo mobiles.
- Keeps records.

*PETTIGREW SCIENCE CENTER

CAREER CLUSTER: Agriculture and Animal Husbandry*

CAREER TITLE: Inventory Control Clerk

DOT NO: 223.388

DPS(s):

Compiles records of amount, kind, and value of merchandise, materials, or stock on hand in establishment or department of establishment:

- Counts material on hand and posts totals to inventory records.
- Computes figures from shipping, production or stock records to obtain current theoretical inventory of science equipment and instructional kits.
- Identifies materials needed for science kits and assists in the requisitioning.
- Stores, packages and prepares science materials for shipping.
- May develop and organize materials for science instructional kits.

*PETTIGREW SCIENCE CENTER

CAREER CLUSTER: Agriculture and Animal Husbandry*

CAREER TITLE: Veterinary Assistant

DOT NO: 356.874

DPS(s):

Under supervision, cares for animals under treatment in clinic for disease, injury, or for production of serums:

- Leads, wheels, or carries animal from quarters to treatment room.
- Lifts animal onto treatment table and applies restraints or holds it during treatment.
- Sterilizes surgical instruments and other equipment, such as rubber gloves, syringes, and test tubes, using germicides and autoclave.
- Administers anesthetic, medications, and prescribed nursing care, under direction of VETERINARIAN.
- Measures, mixes, grinds, and chops specified ingredients to prepare food, and feeds animals.
- Bathes and brushes animals and clips their hair and nails.
- Sweeps, dusts, mops, and hoses hospital rooms and animal quarters.
- May receive clients, answer telephone, make appointments, and accept payment on accounts.

*CHATOAK PET CLINIC

CAREER CLUSTER: Communication*

CAREER TITLE: Public Relations/Advertising Assistant

DOT NO: 165.068

DPS(s):

Under supervision, prepares brochure and "background materials" to present a positive image of Los Angeles to potential vacationers and association executives:

- Develops research methods.
- Prepares outlines of the project.
- Maintains phone and letter solicitation of materials for the project.
- Prepares readable materials which motivates and informs.

*LOS ANGELES CONVENTION BUREAU

CAREER CLUSTER: Communication*

CAREER TITLE: Public Relations Assistant/Copywriter

DOT NO: 165.068

DPS(s):

Under supervision, will assist in:

- Writing material.
- Photography.
- Answering telephones.
- Typing.
- News coverage.
- Script writing for CCTV

*PACIFIC TELEPHONE

CAREER CLUSTER: Construction*

CAREER TITLE: Architectural Drafter

DOT NO: 355.878

DPS(s):

Plans artistic architectural and structural features of any class of buildings and like structures:

- Sketches designs and details, using drawing instruments.
- Makes engineering computations involved in the strength of materials, beams, and trusses.
- Estimates quantities needed for project and computes cost.
- Makes freehand drawings of proposed structure when necessary to clarify plans.
- Draw architectural plans according to scale when given a detail.
- Traces architectural plans to company specifications.
- Sets up titles and demonstrates satisfactory lettering skills.
- Demonstrates comprehension of working drawings.

*DANIEL, MANN, JOHNSON & MENDENHALL

CAREER CLUSTER: Construction*

CAREER TITLE: Editorial Assistant

DOT NO: 132.038

DPS(s):

Participation in editorial activities related to government reports:

- Edits parts of reports that include fiscal data and pertinent physical data.
- Checks material in reports for extraneous material, clarity of expression, completeness, conciseness, correct grammatical usage, spelling, punctuation, logical arrangement, correctness of form and layout, and proper degree of emphasis on individual subjects in proportion to their relative importance.
- Checks tables, plates, and graphs for consistency with text.
- Checks all formats, including table of contents, paragraph numbers, and various details required by authoritative guides.
- Rewrites paragraphs on parts of reports, edits or sets up tables that are in conformity with standards.
- Performs other duties as assigned.

*U.S. ARMY ENGINEER DISTRICT

CAREER CLUSTER: Construction*

CAREER TITLE: Engineering Assistant

DOT NO: 7.191

DPS(s):

- Drafts detailed drawings and completes lettering on layouts.
- Operates computer and inputs data.
- Operates blueprint and reproduction machines.
- Picks-up and delivers materials.
- Keeps catalog files in order.

*DICKERSON/GLADSTONE ASSOCIATES

CAREER CLUSTER: Construction*

CAREER TITLE: Sealer, Sander, Cabinet Assembler

DOT NO: 769.887

DPS(s):

Performs any combination of the following duties to facilitate cutting, inspecting, finishing, storing, cleaning, and shipping wood products:

- Sealing and sanding in the wood finishing department.
- Putting together stero speaker enclosures.
- Installing speakers in cabinets.
- Soldering electronic wires.

*PROFILE PRODUCTS, INC.

CAREER CLUSTER: Education*

CAREER TITLE: Biological Aid

DOT NO: 049.384

DPS(s):

Under supervision, aids research workers to carry out experiments in bacteriology, plant pathology, mycology, and other agricultural and biological sciences, performing routine tests and experiments concerned with greenhouses, experimental plots, hives of bees, and experimental equipment.

*CAL STATE UNIVERSITY, NORTHRIDGE

CAREER CLUSTER: Education*

CAREER TITLE: Elementary Special Education Aide

DOT NO:

DPS(s):

Under supervision, will assist in working with aphasic children:

- Developing oral language drills.
- Giving individual help to aphasic children in academic, social, and phsycial areas.
- Will assist in the preparation of audio-visual aids.

*DANUBE AVENUE SCHOOL

CAREER CLUSTER: Education*

CAREER TITLE: Graphic Arts Department Assistant

DOT NO: 141.081

DPS(s):

Under supervision, will draw and paint illustrations for advertisements, books, magazines, posters, billboards, and catalogs:

- Will study design layout or proposed sketch, and select technique, such as pen and ink, watercolor, pastels, scratchboard, tempera, or oils, best suited to produce desired visual effect and to conform with printing method specified.

- Will execute design, using selected technique and rendering details from memory, live models, manufactured products, or reference materials.

*CAL STATE UNIVERSITY, NORTHRIDGE

CAREER CLUSTER: Education*

CAREER TITLE: High School Special Education Aide

DOT NO:

DPS(s):

- Assists with the teaching or ceramics (or reading skills).
- Prepares lessons and gathers materials necessary for instruction.
- Helps with the care of handicapped students including feeding and lifting, as well as pushing wheel chairs.
- Helps handicapped students with toilet skills.

*MILLER HIGH SCHOOL

CAREER CLUSTER: Education*

CAREER TITLE: Photgraphic Laboratory Assistant

DOT NO:

DPS(s):

Under supervision, will work in a photographic laboratory as assistant and will learn the skilled crafts involved in this field.

*CAL STATE UNIVERSITY, NORTHRIDGE

CAREER CLUSTER: Education*

CAREER TITLE: Preschool Special Education Aide

DOT NO:

DPS(s):

- Assist in the instruction of motor development language skills, perceptual training and self-awareness activities.
- Relate to very young children (chronological age 3-6 but developmentally 18 months to 4 years of age).
- Communicate with children who have little or no speech.
- Use perceptual training equipment.

*LOKRANTZ ELEMENTARY SCHOOL

CAREER CLUSTER: Government*

CAREER TITLE: Architectural Drafting Assistant

DOT NO: 355.878

DPS(s):

The student will acquire the following Demonstrated Performance Skill(s) at the campus extension site:

- Completes space layouts for offices.
- Revises construction drawings.
- Completes design work on facility for Phoenix Airport.
- Performs lettering tasks.
- Completes layout sketches of buildings, measurement of space, etc.
- Illustrates desk and counter designs.
- Illustrates with pen and ink for instructions on embedding customs officer's badges in lucite.
- Draws overlay for office space rearrangements.

*U.S. CUSTOMS BUREAU

CAREER CLUSTER: Government*

CAREER TITLE: Budget Analyst/Training Program Research Assistant

DOT NO:

DPS(s):

- Coordinates with budget officer; surveys costs of training operations for this year.
- Analyzes budget information such as travel and per diem costs, In-House training expenses, job-related courses taken by employees, tuition expenses, etc.
- Estimates future costs and prepares next year's training budget.
- Conducted evaluation of secretarial and clerical training course.
- Complete evaluation report with suggestions for revisions.
- Outline book on Communications as first stage for planning of training program design.

*U.S. CUSTOMS BUREAU

CAREER CLUSTER: Government*

CAREER TITLE: Personnel Clerk

DOT NO: 205.368

DPS(s):

Compiles and files personnel records:

- Records data for each employee (e.g. address, weekly earnings, absences, amount of sales or production, supervisory reports on ability, date of and reason for termination.
- (May) operate calculating machine.
- (May) administer and score aptitude, personality and interest tests.
- (May) fill out and explain bonding application required by company.
- Performs typing duties.
- Will have public contact experience.
- Will use telephone as part of contact experience.
- Legible writing would be preferable.

*INTERNAL REVENUE SERVICE

CAREER CLUSTER: Health and Welfare*

CAREER TITLE: Dental Assistant

DOT NO: 79.378

DPS(s):

- Obtains and records patient's personal information and medical history and records dental treatment rendered.
